Repeater Station.—A fixed station established for the automatic retransmission of radiocommunications received from one or more mobile stations and directed to a specific location.

1.a. *New or Additional Facility Authorizations, Assignments and Trasnfers* (per transmitter/per station).—Initial authorization to construct and operate common carrier land mobile stations and their associated bases stations; approval of major modifications to an authorized facility and consent to assign or transfer control a station authorization.

1.b. *Renewals and Minor Modifications* (per station).—Renewal of an initial authorization and minor modifications effected on authorized facilities.

1.c. *Air-Ground Individual License Renewals and Modifications.*—Application for license, renewal or modification for airborne mobile stations for subscribers to a common carrier service for public correspondence.

2. *Cellular Systems.*—A mobile radio system with a high capacity to service subscriber units due to the coordinated reuse of a group of radio channels. A system in which the assigned spectrum is divided into discrete channels which are assigned in groups to geographic cells covering a cellular geographic service area.

2.a. *Initial Construction Permits & Major Modification Applications* (per cellular system).—Self-explanatory

2.b. *Assignments and Transfers* (per station).—Self-explanatory

2.c. *Initial Covering License* (per cellular system).—Initial authorization to operate a cellular system.

2.d. *Renewals.*—Self-explanatory

2.e. *Minor Modifications and Additional Licenses.*—A minor modification effected on an authorized facility Application notifying of additional sites or completion of contruction of original sites for which license to cover not yet filed, requiring additional licenses.

3. *Rural Radio (Central Office, Interoffice or Relay Facilities.*—A domestic public radio service rendered by fixed stations on frequencies below 1000 MHz used to provide (1) public message communication service between a central office and subscribes located in rural areas to which it is impracticable to extend service between landlines, or (2) public message communication service between landline central offices and different exchange areas which it is impracticable to interconnect by other means, or (3) private line telephone, telegraph, or facsimile service between 2 or more points to which it is impracticable to extend service via landline.

3.a. *Initial Construction Permits, Assignments and Transfers* (per transmitter)..—Self-explanatory

3.b. *Renewals and Modifications* (per station).—Self-explanatory

4. *Offshore Radio Service.*—A public communications service for hire betwen stations located in the offshore coastal waters of the United States and its possessions.

4.a. *Initial Construction Permits, Assignments and Transfers* (per transmitter).—Self-explanatory

4.b. *Renewals and Modifications* (per station).—Self-explanatory

5. *Local Television or Point-to-Point Microwave Radio Service.*—

Local Television.—Radio communications service for the transmission of television material and related communications.

Point-to-Point Microwave.—A service rendered on microwave frequencies by fixed stations between points which lie within the United States or between points to its possessions, or to points in Canada and Mexico.

5.a. *Construction Permits, Modification of Construction Permits, and Renewals of License.*—Self-explanatory.

5.b. *Assignments and Transfers of Authorizations.*—Self-explanatory.

5.c. *Initial License for New Fequency.*—Self-explanatory.

6. *International Fixed Public Radio (Public & Control Stations).*—

Public Stations.—Stations which are open to public correspondence and which, in general, are intended to provide radiocommunications between any one of the contiguous 48 states, Alaska, Hawaii or any U.S. possession in connection with the relaying of international traffic between stations.

Control Stations.—Stations whose transmissions are used to control automatically the emissions of operations of another radio station at a specified location, or to transmit automatically to an alarm center telemetering information relative to the operation of such station.

6.a. *Initial Construction Permits, Assignments & Transfers.*—Self-explanatory.

6.b. *Renewals and Modifications.*—Self-explanatory.

7. *Satellite Services.*—A service that provides access to any authorized satellite for communications purposes.

7.a. *Transmit Earth Stations.*—Antennas and associated transmitting and receiving equipment which gives access to a communications satellite.

(1) *Initial Station Authorization.*—Authority to construct and/or operate a transmitting earth station for regular private or common carrier communications services or for telemetry, tracking and command functions.

(2) *Assignments and Transfers of Authorization.*—Self-explanatory.

(3) *All Other Applications.*—Any other application for regular or temporary authorization, including but not limited to, modification or renewal of station authorization, temporary authorizations or waivers.

7.b. *Small Transmit/Receive Stations.*—Small antennas (two meters or less) and associated transmitting and receiving equipment which gives access to a communications satellite.

(1) *Lead Station Authorization.*—Authority to construct and/or operate a small transmit/receive earth station for regular private or common carrier communication services. A Lead Authorization is the first earth station authorization in a network of user earth stations. The Lead Authorization establishes the terms and conditions under which routine authorizations may be granted.

(2) *Routine Stations Authorization.*—Authority to construct and/or operate a small transmit and/or receive earth station for regular private or common carrier communications services under the terms and conditions of a Lead Autorization. An application for a rountine authorization must identify the Lead Authorization to which it is associated.

(3) *All Other Applications.*—Any other application for regular or temporary authorization, including but not limited to, modification or renewal of station authorizations, temporary authorizations or waivers, and transfers and assignments.

7.c. *Received Only Earth Stations.*—Stations licensed to only receive transmissions from communications satellites.

(1) *Initial Station Authorization.*—Stations licensed to only receive transmissions from communications satellites.

(2) *All Other Applications.*—Any other application or regular or temporary authorization, including but not limited to, modification or renewal of station authorizations, temporary authorizations or waivers, and transfers and assignments.

7.d. *Applications for Authority to Construct a Space Station.*—Self-explanatory.

7.e. *Application for Authority to Launch and Operate a Space Station.*—Authorization to launch a space station and assignment of an orbital location at which the space station is to be operated.

7.f. *Satellite Systems Application.*—All antennas and associate transmit and receive equipment required to operate a single satellite communications system which generally includes a main Transmit Earth Station and many Small Transmit/Receive earth stations. The application is processed as a total and complete system in bands where frequency coordination is not required for each station site.

(1) *Initial Station Authorization.*—Authority to construct and/or operate a satellite system for regular private or common carrier communications services.

(2) *Assignments and Transfers of System Authorizations.*—Self-explanatory.

(3) *All Other Applications.*—Any other application for regular or temporary authorization, including but not limited to, modifications or renewal of station authorizations, temporary authorizations or waivers, and transfers and assignments.

8. *Multipoint Distribution Service.*—One way domestic public radio service rendered on microwave frequencies from a fixed station transmitting (usually in a omnidirectional pattern) to multiple receiving facilities located at fixed points determined by the subscribers.

8.a. *Construction Permits, Renewals and Modifications of Construction Permits.*—Self-explanatory.

8.b. *Assignments and Transfers of Control* (per station).—Self-explanatory.

8.c. *Initial License (first license or a license adding a new frequency).*—Self-explanatory.

9. *Section 214 Applications.*—All circuits (channels) installed or acquired and required to be reported pursuant to Sections 63.03(e), 63.04(e) and 63.07(b) of the Commission's rules.

9.a. *Overseas Cable Construction Permits.*—Authorization to lay a new cable or cables.

9.b. *Domestic Cable Construction Permits.*—Authorization to lay a new cable or cables.

9.c. *All other 214 Applications.*—Authorization to intall or acquire a 4 kHz or 24 Kb/s channels for domestic use. Any Domestic broad band channel is considered, for free purposes, a single 4 kHz frequency. All international 214 applications other than cable construction permits.

10. *Tariff Filings.*—Published charges or regulations for one or more, but not all carriers applicable to communication service between points of a system which is subject to any provision of the Communications Act of 1934 and which participates or engages in such communications service, irrespective of whether it is a terminal or intermediate carrier.

10.a. *Filing Fee.*—A filing is a Letter of Transmittal with accompanying tariff supplement, revised page(s), additional page(s), concurrence(s), notice of revocation, adoption notice or any other schedule(s) of rates or regulations filed in accordance with Part 61 of the Commission's rules.

10.b. *Special Permission Filing.*—An application to waive any portion of Part 61 of the Commission's rules.

11. *Telephone Equipment Registration.*—Registration of equipment filed pursuant to Part 68 of the rules. (Terminal equipment and protective circuitry.)

12. *Digital Electronic Message Service.*—A two-way domestic end-to-end fixed radio service utilizing Digital Termination Systems for the exchange of digital information.

12.a. *Contruction Permits, Renewals and Modifications of Construction Permits.*—Self-explanatory.

12.b. *Assignments and Transfers of Control* (per station).—Self-explanatory.

12.c. *Initial License (first license of license adding a new frequency).*—Self-explanatory.

The FCC has previously maintained fee schedules under the general authority granted to the head of each federal agency (see section 9701 of title 31 U.S. Code). However, in 1976, the U.S. Court of Appeals (D.C. Circuit) ruled that the Commission had exceeded its authority under those provisions of law and struck down the fee schedule which was then in place (NAB v. FCC 554 F2d 1118). Since that time the FCC has not attempted to reinstitute a schedule of fees. It is the intent and understanding of Congress that the subsequent enactment of specific fee authority for meeting the actual cost of handling transactions before the FCC will supercede any authority the FCC would otherwise have under section 9701 of title 31 to impose additional fees over and above those provided for under this reconciliation Act.

Cross-Ownership Rule Waivers

The conferees are concerned with Commission enforcement of the local cross-ownership rules particularly in light of the number of recent waiver requests to these rules the Commission has considered. The Commission's purpose in granting any waiver to the cross-ownership rules should be to further the public interest; furtherance of the private interest of any applicant or licensee must be subservient to this purpose.

The conferees expect the Commission to review such requests with great scrutiny and not grant a waiver unless the applicant meets the burden of clearly demonstrating why such a waiver should be granted. Any temporary waiver granted should be limited in duration to the minimum amount of time necessary.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 13, 1985.

Hon. JOHN D. DINGELL,
Chairman, Committee on Energy and Commerce, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached estimate of the budget impact of the reconciliation provisions within the jurisdiction of subconference 8. As requested by your staff, Table 1 reflects the budget impact of the provisions assuming an October 1, 1985 date of enactment. As requested by the Budget Committee, the estimates in Table 2 assume a December 31, 1985 date of enactment.

If you wish further details on these estimates we will be pleased to provide them.

With best wishes,

Sincerely,

JAMES BLUM
(For Rudolph G. Penner).

ESTIMATED BUDGET IMPACT OF RECONCILIATION PROVISIONS—SUBCONFERENCE 8

TABLE 1.—CHANGE FROM RESOLUTION BASELINE [1]

[By fiscal year, in millions of dollars]

	1986	1987	1988	Total 1986–88
Direct spending: Receipts from FCC services and land sale				
Budget authority		−30.0	−36.0	−66.0
Outlays		−30.0	−36.0	−66.0
Authorizations:				
FCC:				
Budget authority	0.9	−.8	[2] −.8	−.7
Outlays	.9	−.8	−.7	−.7
CPB:				
Budget authority	−1.0	2.0	11.0	12.0
Outlays	−.1	−.5	7.4	6.8
Total:				
Budget authority	−0.1	−28.8	−25.8	−54.7
Outlays	.8	−31.3	−29.3	−59.9

[1] Assumes October 1, 1985 date of enactment.
[2] Assumes authorization of the FCC at the 1987 authorization level, adjusted for inflation.

ESTIMATED BUDGET IMPACT OF RECONCILIATION PROVISIONS—SUBCONFERENCE 8

TABLE 2.—CHANGE FROM RESOLUTION BASELINE [1]

[By fiscal year, in millions of dollars]

	1986	1987	1988	Total 1986–88
Direct spending: Receipts from FCC services and land sale:				
Budget authority		−22.5	−36.0	−58.5
Outlays		−22.5	−36.0	−58.5
Authorizations:

Outlays	.8	−23.8	−29.3	−52.4

[1] Assumes December 31, 1985 date of enactment.
[2] Assumes authorization of the FCC at the 1987 authorization level, adjusted for inflation.

TITLE VI—WATER TRANSPORTATION PROGRAMS

SUBTITLE A—BOATING SAFETY FUND

The House bill contained a provision to transfer certain funds from the Boating Safety Account to the General Fund of the Treasury. The Senate receded to the House provision.

SUBTITLE B—NOAA CHARTS

Both House and Senate versions contained provisions authorizing the Secretary of Commerce to raise the price of nautical and aeronautical products. The House receded to the Senate with amendments.

The first amendment requires the Secretary to consult with the Secretary of Transportation concerning impacts on aviation and maritime safety before submitting required reports to the Congress and before any adjustments in prices are made.

The second amendment prohibits the Secretary from raising the price of nautical and aeronautical products in order to recover the costs of data acquisition and processing.

The third amendment defines nautical and aeronautical products.

SUBTITLE C—FOREIGN FISHING PERMIT FEES

The House bill included a provision that would amend section 204(b)(10) of the Magnuson Fishery Conservation and Management Act (MFCMA) (16 U.S.C. 1824(b)). The House would have stricken the terms "and the territorial waters of the United States" in section 204 of the MFCMA thereby altering the formula by which MFCMA costs are assigned. The effect of this change would be to increase the proportion of the costs of implementing the MFCMA allocated to foreign fishing nations. Under current law, the fees, once collected, are deposited in the Fisheries Loan Fund established under section 4 of the Fish and Wildlife Act of 1956 (16 U.S.C. 742(c)). The House bill also provided that any increase in fees collected through the new formula, over and above what would have been collected via the old formula, would be deposited in the General Fund of the United States Treasury. The Senate bill had no comparable provision.

The Senate receded to the House with amendments, which authorize the Secretary of Commerce to raise foreign fishing fees by instituting the new formula if the Secretary, in consultation with the Secretary of State, finds that any foreign nation receiving an allocation under section 201(e) of the MFCMA is: (1) harvesting anadromous species of United States origin at a level that is unacceptable to the Secretary; or (2) failing to take sufficient actions to benefit conservation and development of United States fisheries.

Under the new formula, fees that would apply if either of the above conditions are not met would be at least in an amount sufficient to return to the United States an amount which bears to the total cost of carrying out the provisions of this title during that fiscal year the same ratio as the aggregate quantity of fish harvested by foreign fishing vessels within the fishery conservation zone during the preceding year bears to the aggregate quantity of fish harvested by both foreign and domestic fishing vessels within such zone during the preceding year. Application of this new formula could be waived at any time during the year if the Secretary, in consultation with the Secretary of State, finds that remedial actions are taken by such foreign nations.

The Secretary, in consultation with the Secretary of State, would be required in each year to make a determination of the performance of foreign nations receiving an allocation and to report to the Congress on those determinations and the reasons therefor.

Any amount collected over and above what would have been collected under the existing fee formula would be deposited in the General Fund of the United States Treasury.

The Conferees wish to clarify that the term "harvesting anadromous species" means the catching and retention of such anadromous species for economic benefit and not situations where, in the course of fishing for other species, anadromous species are caught incidentially and discarded.

SUBTITLE D—OCEAN AND COASTAL RESOURCES MANAGEMENT AND DEVELOPMENT BLOCK GRANT ACT

The House bill included provisions to provide, subject to appropriations, annual block grants to coastal states from a fund consisting of a portion of annual, federal Outer Continental Shelf (OCS) receipts. Similar legislation has passed the House on several occasions (see H. Rpt. 99-300). The Senate bill contained no similar provision. The Senate receded to the House with amendments.

Section 6032(b)(1) was amended to specify that an amount equal to twenty percent of the amount, if any, by which the total OCS revenues during the previous fiscal year exceeded $5 billion shall be deposited annually into the fund. In addition, the fund is capped so that it may not contain more than $150 million at any time during fiscal year 1988, nor more than $300 million during fiscal year 1989. The cap on the fund increases by five percent per year thereafter.

The second amendment provides for the deduction from block grants of a proportion of the funds received by the state pursuant to the Coastal Zone Management Act and the Outer Continental Shelf Lands Act prior to the award of block grants. Funds not awarded as a result of these deductions are to be paid into the General Fund as miscellaneous receipts.

SUBTITLE E—AMENDMENTS TO THE COASTAL ZONE MANAGEMENT ACT

The House bill contained a slightly modified version of H.R. 2121, a bill to reauthorize and amend the Coastal Zone Management Act (CZMA). The Senate bill contained no similar provision. The Senate receded to the House with amendments.

In Section 6043(b), the expression of the federal-state grant provisions under Sections 306 and 306A of the CZMA is changed from a percentage to a ratio. The amendment clarifies that federal funds are to be provided on a matching basis without reference to the total costs for implementing any state program.

Section 6043(c) amends section 306(g) of the CZMA. The amendment requires states to promptly notify the Secretary of any proposed amendments, modifications or other program changes to their federally approved programs. It establishes deadlines for Secretarial review of proposed amendments. In addition, it stipulates that a state may not implement any proposed amendment as part of its approved program until after the amendment has been approved by the Secretary.

The Conferees note that a proposed amendment is not a part of a state's federally approved program until that amendment has received Secretarial approval. Since federal assistance under Section 306 is provided for implementation of approved programs, no federal funds may be utilized for implementation of a proposed amendment until it has been so approved.

Section 6044(g) requires certain information regarding implementation of Section 315 of the CZMA be included in the biennial report required under Section 316 of the CZMA.

The Conferees have agreed upon amendments to Section 315 of the CZMA which would, among other things, require redesignation of all existing national estuarine sanctuaries as national estuarine reserves. The Conferees do not intend that NOAA immediately require that educational and informational materials be modified to effect a redesignation if doing so would impair public recognition and acceptance of any existing sanctuary or impose undue administrative and economic burdens.

Finally, authorization figures for fiscal year 1986 have been added in Section 6046.

SUBTITLE F—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION [NOAA]

The Senate bill incorporates the text of S. 990, the NOAA Ocean and Coastal Programs Authorizations. S. 990 was passed with amendments by the Senate on June 19, 1985, and its provisions are discussed in S. Rpt. 99-72. The House receded to the Senate with amendments.

In Section 6051, fiscal year 1986 authorizations were amended to correspond to fiscal year 1986 appropriations levels. These authorizations are increased by 4.5 percent in fiscal year 1987, consistent with the approach taken by S.990.

The final text also includes amendments to Title II of the Marine Protection, Research, and Sanctuaries Act and additional amendments to the National Ocean Pollution Planning Act set forth in Subtitles G and H.

Finally, the Senate bill included a two-year reauthorization for the National Advisory Committee on Oceans and Atmosphere (NACOA). The Conferees agreed to a one-year reauthorization at fiscal year 1986 appropriation levels, recognizing that a decision on authorizations for fiscal year 1987 and beyond should be deferred pending further consideration of the role of NACOA and the establishment of a National Ocean Policy Commission.

SUBTITLE G—THE MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT AMENDMENTS

The Senate bill contained a two-year reauthorization of Title II of the Marine Protection, Research, and Sanctuaries Act in S. 990. The final text contains a two-year reauthorization with additional amendments which were contained in H.R. 2958. For further discussion of these amendments see H. Rpt. 99-101, Part I and H. Rpt. 98-135, Part I.

SUBTITLE H—NATIONAL OCEAN POLLUTION PLANNING ACT AMENDMENTS

The Senate bill included a two-year reauthorization of NOPPA which had been incorporated into S. 990. The final text contains a two-year reauthorization with additional amendments which were contained in H.R. 1958. For further discussion of these amendments see H. Rpt. 99-101, Part II.

SUBTITLE I—WEATHER MODIFICATION

Section 6081 authorizes, for the fiscal years 1986 through 1988, NOAA's program for reporting on all public and private weather modification activities. A similar provision was included in S. 1103 (S. Rept. 99-75), which passed the Senate June 18, 1985.

Section 6082 directs the Administrator of NOAA to assure the future availability and usefulness of ocean satellite data to the maritime community. In adopting this provision, the Conferees' primary aim was to encourage NOAA to take full advantage of future ocean satellite missions flown by sister agencies, thereby facilitating the use of data and information from such missions by the maritime community. For example, the Navy intends to launch the $300 million Navy Remote Ocean Sensing System (NROSS) in 1990. For an additional modest investment, NOAA could and should establish a system for disseminating real-time NROSS data to the civilian community.

Section 6083 requires the Administrator to report to the appropriate Congressional Committees and to provide full justification before contracting any activity to the private sector pursuant to OMB Circular Memorandum A-76. The 30-day stay of the A-76 process constitutes an appropriate balance between providing an adequate opportunity for Congress to consider and act upon A-76 proposals and ensuring that desirable management efficiencies are achieved without undue delay. A provision similar to Section 6083 was included in S. 1103 (S. Rpt. 99-75), which passed the Senate June 18, 1985.

Section 6084 authorizes, for the fiscal years 1986 and 1987, the activities of the National Climate Program Office. A provision analogous to Section 6084 was included in S. 1103 (S. Rept. 99-75), which passed the Senate June 18, 1985. The key provision in section 6084 is the statutory establishment of the Climate Program Policy Board, which functions as a "Board of directors" for the Program and is responsible for long-range planning and presentation of budgetary recommendations to OMB. The Conferees' intent in enacting section 6084 is well explained in H. Rpt. 98-135 (Part I)

Section 6085 redesignates section 5 of the Coast and Geodetic Survey Act as section 5(1), and amends that section to clarify that it authorizes the Administrator to enter into cooperative agreements with other Federal agencies for joint surveys and investigations. Questions have been raised as to whether section 5(1), as redesignated, applies to agreements among Federal agencies, as well as agreements between the Secretary and other public and private organizations, such as state mapping agencies. The amendment to section 5(1) is intended to clarify that the section does authorize the Secretary to enter into cooperative agreements with other Federal agencies.

Section 6085 also adds a new paragraph (2) to section 5 that explicitly authorizes the Secretary to establish the terms of agreements entered into pursuant to this section, including the terms of reimbursements to the Administration, that reflect the amount of benefits derived by the Administration from the agreement.

SUBTITLE J—MARITIME AUTHORIZATIONS

The Senate bill contained provisions of S. 679 which was passed by the Senate on June 5, 1985 (see Senate Rpt. 99-64). The House bill contained no similar provisions. The House receded to the Senate with an amendment to strike the last subsection.

Construction Differential Subsidy

The Senate bill contained a provision citing those provisions of the Merchant Marine Act, 1936, which authorize repayment to the Federal Government of construction-differential subsidy (CDS) grants with interest. The House bill contained no similar provision. The Senate receded to the House, agreeing to delete the provision as unnecessary.

The Maritime Administration has promulgated a final rule (50 Fed. Reg. 19170-78, May 7, 1985) to allow vessel owners or operators to repay CDS grants with interest, as authorized by the Merchant Marine Act, 1936. This administration action obviates the need for legislative action to achieve the desired savings estimated by CBO at $200 million in fiscal year 1986.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 18, 1985.

Hon. WALTER B. JONES,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached estimate of the budget impact of the reconciliation provisions within the jurisdiction of subconference 9.

If you wish further details on these estimates, we will be pleased to provide them.

With best wishes,

Sincerely,

RUDOLPH G. PENNER.

ESTIMATED BUDGET IMPACT OF RECONCILIATION PROVISIONS—SUBCONFERENCE 9, CHANGE FROM RESOLUTION BASELINE

[By fiscal year, in millions of dollars]

	1986	1987	1988	Total 1986–88
Direct spending: Boat safety:				
Budget authority	−15			−15
Outlays	−6	−5	−3	−14
Authorizations:				
Coastal block grants:				
Budget authority			150	150
Outlays			50	50
National Oceanic and Atmospheric Administration:				
Budget authority	−51	−59	[1] −64	[1] −174
Outlays	−42	−59	−63	−164
Maritime Administration:				
Budget authority	−10	[2] −10	[2] −10	[2] −30
Outlays	−8	−10	−10	−28
Total:				
Budget authority	−76	−69	76	−69
Outlays	−56	−74	−26	−156

[1] Assumes a 1988 authorization for NOAA programs at the 1987 authorization levels, adjusted for inflation at the rate projected in the budget resolution baseline.

[2] Assumes authorization of the maritime programs for 1987 and 1988 at the 1986 authorization levels, adjusted for inflation at the rate projected in the budget resolution baseline.

Note.—Assumes a Dec. 31, 1985, date of enactment.

TITLE VII—ENERGY AND RELATED PROGRAMS

SUBTITLE A—PIPELINE PROGRAMS

Pipeline Safety Authorization User Fees

This subtitle establishes a user fee to fund the cost of the Natural Gas Pipeline Safety Act and the Hazardous Liquid Pipeline Safety Act and authorizes appropriations for FY86. The House bill contained conflicting provisions on user fees. The Public Works title prohibited pipeline safety user fees. The Energy and Commerce title required user fees. The Senate had no user fee provisions. The Conferees agreed to establish and collect user fees starting in FY86.

User fees may be based on volume-miles, miles, revenues, or any appropriate combination of these. The Conferees intend for the gas pipeline industry and liquid pipeline industry to each pay their own appropriate share of the pipeline safety program. The Conferees require that the Secretary of Transportation will take into account allocation of Department resources when setting user fees. The Secretary is allowed, but not required, to set higher fees for non-hydrocarbon pipelines such as sour crude, sour gas, or carbon dioxide if these substances require a disproportionate share of Department resources. Likewise, the Secretary could set a special fee for a facility, such as an LNG facility, if it requires a disproportionate share of Department Resources.

The Conferees clearly intend for user fees to cover all Federal costs associated with the Federal Pipeline Safety program, but do not intend for the fees to raise any funds in excess of costs.

The Conferees have not changed the normal budget, authorization and appropriations requirements for the pipeline safety program. The only change caused by the establishment of user fees is the source of funds. Annual authorization and appropriation are still required, but the cost of the program is offset by user fees.

The Conferees note that this is not a trust fund.

SUBTITLE B—STRATEGIC PETROLEUM RESERVE (SUBCONFERENCE NO. 11)

Both the House and the Senate passed bills contain very similar provisions authorizing appropriations for the Strategic Petroleum Reserve for fiscal years 1986, 1987 and 1988. Both provisions also amend sec. 160(c) of the Energy Policy and Conservation Act which currently prohibits the U.S. Government from selling its share of oil from the Naval Petroleum Reserve at Elk Hills, unless the SPR is being filled at a minimum of 100,000 barrels per day or until 500 million barrels are in storage in the SPR. The conference agreement amends that provision so as to continue the prohibition on the sale of the U.S. share of the Elk Hills oil unless an average daily SPR fill rate of at least 35,000 barrels per day is maintained for each of the fiscal years 1986, 1987 and 1988, or until 527 million barrels are in storage in the SPR. The conferees regard the storage level of 527 million barrels as an interim storage figure. Nothing in this provision alters the current objective of filling the SPR to 750 million barrels.

SUBTITLE C—FEDERAL ENERGY CONSERVATION SHARED SAVINGS

The House Budget Reconciliation legislation authorizes the federal government to

enter into long-term contracts with private energy service companies for the purposes of saving energy in federal buildings. The Senate included a similar provision in its Budget Reconciliation legislation. The conferees agreed to provide Federal agencies authority to enter into shared energy savings contracts with private energy service companies for limited purposes. Such contracts are designed to facilitate reducing the cost of energy consumed in federal buildings, which totaled over $4 billion in 1984. The subtitle adds a new title VIII, consisting of four sections, to the National Energy Conservation Policy Act (NECPA).

Section 801 authorizes federal agencies to enter into long-term "shared savings" contracts for the limited purpose of reducing the cost of energy consumed in federally owned buildings or other federally owned facilities.

Typically, under such contracts, private energy service companies will install energy efficiency equipment and provide energy management services in federal buildings at no cost to the federal customer. The private company risks its own capital in return for a share of the value of energy savings resulting from the improvements. Thus far, restrictions on long-term contracting authority have prevented the Federal government from reducing the federal energy bill through shared savings contracts.

This provision would, therefore, allow the Federal government to enter into long-term contracts, not to exceed twenty-five years, without the necessity of obligating the total cost of the contract, including termination costs, at the time of the contract award. The conferees note that the type of contract permitted under this provision is unique and that such contracts are to be allowed only for the purpose of saving energy and may only be entered into within the context of federal government contracting law and regulation. The conferees further note that allowing shared energy savings contracts to be entered into for up to twenty-five years is not to be interpreted as a general endorsement of long-term contracts for goods and services. However, the conferees also intend that this legislation allow agencies to proceed with shared savings contracts, and every effort should be made to make full use of this authority wherever such contracts are expected to prove cost-beneficial to the agency.

It is understood that due to the unique and specialized nature of these contracts, they may require new contracting procedures. The conferees intend that any changes to existing contracting procedures necessitated by this title be incorporated into standard procurement regulations, such as the Federal Aquisition Regulations and the Defense Acquisition Regulations.

Although energy efficiency improvements frequently provide benefits in addition to energy savings, such as more reliable equipment or increased comfort, the contracts authorized herein are for the purpose of energy savings alone, and any other benefits which arise therefrom must be ancillary to that purpose.

As noted above, a typical contract obligates a private energy service company to risk its own capital on implementing energy savings measures. Implementaton activities might include an energy audit of the building, the purchase or lease and installation of equipment, or the training of personnel required to maintain or operate the equipment. Moreover, the contract might obligate the private contractor to provide ongoing operation and maintenance services for the life of the contract. In return, the Federal agency agrees to share the value of the energy savings, if any, which result from such measures. The "split" of the savings each year, and the method of determining the value of such savings, are specified in the contract. In a ten year contract, for example, the federal share of the savings might begin at 20 percent, but rise steadily to 50 percent by the fifth year. If no savings result, the private contractor receives no payments for savings.

The typical contract also provides the agency the opton to purchase the removable equipment at the end of the term of the contract for the remaining value of that equipment, if any. Nothing in this legislation is intended to prevent such arrangements as long as they comply with applicable federal law.

Section 802 authorizes any federal payments pursuant to such contracts representing the shared energy savings due the contractor to be made out of funds appropriated, or otherwise made available, to the agency for energy expenses and related operation and maintenance expenses. This section also authorizes the payment of termination costs, if any, to be made from such funds as long as these costs are provided for in the contract. The conferees wish to make clear that no payments are authorized by this section in excess of payments provided for in the contract and consistent with this title.

Section 803 requires each Federal agency to report periodically to the Secretary of Energy on its progress in implementing this authority. The conferees intend that such reports shall be made at least annually. This section further provides that the Secretary of Energy shall include a summary of that progress in the annual report to Congress already required under section 550 of NECPA, and shall include a description of progress made in achieving energy savings using this authority.

Section 804 defines "Federal agency" to include both civilian and military agencies. It also defines the term "energy savings" to mean a reduction in the cost of energy from a base cost established through a methodology set forth in the contract. The typical contract requires the parties to agree on the method for measuring the reduction of consumption (or, in the case of cogeneration, the production of new energy) resulting from the implemented measures, and for translating that result into dollar savings. The conferees also note that these contracts are restricted to savings energy in federally owned buildings and other federally owned facilities. In the case of congenerated electricity, the definition of "energy savings" limits the use of such electricity to federally owned facilities. However, the conferees recognize that the physical transmission of electricity among federally owned facilities may require using public or private transmission facilities in the customary manner and in accordance with applicable law.

The conferees also note that these contracts are not for saving energy in, for example, vehicles, or for the purpose of producing energy to sell to the private sector.

SUBTITLE D—BIOMASS ENERGY AND ALCOHOL FUEL, LOAN GUARANTEES

The Senate Committee on Energy and Natural Resources version contained a provision which extended the loan guarantee authority for Biomass Energy projects set forth in section 221 of the Biomass Energy and Alcohol Fuels Act of 1980. The House version contained no similar provision.

The conference agreement would amend Section 221 of the Biomass Energy and Alcohol Fuels Act of 1980 (Act), providing one final opportunity for three projects to obtain loan guarantees from the Department of Energy to construct ethanol plants in the United States. It is the clear intention of the conferees that no further administrative or legislative extensions of the conditional commitments be issued and that no loan guarantees be issued after June 30, 1986, assuming that the Department of Energy expedites consideration of these projects.

SUBTITLE E—SYNTHETIC FUELS

The House measure contained provisions terminating on the date of enactment, the United States Synthetic Fuels Corporation established under title I of the Energy Security Act.

The Senate measure contained no comparable provision.

The conference agreement provides for (1) termination of the authority of the SFC to award financial assistance as of the date of enactment; (2) termination of the Board of Directors of the SFC within 60 days after enactment of this Act; and (3) transfer, within 120 days of enactment of this Act, of the duties and responsibilities of the SFC to the Secretary of the Treasury in accordance with subtitle J of title I of the Energy Security Act.

SUBTITLE F—URANIUM ENRICHMENT

The House bill authorized the uranium enrichment program for fiscal years 1986, 1987, and 1988 at a level equal to estimated revenues less specific amounts established in the provision. Those amounts—$110 million in FY 1986, $150 million in FY 1987, and $150 million in FY 1988—were to be paid to the Treasury in partial repayment of the program's debt. The bill also permitted the Department of Energy (DOE) to resell unneeded power purchased from the Tennessee Valley Authority (TVA) to electric utilities. Savings from such transactions were to be deposited in the Treasury as further repayment.

The Senate bill authorized the uranium enrichment program for fiscal years 1986, 1987, and 1988 at a level equal to estimated revenues. Any revenues in excess of expenditures were to be deposited in the Treasury in partial repayment of the program's debt. The bill also required a report by the Secretary of Energy on the effects of a lawsuit, currently under appeal, that invalidated the utility services uranium enrichment contract between DOE and its customers.

The conference substitute is a compromise of the two bills. The substitute authorizes appropriations for the enrichment program during fiscal years 1986, 1987, and 1988 at a level equal to estimated revenues less an amount determined by the Secretary of Energy. The amount determined by the Secretary is to be paid to the Treasury in partial repayment of the unrecovered investment. In addition, any further revenues in excess of expenditures are to be deposited in the Treasury in repayment of the debt identified by the Secretary at the time he makes his first determination. The report required in the Senate bill is retained. The provision in the House bill relating to sales of TVA power is deleted.

The Secretary of Energy is given responsibility for determining the appropriate repayment amount after permitting an opportunity for notice and comment. The deter-

mination is in his discretion and is not subject to judicial review. The determination is to be consistent with the financial integrity of the uranium enrichment service activities program over a period of not less than 10 years. The provision also requires that the amount of such repayment shall not adversely affect the reliability of supply of uranium enrichment services at competitive prices for existing and potential customers. The amounts specified in the House bill are to be goals which the Secretary shall seek to achieve, but is not required to achieve.

The conference substitute recognizes that as part of comprehensive legislation to reduce the Federal deficit, the uranium enrichment program shares a responsibility to make a partial repayment of its debt, and that the amounts assumed in the First Concurrent Resolution on the Budget for FY 1986, and contained the House bill are reasonable goals. However, maximizing repayments in the next three years may impair the financial integrity of the program in the longer term, and thus, the Secretary must establish a repayment amount consistent with such financial integrity as well ensuring that the repayment will not adversely affect the reliability of supplies at competitive prices. The conferees expect the Secretary to consider a variety of factors in his determination, including the appropriate price and market share, the impact upon existing enrichment facilities and other program expenditures, the impact upon research and development of advanced technologies for additional capacity, and the deficit reduction goals in the provision.

The Secretary is to make the determination prior to the submission of the budget in each of the three fiscal years, but may make revised determinations, subject to the same standards and procedures, during such fiscal years. Since fiscal year 1986 has already begun, the Secretary should make the determination as soon as practicable. The conference report on the Energy and Water Development Appropriations Act of FY 1986 explicitly permitted a repayment if authorized. This legislation constitutes such an authorization.

The substitute also requires the Secretary to submit to Congress, along with his first determination, an estimate of the amount of prior investment in the uranium enrichment service activities program that remains unrecovered. The estimate should also include an analysis of how any of the debt should be apportioned between defense and commercial customers.

Tennessee Valley Authority [TVA] Power Sales

The House bill contained a provision entitled "Sale of Unnecessary Electric Energy". The House bill also contained a conflicting provision entitled "Sale by Secretary of Energy of Certain Unnecessary Electric Energy". The Senate bill contains no comparable provision. The House Conferees receded to the Senate in this matter.

Federal Energy Regulatory Commission Annual Charges

The House bill contained a provision requiring the FERC to assess and collect annual charges from interstate oil or natural gas pipelines and public utilities in amounts determined under the provision. The House bill also prohibits FERC from assessing or collecting charges from interstate oil or natural gas pipelines, except those charges assessed or collected pursuant to law approved before the date of enactment of this Act. The Senate bill contained no comparable provision. The House Conferees receded to the Senate on this matter.

TITLE VIII—AMENDMENTS TO THE OUTER CONTINENTAL SHELF LANDS ACT

SUBTITLE A—AMENDMENTS TO OUTER CONTINENTAL SHELF LANDS ACT

Section 8001—Short title

Neither House version contained a short title. The Senate version contained the short title, "Outer Continental Shelf Lands Act Amendments of 1985". The House Conferees receded to the Senate on the short title.

Section 8002—National policy for the Outer Continental Shelf

The Committee on Merchant Marine version, at section 6401 of H.R. 3500, contained an addition to the policy provision (Section 3 of the OCSLA) which stated that the distribution of section 8(g) receipts will provide states with funds which shall be used for the mitigation of adverse economic and environmental effects related to OCS development. Neither the House Interior Committee nor the Senate Energy Committee versions contained a comparable provision. The Senate Conferees receded to the House Merchant Marine Committee language, with an amendment. The amendment provided that the use of the funds for the mitigation of adverse economic and environmental effects would be discretionary with the State, rather than obligatory. The Conferees rejected the concept of federal control or limitation over State activities. The House Conferees agreed to change the word "shall" to the word "may".

Section 8003—Revision of Section 8(g)

Paragraph (1) of subsection (g) stipulates the type of geographical, geological, and ecological information that is to be shared with coastal states with respect to the 8(g) zone and adjacent federal areas. Both House Committee versions contained similar language and the Senate Committee had no comparable provision. The Conferees agreed to accept the language of the Committee on Merchant Marine and Fisheries on information sharing.

Paragraph (2) of subsection (g) describes the revenues to be divided between the federal government and coastal state governments. The Conferees accepted language of the House Committees, with an amendment to add the words "derived from any bidding system authorized under subsection (a)(1), excluding Federal income and windfall profits tax and" after the words "royalties and other revenues". The intent of the amendment was to assure the division of revenues received from any of the alternative bidding systems, if utilized by the Secretary of the Interior, under section 8(a). The Conferees also reasserted their intention that federal income and windfall profit taxes would not be included in such division. With the amendment noted, the Conferees agreed on the House language in paragraph (2).

The agreed upon language is clear that Federal income and windfall profits taxes are excluded. If the Secretary were to shift to an alternative bidding system, the fact that revenues may be termed "profit sharing receipts" or some other nomenclature is irrelevant. All such revenues, except federal income and windfall profits taxes, are to be included and the Federal government may not attempt to exclude any revenues by not calling them "bonus", "rent", or "royalty".

Section 8(g)(2) as amended by this title requires that the State's share of the 8(g) revenues together with accrued interest shall be transmitted "not later than the last business day of the month following the month in which these revenues are deposited in the Treasury,". The Conferees fully expect that the Department will comply with this prescribed deadline. However, under this language the Department may expedite distribution of the State's share to the State by omitting the step of investing these escrowed revenues in interest-bearing securities, which may have a maturity of 30 days or more, and by paying the State its share as soon as the 8(g) revenues can be identified among non-8(g) royalty payments by a lessee.

Under the current reporting system in place, the OCS lessee aggregates payments to the Federal Government of 8(g) and non-8(g) OCS revenues, so some period of time is required for the Department to identify the 8(g) revenues. Thus, even where the Department does invest the State's share of 8(g) revenues, the period during which interest accrues to the State will not commence until the 8(g) revenues can be segregated by the Department and actually invested. It is anticipated that the Department can meet the requirements of section 8(g)(2) as amended without substantial revision of the current OCS reporting system, reporting forms, or Treasury accounts.

Paragraph (3) provides for an agreement between the Secretary of the Interior and the Governor of the coastal State to enter into an unitization or other royalty sharing agreement for the division of revenues from the production of any common potentially hydrocarbon-bearing area. Both House Committees and the Senate Committee had similar language. However, the Senate language contained an additional provision that if no such agreement is reached, the Secretary may nevertheless proceed with the leasing of the tract or tracts. Any revenues received by the Federal Government from such leasing would be subject to the requirements of paragraph (2). The House Conferees receded to the Senate on this provision.

Paragraph (4) provides for the investment by the Secretary of the Treasury of the deposits in the 8(g) account. The Senate language was different from the two House Committee versions because, to provide some flexibility to the Secretary of the Treasury, it required the deposits be invested in securities having the highest reasonably available interest rate as determined by the Secretary of the Treasury. The House Conferees receded to the Senate.

Paragraph (5) provides for the distribution of revenues when there is a boundary dispute between the United States and a state under section 7 of the OCSLA. Both House Committees and the Senate Committee had similar language in this paragraph. The House Conferees receded to the Senate on its language in paragraph (5).

Paragraphs (6) and (7) were identical in all three versions and were not subject to change in the Conference.

During the Conference, an issue was raised as to whether revenues received by the Federal Government from tracts located in what is now the 8(g) zone, but which were leased prior to the date of enactment of the OCS Lands Act Amendments of 1978 (September 18, 1978), should be excluded from the distribution of revenues to the States under this title. The uniform position of the Senate Conferees was that the issue had been settled by a roll call vote on the Senate floor and that all such revenues were subject to such distribution under this

title. The House Conferees then considered and rejected a motion to adopt Statement of managers language to exclude such revenues.

Section 8004—Distribution of 8(g) account

Subsection (a) provides that prior to January 1, 1986, the Secretary shall distribute to designated coastal States the amounts due and payable to each state under paragraph (2) of section (g), as amended, for the period between October 1, 1985, and the date of such distribution and the monies to be distributed under subsection (b) of this section. Except for technical differences, both House Committee versions and the Senate Committee version were identical and were not subject to modification by the Conference.

With respect to the requirement of the distribution of the appropriate shares of currently escrowed funds by January 1, 1986, the Conferees understand that it has been the practice of the Department of the Interior to invest such funds to obtain interest on the escrowed funds with the intent of distributing this interest to the States and the Federal Government upon distribution of the account. Because of such investment practices, the full amount of escrowed funds due to be paid under this section may not be liquid as of January 1, 1986. Therefore, the Conferees anticipate that the Secretary will make payments to the states as soon as such investments mature and money is available.

Subsection (b) provides for the fair and equitable distribution of funds in the 8(g) account, including all accrued interest thereon through September 30, 1985. Both house versions contained identical distribution figures for each of the seven states eligible for the funds. The Senate figures were identical, except for Alaska which was $10 million less than that provided in the House bills. The House Interior Committee version also provided that no more than $4.3 billion would be credited to the Federal Treasury. Any money that remained after such credit to the Federal Treasury would be paid to affected coastal States. Neither the Merchant Marine Committee nor the Senate Energy Committee versions contained a comparable provision.

Finally, the House Merchant Marine Committee and Senate Energy Committee versions provided that acceptance of payment under this section shall satisfy and release any and all claims against the U.S. arising under, or related to, section 8(g) as it was in effect prior to the date of enactment of this Act. With respect to all of the described provisions in subsection (b), the Senate receded to the House Merchant Marine Committee version.

Section 8005—Immobilization of boundaries

This section amends the Submerged Lands Act to provide that any boundary between a State and the U.S. which has been or is hereafter established by a final decree of the U.S. Supreme Court shall remain immobilized. All three Committee versions were similar, except for technical differences.

Section 8006—Recoupment

This section provides for States to recoup their share of revenues which should have been, but which were not, deposited in the 8(g) account under section 8(g)(4) of the OCS Lands Act as it was in effect prior to the date of enactment of this Act. All three Committee versions were similar. The language in the first clause relating to "bonuses, royalties, and other revenues" was taken from existing section 8(g)(4).

Section 6404—Local passthrough

The House Committee on Merchant Marine version contained a provision that would have provided a minimum of 33 percent of the funds to local coastal governments for the mitigation of economic and environmental effects related to OCS development. Neither the House Interior Committee nor the Senate Energy Committee version contained a comparable provision. The House receded to the Senate by deleting the local passthrough provision.

SUBTITLE B—COORDINATION AND CONSULTATION WITH AFFECTED STATES AND LOCAL GOVERNMENTS

Section 8101—Revision of section 19

The House Interior Committee version contained an amendment to section 19 of the OCSLA. The Merchant Marine Committee and the Senate Energy Committee versions has no comparable provision. The Conferees agreed to an amendment to the Interior Committee language.

Under existing law, section 19(c) requires that the Secretary accept the recommendations of a Governor regarding a proposed lease sale or development and production plan if the Secretary determines that acceptance of the recommendation provides a "reasonable balance between the national interest and the well-being of the citizens of the affected state."

During extensive House hearings on the OCS leasing process, including the State/Federal consultation process, several representatives of environmental groups, fishing groups, and state governments, including those from oil-producing states such as Texas and Louisiana, expressed dissatisfaction with the Secretary of the Interior's response to state recommendations. In the past, this dissatisfaction has led to lawsuits and moratoria over lease sales off several states. The development of potential hydrocarbon resources in areas with valuable fisheries resources has also been a contentious and recurring issue.

Under the amendment agreed to by the Conferees, the Secretary will be required, in determining the "national interest", to "equally weigh" the need for offshore energy activities and the need to protect "other resources and uses of the coastal zone and the marine environment, including living marine resources" affected by such offshore energy activities. Section 19, as amended, will require the Secretary to consider carefully and equitably the recommendations of the Governors of coastal states with respect to lease sales and oil and gas development and production plans. The Secretary is required to provide the Governors of affected states with a decision in writing together with reasons and information sufficient to support the decision. The Secretary's decision must also address each specific point raised in the Governor's recommendations. Further, if the Secretary rejects the Governor's recommendation, he may not implement any decision for a period of 30 days following receipt, by the Governor, of the findings on which the Secretarial decision was based.

The amendment includes new language which provides that the scope of judicial review of the Secretary's decision shall be that applied to final federal agency actions by the Administrative Procedure Act, 5 U.S.C. 706(2)(A)—"arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law".

The amendment repeals subsection (d) of existing law.

SUBTITLE C—USE OF AMERICAN-BUILT RIGS FOR OCS DRILLING

Section 8201—Use of American-built rigs for OCS drilling

The Senate receded to the House on Title VI, Subtitle H of the Merchant Marine Committee version—Use of American-built Rigs for OCS Drilling.

TITLE IX. MEDICARE, MEDICAID, MATERNAL AND CHILD HEALTH

SUBTITLE A. MEDICARE

1. Rates of increase in payments for inpatient hospital services (sec. 101)

Present law

Current law generally provides that the medicare prospective payment rates should be updated annually by the Secretary of Health and Human Services. The law states that the update for FY 1986 should take into account amounts necessary for the efficient and effective delivery of medically appropriate and necessary care of high quality, but may not exceed the rate of increase in the hospital marketbasket index (the increase in hospital input prices) plus one quarter of a percentage point. The Secretary of HHS promulgated final regulations freezing hospital medicare payments for FY 1986 at the FY 1985 levels. Public Law 99-107, the Emergency Extension Act of 1985, amended current law to provide that the payment rates in effect on September 30, 1985 should remain in effect for a further 45-day period, through November 14, 1985. Public Law 99-155 extended this requirement through December 14, 1985, and Public Law 99-181 extended the requirement through December 18, 1985.

House bill

The bill would require that the Secretary provide a 1 percent increase in the PPS payment rates for FY 1986. A similar rate of increase would be provided for PPS-exempt hospitals, which remain under a cost reimbursement system. For PPS hospitals, the provision would be effective for discharges occurring during FY 1986 for the Federal portion of the prospective payment rates. For the hospital-specific portion of the payment rates in PPS hospitals, and for PPS-exempt hospitals, the provision would take effect for the hospital's cost reporting period that begins during FY 1986.

Senate amendment

The provision would require the Secretary of Health and Human Services to provide a 0.5 percent increase in the PPS rates for fiscal year 1986 and an increase no greater than the increase in the hospital market basket index in fiscal years 1987 and 1988. Additionally, the payment limits for PPS-exempt hospitals and units would be increased by 0.5 percent for fiscal year 1986 and by an increase of no more than the hospital market basket in fiscal years 1987 and 1988.

The provision would be effective for hospital cost reporting periods beginning on or after October 1, 1985, for the hospital-specific portion of the PPS rates, and for discharges occurring on or after October 1, 1985, for the Federal portion of the PPS rates. For PPS-exempt hospitals, the provision would take effect for hospital cost reporting periods beginning on or after October 1, 1985.

Conference agreement

The conference agreement includes the House bill with the following modifications. The conference agreement extends the cur-

rent freeze on the PPS payment rates and on the cost limits for PPS-exempt hospitals through February 28, 1986.

For PPS hospitals, the Secretary will be required to provide an increase of 1 percent in the PPS payment rates for the remainder of fiscal year 1986 and an increase no greater than the increase in the hospital market basket index in fiscal years 1987 and 1988. For fiscal year 1986, the increase in the Federal portion of the rates will take effect for discharges occurring on or after March 1, 1986, and the increase in the hospital specific portion of the rates will take effect with the beginning of the sixth month of the hospital's first cost reporting period beginning on or after October 1, 1985 (e.g., June 1, 1986, for a hospital with a cost reporting period beginning on January 1, 1986; and December 1, 1986 for a hospital with a reporting period beginning on July 1, 1986).

For PPS/exempt hospitals, the Secretary will be required to increase the applicable cost limits for fiscal year 1986 by seven-twelfths of 1 percent (0.5833 percent) effective for hospital cost reporting periods beginning on or after October 1, 1985 but before October 1, 1986. For fiscal years 1987 and 1988, the Secretary will be required to provide an increase in the cost limits that is no greater than the increase in the hospital market basket index. Further, in computing the cost limits for fiscal years 1987 and 1988, the increase for fiscal year 1986 shall be deemed to be 1 percent rather than 0.5833 percent.

2. One-year extension of transition to national DRG rates (sec. 102)

Present law

The Social Security Administration of 1983 (P.L. 98-21) provided for a new prospective payment system for hospital inpatient services provided to medicare beneficiaries.

Current law provides for a three-year transition from payments based on hospital specific costs to payments based on national DRG (diagnosis related group) rates. During this period, a declining portion of the total prospective payment will be based on a hospital's historical reasonable costs and an increasing portion will be based on a combination of regional and national DRG rates. In the fourth year of the program and thereafter, medicare payments will be determined under a totally national DRG payment methodology. The blend of the historical cost (hospital specific) portion of the payment rate with the Federal portion of the DRG payment rate is changed with the beginning of the hospital's cost reporting period.

The Federal DRG component is comprised, for the first three years, of a combination of national and regional rates. This phase-in takes account of current differences in hospital costs across regions; different payment levels are provided for nine census regions of the United States. Changes in the blend and the amounts of the national/regional components of the Federal DRG payment rates are made on the Federal fiscal year basis. The prospective payment rate transition started with each hospital's first cost reporting period that began on or after October 1, 1983. The current transition schedule is shown below.

For hospital cost reporting periods beginning on or after:

Fiscal year [1]	Hospital specific portion (percent)	Federal DRG portion (percent)
1984	75	25 (100 percent regional)
1985	50	50 (25 national, 75 regional)
1986	25	75 (50 national, 50 regional)
1987	0	100 (100 national)

[1] The hospital specific portion (HSP) amount and the proportional shares of the HSP and the Federal DRG amount change with the beginning of the hospital's cost reporting period. The Federal (national and regional) rates and their proportional shares change with the beginning of the Federal fiscal year.

P.L. 99-107, the Emergency Extension Act of 1985, amended current law to provide that hospital payment rates that were in effect on September 30, 1985 should remain in effect for a further 45-day period, through November 14, 1985. This change also suspends the transition at the blend of 50 percent hospital specific/50 percent Federal for the 45-day period. Public Laws 99-155 and 99-181 extended this requirement through December 18, 1985.

House bill

The bill would extend the transition period for one additional year. The 50 percent hospital specific cost/50 percent Federal DRG payment rate blend would be maintained for FY 1986. Since changes in the regional/national composition are made on a Federal fiscal year basis, the transition schedule would be revised as follows. For hospital cost reporting periods beginning on or after:

Fiscal year [1]	Hospital specific portion (percent)	Federal DRG portion (percent)
1984	75	25 (100 percent regional)
1985	50	50 (25 national 75 regional)
1986	50	50 (25 national, 75 regional)
1987	25	75 (50 national, 50 regional)
1988	0	100 (100 national)

This provision would have two effects. First, it would continue to base 50 percent of the payment on the hospital's own historical cost base for one more year. Second, it would continue to base 75 percent of the Federal portion of the payment rate on regional costs for one more year. For the blend of the regional and national portions of the Federal component of the payment rate, the provisions would be effective for discharges occurring on or after October 1, 1985. The blend of the hospital specific and Federal portions would be effective for discharges occurring during hospital cost reporting periods beginning on or after October 1, 1985.

[1] The hospital specific portion (HSP) amount and the proportional shares of the HSP and the Federal DRG amount change with the beginning of the hospital's cost reporting period. The Federal (national and regional) rates and their proportional shares change with the beginning of the Federal fiscal year.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with the following modifications. Beginning with the sixth month of the hospital's cost reporting period beginning during fiscal year 1986, the hospital specific/Federal blend will be 45 percent hospital specific and 55 percent Federal. For hospital cost reporting periods beginning during fiscal year 1987 the hospital specific/Federal blend will be 25 percent hospital specific and 75 percent Federal. Effective for discharges occurring on or after March 1, 1986 and before October 1, 1986 the blend of the Federal rate components will be 75 percent regional and 25 percent national. For discharges occurring during fiscal year 1987, the blend of Federal rate components will be 50 percent regional and 50 percent national.

The conferees believe that this modification in the transition will give all hospitals more time to adjust to the prospective payment system. In addition, it would provide hospitals in higher cost regions of the country an opportunity to make the necessary changes to reduce their costs. This modification in the transition to national rates does not reflect a lack of support for the prospective payment system. The conferees do not believe that any further delay in the transition to national rates is warranted. The conferees believe that significant progress must be made in developing refinements to the DRG system to more accurately reflect the actual costs incurred in providing care. For example, the conferees, in this legislation, have requested a report on refining the hospital wage index to reflect the higher costs incurred in core city areas relative to suburban areas. In addition, the conferees anticipate that significant progress will be made toward implementing a severity of illness index.

It has come to the conferees' attention that burn center hospitals may be among these hospitals that will require special treatment because of the extensive treatment needs of their patients. For these hospitals, up to one-half of the burn patients may be outliers—far in excess of the percentage comtemplated by the PPS. The Secretary is requested to review the adequacy of the payments being made to burn center hospitals under PPS and any problems of access that the present payment method may be creating for medicare patients.

3. Application of revised hospital wage index (sec. 103)

Present Law

As an integral part of the medicare prospective payment system (PPS) for hospitals, the Federal portion of the prospective payment rates is adjusted to take into account differences in wages from area to area. This is accomplished by means of an area wage index applied to all PPS hospitals in urban and rural areas. The current hospital wage index is constructed from a national data base of hospital wage records maintained by the Bureau of Labor Statistics (BLS). There are a number of technical flaws in this index, principally that is fails to recognize differences at the local level regarding the number of part-time hospital workers.

In response to requirements in the Deficit Reduction Act of 1984, P.L. 98-369, the Health Care Financing Administration developed a new "gross hospital wage index," based on a more refined survey of hospital wage costs. This index is derived from total gross hospital wages including salaries of interns and residents, personnel employed in areas other than the inpatient area, hospital-based physicians and all other salaries paid to hospital employees. P.L. 98-369 required that any new wage index be implemented retroactive to October 1, 1983. According to the PPS final regulations published September 3, 1985, HCFA planned to implement the new wage index October 1, 1985, retroactive to October 1, 1983.

P.L. 99-107, the Emergency Extension Act of 1985, amended current law to provide that medicare hospital payments would be determined on the same basis as they were on September 30, 1985, effective through November 14, 1985. Public Law 99-155 extended this requirement through December 14, 1985, and Public Law 99-181 extended it through December 18, 1985. This means that there can be no change in the wage index until after this date.

a. New gross wage index

House bill

The Secretary would be required to implement the new "gross wage index" published in the proposed PPS regulations on June 10, 1985. The provision of current law requiring retroactive application of the new wage index would be repealed. The house bill does not preclude the Secretary from making adjustments to reflect computation errors that may have been made in calculating the specific index amounts. The provision would be effective for discharges occurring during fiscal year 1986.

The House bill requires that the gross wage index be used for FY 1986. Further, the House bill requires the Secretary to make refinements, as necessary, in the area wage index for FY 1987 and beyond.

Senate amendment

Similar provision, except references final PPS regulations published September 3, 1985. The provision would be effective for discharges that occur during FY 1986, with Secretarial authority to make periodic adjustments in the appropriate wage index for discharges occurring after September 30, 1986.

Conference agreement

The conference agreement follows the Senate amendment with a modification that the provision would be effective for discharges occurring on or after March 1, 1986.

B. Wage index study

House bill

The Secretary would be required to study, in consultation with the Prospective Payment Assessment Commission, and make a recommendation to the Congress by May 1, 1986, on refining the area wage adjustment to reflect the higher wage costs incurred by hospitals located in core city areas relative to those in surburban areas of the same metropolitan area.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with a modification of the reporting date to March 1, 1987.

4. Change in formula for indirect teaching adjustment (sec. 104)

Present law

The medicare program provides reimbursement for both the direct and indirect costs of medical education incurred by teaching hospitals. The direct costs of approved medical education programs (such as salaries for residents and teachers and classroom costs) are excluded from the prospective payment system, and are reimbursed on a reasonable cost basis. The indirect costs are increased patient care costs associated with teaching programs due to such factors as increased diagnostic testing, increased numbers of procedures prescribed, higher staffing ratios, and a more severely ill patient population.

A proxy measure, defined as the hospital's ratio of the number of interns and residents divided by the number of beds (IRB), has been used to adjust medicare prospective payments for indirect medical education costs. An adjustment factor for indirect medical education costs was estimated statistically based on the increase in hospitals' costs as their ratio of interns and residents to the number of beds (IRB) increases. This factor was first used as an adjustment to the medicare limits on hospital payments under the former cost-based reimbursement system.

When Congress enacted the prospective payment system, it established the indirect teaching adjustment factor at double the factor which was in effect as of January 1, 1983. After recomputing this factor, the Health Care Financing Administration estimated, on a linear basis, that a 0.1 increase in the IRB ratio would result in a 5.79 percent increase in a hospital's cost per discharge; doubled, the indirect teaching factor was established at 11.59 percent. This adjustment is made to the Federal DRG portion of the PPS rate only. The adjustment was doubled because of concerns that the DRG system would adversely affect teaching hospitals. These concerns stemmed from doubts about the ability of the DRG case classification system to fully account for factors such as severity of illness, urban location, bed size, and increased medicare costs associated with hospitals that serve large numbers of low-income patients. The doubling of the indirect teaching adjustment from 5.79 percent to 11.59 percent was done on a budget-neutral basis, which means that the DRG payments were adjusted downwards overall to account for the doubling of the indirect teaching adjustment.

a. Adjustment reduction

House bill

The House bill would reduce the indirect teaching adjustment to 8.1 percent (for FY's 1986 and 1987) and 8.7 percent (for FY's 1988 and beyond) for each 0.1 increase in the IRB ratio, on a variable or curvilinear basis. (An adjustment made on a variable basis reflects the non-linear cost relationship; that is, each increase in residents-to-bed ratio does not result in a proportional increase in costs).

The reduction from 8.7 percent to 8.1 percent in FY 1986 and FY 1987 recognizes that a portion of the indirect teaching adjustment compensates hospitals serving a disproportionate share of low-income patients. When the disproportionate share payment provisions expire at the end of FY 1987, the indirect teaching adjustment would revert to 8.7 percent.

The savings from the reduction in the indirect teaching adjustment from 11.59 percent on a linear basis to 8.7 percent on a curvilinear basis would be total systems savings. The savings from the further reduction from 8.7 percent to 8.1 percent would be used to offset the additional costs of the disproportionate share provision.

Senate amendment

The Senate amendment would reduce the indirect teaching adjustment from 11.59 percent to 7.7 percent on a variable, or curvilinear basis, for fiscal years 1986 and 1987, and 8.7 percent for fiscal years 1988 and beyond.

Conference agreement

The conference agreement includes the House bill with an amendment to clarify effective dates (see item (g)).

b. Intern outpatient counting

House bill

The House bill would provide that interns and residents assigned to outpatient departments of a hospital would be counted for purposes of determining the indirect teaching adjustment.

Senate amendment

There is a similar provision in section 704 of the Senate amendment.

Conference agreement

The conference agreement includes the Senate amendment.

c. Restandardizing the DRG rates

House bill

The House bill would require the Secretary to restandardize the Federal DRG payment amounts by excluding, for discharges occurring after September 30, 1985, the reduced indirect medical education payment amounts based on the indirect teaching adjustment factors authorized by this provision (i.e., 8.1 percent in fiscal years 1986 and 1987, and 8.7 percent in fiscal years 1988 and thereafter) in place of the factor used under current law (i.e., 11.59 percent).

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with the modification that the Secretary will be required to restandardize the Federal DRG payment amounts effective for discharges occurring after September 30, 1986.

d. Reduce the standardized rates

House bill

The House bill requires that the Secretary restandardize the standardized payment amounts. In order to ensure that the budget neutrality calculation does not redistribute payment amounts among the twenty payment areas for which standardized payment amounts are calculated, the budget neutrality adjustment should be calculated to take into account the varying teaching payments in each of these regions. For each of these twenty payment areas, indirect teaching payments based on rates standardized to 8.1 percent curvilinear and paid out on the same basis (plus the disproportionate share payments) shall be neither more nor less than the payments based on rates standardized by 11.59 percent linear indirect medical education factor and paid out on 8.7 percent curvilinear basis.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with the modification that the reduction in the Federal DRG payment amounts will be effective for discharges occurring on or after October 1, 1986

e. Counting of non-employee interns

House bill

No Provision.

Senate amendment

In determining the indirect teaching adjustment, the Senate amendment would prohibit the Secretary from distinguishing between interns and residents who are employees of a hospital and those who furnish services to a hospital but are not employees of the hospital.

Conference agreement

The conference agreement includes the Senate amendment.

f. Intern and resident reimbursement limitations

House bill

No provision.

Senate amendment

Effective July 1, 1986, the Senate amendment would provide that interns and residents whose costs are not recognized as reasonable for the following reasons would not

be counted in determining the indirect teaching adjustment: (1) those whose training exceeds the lesser of 5 years or the minimum number of years necessary to meet initial board eligibility requirements except, however, those who begin geriatric fellowship programs prior to July 1, 1991. After July 1, 1989, if the required number of years of training changes, the Secretary may change the number of years within specified limits; (2) for the year beginning July 1, 1986, one-third of those who are not graduates of accredited or approved schools of medicine osteopathy, dentistry, or podiatry; for the year beginning July 1, 1987, two-thirds of those who are not graduates of such accredited schools; and for the year beginning July 1, 1988, none of those who are not graduates of such accredited schools; (3) for hospitals at which on October 1, 1985, more than 50 percent of their interns and residents were not graduates of accredited schools, one-third of such graduates for the 2 years beginning July 1, 1986, two-thirds of such graduates for the 3 years beginning July 1, 1988, and none of such graduates beginning July 1, 1991.

Conference agreement

The conference agreement does not include the Senate amendment.

g. Effective date

House bill

The House bill would be effective for discharges occurring on or after October 1, 1985.

Senate amendment

The Senate amendment provides an identical effective date.

Conference agreement

The Conference agreement includes the Senate amendment with the modification that the effective date will be March 1, 1986. In addition, the Secretary will be prohibited from implementing this provision until such time as the additional payments to disproportionate share hospitals are initiated.

5. Additional payment amounts for hospitals serving a disproportionate share of low income patients (sec. 105)

Present law

Under the Social Security Amendments of 1983, the Secretary of HHS is required to make adjustments to the PPS rates as the Secretary deems appropriate for hospitals that serve a disproportionate number of low income or medicare part A patients. The Deficit Reduction Act of 1984 requires the Secretary, prior to December 1, 1984, to develop and publish a definition of disproportionate share hospitals, to identify such hospitals, and to make the list available to the Committees with legislative jurisdiction over part A. The Secretary has failed, to date, to develop any criteria for defining or identifying such hospitals or otherwise make any information available to the Committees.

House bill

a. Fiscal years 1986 and 1987 payments

For FY 1986 and FY 1987, the House bill would require the Secretary of HHS to make additional payments by adjusting the Federal portion of the DRG payment, for eligible urban PPS hospitals with 100 beds or more, serving a disproportionate share of low income patients.

b. Eligible hospitals

The House bill would provide that such adjustment would be made to urban PPS hospitals with 100 or more beds meeting the disproportionate share criteria.

c. Low income patient definition

The proxy measure for low income would be the percentage of a hospital's total inpatient days attrributable to medicaid patients (including medicaid-eligible medicare beneficiaries—medicare/medicaid crossovers).

d. Mandatory payment rate

The Federal portion of the DRG payment would be increased by .7 percent for each 1 percentage point increase in the ratio of low income inpatient days to total inpatient days, above the minimum threshold of 15 percent. The maximum adjustment would be 16 percent.

A limited exceptions process would be established for urban PPS hospitals with 100 beds or more. The Secretary would be required to make disproportionate share payments where a hospital can demonstrate that more than 30 percent of its net inpatient care revenue is provided by local or state governments for inpatient care for low income patients not otherwise reimbursed by medicare or medicaid. If this threshold is met, the per DRG add-on would be 16 percent. In no case would a hospital receive an adjustment greater than 16 percent.

This bill reduces the indirect teaching adjustment from 8.7 percent to 8.1 percent to reflect the disproportionate share adjustment. When the disproportionate share adjustment expires in two years, the indirect teaching adjustment would be increased for FY 1988 and beyond to 8.7 percent. The disproportionate share provision would be budget neutral and would be accomplished by restandardizing the standardized payment amounts.

e. Restandardization of DRG rates

The House bill would require the Secretary to restandardize the DRG payment amounts to reflect the disproportionate share adjustment.

f. Data development

No provision.

g. Data use for payment

No provision.

h. Discretionary payment add-on

No provision.

i. Waiver of Paperwork Reduction Act

No provision.

j. Effective date

The House bill would be effective for discharges occurring between October 1, 1985 and September 30, 1987.

Senate amendment

a. Fiscal years 1986 and 1987 payments

Similar provision, except that additional payments would be made to qualified urban or rural hospitals regardless of bed size.

b. Eligible hospitals

The Senate amendment provides that such additional payments would be made to any PPS hospital meeting the disproportionate share criteria.

c. Low income patient definition

The proxy measure for low income patients would be the percentage of a hospital's total medicare part A patient days attributable to medicare patients who are also enrolled in the Federal Supplemental Security Income (SSI) program.

d. Mandatory payment rate

For hospitals with 100 beds or more, the Federal portion of the PPS payment would be increased by 2 percent plus .25 percent for each 1 percentage point (or portion thereof) that the proxy measure is above the 15 percent minimum threshold. The maximum adjustment would be 12 percent. PPS rates for hospitals with less than 100 beds would be increased by 12 percent if their proxy measure is 55 percent or more.

e. Restandardization of DRG rates

No provision.

f. Data development

The Secretary would be required to develop accurate data on medicare patients who are also enrolled in SSI by October 1, 1986.

g. Data use for payment

The proposal also requires the Secretary to pay hospitals where historical data is not available on the basis of similar hospitals in the region in which the hospital is located.

h. Discretionary payment add-on

The Senate amendment would provide that disproportionate share payments may be made to a hospital based on data provided by the hospital if the Secretary agrees that such data is more accurate than the data which would otherwise be used.

i. Waiver of Paperwork Reduction Act

The Senate amendment would provide that the Paperwork Reduction Act would not apply to information required for purposes of carrying out this provision.

j. Effective date

The provision would be effective for discharges occurring on or after October 1, 1985, and before October 1, 1987.

Conference agreement

The conference agreement includes the House bill with the following modifications. Additional payments will be made to urban PPS hospitals with more than 100 beds if the hospital's percentage of low income patients is 15 percent or higher. For such hospitals, the Federal portion of the hospital's payment rate will be increased by 2.5 percent plus one-half of the difference between the hospital's percentage of low income patients and 15 percent, up to a maximum increase of 15 percent. The Federal portion of the payment rate will be increased by 5 percent for urban hospitals with less than 100 beds having a percentage of low income patients of 40 percent or higher. The increase will be 4 percent for rural hospitals with a percentage of low income patients of 45 percent or more.

The percentage of low income patients will be defined as the total number of inpatient days attributable to Federal Supplemental Security Income beneficiaries divided by the total number of medicare patient days, plus the number of medicaid patient days divided by total patient days.

Additional payments to qualified hospitals will be effective for discharges occurring on or after March 1, 1986 and before October 1, 1988.

The Congressional Budget Office is required to undertake a study of the impact of payments to disproportionate share hospitals and the advisability of providing additional payments to all "Pickle" hospitals, i.e., those which can demonstrate that more than 30 percent of their revenues are derived from State and local government payments for indigent care provided to patients not covered by medicare or medicaid. The CBO is required to report the results of this study by January 1, 1987.

6. Treatment of certain rural osteopathic hospitals as rural referral centers (sec. 106)

Present law

Under present law, rural hospitals that meet certain requirements can qualify to receive the "urban standardized payment amount adjusted by the rural wage index applicable for the geographic area. The adjustment was permitted because data indicated that large rural hospitals with high case mix indices had costs which were similar to those of urban hospitals.

Under existing criteria there are approximately 146 rural referral centers. Each rural referral center is reviewed every three years by the Health Care Financing Administration to determine if the center continues to qualify. In order to qualify, a rural referral center must meet a specified case mix index, have at least 6,000 discharges in a cost reporting period, and meet other minor requirements.

House bill

The House bill would allow osteopathic hospitals to meet the rural referral center standard if they had at least 3,000 discharges in a cost reporting period and if they meet all the other requirements, as specified by the Secretary, for rural referral center designation. The provision would be effective for cost reporting periods beginning on or after the date of enactment.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill. The conferees note that rural osteopathic hospitals wishing to qualify as rural referral centers must meet all other applicable requirements, in addition to the new discharge requirement established by this provision.

7. Return on equity capital for inpatient hospital services and other services (sec. 108)

Present law

A return on equity (owner) capital invested and used in providing patient care is considered a medicare allowable cost for proprietary, or for-profit, health care providers. Equity capital is the net worth of a hospital excluding those assets and liabilities not related to patient care. Specifically, equity capital includes: (1) the investment in the plant, property, and equipment (net of depreciation) related to patient care, plus deposited funds required in connection with leases; and (2) working capital maintained for necessary and proper operation of patient care facilities.

The level of payment for return on equity (ROE) formerly was set at a rate of no more than one and one-half times the average rate of return on trust fund investments. In the Social Security Act Amendments of 1983 (P.L. 98-21), Congress reduced the level of payments for hospitals to the average rate of return on trust fund investments. The rate of return for other providers was not affected.

a. Hospital return on equity payments

House bill

The House bill would provide that return on equity would not be a medicare allowable cost for inpatient hospital services beginning October 1, 1986. In addition, costs attributable to a return on equity capital would be excluded in determining national and regional DRG prospective payment rates adjusted to include capital costs.

The bill would be effective with respect to cost reporting periods beginning on or after October 1, 1986, and to DRG payments for discharges on or after October 1, 1986.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with the modification that payments to hospitals for return on equity capital will be separated from payments for other elements of capital costs and phased out over a three-year period. For hospital cost reporting periods beginning in fiscal year 1987, payments for return on equity will be reduced to 75 percent of the otherwise allowable amount. For cost reporting periods beginning during fiscal years 1988 and 1989, return on equity payments will be reduced to 50 percent and 25 percent, respectively, of the otherwise allowable amounts.

The conferees expect that next year the Congress will review the entire issue of the method by which capital expenses of hospitals are reimbursed. At that time, the Congress will review, and may change, the provisions in this Act regarding return on equity.

b. Other provider return on equity payments

House bill

The House bill would reduce the rate of return for other provider services, if regulations provide for ROE, to the average rate of return on the hospital insurance trust fund beginning October 1, 1985.

The bill would be effective with cost reporting periods beginning on or after October 1, 1985.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with a modification. The effective date would be March 1, 1986.

8. Continuation of medicare reimbursement waivers for certain hospitals subject to regional hospital reimbursement demonstrations (sec. 109)

Present law

Section 1886(c) permits a permanent waiver of the standard medicare reimbursement rules for States whose hospital cost containment programs meet a number of requirements, including the requirement that the costs under the State program not exceed those that would have been incurred without the waiver.

House bill

The House bill would permit a local hospital reimbursement system that had operated under a waiver to continue if the State requested the continuation and if the local project meets the requirements for States that receive a waiver, with the following change.

Such a system would have to include substantially all acute care hospitals in the area, and review a minimum of 75 percent of all revenues or expenses there for inpatient hosptial services and 75 percent of revenues or expenses for inpatient hospital services provided under the state's plan approved under title XIX. Medicare's costs could not exceed what they otherwise would be under the medicare PPS systems.

This option would be limited to reimbursement systems that were carrying out demonstration on January 1, 1985 with the approval of the Secretary of Health and Human Services. This provision would become effective upon enactment.

Senate amendment

Similar provision except (a) requires the Secretary to approve such a waiver request and (b) includes demonstrations authorized under section 402 of the Social Security Amendments of 1967, (as amended by section 222(b) of the Social Security Amendments of 1972).

Conference agreement

The conference agreement includes the Senate amendment with a modification to strike the language concerning the effective date.

In addition, the conference agreement will extend the demonstration project known as "Assessment for Community Care Services" through September 30, 1986. The conferees note that this project, carried out by Monroe County Long Term Care Program, Inc. has pioneered in the development of home based alternatives to hospital and nursing home use which allow the delivery of more appropriate and economical care to medicare beneficiaries.

9. Four-year test for state waivers for certain states (Sec. 110)

Present law

Under present law, States may request a waiver of medicare's reimbursement rules for a statewide hospital reimbursement control system under section 1886(c) of the Social Security Act. A number of requirements must be met before such a waiver request is granted. One requirement is that the State demonstrate, to the Secretary of the Department of Health and Human Services' satisfaction, that the amount of medicare payments made under the waiver would not exceed the amounts that otherwise would have been paid over a 36-month period under Title XVIII, if the State were not under a statewide reimbursement waiver.

House bill

The House bill would extend the 36-month test period under section 1886(c)(1)(C) for a further 12 months. Therefore, the comparison period would be a 48-month period. The provision would apply only to states which had made a request for a waiver under 1886(c) prior to December 31, 1984, and whose request was approved. The Secretary would be prohibited from discontinuing payments under the State's system because the Secretary has reason to believe that the assurances for meeting cost effectiveness tests are not being (or will not be) met before July 1, 1986. The only State that meets these criteria is New Jersey. The provision would be effective upon enactment.

Senate amendment

The Senate amendment would prohibit the Secretary from discontinuing a State's waiver so long as the State takes appropriate steps by July 1, 1986, to assure the Secretary that its system will continue to meet the cost-effectiveness test. The provision would apply only to States which had made a request for a waiver under 1886(c) prior to December 31, 1984. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the House bill.

10. Special rule for treatment of depreciation and capital indebtedness for donations of State property to non-profit corporations (sec. 111)

Present law

Section 2314 of the Deficit Reduction Act of 1984 (DEFRA), P.L. 98-369, limited the basis for which medicare depreciation is allowed when a change of ownership occurs. The new owner's basis is the lesser of (1) the historical cost, net of depreciation (cost to the previous owner), or (2) the purchase price.

House bill

The House bill would provide a special rule for treatment of certain transfers. In the case of a hospital or skilled nursing facility that is donated by a State government (donor) to a non-profit corporation (donee), the basis from which capital-related costs to the donee is calculated would be the donor's historical cost (net of depreciation).

The provision would be effective as if it had been included originally in DEFRA.

Senate amendment

Similar provision, except it applies only to hospitals.

Conference agreement

The conference agreement includes the Senate amendment.

11. Report on impact or outlier and transfer policy on rural hospitals (sec. 112)

Present law

Present law requires that additional payments be made under the prospective payment system for hospitals when there is either an unusually long length of stay or the stay is excessively costly (both as defined by the Secretary).

House bill

The Secretary of Health and Human Services would be required to review the impact of the outlier and transfer polices under the PPS system as they relate to rural hospitals, particularly rural hospitals with less than 100 beds.

The Secretary would be required to report to Congress on findings of the review not later than May 1, 1986, and should include in this report recommendations on changes in these policies to the extent that they adversely affect rural hospitals. The provision would be effective upon enactment.

Senate amendment

No provision

Conference agreement

The conference agreement includes the House bill with a modification to change the due date of the report to October 1, 1986.

12. Information on impact of PPS payments on hospitals (sec. 113)

Present law

Under the Congressional Budget Act of 1974, the Congressional Budget Office (CBO) is entitled to the most recently available cost reports submitted by medicare participating hospitals to the Department of Health and Human Services. There is no requirement that the House of Representative's Committee on Ways and Means or the Senate's Committee on Finance receive cost report information on hospitals that participate in the medicare program.

House bill

The House bill would require the Secretary of Health and Human Services to make available to the Prospective Payment Assessment Commission (ProPAC), the Congressional Budget Office, the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the Senate, the most current information on the payments being made under the prospective payment system to individual hospitals.

The hospital specific information would be treated as confidential and would not be subject to further disclosure in a manner that would permit the identification of individual hospitals. The provision would be effective upon enactment.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill, with a modification to omit the House Committee on Ways and Means and the Senate Committee on Finance from, and to add the Congressional Research Service and the General Accounting Office to, the list of entities to receive current PPS payment information.

13. Indirect teaching adjustment related to independent clinic activities (sec. 710)

Present Law

For the first three years of the prospective payment system (PPS), a special exception is applied to hospitals which had traditionally been allowed direct billing under part B so extensively that it would have been disruptive to immediately require them to bill for all such services under part A. These hospitals are, in effect, allowed to have part of their PPS payments paid through part B billings and the remainder paid to the hospital under part A. The Health Care Financing Administration has ruled that in such split payment cases, the indirect teaching adjustment would apply only to the portion of the medicare payment that is paid through part A.

House bill

No provision.

Senate amendment

The provision would clarify that the split payment provision was only intended to provide a temporary billing accommodation for certain hospitals and that the indirect teaching adjustment should be applied as if the entire PPS payment had been made under part A. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment, with the following modifications. Part A services billed under part B under a waiver granted under this authority will be paid at 100 percent of the reasonable charge (or other applicable basis of payment) and the entity billing such services under part B must accept such payment as payment in full. Payment of the indirect teaching adjustment as if all services were billed under the PPS payment methods in part A, will be effective with the first hospital cost reporting period beginning on or after January 1, 1986. Payment or part A services billed under part B at 100 percent of reasonable charges and the requirement that the billing entity accept such payment as full payment will be effective for services provided on or after 10 days following enactment.

14. Coverage of psychologists' services (sec. 711)

Present law

Section 1861(b) of the Social Security Act includes the definition of the inpatient hospital services that are paid for by medicare "such other diagnostic or therapeutic items or services, furnished by the hospital or by others under arrangements with them made by the hospital, as are ordinarily furnished to inpatients either by such hospital or by others under such arrangements.

House bill

No provision.

Senate amendment

The provision would clarify that inpatient hospital services for which payments may be made under medicare part A would include diagnostic or therapeutic services provided by a psychologist. The provision would be effective upon enactment.

Conference amendment

The conference amendment does not include the Senate amendment.

15. Payments to sole community hospitals (sec. 711C)

Present law

Public Law 98-21 provided a special PPS payment formula for hospitals known as sole community hospitals that, due to special circumstances such as isolated location, are the sole source of inpatient services reasonably available in a given geographic area. Such hospitals are paid on the basis that all other PPB hospitals are paid during the fist year of the transition period: 75 percent based on the hospital specific rate and 25 percent on the national DRG rate. Unlike other hospitals under PPS, which will eventually be paid totally according to a national DRG rate, sole community hospitals will remain at the 75/25 ratio.

In a suit filed in 1984, Redbud Community Hospital, a sole community hospital in Clearlake, CA, challenged HHS's determination of its PPS rate, arguing that the rate did not take into account the costs of providing several new services that were incurred subsequent to its base year. The United States District Court for the Northern District of California issued a preliminary injunction on July 30, 1984, directing the HHS Secretary to issue regulations taking into account any extraordinary and unusual costs not necessarily reflected in a hospital's base year costs but which, if not considered in estimating the hospital specific rate, were likely to result in a distortion in that rate, and taking into account the special needs of sole community hospitals and the unique effects of their status on the hospital specific rate. HHS issued such regulations on July 1, 1985, but withdrew them on July 31, 1985, after Supreme Court Justice William Rehnquist stayed the order of the U.S. District Court. There is a small number of other sole community hospitals that also consider their PPS payments to be inadequate because of costs incurred subsequent to their base year due to the addition of new facilities or services.

House bill

No provision.

Senate amendment

a. Payment provision

The Senate amendment would require the Secretary to provide an adjustment to the PPS rates to reasonably compensate sole community hospitals that experience a significant increase in operating costs in cost reporting periods after the base period due to the addition of new inpatient facilities or services (including the opening of a special care unit). Such payment adjustment would be applied to the cost reporting period during which the cost increase was incurred

and to subsequent cost reporting periods as may be necessary to reasonably compensate the hospital for the increased costs.

b. Study

The Senate amendment would require the HHS Secretary to complete a study by January 1, 1987, of the effects of this provision, including recommendations on a permanent mechanism for needed expansions of sole community hospitals' services and the hospital specfic rates of such hospitals.

The provision would be effective for payments for cost reporting periods beginning on or after October 1, 1983. The provision would expire on September 30, 1989.

Conference agreement

The conference agreement includes the Senate amendment but deletes the language relating to case mix changes, which is superfluous. The conferees intend that this provision will remedy problems for hospitals such as Redbud that have added new inpatient services subsequent to their base years.

16. Sense of the Senate with respect to inpatient hospital deductible (sec. 711B)

Present law

The Secretary of HHS announced that the inpatient hospital deductible for calendar year 1985 will be $492.

Medicare law specifies the formula to be used to determine the inpatient hospital deductible amount, based on the average costs of a day of hospital care. Reduced lengths of stay and lower hospital occupancy rates have reduced costs per admission but have increased the costs of care per day.

House bill

No provision.

Senate amendment

Expresses the sense of the Senate that the Committee on Finance should report legislation on the annual increase in the deductible so that it is more consistent with annual increases in medicare payments to hospitals. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment, with the understanding that this provision expresses only the sense of the Senate.

17. Promulgation of inpatient hospital deductible (sec. 716A)

Present law

The Secretary of HHS announced on September 30, 1985, that the inpatient hospital deductible for calendar year 1986 will be $492, an increase of 23 percent over the corresponding 1985 figure. Medicare law specifies the formula to be used to determine the deductible amount.

The Secretary must publish a notice of the projected increase by October 1 of each year.

House bill

No provision.

Senate amendment

The Senate amendment requires the Secretary to publish a notice of the projected increase by September 15 of each year. This provision would be effective for calendar years after 1985.

Conference agreement

The conference agreement includes the Senate amendment.

18. ProPAC expansion (sec. 142 and 734)

Present law

The Social Security Amendments of 1983 (P.L. 98-21) provided for the establishment of the Prospective Payment Assessment Commission (ProPAC) consisting of 15 members appointed by the Director of the Office of Technology Assessment, generally to serve for 3-year terms.

House bill

The House bill would expand current ProPAC membership by two, to be appointed no later than January 1, 1986. (See item 40 also for provisions relating to physician payment activities or ProPAC.)

Senate amendment

The provision would expand ProPAC membership by two, to be appointed no later than 60 days after enactment, for 3-year terms. This provision would become effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment. It is the intent of the conferees that the two new ProPAC members would represent nurses and rural hospitals.

19. Extension and payment for hospice care (sec. 121)

Present law

Under current law, individuals who are entitled to medicare part A benefits and who are certified to be terminally ill may elect to receive part A reimbursement for hospice care services, in lieu of certain other services. Public Law 97-248, the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), which authorized this hospice benefit, mandated reports to the Congress by the Secretary of Health and Human Services on September 30, 1983, (regarding the Department's hospice demonstration project) and January 1, 1986 (evaluating the hospice benefit). Current authority for the medicare hospice benefit is scheduled to sunset on October 1, 1986.

In implementing the TEFRA hospice benefit, the Department of Health and Human Services established a prospective payment system and set daily rates for each of four levels of hospice care. Public Law 98-617 increased the routine home care payment rate by approximately $7.00 per day for the fiscal year beginning October 1, 1984, and required the Secretary of HHS to review and adjust the hospice rates annually, beginning October 1, 1985.

The report on the hospice demonstration project, which was to have been submitted by September 30, 1983, has not been received by the Congress. Cost data will not be available to the Secretary in order for the rates to the updated by October 1, 1985.

House bill

The bill would repeal the sunset provision of present law. Beginning January 1, 1986, each of the daily payment rates for hospice care would be increased by $10.00, an amount which is slightly less than the Congressional Budget Office estimate of the savings per day attributable to a medicare hospice election. The Secretary would be given one additional year, until October 1, 1986, to review and adjust the hospice rates and to report to the Congress on the adequacy of the rates in insuring participation in medicare by an adequate number of hospice programs. The repeal of the sunset provision would be effective on enactment of the bill.

Senate amendment

Identical provision.

Conference agreement

The conference agreement includes the House bill.

20. Limiting the penalty for late enrollment in part A (sec. 122)

Present law

Part A coverage under medicare is available on a voluntary basis to individuals 65 or over who are not otherwise entitled to coverage. These individuals may obtain medicare part A coverage by paying a monthy premium. Anyone purchasing part A coverage after the third month after the month in which he becomes eligible is charged a late penalty of 10 percent of the standard premium for each 12 months he is late in enrolling; that is, for each 12 months during which he could have been, but was not enrolled. This penalty is paid each and every month of coverage for the rest of the beneficiary's life.

House bill

The House bill would limit the part A premium penalty to 10 percent no matter how late an individual enrolled, and the period during which the penalty is paid would be limited to twice the number of years enrollment was delayed. At the end of this period, the premium would revert to the standard monthly premium in effect at that time. For example if the individual enrolled one year late, the penalty would be 10 percent paid for two years; for late enrollment for two years, the penalty would be 10 percent a year for four years, and so on, after which it would revert to the standard premium amount.

The House bill would also apply to medicare beneficiaries currently paying a part A premium penalty. Months before, during or after January 1986, in which such an individual was required to pay a premium penalty, would be taken into account in determining the month in which the premium would no longer be subject to a penalty increase.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill, with a modification that the effective date will be April 1, 1986.

21. Medicare coverage of, and application of hospital insurance tax to, newly hired state and local government employees (sec. 123)

Present law

Under present law, there is no Federal requirement that state and local government employees pay the hospital insurance tax. Most state and local government employment is already covered as a result of voluntary agreements for such coverage entered into by the States. About 25-30 percent of such employment is not currently covered.

House bill

The House bill would extend medicare coverage on a mandatory basis for all state and local government employees hired subsequent to December 31, 1985. The employers and their employees would become liable for the hospital insurance portion of the FICA tax and the employees would earn credit toward medicare eligibility based on their covered earnings.

Senate amendment

The Senate amendment is similar, but would include current, as well as newly

hired, employees and would become effective October 1, 1986.

22. Responsibilities of medicare hospitals in emergency cases (sec. 124)

Present Law

Hospitals that participate in medicare have to meet defined conditions of participation and enter into participation agreements. The participation agreement contains no specific requirements relating to the appropriate treatment of emergency patients, including non-medicare patients.

a. Requirements

(1) Medical screening

House bill

The House bill would require all participating hospitals with emergency departments to provide an appropriate medical screening examination for any individual who requests it (or has a request made on his behalf) to determine whether an emergency medical condition exists or if the patient is in active labor.

Senate amendment

The Senate amendment contains a similar provision, except it would require such examination or treatment only if it is within the capability of the hospital's emergency department. In addition, it provides that these medical screening requirements would not apply if providing a medical screening examination would delay or otherwise be contrary to prompt medical treatment of the individual's medical condition.

Conference agreement

The conference agreement includes the Senate amendment's provision that such examination or treatment is required of the hospital only if it is within the capability of the hospital's emergency department; the conference agreement does not include the Senate amendment's provision that the medical screening requirements would not apply if they would delay or be contrary to prompt treatment.

(2) Necessary stabilization

House bill

The House bill provides that all participating hospitals must, when a patient is found to have an emergency condition or to be in active labor (i) provide further examination and treatment within their competence to stabilize the medical condition or provide treatment for the labor, unless such treatment is refused, or (ii) provide an appropriate transfer to another medical facility in accordance with a defined standard.

Senate amendment

The Senate amendment contains a similar provision, except that such a determination could be made through an appropriate medical screening examination or otherwise. In addition, the Senate amendment does not require the hospital to provide for transfer to another medical facility if the transfer is refused.

Conference agreement

The conference agreement includes the House bill's language concerning the hospital's determination of an emergency medical condition or active labor. The conference agreement includes the Senate amendment's provision that transfer is not required if refused, with a clarifying amendment that examination, treatment or transfer could be refused by either the patient or a person responsible for the patient. The conference agreement also provides that if the individual (or a legally responsible person acting on the individual's behalf) refuses further medical examination and treatment or refuses a transfer, the hospital's obligation with respect to further examination and treatment or with repect to transfer is discharged.

(3) Restricting transfers until patient is stabilized

House bill

A hospital may not transfer a patient who has not been stabilized or is in active labor unless: (i) a physician has signed a certificate that, based on the information available at the time and using reasonable standards, the medical benefits to be obtained from appropriate medical treatment at another facility outweigh the risks of transfer, i.e., the receiving facility has agreed to accept the patient, has space and qualified personnel available for his treatment and is provided with medical examination and treatment records from the transferring hospital, and the transfer is made by proper personnel using equipment that meets health and safety standards.

Senate amendment

The Senate amendment includes a similar provision, except prohibits a hospital from transferring a patient who has not been stabilized or is in active labor unless: (i) the patient (or member of the patient's family if the patient is an unemancipated minor or is unable to communicate) or (ii) a physician or other qualified medical personnel when a physician is not available in the emergency department has made a determination that the benefits of a transfer outweigh the risks, and (iii) the transfer is an appropriate transfer.

Conference agreement

The conference agreement includes the Senate amendment provision conditioning a transfer on patient (or member of the patient's family) approval, with an amendment that a person legally responsible for the patient could also request a transfer. The conference agreement includes the House bill provision requiring physician certification for transfer, but includes the Senate amendment provision that such certification could also be made by other qualified medical personnel when a physician is not (adding the word "readily") available in the emergency department.

(4) Definition of an appropriate transfer

House bill

Defines an appropriate transfer as one:

(i) in which the receiving facility has available space and qualified personnel for the treatment of the patient, has agreed to accept transfer of the patient and to provide appropriate medical treatment, and is being provided appropriate medical records (or copies) of the examination and treatment provided by the transferring facility;

(ii) in which the transferring hospital provides the receiving hospital with appropriate medical records (or copies) of the examination and treatment affected the transferring hospital;

(iii) in which the transfer is made through qualified personnel and transportation equipment, including medically appropriate life support measures during the transfer; and

(iv) which meets other requirements the Secretary of HHS may find necessary.

Senate amendment

The Senate amendment contains a similar provision except:

(i) also provides that if the patient's medical condition is sufficiently serious to require an immediate transfer, the receiving facility must be notified of the transfer as soon as practicable under the circumstances;

(ii) no provision;

(iii) provides that the transfer be made by qualified personnel and transportation equipment as required, including necessary and medically appropriate life support measures; and

(iv) identical provision.

Conference agreement

The conference agreement includes:

(i) the House bill, which does not include notification of the transfer as soon as practicable;

(ii) the House bill, which requires the transferring hospital to provide the receiving hospital with appropriate medical records; and

(iii) the Senate amendment regarding qualified personnel and transportation equipment.

b. Enforcement

House bill

The House bill provides that a hospital that fails to meet these requirements would have its medicare participation agreement terminated. In addition, a participating hospital that knowingly violates these requirements and the responsible physician in the hospital with respect to such a violation are each subject to a civil monetary penalty of not more than $25,000 for each violation. For purposes of this section, a "responsible physician" means a physician who is employed by, or under contract with, the participating hospital, and acting as such an employee or under such contract, has professional responsibility for the provision of examinations or treatments for the individual, or transfers of the individual with respect to which the violation occurred.

Any person who suffers personal harm, and any medical facility which suffers a financial loss as a direct result of a participating hospital's violation of these requirements, may bring a civil action, in an appropriate Federal district court, against the participating hospital, for damages and other appropriate relief. No civil action may be brought more than two years after the violation.

Senate amendment

The Senate amendment provides that if a hospital knowingly and willfully, or negligently, fails to meet the requirements of this provision, the hospital would be subject to (1) termination of its medicare provider agreement, or (2) at the option of the Secretary, suspension of the medicare provider agreement for an appropriate length of time, as determined by the Secretary, after reasonable notice to the hospital and to the public.

Conference agreement

The conference agreement includes the House bill, with a modification to permit the Secretary to terminate or suspend a hospital's provider agreement for "knowingly and willfully, or negligently" failing to meet the requirements of this provision in addition to the civil monetary penalties and civil enforcements.

The civil enforcement provision was restructured to clarify its application. In addition, the courts are directed, on the issue of damages, to apply the law of the State in which the violating hospital is located, for actions brought by a harmed individual or a hospital which suffers a financial loss. The language allowing courts to grant "other appropriate relief" was also modified to read "other equitable relief as appropriate", to

give the courts clearer direction that such relief should be within the courts regular equitable powers and should be granted for the purpose of remedying the violation or deterring subsequent violations.

c. Definitions

(1) Emergency medical condition

House bill

The House bill defines "emergency medical condition" to mean a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that lack of immediate medical attention could result in placing the patient's health in serious jeopardy, serious impairment to bodily functions, or serious dysfunction of any bodily organ or part.

Senate amendment

The Senate amendment contains an identical definition.

(2) Active labor

House bill

The House bill defines "active labor" to mean labor when delivery is imminent, there is inadequate time to safely transfer the patient to another hospital, or a transfer could threaten the health and safety of the patient or the unborn child.

Senate amendment

The Senate amendment includes a similar definition, except provides that there is inadequate time to safely transfer the patient prior to delivery, and does not include that a transfer could threaten the health and safety of the patient or the unborn child.

Conference agreement

The conference agreement includes the House bill provision concerning the threat to the health and safety of the patient or unborn child and the Senate amendment provision regarding inadequate time to transfer prior to delivery.

(3) Participating hospital

House bill

The House bill defines "participating hospital" to mean a hospital that has a provider agreement under section 1866 of medicare and has obligated itself to comply with the requirements of this provision.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House definition of "participating hospital."

(4) To stabilize

House bill

The House bill defines "to stabilize" to mean, with respect to a medical condition, to provide such medical treatment of the condition as may be necessary to assure that no material deterioration of the condition is likely to result from the transfer of the individual from a facility.

Senate amendment

The Senate amendment defines "to stabilize" to mean, with respect to an emergency medical condition, to provide such medical treatment of the condition as may be necessary under the circumstances and within the capability of the hospital (A) so that the transfer of the individual will not, within reasonable medical probability, result in substantial risk of death or serious impairment as a direct result of the transfer, or (B) in order to determine that the benefits obtained from providing appropriate medical treatment at another medical facility, taking into account potential risks involved in the transfer, outweigh the potential benefits to the individual's medical condition from not affecting the transfer.

Conference agreement

The conference agreement includes the House bill with two modifications from the Senate amendment: the condition must be an emergency medical condition, and the assurance that no material deterioration of the medical condition is likely to result must be within reasonable medical probability.

(5) Stabilized

House bill

The House bill defines "stabilized" to mean, with respect to a medical condition, that no material deterioration of the condition is likely to result from the transfer of the individual from a facility.

Senate amendment

The Senate amendment defines "stabilized" to mean, with respect to an emergency medical condition, that such medical treatment has been provided as may be reasonably necessary under the circumstances and within the capability of the hospital (A) so that the transfer will not, within reasonable medical probability, result in substantial risk of death or serious impairment as a direct result of the transfer, or (B) in order to determine that the benefits obtained from providing appropriate medical treatment at another medical facility, taking into account potential risks involved in the transfer, outweigh the potential benefits to the individual's medical condition from not affecting the transfer.

Conference agreement

The conference agreement includes the House bill with the same two modifications described in Item (4) above.

(6) Transfer

House bill

The House bill defines "transfer" to mean the movement (including discharge) of a patient outside a hospital's facilities at the direction of any person employed by (or affiliated or associated, directly or indirectly, with) the hospital, but does not include such movement of a patient who has been declared dead or leaves the facility without the permission of any such person.

Senate amendment

The Senate amendment contains an identical definition.

d. Preemption

House bill

The House bill provides that this provision does not preempt State or local law requirements respecting hospitals, except if such requirements directly conflict with a requirement of this provision.

Senate amendment

The Senate amendment contains a similar provision, except does not specify that the State or local law requirements must apply only to hospitals.

Conference agreement

The conference agreement includes the Senate amendment.

e. GAO study

House bill

No provision.

Senate amendment

The Senate amendment requires the Comptroller General to conduct a study, and report to Congress within 2 years after enactment, on problems created by hospitals that transfer patients without providing necessary emergency medical treatment. The study must include a survey and assessment of the extent of the problems; a survey of the available remedies to such problems and an assessment of the frequency and effectiveness with which such remedies are utilized; an assessment of the effectiveness of the remedy provided by this new provision; and recommendations for changes in Federal law, including medicare and possibly medicaid.

Conference agreement

The conference agreement does not include the Senate amendment.

f. Regulations

House bill

No provision.

Senate amendment

The Senate amendment requires the Secretary of HHS to promulgate final regulations to implement this new provision within 180 days of enactment, and to report to Congress on the methods to be used for monitoring and enforcing compliance with this provision.

Conference agreement

The conference agreement does not include the Senate amendment regarding regulations, but does include the Senate amendment requiring the Secretary to report to Congress on monitoring and enforcement within 6 months after the enactment date.

g. Effective date

House bill

The House bill provides an effective date of October 1, 1985.

Senate amendment

The Senate amendment provides an effective date of April 1, 1986.

Conference agreement

The conference agreement includes the modification that the effective date would be 90 days after enactment.

23. Improve access to skilled nursing facilities (sec. 722)

Present law

Medicare provides skilled nursing facility (SNF) services under the Hospital Insurance (Part A) program.

a. Payment rates.—SNF's are reimbursed on the basis of reasonable costs actually incurred, subject to limits. Medicare's final payment to a SNF is determined retrospectively only after a SNF has itemized its costs for a full year on a medicare cost report. Separate reimbursement limits are applied to freestanding SNFs and hospital-based SNFs. For freestanding facilities, limits are established at 112 percent of the mean operating cost of urban and rural freestanding facilities respectively. Limits for urban hospital-based facilities are equal to the urban freestanding facility limits plus 50 percent of the difference between the freestanding limit and 112 percent of mean operating costs for hospital-based facilities. A similar calculation, based on costs of rural facilities, is made for rural hospital-based facilities. Cost differences between hospital-based and freestanding facilities attributable to excess overhead allocations resulting from medicare reimbursement principles are recognized as an add-on to the limit for hospital-based facilities.

b. Waiver of liability.—Current medicare law allows part A providers to collect payment from intermediaries after a claim has

been denied because the items or services were found not to be medically reasonable and necessary or because services where determined to be custodial care. A finding must be made that neither the beneficiary nor the provider knew or could reasonably have been expected to know that the items or services were not covered. However, providers can earn a presumption, or waiver, that allows them not be held liable for uncovered services they provided if the provider meets five procedural criteria. By meeting the criteria, providers are essentially presumed not to have known that the service would not be covered and their liability for paying for that service therefore can be waived. This is often referred to as the "waiver of liability." Under current administrative practice, a SNF is judged to meet these criteria and to have its liability for certain uncovered claims waived if its denial rate does not exceed 5 percent. The denial rate is determined by the percentage of days billed by the provider as covered that HCFA later determines to be noncovered when the bill is reviewed. Under the waiver policy, SNFs with a denial rate of 5 percent or less are paid for these denied services.

In a proposed rule published February 12, 1985, HCFA would eliminate the criteria for a favorable presumption and determine payment on a case-by-case basis. Under the rule, SNFs would be liable for payment for 100 percent of all claims which were judged to be uncovered after HCFA review.

House bill

No provision.

Senate amendment

The Senate amendment provides that SNFs providing less than 1,500 days of care per year to medicare patients in the preceding year would have the option of being paid a prospective rate set at 105 percent of the regional mean for all SNFs in the region. The rate would be separately calculated for urban and rural areas and include all non-ancillary costs, including capital and return on investment if medicare pays SNFs for a return on equity capital. Those accepting the prospective rate would be required to file a minimal cost report. With respect to ancillary services, the Secretary would be allowed to pay for those services on the basis of reasonable costs or reasonable charges. The Secretary would be required to reduce the number of intermediaries to ten by April 1, 1987. The Secretary would be required to maintain the five percent favorable presumption waiver of liability until 30 months after enactment of this legislation. This provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment, with the following modifications. The prospective per diem rates will be adjusted to reflect wage differences between urban areas and between rural areas within each region. The prospective urban or rural regional per diem rate for a skilled nursing facility cannot exceed the per diem cost limit otherwise applicable to that facility, adjusted to include average urban or rural per diem capital costs and return on equity if medicare pays SNFs for a return on equity capital under the normal reimbursement rules. Thus, the SNF's prospective rate cannot exceed its cost limit adjusted for capital costs. Prospective payment on this basis will take effect for facilities that elect such payment for cost reporting periods beginning on or after October 1, 1986. The conference agreement does not require the Secretary to reduce the number of fiscal intermediaries serving skilled nursing facilities.

24. Limitation on direct medical education payments (sec. 107)

Present law

On July 5, 1985, the Administration issued final regulations freezing the amount medicare reimburses providers for their direct costs of approved medical education activities, for cost reporting periods beginning on or after July 1, 1985.

The freeze permits payment based on the lesser of a provider's allowable direct medical education costs for the current cost reporting period or for a base year (the provider' cost reporting period beginning on or after October 1, 1983), adjusted for changes in medicare utilization.

House bill

The House bill would retroactively prohibit implementation of the regulations imposing the one-year freeze.

Senate amendment

a. Payment level

The Senate amendment would limit payments to hospitals for their direct costs of approved medical education activities for the first cost reporting period beginning on or after July 1, 1985. The limit would be the provider's approved medical education costs during the cost reporting period ending prior to October 1, 1985, updated to reflect general increases in the cost of approved medical educational activities which took place between the end of the prior accounting period and the beginning of the freeze accounting period.

b. Residency year limitation

Beginning with the first cost reporting period beginning on or after July 1, 1986, the direct costs of medical education activities associated with those residents who are either board eligible or have completed more than five years of training will no longer be allowable, with the exception of geriatric fellowships which meet criteria established by the Secretary. The exception for geriatric fellowships expire July 1, 1991.

c. Limitations regarding certain foreign medical graduates

Also beginning with a hospital's first cost reporting period beginning on or after July 1, 1986, only 66 percent of the direct educational costs of graduates of medical schools not accredited by the Liaison Committee on Medical Education (LCME), or graduates of accredited schools of osteopathy, dentistry, or podiatry will be considered for allowable cost determinations. The allowable percent for these so-called "foreign medical graduates" would be reduced to 33 percent in the subsequent reporting and to zero percent thereafter.

d. 1986-1987 payments

For the year beginning July 1, 1986, the amounts recognized as reasonable would include, on an average cost per intern and resident basis, the lesser of (1) two-thirds the number of interns and residents who are not graduates of such accredited schools but two began their formal training required for initial board eligibility in their specialty prior to July 1, 1986, or (2) two-thirds the number of interns and residents who are not graduates of such accredited schools but for whom the hospital received direct medical education payments from medicare for the year beginning July 1, 1985.

e. 1987-1988 payments

For the year beginning July 1, 1987, the amounts recognized as reasonable would include, on an average cost per intern and resident basis, the lesser of (1) one-third the number of interns and residents who are not graduates of such accredited schools but who began their formal training required for inital board eligibility in their specialty prior to July 1, 1986, or (2) one-third the number of interns and residents who are not graduates of such accredited schools but for whom the hospital received direct medical education payments from medicare for the year beginning July 1, 1985.

f. Special 50 percent foreign medical graduate rule

Hospitals whose unaccedited medical school graduates represent more than 50 percent of their students as of October 1, 1985, would receive the 66 percent funding for the first two reporting periods beginning on or after July 1, 1986, 33 percent funding for the three subsequent periods, and no funding thereafter. The provision also requires the Secretary and the General Accounting Office to study and report on various aspects of graduate medical education. The provision would be effective for cost reporting periods beginning on or after July 1, 1985.

g. Nursing and other health professions study

The Senate amendment would require the Secretary to conduct a study and report to Congress prior to December 31, 1986, on approved nursing and other health professions educational activities for which medicare reimburses hospitals. The study must address data on the types of such programs and the number of programs and students; relationships between hospitals and the schools with which the programs are affiliated; the types and amounts of expenses for which reimbursement is made; and the financial and other contributions which accrue to the hospital as a consequence of having such programs.

h. Geriatric fellowship study

The Senate amendment would require the Secretary to conduct a study and report to Congress prior to July 1, 1990, on (1) the advisability of continuing the exemption for geriatric fellowships from the limitation on years of training for purposes of determining medicare payments for direct medical education costs, (2) the advisability of expanding the exemption to cover other educational activities, and (3) the adequacy of the supply of faculty in the field of geriatrics.

i. GAO study

The Senate amendment would require the General Accounting Office to conduct a study and report to Congress prior to December 31, 1986, on differences in medicare payments to teaching versus nonteaching hospitals, identifying the components of such payments and accounting, to the extent feasible, for any differences between the amounts of the payment components in teaching and nonteaching settings. It would provide that GAO may use a sample of teaching hospital patients and other data sources deemed appropriate, and would require GAO to control to the extent feasible for differences in a number of factors which could affect the comparability of patients and of payments between teaching and nonteaching settings. It would require that this study be coordinated with the study of

teaching physicians' services required under section 2307(c) of the Deficit Reduction Act of 1984.

j. Waiver of Paperwork Reduction Act

The Senate amendment would provide that Chapter 35 of Title 44, U.S. Code (Paperwork Reduction) would not apply to information required to carry out this provision.

Conference agreement

a. Payment level

The conference agreement includes the Senate amendment with a modification as follows.

Hospital-specific approved FTE resident amounts will be determined based on data on direct graduate medical education (GME) costs and numbers of interns and residents, from hospital cost reporting periods beginning in fiscal year 1984. These amounts will then be updated according to the specifications described in the July 5, 1985 regulation (amending 42 CFR Parts 405 and 412) limiting medicare payments for direct medical education costs; and will then be increased by an additional one percent.

This methodology replaces the current reasonable cost methodology for determining hospitals allowable costs, in calculating hospitals' medicare payments for graduate medical education activities. (Medicare will continue to reimburse hospitals on a cost basis for the direct medical education costs associated with nursing and allied health training activities. This amendment prohibits the Secretary from placing limitations on the allowable costs of such activities.)

A hospital's medicare payments will be determined by multiplying its approved FTE resident amount by the number of its full-time equivalent residents, and then by multiplying that product by the proportion of total inpatient days used by medicare patients.

For those hospitals whose cost reporting periods do not coincide with the normal July 1 through June 30 residency year, the hospital's FTE count will be determined by multiplying the number of FTE residents in the first residency year falling within the cost reporting period by the proportion of the residency period falling within that cost reporting period, and adding to this the number of FTE residents in the second residency year falling within the cost reporting period multiplied by the proportion of that residency year falling within the cost reporting period.

For hospitals' cost reporting periods beginning on or after July 1, 1986, the approved FTE resident amounts will be determined by applying the increase in the Consumer Price Index for Urban Consumers to the amounts allowed in the previous cost reporting period.

b. Residency year limitations

The conference agreement includes the Senate amendment with a modification as follows.

Limitations are placed on the way in which residents are counted toward full-time equivalency, once they have reached a specified point in their training. On or after July 1, 1986, hospitals will receive 100 percent of their approved FTE resident amounts for each year of a resident's training that is within the minimum number of years of formal training necessary to satisfy specialty requirements for initial board eligibility, plus one year, to a maximum of five years.

On or after July 1, 1986, and before July 1, 1987, medicare payment for training years exceeding these limits will be made at 75 percent of the rate that would otherwise be recognized. On or after July 1, 1987, payment will be made at 50 percent of the rate that would otherwise be recognized. Up to two years of training in a geriatric residency or fellowship program will be paid for at 100 percent of the rate that would otherwise be recognized, and will be excluded from the 5-year limit.

c. Limitations regarding certain foreign medical graduates

The conference agreement includes the Senate amendment with a modification as follows.

No limitations are applied with respect to medicare payment for approved FTE resident amounts for FMGs, except as follows. Effective July 1, 1986, an FMG will not be counted as a resident unless the individual has passed the Foreign Medical Graduate Examination in Medical Sciences (FMGEMS), except under specified circumstances. A one-year transition period is provided for current FMG residents. From July 1, 1986 through June 30, 1987, such an FMG will be counted as a resident at a rate equal to one-half of the rate at which the individual would otherwise be counted. An FMG who does not pass the FMGEMS during that year would not be counted at all during subsequent years, unless he or she later passed the test.

d. 1986-1988 payments

The conference agreement does not include the Senate amendment.

e. 1987-1988 payments

The conference agreement does not include the Senate amendment.

f. Special 50 percent foreign medical graduate rule

The conference agreement does not include the Senate amendment.

g. Nursing and other health professions study

The conference agreement includes the Senate amendment.

h. Geriatric fellowship study

The conference agreement includes the Senate amendment with a modification as follows.

The conferees note that the Secretary is required by Public Law 99-158 to conduct a study of Health Personnel Needs for the Elderly. The conferees direct the Secretary to coordinate that study with the one mandated by this act.

i. GAO study

The conference agreement includes the Senate amendment with a modification as follows.

The GAO is required to study the differences in the amounts of medicare payments made with respect to patients in teaching and nonteaching hospitals, and also to study variations in such payments across teaching hospitals, taking into account the same variables and factors.

j. Waiver of paperwork reduction act

The conference agreement includes the Senate amendment.

k. Part B billing

The conference agreement includes a requirement that the Secretary establish by July 1, 1987, a system which provides for a unique identifier for each physician who furnishes services for which payment may be made under medicare. This system is required in order to enable the Secretary to effectively enforce the current law prohibition on part B billing by interns and residents in approved training programs for services within the scope of those programs. This capability is of particular importance in light of the limits on allowable direct GME costs established by this legislation.

l. Report on uniformity of approved FTE resident amounts

The conference agreement includes a requirement that the Secretary report to Congress before December 31, 1987, on the advisability of revising approved FTE resident payment amounts across hospitals to provide for greater uniformity, and on how such revisions should be implemented if advised.

m. Study on foreign medical graduates

The conference agreement includes a requirement that the Secretary study and report to Congress by December 31, 1987 on the use of FMGs for the provision of health care services to medicare beneficiaries. The study should evaluate cost, quality and access issues with respect to services provided by FMGs, and should address the impact on costs of and access to these services in the event of a phase-out of medicare direct GME payments for FMGs.

n. Changes in cost allocation methods

Certain hospital reimbursement systems that received waivers from medicare have used methods of allocating administrative and general costs that are different from those required by the medicare hospital cost reporting forms. The conferees are concerned that, where these alternative allocation methods are in use, the base year direct GME costs used to determine the approved FTE resident amounts established by other provisions of this legislation, may be understated.

The conferees direct the Secretary to permit changes in these alternative allocation methods. The conferees further direct the Secretary to adjust the regional standardized payment amounts and the hospital-specific amounts to account for the overstatement of these amounts due to the method of allocation of overhead used by teaching hospitals in the base period.

25. Moratorium on medicare laboratory payment demonstration

Present law

Pursuant to demonstration authority of present law, the Secretary has proposed to experiment with competitive bidding as a method of purchasing clinical laboratory services under the medicare program. Independent laboratories have expressed the concern that under the experiments, unsuccessful bidders might not be eligible to participate in the medicare program.

House bill

No provision.

Senate amendment

The provision would postpone the demonstrations until December 31, 1986 with the exception that the design of and site selection for such demonstrations can proceed. During this moratorium, representatives of the laboratory industry could conduct a study in collaboration with the Secretary and the U.S. General Accounting Office, to determine whether there is a less disruptive method of utilizing competitive market forces in setting medicare payment levels—e.g., by giving medicare access to laboratory fee schedules that have been established in competing for the business of other large purchasers. If the study is conducted, the

Secretary and the GAO shall provide the study and their comments on it to the committees of jurisdiction. This provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment. It is the intent of the conferees that if a study is conducted the Secretary will assist the industry in the conduct of the study by providing data and technical assistance as necessary. The GAO's role is intended to be consultative rather than participatory with respect to the conduct of the industry study.

26. Extend home health waiver of liability

Present law

Present medicare law allows part A providers to collect payment from intermediaries after a claim has been denied because the items or services were found not to be medically reasonable and necessary or because services were determined to be custodial care. A finding must be made that neither the beneficiary nor the provider knew or could reasonably have been expected to know that the items or services were not covered. Under current administrative practice, providers can be presumed to meet this test if they meet certain criteria. The principle criterion for home health agencies is that its denial rate does not exceed 2.5 percent. The denial rate is determined by the percentage of days billed by the provider as covered that HCFA later determines to be noncovered when the bill is reviewed. Under this waiver of liability policy, home health agencies with a denial rate of 2.5 percent or less are paid for these denied services.

In a proposed rule published Feburary 12, 1985, HCFA would eliminate the criteria for a favorable presumption and determine payment on a case-by-case basis. Under the rule, home health agencies would be liable for payment for claims which were judged to be uncovered after HCFA review.

House bill

No provision.

Senate amendment

The provision would require the Secretary to maintain the 2.5 percent waiver of liability policy for home health agencies from the date of enactment until 12 months after the consolidation of claims processing for home health agencies, that is, when all ten home health agency fiscal intermediaries begin operations. This provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment.

27. Home health regulation moratorium

Present law

Prior to the recent publication of final regulations, reimbursement for home health services was limited to the 75th percentile of the average costs per visit incurred by all home health agencies. Separate limits were established for each type of service (e.g., skilled nursing, home health, and physical therapy); however, they were applied in the aggregate to each home health agency based on its mix of services.

The Administration has revised, in regulations published July 5, 1985, the home health cost limit methodology. For cost reporting periods beginning on or after July 1, 1985, the limits are set at 120 percent of the mean and would be applied separately to each type of service. For cost reporting periods beginning on or after July 1, 1986, the limits are to be reduced to 115 percent of the mean. For cost reporting periods beginning on or after July 1, 1987, the limits are to be set at 112 percent of the mean.

House bill

No provision.

Senate amendment

The provision would delay implementation of the July 5 regulations until July 1, 1986. The provision would become effective July 1, 1985.

Conference agreement

The conference agreement includes the Senate amendment with a modification as follows:

The modification specifies that for cost reporting periods beginning on or after July 1, 1985, the limits are set at 120 percent of the mean. For cost reporting periods beginning on or after July 1, 1986, the limits are to be set at 115 percent of the mean and for cost reporting periods beginning on or after July 1, 1987 the limits are to be set at 112 percent of the mean. The statute also directs the Secretary to provide for an adjustment to these limits as they apply to hospital-based home health agencies, to account for the higher administrative and general costs incurred by such agencies.

The Secretary is precluded from applying the limits separately for each type of service. Instead, the Secretary would be required to continue to allow agencies to aggregate these limits and apply them to aggregated costs. The Comptroller General is required to report to Congress by September 1, 1986 on the appropriateness of applying the cost limits discipline-by-discipline, rather than through aggregation. The conferees expect to examine this issue after submission of the GAO report.

28. Studies relating to physical therapists and other professionals

a. Study of physical therapists' office requirements

Present law

Under current law, part B of medicare covers the services of a qualified physical therapist in independent practice when furnished by him or under his direct supervision in his office or in the patient's home. These services must be prescribed by a physician and furnished pursuant to a written plan of treatment established by a physician or a qualified physical therapist.

The Secretary is required, under present law, to establish conditions that an independently practicing physical therapist must meet in order to receive medicare reimbursement. The Secretary, by regulation, requires that a physical therapist in independent practice maintain an office space with the necessary equipment to provide an adequate program of physical therapy. This requirement is applied even to those therapists who operate exclusively in the beneficiary's home.

House bill

No provision.

Senate amendment

The Senate amendment is required to study the requirement that independently practicing physical therapists who operate exclusively in beneficiaries' homes maintain fully-equipped offices. The report would be due April 1, 1986. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment with a modification that specifies the report is due to Congress prior to October 1, 1986.

b. Study of home health agency supervision

Present law

The medicare law requires that a physician or registered nurse supervise patient care services provided by a home health agency.

House bill

No provision.

Senate amendment

The Secretary is required to examine the question of whether other health care professionals (e.g., physical therapists, occupational therapists, and speech-language pathologists) may be qualified to supervise patient care services provided by a home health agency. Further, the Secretary would be required to specify criteria and conditions for which they could fulfill the supervisory role. The report would be due April 1, 1986. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment with a modification that specifies the report is due to Congress prior to October 1, 1986.

29. Extension of working aged provisions to individuals over 69

Present law

The Age Discrimination in Employment act (ADEA) requires employers of 20 or more people to offer employees and their spouses age 65-69 the same health insurance coverage they offer to younger employees and under the same conditions.

If the older employee chooses the employer's plan, medicare becomes the secondary payor if the employer plan does not pay full benefits.

If the older employer chooses not to participate in the employer's plan, medicare will be the primary payor. The employer is prohibited from offering a health plan designed to supplement medicare (i.e. fill in medicare's deductible and coinsurance).

Currently, ADEA applies only to persons between the ages of 40 and 70.

House bill

The House bill would extend the health insurance requirements of ADEA to persons over the age of 69, thereby removing the upper age limit, and makes corresponding changes in medicare law.

The House bill would amend ADEA to provide that the group health insurance requirement be exempted from the age limits.

The House bill would make other conforming amendments regarding special enrollment periods and the effective date of enrollment.

The House bill generally would be effective January 1, 1986 with certain exceptions.

Senate amendment

Similar provision.

Conference agreement

The conference agreement includes the Senate amendment with a technical modification.

30. Health maintenance organizations and competitive medical plans

a. Finanical responsibility for patients hospitalized on the effective date of an enrollment or disenrollment.

Present law

Under current law it is unclear who is resposnible for payment when a medicare beneficiary is an inpatient of a hopital under the prospective payment system on the ef-

fective date of his/her TEFRA HMO/CMP enrollment. A similar problem exists for disenrollment. A TEFRA HMO/CMP is a health maintenance organization or competitive medical plan with a risk contract under Section 1876 of the Social Security Act, authorized under the Tax Equity and Fiscal Responsibility Act of 1982.

House bill

Enrollment—a TEFRA HMO/CMP is not financially responsible for reimbursing covered inpatient stays in a PPS hospital for inpatient stays beginning before the effective date of the beneficiary's enrollment in the TEFRA HMO/CMP. Medicare will reimburse for the inpatient stay, if otherwise covered, as if the beneficiary were not enrolled in a TEFRA HMO/CMP. The TEFRA HMO/CMP will be responsible for any other services covered under medicare (i.e., all services except the inpatient stay, such as physician services provided to the patient during the inpatient stay) and any additional or supplemental services which would otherwise be due an enrollee, effective with the date of his/her enrollment in the TEFRA HMO/CMP.

Disenrollment—if the enrollee is an inpatient in a PPS hospital on the effective date of his/her disenrollment from the TEFRA HMO/CMP, the TEFRA HMO/CMP will be responsible for reimbursing for the full inpatient stay. Medicare will not make a monthly capitation payment nor will it pay for the inpatient stay under the regular medicare program after the effective date of disenrollment. The TEFRA HMO/CMP is not responsible for any other covered medicare services, or any additional or supplemental services to the enrollee, beginning on the effective date of disenrollment. This provision would apply only if the enrollee is an inpatient of a PPS hospital provided for or arranged by the TEFRA HMO/CMP, or if the services were emergency or urgently needed services. The provision is effective for enrollments and disenrollments effective on or after October 1, 1985.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with a modification changing the effective date to enactment.

b. Disenrollment procedures

Present law

Present law specifies the effective date of disenrollment from a TEFRA HMO/CMP to be the first calendar month following a full calendar month after the request is made for termination.

House bill

Disenrollments would be effective with the first day of the first month following the month in which the disenrollment request was made. The provision would require that the beneficiary receive a copy of the disenrollment form and that materials be provided to the beneficiary explaining how long he/she must continue to use the HMO/CMP facilities in order to have the services covered. The House bill requires that information be provided to beneficiaries clearly delineating when they may begin to use the regular medicare benefit. The provision is effective for requests for termination of enrollment submitted on or after October 1, 1985.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with a modification changing the effective date to February 1, 1986.

c. Review of marketing material

Present law

There are no present law provisions relating to marketing materials.

House bill

The House bill would require all TEFRA HMO/CMPs to submit all brochures, application forms, and promotional and informational material to the Health Care Financing Administration (HCFA) for approval, at least 45 days before issuance. HCFA would be required to review all these materials. If the HMO did not hear from the HCFA within the 45-day period, the organization could assume approval. The provision would apply to material for distribution on or after November 15, 1985. This provision would not apply to material which has been distributed prior to November 15, 1985.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with two modifications. The effective date is changed to April 1, 1986 and the provision would not apply to materials distributed prior to April 1, 1986.

d. Prompt publication of the AAPCC

Present law

In order to establish the payment amounts to TEFRA HMO/CMPs the Secretary has developed a measure called the Average Adjusted Per Capita Cost (AAPCC). There are no current law requirements relating to the specific date of publication of the AAPCC.

House bill

The House bill would require the Secretary to publish the AAPCC no later than September 7 of each year. The provision would apply to determinations of per capita rates of payment for 1987 and subsequent years.

Senate amendment

The Senate amendment would require the Secretary to publish the AAPCC no later than 10 days after publication of the hospital prospective payment rates.

Conference agreement

The conference agreement includes the House bill.

31. Evaluation of preadmission and pre-procedure certification programs

Present law

Peer review organizations (PROs) have the general responsibility of reviewing the quality and utilization of inpatient hospital services provided to medicare beneficiaries. PROs have been directed specifically by the Secretary of the Department of Health and Human Services to reduce the rate of inappropriate admissions. As a method to accomplish this goal, all PROs do preadmission screening on some elective surgery. Four PROs are currently conducting 100% preadmission review of non-emergency surgery.

House bill

The House bill would require the Secretary of HHS to evaluate the efficacy of PRO programs with 100% preadmission elective surgery review compared with programs that include less comprehensive review.

The Secretary would be required to evaluate the feasibility of extending PRO pre-procedure certification activities to outpatient and ambulatory settings. The Secretary would also be required to consider whether other organizations, including medicare carriers, could more effectively conduct such pre-procedure screening.

The Secretary would be required to submit a report to Congress by December 31, 1986.

Senate amendment

No provision.

Conference agreement

The Conference agreement does not include the House bill.

32. Prohibition of administrative merger of renal disease networks with other organizations

Present law

Present law required the Secretary to establish network organizations to assure effective and efficient administration of the end stage renal disease (ESRD) program. The network organizations are responsible for coordinating and evaluating ESRD Services provided within assigned geographic areas. Thirty-two network organizations have been established.

House bill

Under the House bill, the Secretry is prohibited from merging any renal disease network organization into a utilization and quality control peer review organization or any other entity without express statutory authorization.

Senate amendment

Similar provision.

Conference agreement

The conference agreement includes the Senate amendment with modifications. The Secretary is permitted to consolidate the network areas and organizations in order to achieve efficiencies in the administration and operation of these organizations, provided the number of network organizations is not reduced to less than fourteen.

33. Extension of certain medicare municipal health services demonstration projects

Present law

Currentlaw permits waiver of certain medicare requirements when the Health Care Financing Administration enters demonstrations under its general demonstration authority.

House bill

Under the House bill, the Secretary would be required to extend for three additional years, the three municipal health services health maintenance organization demonstration projects (Milwaukee, San Jose and Cincinnati) currently authorized under medicare demonstration authority. These demonstrations were authorized under authority provided in the Social Security Amendments of 1967 and 1972. The provison would be effective upon the date of enactment.

Senate amendment

Similar provision, except it includes an additional project in Baltimore.

Conference agreement

The conference agreement includes the Senate amendment.

34. Technical corrections

Present law

Current medicare law contains an number of technical errors.

House bill

(a) The House bill would correct problems with the medicare special enrollment period and the premium penalty forgiveness for the working aged. The anomaly under which certain individuals who are working and covered by an employer group health plan receive only one special enrollment period and others receive more would be corrected.

(b) In addition, the House bill would clarify that an individual would be eligible for forgiveness of the medicare penalty for any period during which he or she was over 65 and covered by an employer group health plan.

The provision requiring a person to meet the eligibility requirements of part A, and to have filed for part A, would be repealed.

(c) The House bill would make certain corrections in spelling, language and indentation.

Paragraph (a) would apply to the first month that begins more than 90 days after the date of enactment with certain exceptions.

Paragraph (b) would apply to months beginning January 1983 as they effect premiums for months beginning with the first month that begins more than 30 days after the date of enactment.

Paragraph (c) generally would be effective as though they had been included in the public laws that they correct.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill.

35. Coverage of respiratory care services for ventilator-dependent individuals

Present law

Medicare provides limited outpatient and home services to ventilator dependent individuals.

In order to qualify for home health services, a medicare beneficiary must be confined to his or her home and under the care of a physician. In addition, the person must be need of part time or intermittent skilled nursing care or physical or speech therapy. Once an individual qualifies for medicare's home health benefit, the beneficiary becomes entitled to a range of home health services.

In order to qualify for medicare's skilled nursing facility benefit, individuals must first be hospitalized for at least three consecutive days. They must also need skilled nursing or other skilled rehabilitation services on a daily basis for treatment related to the condition for which the beneficiary was hospitalized. Medicare law specifies the range of services which are covered in the skilled nursing facility.

House bill

No provision.

Senate amendment

The provision would amend medicare law to allow qualified respiratory care patients to qualify for medicare's home health and skilled nursing facility benefits and would include among covered services respiratory care for such individuals. The provision defines "qualified respiratory care patient" as an individual who has been hospitalized for at least 30 consecutive days, dependent on a respirator for life support at least 6 hours per day during that time, and is willing and medically able to be cared for in a less intensive setting.

The provision relating to medicare would be effective for services performed on or after October 1, 1988.

Conference agreement

The conference agreement does not include the Senate amendment.

36. Increase audit effort and medical claim review (sec.)

Present law

Under current law, the Secretary contracts with intermediaries and carriers to perform the day-to-day administrative and operational tasks for the medicare program, including the review of claims and the conduct of audits.

House bill

No provision.

Senate amendment

The provision would require that medicare contractor budgets for fiscal years 1986, 1987, and 1988 be supplemented by $105 million in each year to be spent specfically for provider cost audits and medical review activities. The provision would be effective October 1, 1985.

Conference agreement

The conference agreement includes the Senate amendment with a technical modification. The Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) earmarked $45 million through FY85 for intensified review activities. This authorization is extended for three years through FY88. The $105 million under the Senate amendment represents an additional $60 million above this amount.

The conferees intend that the Secretary has the flexibility to utilize the funding amounts in whatever manner the Secretary determines would be most cost-effective.

37. Charges by physicians for services billed to an HMO

Present law

Physicians who agree to become participating physicians, that is, accept assignment for all medicare patients, must accept medicare's reasonable charge determination as payment in full (subject to applicable cost-sharing) for services rendered to beneficiaries. When a participating physician provides an emergency service to a medicare beneficiary who is enrolled in a Health Maintenance Organization (HMO), the physician may bill the HMO. In this case, a participating physician does not have to accept assignment. Further a nonparticipating physician is not limited as to the amount he or she can charge the HMO (as he or she would otherwise be under the physician fee freeze provisions).

House bill

No provision.

Senate amendment

The provision would provide that participating and nonparticipating physicians cannot charge HMOs more for emergency services rendered to a medicare beneficiary than they could charge the beneficiary. The provision would be effective for items and services provided on or after October 1, 1985, and before October 1, 1986.

Conference agreement

The conference agreement does not include the Senate amendment.

38. Sense of the Senate with respect to coverage of liver transplant procedures for persons over 18 years of age under medicare

Present law

Section 1862 excludes from medicare coverage any items or services that are not reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. This section has been interpreted to exclude from coverage items and services that are considered to be experimental and that do not have a proven medical benefit. On February 9, 1984, the Secretary announced that liver transplants for persons under 18 years of age with certain specified conditions were no longer considered experimental and would, therefore, be covered under medicare.

House bill

No provision.

Senate amendment

The Senate amendment specifies the sense of the Senate, given available information regarding liver transplant services, that liver transplant services are to be covered under medicare and that the Secretary reconsider coverage of liver transplant services for individuals over 18 years of age.

Conference agreement

The conference agreement includes the Senate amendment with the understanding that the provision expresses only the sense of the Senate.

39. Extension of physician fee freeze for nonparticipating physicians and improvements in the participating physician program

a. Physician payments

Present law

Medicare pays for physicians' services on the basis of medicare-determined "reasonable charges". The reasonable charge for a service is the lowest of 1) a physician's billed charge; 2) the charge customarily made by the physician; or 3) the prevailing charge limit, derived from the charges made by all physicians in the geographic area for the service. The customary and prevailing charge screens are generally updated annually, on October 1. Increases in prevailing charge levels are limited by an economic index that reflects general inflation and changes in physicians' office practice costs.

Under the Deficit Reduction Act of 1984 (P.L. 98-369), the medicare customary and prevailing charges for all physicians' services provided during the 15-month period beginning July 1, 1984 were frozen at the levels that applied for the 12-month period ending June 30, 1984. The actual charges of nonparticipating physicians were also frozen during the 15-month period, at the levels in effect during April-June 1984.

The Deficit Reduction Act (DEFRA) also instituted a medicare participating physician and supplier program. Participating physicians and suppliers agree to accept assignment on all medicare claims for the 12-month period beginning on October 1 of a year. Nonparticipating physicians and suppliers can decide on a claim-by-claim basis whether or not to accept assignment.

The carriers responsible for paying medicare claims are required to monitor nonparticipating physicians' actual charges during the 15-month freeze. Physicians who knowingly and willfully bill beneficiaries in excess of what they charged during April-June 1984 can be subject to civil monetary

penalties and/or exclusion from participation in medicare.

Public Law 99-107, Public Law 99-155 and Public Law 99-181 extended through December 18, 1985 the payment terms established in DEFRA. Physicians are bound during the extension period by the decisions they made regarding participation for the year beginning October 1, 1985, and are subject to the corresponding payment rules.

House bill

(sec. 141)

Under the bill, an update in customary and prevailing charges would be provided on October 1, 1985 to all physicians who, as of that date, are participating physicians. The same prevailing charge screens would apply to all physicians who are participating as of that date, regardless of their prior participation status.

For any physician who is not covered by a participation agreement as of October 1, 1985, the current freeze on customary and prevailing charges would be extended through September 30, 1986. The current freeze on the actual charges of nonparticipating physicians would also be extended, for the same period. Formerly participating physicians who withdrew from the participation program for the year beginning October 1, 1985 would be required, like continuing nonparticipating physicians, to limit their actual charges to no more than the levels they charged during April-June 1984. The monitoring of nonparticipating physicians' actual charges would be continued through FY 1986.

On October 1, 1986, physicians covered by participation agreements effective for the year beginning October 1, 1986 would receive customary and prevailing charge updates. Nonparticipating physicians for the year beginning October 1, 1986 would also receive customary and prevailing charge updates. However, they would be subject to the prevailing charge limits applied to participating physicians during the prior participation period. This one-year differential would apply in future years, establishing a permanent gap between the prevailing charge screens to which participating and nonparticipating physicians are subject.

(sec. 151)

The provision is identical to the one outlined for section 141, with the following exceptions:

Physicians who participated or took assignment on 100 percent of medicare claims during the year beginning October 1, 1984, but who are not participating as of October 1, 1985, would receive increases in their customary and prevailing charges on October 1, 1985, equal to one-half the increases they would have received had they been participating as of that date.

In addition, previously participating physicians who are not participating as of October 1, 1985 would be allowed to increase their actual charges by one-half the percentage increase in their actual charges during the July 1, 1984-September 30, 1985 period over their charges during the period April 1, 1984-June 30, 1984. These physicians' actual charges would then be monitored against these new levels. Charges in excess of the new freeze levels would not be recognized in computing customary charge updates on October 1, 1986.

Beginning October 1, 1986, the prevailing charge screens of physicians who participated or always accepted assignment in the immediately preceding year, but who do not participate in the current year, would lag behind those of participating physicians by one-half the amount that other nonparticipating physicians' prevailing charges lag.

Senate amendment

The Senate amendment is similar to section 141 of the House bill with the following modifications. Physicians who were participating in fiscal year 1985, but who withdrew from the participating program in fiscal year 1986 would have their actual charges during the 12-month period ending March 31, 1985 reflected in the calculation of their customary charges for fiscal year 1986.

The Senate amendment would afford all physicians a second opportunity to exercise their option to enter into or terminate participation agreements for fiscal year 1986, during a 30-day period following enactment.

Conference agreement

The conference agreement includes the Senate amendment with a modification as follows.

The payment rates now in effect will be extended from December 19, 1985 through January 31, 1986. The freeze on nonparticipating physicians' actual charges to beneficiaries, and the monitoring of these charges, will also be extended during this period.

During the month of January 1986, physicians will have the opportunity to decide whether or not to participate for the 11-month period beginning February 1, 1986. New participation agreements can be signed or old ones terminated during January. In order to make existing participation agreements (which apply on a fiscal year basis) consistent with the new update and participation cycles (which will be on a calendar year basis), and in order to expedite implementation of the fee screen update for participating physicians, the agreement provides that existing participation agreements will be deemed to be in effect through December 31, 1986, unless terminated by the physician during January 1986. Therefore, physicians covered by agreements effective through September 30, 1986 who, during the month of January 1986, elect to continue participation do not have to sign new agreements; and the automatic renewal clause in the existing agreements will apply on a calendar year basis. Those physicians covered by participation agreements who wish to withdraw from participation for the 11-month period beginning February 1, 1986 must notify the carrier in writing during the month of January of their wish to do so.

On February 1, 1986, physicians who are covered by participation agreements on that date will receive customary and prevailing charge updates. The prevailing charges will reflect the updated customary charges of all physicians. With respect to most nonparticipating physicians, customaries will be updated solely for the purpose of updating participating physicians' prevailing charges. However, updated customaries will be used for payment purposes for nonparticipating physicians for the 11-month period beginning February 1, 1986 if they participated during fiscal year 1985.

For physicians who are neither participating on February 1, 1986 nor were participating during fiscal year 1985, the existing freeze on customary and prevailing charges will be extended through December 31, 1986. In addition, the freeze on actual charges (at April-June 1984 base period levels) will be extended through December 31, 1986 for all nonparticipating physicians, including those who were participating during fiscal year 1985. Monitoring of these physicians' actual charges continues for the same period.

The customary and prevailing charge screens applied on February 1, 1986 for participating physicians will be those that would have been applied for the October 1, 1985 update, had they not been frozen at the levels in effect on September 30, 1985. These October 1, 1985 charge screens reflect physicians' actual charges made during the 12-month period ending March 31, 1985. Use of these screens, rather than new ones based on a more recent period of charges (July 1, 1984 through June 30, 1985), will enable the carriers to apply the payment increases to participating physicians as expeditiously as possible. Construction and application of new screens would result in delaying the update significantly.

In order to compensate participating physicians for the prevailing charge increases that they will lose during the 4-month period beginning October 1, 1985 due to the freeze, the medicare economic index (MEI) applied to prevailing charges for services provided during the 11-month period beginning February 1, 1986, will be increased by one percentage point, approximately one-third of the total MEI increase due these physicians over the 12-month period beginning October 1, 1985. This one percentage point increase is a one-time increase to be applied only during the 11-month period, and is not built into the prevailing charge levels on a permanent basis. It is to be excluded in determining nonparticipating physicians' prevailing charges for the year beginning January 1, 1987.

Beginning January 1, 1987, participation agreements will be effective on a calendar year basis. Similarly, future customary and prevailing charge updates will be moved permanently from October 1 to January 1. Following February 1, 1986, the next participation period will begin and the next payment update will occur on January 1, 1987 and on each January 1 thereafter. The data base used to calculate the fee screens will also be moved forward by one quarter, to the period July 1 through June 30; thus, updates will continue to reflect physicians' actual charges made during the 12-month period ending six months prior to the update.

During the 45-day period (November 15 through December 31) immediately preceding a new participation period, physicians will have the opportunity to enter into participation agreements effective for the year beginning January 1, or to withdraw from existing agreements.

On January 1, 1987, and on each January 1 thereafter, physicians who are participating on that date will receive customary and prevailing charge updates, based on actual charges made during the preceding July 1 through June 30. Nonparticipating physicians will also receive customary charge updates, based on their actual charges made during that period.

For purposes of the January 1, 1987 customary charge update, actual charges exceeding the April-June 1984 base period levels, billed from October 1, 1985 through January 31, 1986 by a physician who was not participating during that four-month period, will not be recognized. Likewise, for purposes of the January 1, 1987 and January 1, 1988 customary charge updates, actual charges in excess of the April-June 1984 base period levels, billed from October 1, 1985 through December 31, 1986 by a physician who was not participating at the time of providing the service, will not be recognized.

For the year beginning on January 1, 1987, physicians who elect not to participate

will be subject to the prevailing charges that were applied to participating physicians during the preceding participation period, excluding the temporary one percentage point increase in the MEI. For years beginning on January 1, 1988, and each January 1 thereafter, physicians who elect not to participate will be subject to the prevailing charges that were applied to participating physicians during the preceding participation period. This permanent one-year lag or differential in prevailing charges is intended to provide an incentive to physicians to participate, and reflects the priority the conferees attach to increasing participation.

b. Transfer of funds for carriers

Present law

The Deficit Reduction Act of 1984 provided for transfer from the Federal Supplementary Medical Insurance Trust Fund to carriers of at least $8 million in fiscal year 1984 and $15 milion in fiscal year 1985 to implement the freeze and participating physician and supplier program.

House bill

The bill would extend for one year (FY 1986) the current law provision for the transfer of $15 million from the Federal Supplementary Medical Insurance trust fund. The bill would require that a significant proportion of those funds be used for the expansion of the participation program and for the development of professional relations staffs dedicated exclusively to addressing the billing and other problems of participating physicians and suppliers.

Senate amendment

Identical provision.

Conference agreement

The Conference agreement includes the House provision with a modification as follows.

In addition to the $15 million provided for in the House and Senate bills, a further $3 million (total $18 million) will be transferred from the part B trust fund to the carriers in fiscal year 1986, and will be available for obligation through December 31, 1986. These funds are intended to cover the costs of additional mailings by the carriers to physicians and suppliers explaining the changes in the fee freeze and participation program, and to cover the carriers' costs of implementing the fee freeze and participation program during the last three months of 1986.

The conferees intend that the Secretary devote sufficient funds to the carriers for maintenance of their toll-free telephone lines so that they are useful to beneficiaries seeking information about participating physicians and suppliers. Sufficient resources should also be devoted to ensure that participating physicians and suppliers enjoy the benefit of the carriers' direct lines for the electronic receipt of claims.

c. Participating physician directory

Present law

DEFRA required the Secretary to publish annually a directory identifying participating physicians by name, address, and specialty. The directory is to be organized to make the most useful presentation of information.

House bill

The Secretary would be required to publish participating physician and supplier directories (rather than a single directory) for appropriate local geographic areas, and to provide for their distribution to each participating physican located in each such area.

Senate amendment

Identical provison.

Conference agreement

The Conference agreement includes the House provision. The conferees note that the directories of participating physicians and suppliers should be organized so as to be meaningful and useful to beneficiaries. For example, if, in especially large metropolitan areas, local medical markets can be identified, these should serve as the basis of organizing the directories. The requirement that the directories be sent to all participating physicians in an area is intended to facilitate and encourage the development of referral networks among participating physicians and suppliers.

d. Physician assignment rate list (PARL)

Present law

DEFRA required the Secretary to publish annually a list of physicians and suppliers serving medicare beneficiaries. The list is to include, for each physician and supplier name, address, specialty, and percent of claims accepted on assignent during the preceding year.

House bill

The House bill eliminates the requirement for the PARL directory.

Senate amendment

Identical provision.

Conference agreement

The Conference agreement includes the House provision.

e. Explanation to benefits

Present law

Medicare carriers inform beneficiaries of actions taken on their claims through Explanation of Medicare Benefits (EOMB) notices.

House bill

The bill would require that, for all unassigned claims, the Explanation of Medicare Benefits (EOMB) include a reminder to beneficiaries of the participating physician and supplier program, and provide them with the toll-free number for information in their area. The message would also remind beneficiaries of the limitation on the charges that participating physicians and suppliers may impose.

Senate amendment

Identical provision.

Conference agreement

The Conference agreement includes the House provision with the deadline moved to July 1, 1986. The conferees note that this provides the Secretary with ample time to pilot-test messages, if necessary, to ensure that they convey information to beneficiaries in a meaningful and appropriate fashion.

f. Inapplicability of penalties

Present law

No provision.

House bill

No provision.

Senate amendment

The Senate amendment would provide that the freeze imposed on actual charges to beneficiaries would not apply in cases where a claim for payment is not filed because the patient chooses to pay the entire bill from private sources.

Conference agreement

The Conference agreement does not include the Senate amendment.

40. Physician payment assessment group and development of relative value scales

Present law

There currently exists no advisory body whose purpose it is to make recommendations regarding medicare physician payment.

(sec. 142)

The Director of the Congressional Office of Technology Assessment would appoint to the Prospective Payment Assessment Commission (ProPAC) two additional members to provide representation for rural hospitals and four nurses. In addition, the Director would appoint six new members to comprise a physician payment unit, which would function as a subcommittee of ProPAC.

The mission and ongoing duties of the physician payment subcommittee would be to make recommendations regarding medicare physician payment. Recommendations would address, among other issues, adjustments to reasonable charge levels for physicians' services, and changes in the medicare physician payment mechanism. The physician payment subcommittee would advise the Secretary on the development of a fee schedule based on a relative value scale (RVS), to be implemented by October 1, 1987.

(sec. 152)

The section would provide for establishment of a physician payment review commission of 11 members, separate from and independent of ProPAC. The duties and activities of the commission are largely identical to those of the physician payment subcommittee of ProPAC outlined in section 142.

Senate amendment

No provision.

Conference agreement

The conference agreement includes section 152 of the House bill with a modification to conform the required functions to those specified in section 142 of the House bill.

41. Part B premium

Present law

The Secretary is required to calculate and announce each September the amount of the monthly premium that will be charged in the following calendar year for people enrolled in the Supplementary Medical Insurance (part B) portion of medicare. A temporary provision of law requires that for 1986 and 1987 the premium amount be calculated so as to produce premium income equal to 25 percent of program costs for enrollees age 65 and over.

Beginning in 1988, the premium calculation would revert to an earlier method under which the premium amount is the lower of: (1) an amount sufficient to cover one-half of program costs for the aged; or (2) the current premium amount increased by the percentage by which cash benefits were most recently increased under the cost-of-living adjustment (COLA) provisions of the social security program.

House bill

The House bill would extend for one additional year the existing temporary provision whereby the portion of part B costs financed by enrollee premiums equals 25 percent of program costs. If there is no social

security cost-of-living adjustment, the monthly premium would not be increased that year.

Senate amendment

Same provision.

Conference agreement

The conference agreement includes the Senate amendment with a technical modification. There is no intent to change any policy other than to extend the date to 1988.

42. Inherent reasonableness determinations and customary charges for certain former hospital-compensated physicians

a. Inherent reasonableness

Present law

Payment for items and services under part B is generally made on the basis of reasonable charges. The law provides for some flexibility in the determination of reasonable charges; the regulations at 42 CFR 405.502(a)(7) allow the use of "other factors that may be found necessary and appropriate with respect to a specific item or service . . . in judging whether the charge is inherently reasonable."

House bill

The bill would require the Secretary to promulgate regulations which specify explicitly the criteria of "inherent reasonableness." The Secretary would be required to correct both excessive and deficient charges in accordance with these regulations.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House provision.

b. Hospital-compensated physicians

Present law

Carriers established compensation-related customary charges (CRCCs) for certain hospital-based physicians when combined-billing arrangements were eliminated, effective October 1, 1983. The CRCC provision was intended to be transitional; hospital-based physicians would have received customary charge updates on July 1, 1984 based on their actual charges had it not been for the general freeze on medicare customary and prevailing charges for physicians' services instituted by the Deficit Reduction Act.

House bill

In FY 1986, participating hospital-based physicians (HBPs) whose compensation-related charges were frozen as part of the general medicare fee freeze would, like other participating physicians, receive increases in their medicare payment based on their actual charges. Participating HBPs would receive increases that reflect charges that they made during the same base period used to update other participating physicians' charges (April 1984-March 1985). Nonparticipating HBPs would receive payments that reflect their charges during April 1984-March 1985, but deflated to approximate 1982 charges. This is the same period on which other nonparticipating physicians' payment is based.

Senate amendment

The Senate amendment would provide for the recalculation of the compensated-related customary charges (CRCCs). For services rendered between October 1, 1985, and September 30, 1986, the customary charges of physicians would be determined based on the physicians' actual charges made between April 1, 1984 and March 31, 1985. If such physicians had insufficient billings during that 12-month period, the calculation would be based on the first 3-month period beginning on or after February 1, 1985 for which sufficient billings are available. In either case, in order to put these physicians in the same position as other physicians, the actual charges will be deflated to September 1, 1984 levels in the case of physicians who were participating physicians during fiscal year 1985 or 1986; or to July 1982 in the case of physicians who did not participate in either year. The provision would be effective for services rendered on or after October 1, 1985, and before October 1, 1986.

Conference agreement

The conference agreement includes the House bill with a modification as follows.

Hospital-compensated physicians who, between October 31, 1982 and January 31, 1985 were in (and within the same period terminated arrangements by which they were compensated by a hospital for part B services furnished to its patients, will have customary charges calculated based on their actual charges. On February 1, 1986, physicians covered by this provision who are participating on that date will have their customary charges updated based on their actual charges billed during the 12-month period ending March 31, 1985. Physicians who are not participating on February 1, 1986 but who participated during fiscal year 1985 will have their customary charges updated in the same fashion. Physicians who were nonparticipating in fiscal year 1985 and who are not participating on February 1, 1986 will have their customary charges updated, and then deflated by .85 to approximate 1982 charge levels, on which other continuing nonparticipating physicians' customary charges are based.

Physicians who come off compensation arrangements between February 1, 1985 and December 31, 1986 will be treated as new physicians for purposes of establishing their customary charges. However, if a group or other entity continues to bill for or on behalf of a physician who came off a compensation arrangement before January 31, 1985, the customary charges (as well as the actual charges, in the case of a nonparticipating physician) of the group or the entity billing for or on behalf of the physician would be imputed to the physician.

43. Occupational therapy services

Present law

Medically necessary occupational therapy services are covered under part A of medicare when provided as a part of covered inpatient or post-hospital extended care services in a skilled nursing facility, or as part of home health services or hospice care.

Part B coverage of occupational therapy services is limited to treatment in a hospital outpatient department, comprehensive outpatient rehabilitation facility, home health agency or when incident to a physician's service.

House bill

The House bill would extend reimbursement under part B of medicare for occupational therapy services. This therapy would be covered when provided in a skilled nursing facility (when part A coverage is exhausted), in a clinic, or a rehabilitation agency. Payment would be made on a reasonable cost basis.

The House bill would provide part B coverage of occupational therapy services when furnished in a therapist's office or a beneficiary's home. The independently practicing therapist would have to meet licensing and other standards prescribed by the Secretary. No more than $500 in incurred expenses would be eligible for coverage in a calendar year per beneficiary. Payment would be based on 80 percent of reasonable charges.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill.

The conferees believe that the value of occupational therapy services to beneficiaries merits a modest expansion of the program. Further, the conferees find that such services have the potential to reduce and avoid the need for institutional care while enabling the beneficiary to function more independently.

44. Payment for durable medical equipment and other nonphysician services

Present law

Payment for durable medical equipment (DME) is paid under part B on the basis of reasonable charges. In the past, payment for DME was made for both rented and purchased items, depending on the beneficiary's decision to either rent or purchase. As a result, the majority of DME was rented, even when purchase would have been more economical.

Beginning February 1, 1985, the Secretary implemented three methods for reimbursing DME under medicare: lease-purchase, lump sum purchase or rental charges. Equipment costing less than $120 is considered inexpensive equipment and payment is made only on the basis of purchase. For equipment costing more than $120, the carrier must determine which method is cost-effective based on the beneficiary's expected need for the equipment (as indicated on the physician's prescription) and reimburse accordingly. Used equipment that is purchased and that meets certain standards is reimbursed at 100 percent rather than 80 percent of the reasonable charges (applicable copayment amounts are waived).

House bill

(Section 146)

a. Fiscal year 1986 payment level

The House bill would set new reimbursement limits on rented durable medical equipment (DME). In determining medicare's customary and prevailing charges for rented DME during FY 1986, the Secretary would allow an increase of no more than one percent over the level set for rented DME furnished beginning July 1, 1984.

b. Mandatory Assignment

The House bill would provide that payment for DME provided on a rental basis would only be made on the basis of assignment.

c. Limits on annual increases in prevailing

For DME items furnished during fiscal years beginning on or after October 1, 1986 the House bill would limit the annual percentage increase in prevailing charges for rental and purchase to no more than the increase in the Consumer Price Index for all urban consumers for the 12-month period ending the preceding March.

d. Clarification of DEFRA effective date

The bill clarifies that the DEFRA provision moving updates of customary and prevailing charges to October 1 also applies to DME.

Effective Date

Paragraph (a) would be effective with respect to items or services furnished on or after October 1, 1985.

Paragraph (b) would be effective with respect to supplies or items furnished on or after January 1, 1986.

Paragraph (c) would be effective with respect to items or supplies furnished on or after October 1, 1986.

Paragraph (d) effective as though included in DEFRA.

(Section 153)

a. Fiscal year 1986 payment level

This section is similar except that it would freeze both customary and prevailing charges for rented DME and for purchases of oxygen supplies during FY 1986 at the same level for supplies furnished during the 15-month period beginning July 1, 1984.

b. Mandatory assignment

This section is similar except that payment for purchases of oxygen supplies, in addition to DME provided on a rental basis, would only be made on the basis of assignment.

c. Limits on annual increase in prevailing

This section is similar except that future increases in payment for purchases of oxygen supplies, in addition to DME provided on a rental basis, would be limited to the CPI.

d. Clarification of DEFRA effective date

Same provision.

Same effective dates.

Senate amendment

a. Fiscal year 1986 payment level

The provision would impose new reimbursement limits on nonphysician services paid on a reasonable charge basis under part B other than DME that is lump-sum purchased or furnished under a lease-purchase agreement and independent clinical laboratory services. During fiscal year 1986, medicare customary and prevailing charges for services subject to the limits would be allowed to increase by 1 percent over the level in effect for the 15-month period beginning July 1, 1984.

b. Mandatory assignment

No provision.

c. Limit on annual increase in prevailing

For items and services furnished in fiscal year 1987 and thereafter, medicare prevailing charges could rise no faster than the increase in the consumer price index. The provision would be effective October 1, 1985.

Conference agreement

The conference agreement includes section 153 of the House bill with modifications. Customary and prevailing charges and lowest charge levels will be frozen for the period October 1, 1985 through January 31, 1986 for nonphysician and nonlaboratory supplies and services. This means that medicare fee screens for all nonphysician services paid for on a reasonable charge basis under Part B are frozen at the level which was in effect for such services for the 15-month period beginning July 1, 1984.

The agreement provides that the freeze is extended for the eleven-month period February 1, 1986–December 31, 1986 for rented durable medical equipment and consumable oxygen. Beginning April 1, 1986, and thereafter, payment for those items and services would be made only on the basis of assignment; that is, suppliers would have to accept the medicare reasonable charge as payment in full (except for the deductible and copayment).

The agreement specifically precludes extension of the freeze after February 1, 1986 for purchased DME and other nonphysician services paid for on a reasonable charge basis. Thus, other nonphysician suppliers and services would receive the full update in customary and prevailing charge screens for the 11-month period beginning February 1, 1986. This is the update that would have been effective on October 1, 1985, but for regulations issued by the Secretary which froze the rates.

Future updates of customary, prevailing, and lowest charge level screens for DME and other nonphysician services will occur on January 1 of each year beginning in 1987. Beginning January 1, 1987, the annual increase in the prevailing charge screens for rented DME and consumable oxygen will be limited to the increase in the Consumer Price Index for all urban consumers (U.S. city average). Beginning January 1, 1988, the annual increase in the prevailing charge screens for purchased DME will be subject to the same limit. For the purpose of this section, purchased DME includes DME furnished on a lease-purchase basis.

The base period for calculation of customary and prevailing charge screens is the 12-month period ending the preceding June 30. The base period for the lowest charge levels is the three-month period ending the preceding September 30.

The conference agreement for the DEFRA effective date provision includes the House provision, with a modification to specify that the provision applies for all, rather than some, part B nonphysician services except lab tests.

45. Payment for assistants at surgery for certain cataract operations and other operations

Present law

Currently, medicare covers assistants at surgery during routine cataract operations. Their services are considered reasonable and necessary if it is generally accepted practice among ophthalmologists in the local community to use an assistant at surgery. Some medicare carriers restrict coverage of assistants at surgery to cases where medical necessity is established.

House bill

The House bill would deny medicare payment for assistants at surgery for routine cataract operations. In cases where complicating medical conditions exist, the Secretary would be required to establish procedures by which the primary surgeon could request prior approval from the PRO for the use of an assistant.

The House bill would prohibit the assistant at surgery (or someone on his or her behalf) from billing medicare or the beneficiary for services which did not receive prior approval. In addition, the primary surgeon (or someone on his or her behalf) would be prohibited from including charges for the assistant in his or her bill if prior approval had not been received. In order to enforce this provision, the House bill would provide the Secretary authority to impose civil monetary penalties or assessments, or exclusion for up to five years from the medicare program.

The House bill would require the Secretary, after consultation with the physician payment review group, as constituted under section 142 or 152 the House bill, to develop and report to Congress by April 1, 1986, recommendations and guidelines regarding other surgical procedures for which an assistant at surgery generally is not medically necessary. The Secretary would be required to include in this report procedures by which the primary surgeon could request prior approval from an appropriate entity for the use of an assistant at surgery when prior approval is required for those surgical procedures.

The House bill would be effective with respect to services performed on or after October 1, 1985.

Senate amendment

Similar provision.

Conference agreement

The conference agreement includes the Senate amendment with a modification to allow the Secretary discretion to require the carrier or PRO to be the entity from which the primary surgeon requests prior approval for the use of an assistant at surgery. It is the intent of the conferees that this modification would facilitate timely implementation of the provision.

The conferees reviewed the findings of the Office of the Inspector General, HHS, which stated that the use of an assistant at surgery has not medically necessary in most situations. In addition, several medicare carriers currently restrict coverage of assistants at surgery, and there has been no indication that this has an adverse effect on patients.

The agreement further specifies that the provision applies to services performed on or after April 1, 1986. The Secretary's report to Congress on the recommendations and guidelines is due no later than January 1, 1987.

46. Limitation on medicare payment for post-cataract surgery patients (sec. 148)

Present law

Medicare part B pays for certain combinations of prosthetic lenses for post-cataract surgery patients, if determined to be medically necessary by the physician, i.e. cataract contact lenses and eyeglasses. Generally, part B carriers are authorized to replace prosthetic lenses without a physician's prescription in cases of loss or irreparable damage and when supported by a physician's prescription in cases of a change in the patient's condition. Currently, there are not uniform limits on the number of replacements for which medicare will provide reimbursement.

Physicians can bill medicare for services related to cataract surgery in two ways: (1) a comprehensive service code covering the lenses, their fitting and evaluation, and short-term follow-up to assure their suitability; or (2) separate codes for the lenses and for the physician's service.

House bill

The House bill would limit medicare reimbursement with respect to replacement of lost or damaged prosthetic lenses as follows:

(1) cataract eyeglasses; one replacement each year;

(2) cataract contact lenses; one original and two replacements per eye the first year after surgery and two replacements per eye each subsequent year.

The House bill would require the Secretary to provide for separate payment amount determinations for the prosthetic lenses and for the related professional services, and to apply inherent reasonableness guidelines, in accordance with the bill, in determining the reasonableness for charges for prosthetic lenses.

The House bill would be effective for items or services furnished on or after October 1, 1985.

Senate amendment

Similar provision.

Conference agreement

The conference agreement includes the Senate amendment with respect to payment limitations with a modification specifying that the provision applies to items and services furnished on or after April 1, 1986. The conference agreement does not include the limitations on replacements of eyeglasses and contact lenses.

47. Demonstration of preventive health services under medicare

Present law

Medicare does not generally provide coverage of preventive health services.

House bill

The House bill would require the Secretary of HHS to fund at least five demonstrations, under the auspices of schools of public health, to determine whether and how it would be cost-effective to include preventive services as a medicare benefit.

The House bill would require that certain preventive health services be made available to medicare beneficiaries. Such services would include health screenings, health risk appraisals, immunizations, counseling and instruction on such matters as diet and nutrition, reduction of stress, exercise, sleep regulation, prevention of alcohol and drug abuse and mental health disorders, self-care and smoking reduction.

The Secretary would be required to submit a report to Congress describing the demonstrations in progress within three years. Within five years, the Secretary would be required to submit a final report that would evaluate the costs and benefits of providing such services and recommend whether specific preventive services should be included as a medicare benefit.

The House bill would be effective October 1, 1985.

Senate amendment

Similar provision.

Conference agreement

The conference agreement includes the Senate amendment with a modification that specifies that the demonstrations be conducted under the auspices of schools of public health and medical schools with preventive medicine departments accredited by the Council on Education for Public Health. It is the intent of the conferees that at least one of the projects include cancer screening (including breast cancer screening).

48. Ambulatory surgery

Present law

Medicare may pay for ambulatory (i.e., outpatient) surgical procedures performed in three different settings.

(a) Ambulatory Surgical Center (ASC).—The "Omnibus reconciliation Act of 1980" authorized payments for surgical procedures, to be specified by the Secretary, performed in an ASC to be made on the basis of prospectively set rates. On August 5, 1982, the Department issued final regulations and an accompanying notice identifying four groups of surgical procedures and the payment amount for each group. The payment amounts and the list of procedures has not been updated.

The prospective payment rates do not include payments for physicians' services, prosthetic devices, or laboratory services.

Under the 1980 legislation, the costs related to the use of an ASC were covered in full. The Congress waived the 20 percent copayment usually required of patients for such part B services in order to foster greater use of ambulatory surgical centers as opposed to higher cost hospitals.

(b) Hospital outpatient departments.—Medicare payments for ambulatory surgery performed in a hospital outpatient department are made on the basis of reasonable costs. As a part B service, a 20 percent copayment is required of the patient in connection with the costs related to the use of the facility.

(c) Physican's office.—The "Omnibus Reconciliation Act of 1980" also authorized payments to be made to physicians for the use of their office facilities when covered ambulatory surgical procedures were performed there. However, the legislation has not been implemented because adequate utilization and quality control peer review, which is required by law, is not available for office-based surgery.

When surgery is performed in any of these three settings, medicare reimburses 100 percent of the physician's reasonable charge, provided the physician agrees to accept assignment, otherwise the 20 percent copayment is imposed on the beneficiary.

House bill

No provision.

Senate amendment

The provision would extend the ASC prospective payment approach to hosptial outpatient surgery for all procedures which the Secretary approves for the ASC; 150 are currently approved. The rates for ambulatory surgery in all settings would be increased to include the costs associated with a given procedure, including prosthetic devices and lab work. Professional fees would not be included. The provision specifies that the pass-through for direct graduate medical education and capital costs associated with the surgery that is now paid to hospitals would be continued. Further, separately calculated payments would be provided to take into account the costs of services provided by a Certified Registered Nurse Anesthetist (CRNA).

The Secretary would be required to update the present ASC prospective rates to reflect current costs. No rate could exceed the DRG payment rate for comparable inpatient surgery. The rates would be updated annually.

The provision would require the Secretary to have PROs review outpatient surgical procedures.

Finally, the provision would eliminate the current law provisions which waive copayments in connection with both the use of the facility and the physician's charge.

The provisions relating to the updating of payments and lists of procedures would be effective January 1, 1986. Payment amounts for ambulatory procedures that are furnished in ASCs and physicians' offices would be updated prior to January 1, 1986. Other provisions would be effective October 1, 1985.

Conference agreement

The conference agreement does not include the Senate amendment.

49. Payment for clinical laboratory services

Present law

Outpatient clinical diagnostic laboratory services are reimbursed according to fee schedules established by medicare carriers. The initial fee schedules, which went into effect on July 1, 1984, were established at a percentage of the prevailing charges that would have gone into effect on that date. The fee schedules are to be updates on July 1 of each year by the percentage change in the Consumer Price Index for all urban consumers (CPI-U).

The fee schedules are currently calculated and applied on the basis of a statewide or substate geographical area. Beginning July 1, 1987, a national fee schedule is to be established for tests performed in a physician's office, by a freestanding laboratory, or by a hospital (if the test is for a person who is not a patient of that hospital). The fee schedules are to expire July 1, 1987 for hospital laboratory tests performed for outpatients of the hospital; payment for these services would revert to cost-based reimbursement. Payment may only be made to the person or entity who performed such test.

Hospital laboratories and independent laboratories are subject to standards designed to protect the health and safety of patients and to monitoring of compliance with such standards. Laboratories located in physicians' offices are not subject to such standards or monitoring.

House bill

The House bill moves the timing of the annual update to October 1, beginning in 1986. The annual update which would take effect on October 1, 1986 would take into account the change in the CPI-U occurring over the preceding 15-month period. The expiration date for the fee schedules for tests done by hospital-based laboratories would be delayed 3 months, to October 1, 1987.

The Secretary of Health and Human Services would be required to establish a ceiling on the maximum amount medicare would pay under the current fee schedules. A different ceiling would be set for each test and would be applied nationwide. The ceiling would be set at 115 pecent of the median fee for each procedure beginning on January 1, 1986, and at 110 percent of the median beginning on October 1, 1986.

The Secretary would also be required to report to Congress, within one year after the date of enactment, on standards which could be established to protect the health and safety of patients of clinical laboratories which are part of, or associated with, a physician's office. In recommending standards, the Secretary is to consider such factors as scope, type and complexity, which may indicate a need for different standards for laboratories with different characteristics.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with the following modifications. The annual update of the fee schedules will occur January 1 of each beginning in 1987. The annual update which will take effect on January 1, 1987 will take into account the change in the CPI-U occurring over the preceding 18-month period. The fee schedule for laboratory tests furnished by hospitals for outpatients is extended through December , 1987.

The conference agreement further modifies the House bill to specify that the ceilings would be set at 115 percent of the median fee for the respective tests beginning on April 1, 1986 and 110 percent of the median beginning on January 1, 1987. The

national fee schedule for laboratory services would go into effect on January 1, 1988.

It is the conferees understanding that there may be a limited number of lab tests where there is some discrepency in the service reported for the procedure code (such as organ or disease oriented panel tests). In these isolated cases, a reasonable delay in application of the limits on fee schedules may be appropriate.

The conference agreement further specifies that beginning January 1, 1987, medicare payments for laboratory services performed in a physician's office will only be made on the same basis as payments to independent clinical labs. Payment will be made only on the basis of assignment, and the patient's deductible and coinsurance will be waived.

The conferees continue to be concerned about the Secretary's lack of progress is simplifying the current billing requirements for laboratory services. Such simplification may include eliminating requirements that a patient diagnosis appear on clinical laboratory bill, mechanisms to ensure prompt payment, minimizing the amount of information required for claims processing and facilitating bulk or periodic billing for multiple beneficiaries.

The conference agreement reinstates section 1123 of the statute regarding proficiency testing, through September 30, 1987.

50. Vision care

Present law

Medicare pays for eye examinations furnished by a physician to a patient with a complaint or symptom of eye disease or injury. Medicare does not pay for eyeglasses or for eye examinations for the purpose of prescribing, fitting, or changing eyeglasses (except for prosthetic lenses for aphakic patients; that is, those without the natural lens of the eye). Payment is also denied for procedures performed to determine the refractive state of the eye. An optometrist who is legally authorized by the State to practice optometry is defined as a physician, but only with respect to services related to the treatment of aphakic patients.

House bill

Payment would be made under medicare for vision care services performed by optometrists, if the services are among those already covered by medicare when furnished by a physician and if the optometrist is authorized by State law to provide the services.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House bill with an effective date of July 1, 1986. The conferees are concerned that many beneficiaries are either foregoing covered eye care or are paying out-of-pocket for eye care services furnished by optometrists, because they do not have ready access to an ophthalmologist. The bill would not expand or change the current coverage and reimbursement rules in any other manner. It is the conferees' expectation that the medicare carriers, with guidance from HCFA, would use information regarding payments they make for optometrists' services under their own health plans, or other appropriate information, to establish the initial customary and prevailing charge screens.

51. Second opinions

Present law

Medicare payment will be made for medical and other health services if the services are reasonable and necessary. Although a medicare beneficiary may seek a second opinion prior to undergoing surgery, a second opinion is not required as a precondition to payment.

Utilization and quality control peer review organizations (PROs) are authorized to determine whether services and items furnished in connection with medical care are reasonable and medically necessary. PROs conduct pre-admission reviews with respect to a limited number of elective surgical procedures, but are not authorized to require a second opinion as part of the pre-admission review process.

House bill

a. Mandatory second opinions

Payment for certain elective surgeries would be denied under both part A and part B, unless the patient obtained a second opinion from a qualified physician. Payment would not be denied if the second opinion did not agree with the first.

b. Required procedures

The Secretary of Health and Human Services would be required to designate at least ten surgical procedures for which second opinions would be required, chosen from those that can be postponed without undue risk, that are high volume or high cost procedures, and that have a high rate of nonconfirmation. The Secretary could vary the list for each geographic area if available data on volume and costs suggest that it would be cost-effective to do so. The Secretary would also be required to specify which type of specialist must be consulted for each of the listed procedures.

c. PRO functions

Utilization and quality control peer review organizations (PROs) would serve as referral centers to assist patients in obtaining second opinions. The PRO would maintain a list of qualified physicians and would tell the patient which physicians are participating physicians and which have agreed to accept assignment for second opinions. At the patient's request, the PRO would refer the patient to an appropriate physician for a second opinion. The patient could choose any physician of the proper specialty to provide the second opinion, as long as the physician was not affiliated with or did not have any common financial interest with the physician who rendered the first opinion. The Secretary could enter into an agreement with a State or local agency or appropriate private entity (other than a PRO) under certain circumstances.

d. Waiver of requirements

The requirement for a second opinion would be waived if (1) delay would pose a risk to the patient; (2) no physician is reasonably available who is (a) an appropriate specialist, and (b) a participating physician or a physician who has agreed to accept assignment for the second opinion; or (3) the patient is enrolled in a health maintenance organization or competitive medical plan with a medicare risk-sharing contract.

e. Beneficiary notification responsibilities

Physicians, hospitals, and ambulatory surgical centers would be obligated to inform patients about the requirement for a second opinion and would be subject to civil monetary penalties and exclusion from the program for failing to do so.

f. Secretarial notification requirements

The Secretary would be required to notify all physicians, hospitals with medicare agreements, and ambulatory surgical centers with medicare agreements, of these second opinion requirements, including the applicable list of surgical procedures and a description of the penalties for failure to notify a patient about the requirement for a second opinion.

The Secretary would also be required to provide periodic notice to medicare beneficiaries of the second opinion requirements, including the applicable list of the surgical procedures and information about the availability of the second opinion referral services.

g. Deductible and coinsurance waiver

The deductible and coinsurance would be waived for the second opinion (and for a third opinion, if the second was in disagreement from the first).

h. Conforming amendments

The bill makes conforming amendments regarding exclusions from coverage, provider agreements, and functions of PROs.

i. Contingency procedures list

If the Secretary did not establish a list or lists of surgical procedures requiring second opinions within six months after enactment, a statutory list of procedures would go into effect.

j. Study

The secretary would be required to conduct a study of the results of the amendments made by this section. The study must include any changes in utilization of surgical procedures, changes in nonconfirmation rates of second opinions, and outcomes in cases where surgery is not done after a second opinion failed to confirm the necessity of the surgical procedure.

The provision would become effective the first month which begins more than 6 months after enactment. The Secretary must promulgate final regulations necessary to implement the amendments made by this section within six months after enactment.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House provision with modifications as follows.

a. Mandatory second opinions

PROs would be required to perform 100 percent pre-procedure review on at least 10 elective surgical procedures whether the procedure is performed on an inpatient or outpatient basis. Pre-procedure review would be required as a condition of payment except that review would be waived in the case of a medical emergency or under other circumstances as the Secretary may specify. PROs would be authorized to require a second opinion for these procedures as part of the pre-procedure review process if a second opinion is warranted to assist the beneficiary regarding the need for the procedure.

b. Required procedures

The procedures that would be subject to pre-procedure review by a PRO pursuant to this provision would be specified in a contract negotiated between the PRO and the Secretary. Existing contracts (which are on a 2-year cycle) will expire during 1986. New contracts will be signed between June and October 1986. Therefore, implementation of this provision will require renegotiation of signed contracts.

The Secretary would be required to develop guidelines for determining whether a surgical procedure is appropriate for inclu-

sion in the pre-procedure review program. These guidelines would be based on three general requirements. First, the procedure must be one which generally can be postponed without undue risk to the patient. Second, the procedure must be sufficiently costly, or of sufficient volume, as to make it probable that savings to the medicare program would result from effective review. Third, there must be a basis for concluding that pre-procedure review of that procedure is likely to be cost-effective. Such a basis could appropriately include data regarding the frequency with which a second opinion results in a recommendation against surgery and data regarding small area (or regional) variations in the incidence of the procedure. The Secretary is expected to apply these criteria flexibly in developing an appropriate list of procedures.

The Secretary would also be required to develop a list of procedures appropriate for inclusion in the program. The list would include substantially more than ten procedures. PROs would not be bound to include only procedures listed by the Secretary. Subject to negotiation, a PRO could include other procedures when cost-effective and consistent with general criteria specified in the provision. A PRO could review different sets of procedures in various regions of its service area. It is expected that a PRO will identify procedures for inclusion in this program based, in part, on information pertaining to patterns of medical practice within the PRO's service area.

Finally, the Secretary would be required to develop criteria specifying the type of specialist that must be consulted for each procedure, and the circumstances under which a physician may not provide a second opinion because of a common financial interest with the physician who rendered the first opinion.

c. PRO functions

A PRO could approve or disapprove a procedure as reasonable and necessary without requiring a second opinion. In addition, the PRO could require a second opinion and allow the beneficiary to decide among conflicting opinions. A second opinion should not be required if additional information could be obtained from the first physician which would resolve outstanding uncertainties as to medical necessity. Second opinions also should not be required in instances in which it is clear on the basis of available information that the procedure is not needed.

If the PRO requires a second opinion, the beneficiary generally would be free to choose any appropriately qualified physician. However, physicians with a possible conflict of interest, or physicians who have been disqualified by the PRO, would be prohibited from providing second opinions. A physician could be prohibited from providing second opinions if the PRO determines that the physician has rendered grossly unreliable second opinions.

The PRO would be required to assist the patient in identifying a qualified physician for a second opinion and would be required to forward medical records to the physician providing the second opinion. The PRO would not be required to transmit the records in a manner that would conceal the identity of the physician who rendered the first opinion.

d. Waiver of requirements

The conference agreement accepts the House provision regarding waiver of the requirement for a second opinion.

e. Beneficiary notification requirements

The detailed beneficiary notification requirements set forth under the House provision are replaced in the conference agreement by more general notice requirements. It is understood that general requirements with respect to beneficiary notification under the PRO program will apply to pre-procedure reviews under this section.

f. Secretarial notification requirements

Under the conference agreement, the Secretary would be required to arrange for appropriate notice to physicians, hospitals, ambulatory surgery centers, and beneficiaries regarding the pre-procedure review program.

g. Deductible and coinsurance waiver

The conference agreement accepts the House provision.

h. Conforming amendments

The conference agreement accepts the House provision.

i. Contingency procedures list

The conference agreement does not include the House provision.

j. Study

The conference agreement includes a study to be conducted by the Secretary. The study is to evaluate the results of the program on utilization of surgical procedures, changes in nonconfirmation rates and, where possible, outcomes. It is also to evaluate the appropriateness of the procedures actually selected for reviews and PRO patterns with respect to requiring second opinions. Finally, the study is to assess the effectiveness of reviews mandated under this section as compared with other methods of ensuring the medical necessity of surgical procedures. The study is due 36 months after enactment.

The conferees agreed that the effective date would be January 1, 1987.

52. Changing medicare appeal rights

Present law

Beneficiaries dissatisfied with a carrier's disposition of a part B claim are entitled to a review by the carrier. A fair hearing by the carrier is then available if the amount in controversy is $100 or more. The law does not provide for any further administrative appeal or judicial review for a part B claim.

Since the inception of the program, beneficiaries with disputes over claims could be represented by providers in their administrative appeals. In 1984, the Health Care Financing Administration issued a manual instruction prohibiting such representation.

House bill

The House bill provides that beneficiaries may obtain an administrative law judge hearing for part B claims if the amount in controversy is $500 or more, and a judicial review if the amount in controversy is $1,000 or more. In determining the amount in controversy, the Secretary, under regulations, must allow two or more claims to be aggregated if the claims involve the delivery of similar or related services to the same individual or involve common issues of law and fact arising from services furnished to two or more individuals. The current carrier hearing would be retained for amounts in controversy between $100 and $500.

The bill also clarifies that beneficiaries taking appeals under part A or part B could be represented by the provider who furnished the services or items in question.

Senate amendment

No provision.

Conference agreement

The conference agreement includes the House provision with a modification to specify that a national coverage determination made pursuant to section 1862(a)(1)(A) of the Act may not be reversed upon appeal. These determinations are made by the Health Care Financing Administration (HCFA), generally after consultation with the National Center for Health Service Research and Health Care Technology Assessment, and are contained in the Coverage Issues Appendix (now called Medicare Coverage Issues Manual) to the intermediary and carrier manuals.

With the additional workload that would be established under the bill, it is the conferees' expectation that HHS will give serious consideration to establishing a separate office of hearings and appeals for HCFA or otherwise creating a group of hearing officers devoted exclusively or predominately to medicare appeals.

53. Extension of On Lok waiver

Present law

The On Lok Community Care Organization for Dependent Adults provides health care services to frail elderly patients at risk of institutionalization. On Lok conducted a demonstration project from February 1979 to October 1983, with the aid of waivers of compliance with certain medicare and medicaid requirements. P.L. 98-21 required the Secretary to approve waivers for a new three-year, risk-sharing, capitated payment demonstration to be conducted by On Lok from November 1983 to November 1986.

House bill

The Secretary would be required to extend medicare waivers for the risk-sharing On Lok demonstration upon their expiration and, if the State of California applies for an extension of related medicaid waivers, to approve the State's application. The waivers would be extended on the same terms and conditions as applied to the original approval mandated under P.L. 98-21 (except that requirements for collection and evaluation of information for demonstration purposes should not apply) and would remain in effect until the Secretary found that the applicant no longer complied with those terms and conditions. The provisions would be effective upon enactment.

Senate amendment

Similar provision.

Conference agreement

The conference agreement includes the House bill.

54. Remove restriction on actuarial opinion

Present law

Annual reports required of the Board of Trustees on the financial status of the Social Security trust funds (including the medicare trust funds) must include an actuarial opinion certifying that the assumptions and cost estimates used in the report are reasonable. According to provisions in the Social Security Amendments of 1983 (P.L. 98-21), this certification may not refer to the economic assumptions underlying the trustees report.

House bill

No provision.

Senate amendment

The provision would allow the actuaries to comment on the economic assumptions underlying the trustee's report. It would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment.

55. Extend GAO reporting date

Present law

The Deficit Reduction Act of 1984 (DEFRA) required the General Accounting Office (GAO) to study the following aspects of medicare contracting for claims processing:

The ability of HCFA to manage competitive bidding and the relative costs of competitive arrangements compared with cost based reimbursement;

The appropriateness of removing the provider nomination requirements in the statute;

Any disparities in costs and quality of claims processing among various intermediaries and carriers;

Whether the Secretary's standards for evaluating contractor costs are adequate and properly applied; and

Whether the Secretary's authority is sufficient to deal with inefficient intermediaries and carriers either through the contract negotiation and budget review process or through the process of termination or nonrenewal of contracts.

DEFRA required submission of the report to Congress within 12 months of enactment, i.e., by July 18, 1985.

House bill

No provision.

Senate amendment

The provision would extend the reporting date to 18 months after the enactment of DEFRA (i.e. January 18, 1986) to allow the GAO to expand the scope of the study as requested by the committees of jurisdiction (i.e. Senate Committee on Finance, House Committee on Ways and Means, and House Committee on Energy and Commerce).

The provision would be effective as if originally included in the Deficit Reduction Act of 1984.

Conference agreement

The conference agreement includes the Senate amendment with a modification specifying that the GAO report is due May 1, 1986.

56. Allow greater HMO membership on PRO boards

Present law

The Secretary must enter into contracts with organizations to provide utilization and quality control peer review of the health care services paid for under medicare. The contractors are referred to as Peer Review Organizations (PROs). An applicant whose governing body has more than one member who is affiliated with a health maintenance organization (HMO) is given secondary preference to physician-sponsored or physician-assisted entities when PRO contracts are awarded.

House bill

No provision.

Senate amendment

The provision would allow PROs with more than one HMO board member to qualify as a PRO on the same basis as other organizations. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment.

57. Peer Review Organization Reimbursement

Present law

Section 1866(a)(1)(F)(iii) of the Social Security Act specifies that Peer Review Organization reimbursement is to be set at a level which reflects peer review rates established in fiscal year 1982 for both direct and administrative costs (adjusted for inflation). Section 1866(a)(1)(F)(iv) specifies that the aggregate reimbursement for a fiscal year may not be less than the aggregate amount expended in fiscal year 1982 (adjusted for inflation).

House bill

No provision.

Senate amendment

The provision deletes section 1866(a)(1)(F)(iii) and substitutes fiscal year 1985 for fiscal year 1982 in clause (iv). Reimbursement shall be made to the organization on a monthly basis, with payments for any month being made not later than 15 days after the close of such month. This change is to address the concern that current law provisions could be used to restrict PRO reimbursement. The provision would be effective on enactment.

Conference agreement

The conference agreement includes the Senate amendment with a modification specifying that fiscal year 1986 is the base year against which aggregate expenditures are compared.

58. PRO review of Health Maintenance Organization Services

Present law

Current law requires the Secretary of Health and Human Services to contract with Peer Review Organizations (PROs) for the review of the medical necessity, quality, and appropriateness of services provided to medicare beneficiaries. The PROs are required to review some or all of the professional services provided under medicare. Each PRO, in consultation with the Secretary, determines the types and kinds of cases over which it will exercise its review authority in order to most effectively meet its responsibilities.

On January 10, 1985, the Secretary published final regulations to implement the 1982 TEFRA health maintenance organizations (HMOs) and competitive medical plans (CMPs) contract provisions with medicare. The final regulation includes a provision that requires HMOs and CMPs with contracts under section 1876 to comply with the requirement for PRO review of services furnished to medicare enrollees.

House bill

No provision.

Senate amendment

The provision would require the Secretary to implement peer review of part A and part B services furnished by HMOs and CMPs. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment with a modification and changes the effective date of the provision to January 1, 1987. This clarifies an ambiguity that had been raised about current law. The conferees intend that the Secretary allocate sufficient additional funds to the PROs for the performance of the required functions and to recognize the unique features of HMO and CMP delivery of services in implementing this provision.

The conferees understand that the HMO/CMP industry is in the process of developing its own quality assurance capabilities. Conferees intend to review this approach prior to the effective date of this provision.

59. Substitute review pending termination of a PRO contract

Present law

A Peer Review Organization (PRO) which has a contract with the Health Care Financing Administration (HCFA) has exclusive authority to review utilization and quality of services as specified under Title XI of the Social Security Act. The Secretary may terminate a PRO contract for nonperformance provided certain procedures are followed. These procedures require the Secretary to "provide the organization with an opportunity to provide data, interpretations of data, and other information pertinent to its performance under the contract." The data is to be reviewed by a panel appointed by the Secretary and the findings submitted to the Secretary and made available to the organization. The Secretary may accept or not accept the panel's findings. The Secretary may, with the concurrence of the organization, modify the scope of the contract. The Secretary may terminate the contract upon 90 days after the panel has submitted a report or earlier if the organization so agrees. The law does not make provision for assigning review (or backlogged review) to another entity during termination proceedings. Thus, terminations can create a period of several months where no utilization and quality review is conducted.

House bill

No provision.

Senate amendment

The provision would authorize the Secretary to assign review authority to another entity after the PRO has been notified of an intent to terminate its contract because the PRO is not performing effectively and prior to the time when a new PRO contract is awarded. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment.

60. Authorize peer review organizations to deny payment for substandard care

Present law

Peer Review Organizations (PROs) may review, subject to the provisions of their contracts, the professional activities of physicians, other practitioners and institutional and noninstitutional providers in rendering services to medicare beneficiaries. The review is to focus on: (a) the medical necessity and reasonableness of care; (b) the quality of care; and (c) the appropriateness of the setting. The law specifies that the determinations of the PRO with respect to medical necessity reviews and previews of the appropriateness of the setting are generally binding for purposes of determining whether benefits should be paid. Despite the fact that PROs are required to conduct quality reviews, they are not authorized to deny payment for care of substandard quality.

House bill

No provision.

Senate amendment

The provision would authorize PROs to deny payment for care of substandard quality that is identified through criteria developed according to a plan approved by

HCFA. The provision would be effective upon enactment.

Conference agreement

The conference agreement includes the Senate amendment with a modification specifying that beneficiaries are to be protected by the waiver of liability provisions against being charged for services for which medicare payment is denied. Further, the agreement requires the criteria to be developed pursuant to guidelines established by the Secretary.

TITLE IX

SUBTITLE B—MEDICAID AND MATERNAL AND CHILD HEALTH PROVISIONS

1. Services for Pregnant Women (Section 9501)

Present law

The Deficit Reduction Act of 1984 (P.L. 98-369) requires the States to cover under Medicaid, from the date of medical verification of pregnancy, certain pregnant women, if they meet State AFDC income and resource requirements, as follows: (a) pregnant women who would be eligible for AFDC and Medicaid if their child were born; and (b) pregnant women in two-parent families where the principal breadwinner is unemployed.

House bill

(a) *Mandatory coverage.* Requires States to cover under Medicaid pregnant women in two-parent families that meet AFDC income and resource standards even where the principal beadwinner is not unemployed.

(b) *Targeted services.* Specifies that States are not required to extend comparable benefits to other beneficiaries when they provide additional services related to pregnancy (including prenatal, delivery, and post-partum services) or its complication to all covered pregnant women.

(c) *Post-partum coverage.* Requires States to provide post-partum coverage to eligible pregnant women until the end of the 60-day period beginning on the last day of their pregnancy.

Senate amendment

(a) *Mandatory coverage.* No provision.

(b) *Targeted services.* Similar provision.

(c) *Post-partum coverage.* Permits a State to provide such coverage if it does so for all pregnant women covered under the plan. Covered services for this population group may be limited to post-partum care.

Conference agreement

(a) *Mandatory coverage.* The conference agreement follows the House bill.

(b) *Targeted services.* The conference agreement follows the Senate amendment with a clarification that services relating to any other condition which may complicate pregnancy are included in this exception to the general comparability requirement.

(c) *Post-partum coverage.* The conference agreement follows the House bill.

Effective dates. The mandatory coverage provision applies to Medicaid payments for calendar quarters beginning on or after April 1, 1986, without regard to whether or not final regulations to carry out the amendments have been promulgated by that date. Delay is permitted where State legislation (other than legislation appropriating funds) is required. All other provisions take effect on the date of enactment.

2. Modifications of Home and Community-Based Waiver (Section 9502)

Present law

(a) *Eligibility for Ventilator-Dependent Persons.* Section 1915(c) of the Social Security Act authorizes the Secretary of HHS to waive certain Medicaid requirements to allow States to provide a variety of home and community-based long-term care services to individuals who would otherwise require the level of care provided in a SNF or ICF whose cost could be reimbursed under the State's Medicaid plan.

(b) *Needs Allowances.* Regulations require the income of beneficiaries of home and community-based care to be applied to the cost of this care, after deductions have been made for maintenance needs.

(c) *Habilitation Services.* States may cover the following services under waivers: case management, homemaker/home health aid services, personal care, adult day health, habilitation services, respite care, and such other services requested by the State and approved by the Secretary. With regard to habilitation sevices, final regulations excluded prevocational and vocational training and educational activities from services which may be covered.

(d) *Waiver Approval.* In order to receive approval for a waiver, States must provide a number of assurances to the Secretary, including one requiring that the estimated average per capita expenditure for medical assistance under the waiver for those receiving waivered services in any fiscal year not exceed the average per capita expenditure that the State reasonably estimates would have been incurred in that year for that population if the waiver had not been granted. This has been interpreted to require a showing by States that estimated average per capita expenditures under the waiver will not exceed 75 percent of the average per capita expenditures the State estimates would have been incurred in the absence of the waiver. Final implementing regulations published March 13, 1985, also require States to assure that the actual total expenditures for home and community-based services under the waiver will not exceed the State's approved estimated expenditures and that the State will not claim Federal matching payments for expenditures exceeding the approved estimate.

(e) *One Year Waiver Extension.* A home and community-based waiver is granted for an initial term of 3 years, and, upon the request of a State, can be renewed for additional 3-year periods, unless the Secretary determines that certain assurances have not been met.

(f) *Five Year Waiver Renewals.* Same as (e).

(g) *MCH Block Grant Coordination.* Under the waiver authority, States are providing home and community-based services to a number of groups of individuals, inlcuding children. Title V of the Social Security Act, known as the Maternal and Child Health (MCH) Block Grant, authorizes grants to the States for a variety of maternal and child health services, inlcuding services for children with special health care needs.

(h) *Substitution of Participants.* Under the waiver authority, a State may provide a variety of home and communiuty-based services to individuals who would otherwise require the level of care provided in an SNF or ICF, cost of which could be reimbursed under the State's Medicaid plan. Regulations require States, in their applications to provide home and community-based services, to describe the group or groups of indivuduals to whom services will be offered and to estimate the unduplicated number of recipients who will receive services in a given year. This has been interpreted to mean that individuals who receive services in a given year and who die, enter a nursing home, or otherwise drop out of the home and community-based care program during that year, cannot be replaced in that year with other individuals would be eligible to receive such services.

House bill

(a) *Eligibility for Ventilator-Dependent Persons.* Includes ventilator-dependent individuals who receive inpatient hospital services among those individuals eligible for expanded home and community-based services.

(b) *Needs Allowances.* Allows States to establish for individuals receiving waivered services in the community higher maintenance needs allowances than maximum amounts allowed under regulations in effect July 1, 1985.

(c) *Habilitation Services.* Defines habilitation services as services designed to assist individuals to acquire, retain, and improve the self-help, socialization, and adaptive skills necessary to reside successfully in home and community based settings, and includes prevocational, educational, and supported employment services. Habilitation services would not include special education and related services as defined in the Education of the Handicapped Act which otherwise are available through a local educational agency, nor would they inlude vocational rehabilitation services which otherwise are available through a program funded under the Rehabilitation Act of 1973.

(d) *Waiver Approval.* Clarifies that the estimated average per capita expenditure for medical assistance under the program in any fiscal year must not exceed 100 percent of the average per capita expenditures that the State reasonably estimates would have been incurred in that year if the waiver had not been granted.

Prohibits the Secretary from requiring that the actual total expenditures for home and community-based services under the waiver, and the associated claim for Federal matching payments, can not exceed the approved estimates for these services.

Prohibits the Secretary from denying Federal matching payments for home and community-based services on the ground that a State has failed to limit actual total expenditures for home and community-based services under the waivers to the approved estimates for these expenditures.

Allows States, in estimating the average per capita expenditures for physically disabled individuals in ICFs, to use only the expenditures associated with that group of patients and not expenditures associated with non-disabled individuals.

(e) *One Year Extension.* No provision.

(f) *Five Year Waiver Renewals.* No provision.

(g) *MCH Block Grant Coordination.* No provision.

(h) *Substitution of Participants.*—No provision.

Senate amendment

(a) *Eligibility for Ventilator-Dependent Persons.* No provision; however, section 720 of Senate amendment amends Medicaid to require States to cover respiratory services for qualified respiratory care patients.

(b) *Needs Allowance.* No provision.

(c) *Habilitation Services.* No provision.

(d) *Waiver Approval.* No provision.

(e) *One Year Waiver Extension.* Requires the Secretary to extend, for a period of 1 year at a minimum or 5 years at a maximum, any waiver that expires during the 12-

month period beginning September 30, 1985, if the State requests an extension.

(f) *Five year Waiver Renewals.* Requires the Secretary, beginning September 30, 1986, to renew home and community-based services waivers for additional 5-year periods if the Secretary approves the waiver renewal request.

(g) *MCH Block Grant Coordination.* Amends the waiver authority to require the State Medicaid agency, whenever appropriate, to enter into cooperative arrangements with the State agency administering the MCH Block Grant program of services for children with special health care needs. These cooperative arrangements must provide that individuals under 18 who are eligible for home and community-based services will be referred to the State agency administering the MCH program for children with special health care needs.

In addition, the State MCH agency would be required to assure: (1) the establishment of an individual service plan for the child; (2) the designation of a case manager to assist the family in carrying out the plan; and (3) the monitoring of the utilization, quality, and costs of services provided for appropriateness and reasonableness.

(h) *Substitution of Participants.* Amends the home and community-based waiver authority to specify that for waivers which contain a limit on the number of individuals who will receive home and community-based services, the State may substitute additional individuals for any individuals who die or become ineligible for services.

Conference agreement

(a) *Eligibility for Ventilator-dependent Persons.* The conference agreement follows the House bill.

(b) *Needs Allowances.* The conference agreement follows the House bill.

(c) *Habilitation Services.* The conference agreement follows the House bill.

(d) *Waiver approval.* The conference agreement follows the House bill.

(3) *One Year Waiver Extension.* The conference agreement follows the Senate amendment. The conferees intend that waivers extended under this provision are subject to the same Secretarial monitoring and compliance procedures as all other home and community-based services waivers.

(f) *Five Year Waiver Renewals.* The conference agreement follows the Senate amendment.

(g) *MCH Block Grant Coordination.* The conference agreement follows the Senate amendment. The conferees intend that the use of cooperative arrangements be optional with the States and that the use of MCH agencies as case managers be optional with beneficiaries covered under the waiver.

(h) *Substitution of Participants.* The conference agreement follows the Senate amendment.

Effective dates

(a) *Eligibility for Ventilator-dependent Persons.* Effective for services furnished on or after October 1, 1985.

(b) *Needs Allowances.* Effective for waiver or renewal applications filed before, on, or after the date of enactment.

(c) *Habilitation Services.* Effective for services furnished on or after enactment.

(d) *Waiver Approval.* Effective for waiver or renewal applications filed before, on, or after the date of enactment, and for services furnished on or after August 13, 1981.

(e) *One Year Waiver Extension.* Effective for waivers expiring on or after September 30, 1985, and before September 30, 1986.

(f) *Five Year Waiver Renewals.* Effective on September 30, 1986.

(g) *MCH Block Grant Coordination.* Effective on the date of enactment.

(h) *Substitution of Participants.* Effective on the date of enactment.

3. Home and Community-based Services Demonstrations. (Section 9513)

Present law

No comparable provision.

House bill

No provision.

Senate amendment

Requires the Secretary of HHS to conduct demonstrations in four States to determine whether, and to what extent, State-controlled home and community-based services programs for elderly, disabled, and developmentally disabled Medicaid-eligible individuals can reduce expenditures for society as a whole, the Federal government, and/or the States. Under the demonstration, expenditures would exceed the amounts which would otherwise be expended under the States' Medicaid plans for services provided to the same individuals by not less than $85,000,000 no more than $88,000,000 for all four projects over the 3-year period of the projects. These additional amounts may be used to provide additional services such as habilitative services not otherwise covered under the State's Medicaid plan or care provided in small facilities not otherwise eligible for payments under the State plan, but all standards for quality of care otherwise applicable under the State plan would apply. In selecting the four States to carry out the demonstration projects, the Secretary would be required to select programmatically and demographically disparate States.

Requires the Secretary to evaluate the demonstration projects and to submit a preliminary report during the third year of the projects. Requires that the evaluation be funded at a level of not less than $1,500,000 nor more than $2,000,000.

Conference agreement

The conference agreement follows the Senate amendment with a modification providing that at least one of the four demonstration projects include the provision of home and community-based services for a substantial number of persons with Alzheimer's and related disorders, and that at least one of the other demonstration projects address services for mentally retarded and developmentally disabled Medicaid beneficiaries. The conference agreement also clarifies that beneficiaries participating in these demonstration projects will not experience any reduction or delay in benefits or services to which they are entitled under the regular State Medicaid plan. In addition, the conference agreement clarifies that the funding provided for these demonstrations is Medicaid entitlement funding, subject to regular State matching requirements.

The purpose of these demonstration projects is to determine the cost of expanding the availability of home and community-based services as an alternative to institutional long term care. The conferees recognize that the budget neutrality requirement of the current home and community-based waiver provision does not allow the States the flexibility to determine the cost of expansion of services because current waiver programs must be designed within existing spending levels. Under these demonstrations, however, a State's expenditures can exceed the amounts which would otherwise be spent under the State's Medicaid plan for services to the same individuals.

With regard to the demonstration concerning Alzheimer's and related disorders, the conferees intend that the project should specifically address the criteria for determining who is eligible for services as an Alzheimer's or related disorder patient, the range of services needed, and the cost of care for such patients. The conferees expect that the project relating to the mentally retarded and developmentally disabled population will address the cost, range and quality of services needed and the appropriateness of home and community-based care for this population.

Since the individuals participating in these demonstrations are otherwise eligible for Medicaid, the funds provided under this section are intended to support new and expanded benefits that are otherwise unavailable to these individuals under the State's Medicaid plan, such as habilitation services and respite care. The conferees do not intend the conduct of these demonstrations to restrict the benefits available under the State's plan, or otherwise impair and entitlement of any Medicaid-eligible individual participating in the demonstration. This section does not authorize the demonstration of a block grant for ICF/MR services.

The conferees are particularly concerned that these demonstrations attempt to assess the extent to which there are individuals in need of long-term care services who are not now receiving care, but would seek care if services in the community were expanded. The question of induced demand for services (the so-called "woodwork effect") is a major unresolved issue in current policy debates regarding the cost of expanding the availability of home and community-based services for the frail elderly and disabled. The conferees expect that one of the research objectives of these demonstrations will be to test whether a "woodwork effect" exists and, if so, to estimate its size and cost.

In determining whether and to what extent home and community-based waivers reduce expenditures, the conferees intend that the demonstration project evaluation will assess the impact of such services on the utilization and cost of both acute care and long term care services. For those participants eligible for both Medicare and Medicaid, the conferees intend that the costs and/or savings to both programs be separately evaluated.

The conferees are also interested in determing whether home and community-based services under Medicaid are newly offered services or whether they substitute for service currently available under other programs, such as Title XX of the Social Security Act. The conferees expect that the evaluation will determine whether expanding Medicaid home and community-based care improves access to such services or merely changes the financing for existing services.

Effective Date. Effective on enactment.

4. Task Force on Technology-Dependent Children. (Section 9520)

Present law

No comparable provision.

House bill

Requires the Secretary to establish, within 6 months after enactment of this Act, a task force concerning alternatives to institutional care for technology-dependent children. Requires the task force to submit, not later than two years after enactment of

this Act, a final report to the Secretary and Congress on (1) barriers that prevent the provision of appropriate care in a home or community-setting to technology-dependent children, and (2) recommended changes in the provision and financing of health care in private and public health care programs so as to provide home and community-based alternatives for these children.

Senate amendment

Identical provision.

Conference agreement

The conference agreement follows the House bill.

Effective Date. Effective on enactment.

5. Medicaid Coverage of Respiratory Care Services for Ventilator-Dependent Individuals. (Section 9504)

Present law

States are required to cover home health services for Medicaid beneficiaries over 21 who are categorically needy. In addition, a State must provide home health services to (1) categorically needy beneficiaries under 21 if such individuals are eligible to receive skilled nursing facility services under a State's Medicaid plan, or (2) medically needy beneficiaries if SNF services are offered to that group. States may provide such services to other program beneficiaries if they are offered to all eligible beneficiaries.

House bill

No provision.

Senate amendment

Requires States to cover respiratory services in the home for individuals who (1) are medically dependent on a ventilator for life support at least 6 hours per day; (2) have been so dependent for at least 30 consecutive days or the maximum number of days authorized under the State plan, whichever is less, as inpatients in one of more hospitals, SNFs, or ICFs, and who, but for home respiratory care, would require respiratory care in these institutions; (3) have adequate social support services to be cared for at home; and (4) wish to be cared for at home.

Conference agreement

The conference agreement follows the Senate amendment with a modification providing that respiratory care services are an optional Medicaid benefit. Respiratory care services are defined as services provided on a part-time basis at the home of the eligible ventilator-dependent individual by a respiratory therapist or other health care professional trained in respiratory therapy (as determined by the State) for which payment is not otherwise made under the State plan within the payments for other items or services. The conferees expect that the Secretary, in regulations implementing this provision, will take particular care to assure that payment is not made twice for the respiratory care services, either because this service is already covered in the charge for ventilator or related equipment, or because the patient is also receiving nursing or other home care services that include the provision of respiratory care services.

Effective Date. Effective with respect to services furnished on or after April 1, 1986.

6. Optional Hospice Benefits (Section 9505).

Present law

States may cover some services that make up the hospice benefit package, such as home health care and prescription drugs. However, hospices are not recognized as providers for payment purposes, and States may not pay for comprehensive hospice services as a package. In addition, States may not offer services in the hospice package to terminally ill beneficiaries without offering those same services to all beneficiaries.

House bill

Allows States to cover hospice care as an optional Medicaid benefit. Hospice services could be provided to terminally ill individuals who have voluntarily elected to receive hospice care instead of certain other benefits. Hospice care would include the services included under Medicare. Hospice programs would be required to meet Medicare's requirements for organization and operation, and be public or nonprofit. The amount, duration, or scope of hospice services could not be less than benefits under Medicare. States choosing to cover hospice would be required to use Medicare's prospective payment methodology and reimburse at Medicare's rates. Beneficiary elections of hospice care could be for a period or periods as the State may establish. Beneficiaries could revoke election. States could apply the same eligibility standards for patients receiving hospice care outside of institutions as they apply to institutionalized patients. Cost sharing would not be imposed on hospice patients.

Senate amendment

Similar provision. However, contains no further requirements with respect to: the nature of the hospice organization; the amount, duration, or scope of benefits; reimbursement; election periods; income eligibility standards; or cost sharing.

Conference agreement

The conference agreement follows the House bill with a modification to delete the limitation on participation by otherwise qualified for-profit entities. The agreement also clarifies that, if an eligible individual who is a patient in an SNF or ICF elects hospice coverage, the payment for that individual's care in the institution during the period covered by the election will be made by the responsible hospice. The State's payment rate to the responsible hospice for each day the patient resides in an SNF or ICF must be increased by the amount attributable to the cost of room and board in the SNF or ICF; the facility will be paid by the responsible hospice, not by the State.

Effective Date. Effective for services furnished on or after enactment.

7. Medicaid Payments of Direct Medical Education Costs of Hospitals

Present law

State Medicaid payments for inpatient hospital services must be reasonable and adequate to meet the costs which must be incurred by efficiently and economically operated facilities in order to meet State and Federal laws and regulations and quality and safety standards.

House bill

(a) *Basis of payment.* Requires State Medicaid programs to pay hospitals for their direct medical education costs associated with approved medical residency training programs on the basis of a fixed amount per fulltime equivalent (FTE) resident.

(b) *Calculation of payment.* Provides that the payment to each hospital would equal the hospital's approved FTE resident amount, times the hospital's number of FTE residents, times the proportion of total inpatient days attributable to Medicaid patients.

(c) *Payment limitation.* Requires the Secretary to determine each hospital's allowable average cost per FTE resident by using data on the average reasonable direct medical education cost per FTE resident from the hospital's most recent audited Medicare cost report, updated by the actual and estimated change in the Consumer Price Index. Provides that a hospital's FTE resident amount may not exeed the following percentages of the national average FTE resident amount: 175 percent for the residency year beginning July 1, 1986; 150 percent for the residency year beginning July 1, 1987; and 125 percent for residency years beginning on or after July 1, 1988.

(d) *Counting of residents.* Requires the Secretary to establish rules for the computation of FTE residents which provide that only time spent in patient care activities be counted, that time spent in an outpatient setting be counted, and that residents who serve only a portion of their year with one or more hospitals taken into account.

(e) *Weighting factors.* Requires that for residency years beginning July 1, 1987, a weighting factor be applied in calculating the number of FTE residents as follows:

Weighting Factors

Residency year beginning in	Primary care residents	Other residents	
		During initial residency period	During any other period
1987	1.10	0.90	0.75
1988	1.20	.80	.50
1989 or later	1.30	.70	.50

Authorizes the Secretary, beginning July 1, 1989, to change the weighting factors or to establish an alternative method for calculating the number of FTE residents, based on recommendations of the Physician Payment Review Commission (as authorized by Section 152 of the House bill).

(f) *Primary care residents.* Defines "primary care resident" to mean an individual in the first 3 years of postgraduate medical training in the fields of internal medicine, pediatrics, or family medicine, and an individual in up to 2 years of training in geriatric medicine, health, or preventive medicine.

(g) *Initial residency period.* Defines "initial residency period" to mean the minimum number of years of formal residency training necessary to satisfy the requirements for initial board eligibility in a particular medical specialty, not to exceed 5 years; excludes up to 2 years of residency in the fields of geriatric medicine, public health, and preventive health.

(h) *Foreign medical graduates.* Provides that foreign medical graduates (i.e., graduates of medical schools not accredited by a body or bodies approved by the Secretary of Education) may not be counted as residents beginning July 1, 1986, unless they have passed parts I and II of the Foreign Medical Graduate Examination in the Medical Sciences (FMGEMS). Foreign medical graduates who began serving as residents before July 1, 1986, and serve as residents during that year but have not passed the FMGEMS examination before July 1, 1986, would be counted at one-half the rate at which the resident would otherwise have been counted. Authorizes the Secretary to treat an individual as having passed the FMGEMS examination if the individual is unable to take that examination because

they previously received certification from the Educational Commission for Foreign Medical Graduates.

(i) *Report.* Requires the Secretary to report to Congress, not later than Dec. 31, 1986, on whether the new Medicaid payment methodology for direct medical education costs should be revised to provide for greater uniformity in the approved FTE resident amounts and, if so, how such revisions should be implemented.

Senate amendment

No provision directly amending the Medicaid statute.

Conference agreement

The conference agreement does not include the House provision. See section 9202, concerning Medicare payments to hospitals for direct costs of medical education, which affects State Medicaid programs that elect to follow Medicare principles.

8. Treatment of Potential Payments from Medicaid Qualifying Trusts (Section 9506)

Present law

Under Medicaid, only income and resources actually available to an individual are considered in determining eligibility. The law contains no specific provision pertaining to income from trusts.

House bill

(a) *Definition of available amounts.* Specifies that for purposes of Medicaid eligibility, the distributions from certain Medicaid qualifying trusts would be considered available to the individual establishing the trust whether or not the distributions are actually made. The amount deemed available to the beneficiary is the maximum amount of payments that may be permitted under the terms of the trust assuming the full exercise of discretion by the trustee or trustees.

(b) *Definition of trust.* Defines a "Medicaid qualifying trust" as a trust or similar legal device established by an individual (or his or her spouse) under which the the individual is the beneficiary of all or part of the payments from the trust and the amount of such distribution is determined by one or more trustees who are permittted to exercise any discretion with respect to the amount to be distributed to the individual. Clarifies that the provision applies: (1) whether or not the Medicaid qualifying trust is irrevocable or is established for purposes other than to enable the individual to qualify for Medicaid; and (2) whether or not the trustee(s) actually exercise discretion with respect to the amount of funds distributed.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with a modification authorizing States to refrain from applying this provision to individuals in cases where undue hardship will result. While the conferees intend to discourage the establishment of the specified grantor trusts for the purpose of shielding assets from the State, the conferees also would expect States to waive application of this provision in cases where undue hardship would occur. For example, the conferees do not expect a State to deny Medicaid coverage to an individual under this section if he or she would be forced to go without life-sustaining services altogether because the trust funds could not be made available to pay for the services.

This provision addresses only eligibility for Medicaid, not eligibility for Supplemental Security Income or Aid to Families with Dependent Children. The conferees do not intend that the enactment of this provision be interpreted to have any bearing on eligibility policy in either of those cash assistance programs. It is also the understanding and intent of the conferees that this provision will have no effect on current law with regard to the treatment of such trusts in the context of estate proceedings.

In those States where, pursuant to section 1634 of the Social Security Act, the Secretary is making Medicaid eligibility determinations with respect to Supplemental Security Income beneficiaries, the conferees expect that the Secretary and the States will integrate the determinations required under this section into their current arrangements in a manner satisfactory to the Secretary.

Effective Date.—Applies to medical assistance furnished on or after the first day of the second month beginning after the date of enactment.

9. Written Standards for Provision for Organ Transplants (Section 9507)

Present law

No provision.

House bill

Denies Federal matching payments for organ transplant services provided to Medicaid beneficiaries unless the State plan provides for written standards for the coverage of such services and unless the standards treat similarly situated individuals alike. If such standards impose restriction on the faciliities or practitioners who may provide such services, the restrictions must be consistent with the accessibility of high quality care by Medicaid patients.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill.

Effective Date.—Applies to medical assistance furnished on or after January 1, 1987.

10. Extension of MMIS Deadline. (Section 9518)

Present law

States are generally required to have mechanized claims processing and information retrieval systems, known as "Medicaid management Informtion Systems" (MMIS), that are annually reviewed and approved by the Health Care Financing Administration. The systems are designed to improve the capability of State Mediciad agencies to process claims on an accurate and timely basis and to provide data for administration of the Medicaid program.

The current deadline for a State to operate such a system is the earlier of (a) September 30, 1982, or (b) the last day of the sixth month following the date specified for operation of such systems in the States most recently approved advance planning document submitted before the enactment of P.L. 96-398 (October 7, 1980).

House bill

The deadline for State compliance with Federal performance standards for the operation of a Medicaid management information system is extended to September 30, 1985.

Senate Amendment

No provision.

Conference agreement

The conference agreement follows the House bill.

Effective Date.—Applies to payments to States for calendar quarters beginning on or after October 1, 1982.

11. Extension of Certain Texas Waiver Project. (Section 9523)

Present law

Section 1115 of the Social Security Act provides the Secretary of HHS general authority to conduct experiments and demonstrations under Medicaid and to waive program requirements in conducting these demonstrations. Under this authority, the Secretary has approved a waiver for the demonstration project, "Modifications of the Texas System of Care of the Elderly: Alternatives to the Institutionalized Aged," for the period January, 1980, through December, 1985.

House bill

Requires the Secretary to extend until December 31, 1988, approval of the waiver for the demonstration project, "Modifications of the Texas System of Care for the Elderly: Alternatives to the Institutionalized Aged," and to continue the approval on the same terms and conditions as applied to the project as of the date of enactment of this Act. Also specifies that approval remain in effect until such time as the Secretary finds that the applicant no longer complies with these terms and conditions.

Senate amendment

Similiar provision, except requires the Secretary to extend approval of the waiver for this demonstration until January 1, 1989. Does not require the Secretary to continue the approval on the same terms and conditions as applied to the project on date of enactment of the Act.

Conference agreement

The conference agreement follows the House bill with a modification that the waiver be extended until January 1, 1989.

Effective Date.—Effective on enactment.

12. Report on Adjustment in Medicaid Payments for Hospitals Serving Disproportionate Numbers of Low Income Patients. (Section 9519)

Present law

The Omnibus Budget Reconciliation Act of 1981 (P.L. 97-35) required States, in developing their payment rates for inpatient hospital services, to take into account the situation of hospitals which serve a disproportionate number of low income patients with special needs.

House bill

Requires the Secretary to submit to Congress a report (1) describing the methodology used by States to take into account the situation of disproportionate share hospitals when determining their Medicaid payments to hospitals, (2) identifying hospitals that have received a disproportionate share adjustment, and (3) specifying the proportion of low income and Medicaid patients at such hospitals.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with a modification providing that the Secretary transmit the report to Congress no later than October 1, 1986.

13. References to Provisions of Law Providing Coverage Under, or Directly Affecting, the Medicaid Program. (Section 9526)

Present law

No provision.

House bill

A section is added to Title XIX (the Medicaid title) of the Social Security Act which provides references to laws directly affecting the Medicaid program. This allows readers of the title to more easily locate provisions of law that make additional individuals eligible for Medicaid, and that establish additional requirements for State plans to be approved under Medicaid.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill.

14. Third Party Liability Collections. (Section 9503)

Present law

(a) State Plan Requirements

Medicaid is intended to be the payer of last resort; that is, other available resources must be used before Medicaid pays for the care of an individual enrolled in the Medicaid program. The law requires the State plan to provide that:

(1) the State or local agency administering the plan will take all reasonable measures to ascertain the legal liability of third parties to pay for care;

(2) that where such agency knows that a third party has legal liability it will treat the liability as a resource of the individual for purposes of eligibility determinations; and

(3) the agency will seek reimbursement from liable third parties where payment has already been made where the expected amount of recovery exceeds the costs of recovery.

(b) Mechanized Claims Processing Systems

States are generally required to have Medicaid management information systems (MMIS) that are reviewed and approved by HCFA each year. The Secretary is required to develop performance standards, system requirements and other conditions for use in approval of such systems.

(c) Regulations

No provision.

(d) Conditions of Medicaid Eligibility

Current law requires Medicaid beneficiaries to assign their rights to medical support payments and other payments for medical care to the State.

(e) Penalties for Erroneous Excess Payments

If a State makes erroneous excess payments exceeding allowable rates, Federal financial participation is reduced.

House bill

No provision.

Senate amendment

(a) State Plan Requirements

(1) Amends the law to specify that reasonable measures for ascertaining the legal liability of third parties include:

(i) collection of sufficient information (as specified in regulations) to enable the State to pursue claims with such information collected at the point of eligibility determinations,

(ii) submission of a plan to the Secretary for pursuing claims. This plan is to be monitored by the Secretary as part of the review of the claims processing system and be subject to penalties for failing to meet conditions of approval, and

(iii) all other penalties, such as audit disallowances for third-party liability, are prohibited.

(2) Clarifies that the person furnishing the service to a Medicaid eligible may not collect cost-sharing amounts if total third-party liabilities at least equal the amount otherwise payable under Medicaid. Cost-sharing may not exceed the lesser of the amount the beneficiary would be required to pay in the absence of third-party liability or the difference between such liability and the Medicaid payment amount. Violation of this provision could subject the person to a sanction equal to up to three times the amount sought to be collected.

(3) Clarifies that a person furnishing services may not refuse to furnish services to a Medicaid eligible because of a third-party's potential liability.

(b) Mechanized Claims Processing Systems

(1) Requires the Secretary to develop performance standards for assessing States' third-party liability collection efforts which are to be integrated with and monitored as part of the Secretary's review of each State's MMIS.

(2) Provides that reviews of MMIS may be conducted once every three years and may, at the Secretary's discretion, be either total reviews or focused reviews.

c. Regulations

Requires issuance of regulations to implement (a) and (b) above within six months of enactment.

(d) Conditions of Medicaid Eligibility

Requires individuals, as a condition of eligibility, to cooperate with the State in identifying and pursuing liable third parties unless such individual has good cause for refusing to cooperate as determined by the State agency in accordance with standards prescribed by the Secretary.

(e) Penalties for Erroneous Payments

Disregards, for purposes of this calculation, errors resulting from failure of an individual to cooperate or give correct information relating to third-party liability.

Conference agreement

(a) State plan requirements

The conference agreement follows the Senate amendment with a modification that third party payments for preventive pediatric care, including Early and Periodic Screening, Diagnosis, and Treatment services, as well as those for prenatal care, must be pursued by the State, not by the provider. The conferees are concerned that the administrative burdens associated with third party liability collection efforts not discourage participation in the Medicaid program by physicians and other providers of preventive pediatric and prenatal care, since the beneficiaries in need of such services already have difficulty finding quality providers in many communities. The conference agreement therefore provides that, in the cases where preventive pediatric and prenatal services are rendered to a beneficiary for whom a third party is potentially liable, the State make payment to the provider according to the normal payment schedule and pursue the third party payment itself.

The conference agreement further provides that, in the case of beneficiaries on whose behalf a child support enforcement is being carried out by a State agency under Title IV-D, the State Medicaid agency will seek to collect from the third party if, after 30 days of delivering the services in question, the provider has not received payment. The intent of the conferees is to protect the mother and her dependent children from having to pursue the absent spouse, or his employer or insurer, for third party liability.

(b) Mechanized claims processing systems

The conference agreement follows the Senate amendment.

(c) Regulations

The conference agreement follows the Senate amendment.

(d) Conditions of Medicaid Eligibility

The conference agreement follows the Senate amendment with a modification clarifying that individuals are required to indentify, to the extent they are able, potentially liable insurers and other third parties, and to provide information to assist the State in pursuing third parties. Beneficiaries are not required to pursue the collections themselves. Pursuit is the responsibility of the provider or the State as provided elsewhere in this section.

The conferees note that the fact that an insurer or other third party is potentially liable for the costs of an individual's care does not, of course, mean that this coverage constitutes a resource for purposes of Medicaid eligibility. If the applicant or beneficiary actually receives a cash payment from a third party by way of indemnification for a medical expense, and if this payment were not somehow already assigned to the State, then the payment so received would be considered a resource for Medicaid eligibility purposes. In all other circumstances, the health insurance or benefits coverage is not to be considered a resource.

(e) Penalties for Erroneous Payments

The conference agreement follows the Senate amendment.

Effective Date.—The requirement that the Secretary promulgate regulations is effective on the date enactment. All other requirements take effect with respect to calendar quarters beginning on or after the date of enactment, except that delay is permitted where State legislation (other than appropriations legislation) is required. No penalty may be applied against a State for violations of State plan requirements occurring before the effective date of these amendments.

15. Optional Targeted Case Management Services (Section 9508)

Present law

"Case management" is commonly understood to be a system under which responsibility for locating, coordinating, and monitoring a group of sevices rests with a designated person or organization. Under current Medicaid law, case management is not included among the list of medical services which may be covered under a State's Medicaid plan. However, States may include case management services under freedom-of-choice and home and community-base services waivers authorized under sections 1915(b) and 1915(c) respectively. In addition, States may receive administrative funds under their Medicaid plans for certain case management activities (for example, preadmission screening) when offered to all Medicaid beneficiaries in all areas of the States.

House bill

No provision.

Senate amendment

Allows States to cover case management services without regard to requirements that Medicaid services be available throughout a State and that covered services be equal in amount, duration, and scope for certain Medicaid beneficiaries. Defines case management services as services which will assist individuals eligible under Medicaid in gaining access to needed medical, social educational, and other services.

Conference agreement

The conference agreement follows the Senate amendment with a modification clarifying that beneficiaries cannot be locked into designated providers under targeted case management services, whether for the case management services themselves or other services. The conferees expect that the Secretary will assure that payments made for case management services under this section do not duplicate payments made to public agencies or private entities under other program authorities for this same purpose. The conference agreement also provides that, with respect to family planning services, the right of Medicaid beneficiaries to choose their own providers may not be restricted under any waivers granted under section 1915(b) of the Social Security Act.

Effective Date.—Effective for services furnished on or after enactment.

16. Modify revaluation of Assets Provision (Section 9509)

Present law

Under section 2314 of the Deficit Reducton Act of 1984, the "revaluation of assets" provision, Medicare payments to nursing homes may not be increased to reflect higher capital costs that result solely from the sale of such facilities. Capital costs recognized for reimbursement include depreciation, interest expenses, and in the case of proprietary providers, return on equity. Capital-related costs to the new owner are based on the lesser of (1) the allowable acquisition cost to the prior owner (i.e., the historical cost, net of depreciation), or (2) the acquisition cost to the new owner. Medicaid payments are subject to a similar limit with States required to provide assurances, satisfactory to the Secretary, that methodologies used to establish rates paid to nursing homes can reasonably be expected not to increase those rates more than they would under Medicare policy as a result of a change in ownership.

House bill

No provision.

Senate amendment

Amends the Medicaid revaluation of assets provision to allow a State's aggregate capital cost payments to nursing homes to reflect increases in their valuation due to changes in ownership. The revaluation, however, would be limited to the acquisition costs of the previous owner increased by one-half the percentage increase in the Dodge Construction Index for Nursing Homes applied in the aggregate to those facilities which have changed ownership, or one-half the percentage increase in the CPI, whichever is lower.

Requires GAO to conduct a study of the effects of these amendments and to report the results of the study two years after the date of enactment.

Conference agreement

The conference agreement follows the Senate amendment. It is the understanding of the conferees that the Senate report language regarding reduction by the previously allowed depreciation does not govern.

Effective Date.—October 1, 1985, but only with respect to changes in ownership occurring on or after such date.

17. Beginning Date of Optional Coverage for Individuals in Medical Institutions (Section 9510)

Present law

States may provide Medicaid coverage for individuals who are in medical institutions but who have too much income to qualify for cash payments under the Supplemental Security Income Program. The income standard which a State applies to this optional coverage group cannot exceed 300 percent of the SSI benefit amount payable to an aged, blind or disabled individual in his or her own home who has no other income or resources. Implementing regulations specify that the State Medicaid agency shall apply the special income standard beginning with the first full calendar month of institutionalization.

House bill

No provision.

Senate amendment

Substitutes for the full calendar month test a requirement that payment begins at the beginning of any 30 consecutive-day period of institutionalization.

Conference agreement

The conference agreement follows the Senate amendment.

Effective Date.—Applies to services furnished on or after January 1, 1985.

18. Optional Coverage of Children (Section 9511)

Present law

States are able to cover under Medicaid all, or reasonable categories of, poor children under age 18 or 19 or 20 or 21 living in two parent families. These are known as "Ribicoff children." The Deficit Reduction Act required States to cover all children born on or after October 1, 1983, up to age 5, who meet AFDC income and resources requirements. The law requires that coverage for this population group be phased-in over a 5 year period starting with the youngest children. Federal matching is not available for children under age 5 born prior to October 1, 1983, unless the State extends coverage to all Ribicoff children other than those added by the Deficit Reduction Act provision.

House bill

No provision.

Senate amendment

Allows States to cover and receive Federal matching funds for all Ribicoff children under age 5 immediately.

Conference agreement

The conference agreement follows the Senate amendment.

Effective Date.—Applies with respect to payments for services furnished on or after October 1, 1985.

19. Overpayment Recovery Rules (Section 9512)

Present law

State Medicaid agencies are allowed to pay nursing homes and hospitals at interim rates until final rates are established. The State is responsible for the collection of any "overpayment" and must refund the Federal share of such overpayment to the Federal Government. Under current program administrative instructions, the State must refund the Federal share immediately upon discovering the overpayment. Refunds must be made for all overpayments even where they are not collectible because the providers have gone into bankruptcy or out-of-business.

House bill

No provision.

Senate amendment

Allows States up to sixty days (from the date of discovery) to recover overpayments from providers and refund the Federal share. Provides that a State is not liable for the Federal share of overpayments which cannot be collected from bankrupt or out-of-business providers.

Conference agreement

The conference agreement follows the Senate amendment.

Effective Date.—Applies to overpayments for quarters beginning on or after October 1, 1985.

20. Expansion of Services Under Demonstration Waivers (Section 9522)

Present law

Section 1903(m)(2) of the Social Security Act stipulates that States cannot contract on an at-risk basis with an entity which provides a certain number and type of services unless certain conditions are met. If any entity provides: (a) inpatient hospital services and any other mandatory Medicaid service, or (b) any three mandatory services, that entity must meet the specified standards before a State can enter into a risk contract with it for the provision of Medicaid services. The Secretary may not waive these requirements under the freedom-of-choice waivers under section 1915(b).

House bill

No provision.

Senate amendment

Authorizes the Secretary, with respect to entities providing services under a freedom-of-choice waiver, to waive the specified standards under section 1903(m)(2) if the entity does not provide more than five of the mandatory services and does not provide inpatient hospital services.

Conference agreement

The conference agreement follows the Senate amendment with an amendment limiting applicability to the State of Oregon. The conferees view this waiver as a demonstration program which will be reviewed and evaluated.

Effective Date.—Enactment.

21. Life Safety Code Recognition (Section 9515)

Present law

The Secretary of the Department of Health and Human Services may establish "standards of safety and sanitation" applicable to intermediate care facilities for the mentally retarded (ICFs/MR). Section 1905(c) of the Social Security Act requires intermediate care facilities (ICFs) to meet such standards prescribed by the Secretary as he/she finds appropriate for the proper provision of care and to meet such standards of safety and sanitation as established under regulation of the Secretary. These regulations refer to the 1981 Edition of the Life Safety Code of the National Fire Protection Association.

House bill

No provision.

Senate amendment

Requires the Secretary for purposes of section 1905(c) to specify the 1985 edition of the Life Safety Code of the National Fire Protection Association until such time as a new edition is published.

Conference agreement

The conference agreement follows the Senate amendment with an amendment limiting the provision to fire safety code requirements for ICF/MR and allowing the Secretary to use an updated life safety code or higher standards.

Effective Date.—Enactment.

22. Publication of ICF/MR Regulations (Section 9514)

Present law

At their option, States may cover in their Medicaid plans intermediate care facility services for the mentally retarded. These facilities must meet such standards as may be required by the Secretary. These standards were published in 1974 (42 CFR Subpart G).

House bill

No provision.

Senate amendment

Requires the Secretary to publish, within 60 days of enactment, proposed revisions to the standards for intermediate care facilities for the mentally retarded (ICFs/MR).

Conference agreement

The conference agreement follows the Senate amendment.

Effective Date.—Enactment.

23. Modifying Application of Medicaid HMO Provisions for Certain Health Centers (Section 9517)

Present law

(a) *Eligibility to Contract on a Risk Basis.* States can contract with certain organizations to provide health care services to Medicaid beneficiaries on a prepaid capitated basis. Among these organizations are: Community Health Centers and Migrant Health Centers, primarily funded by the Public Health Service, and certain rural health care centers known as Appalachian Health Centers, funded under the Appalachian Regional Development Act, that had existed prior to June 30, 1976.

(b) *Lock-in Provision.* States can restrict Medicaid beneficiaries from disenrolling without cause from certain organizations offering services on a prepaid capitated basis for periods of up to six months. This restriction is known as lock-in." Organizations eligible to participate in the lock-in provisions include federally qualified HMOs, and Community, Migrant and Appalachian Health Centers that are receiving, and had received in each of the two preceding years, at least $100,000 under the appropriate sections of the Public Health Service or Appalachian Regional Development Acts. In either case, the organizations must also meet the requirement that less than 75 percent of their enrolled members are receiving benefits under either Medicaid or Medicare.

(c) *Continuation of Benefits.* In the case of Medicaid beneficiaries who are enrolled in a federally qualified HMO contracting with a State Medicaid program and who would otherwise lose their Medicaid eligibility, States may deem these individuals eligible for Medicaid with respect to the services provided by the HMO for a period of up to 6 months.

House bill

No provision.

Senate amendment

(a) *Eligibility to Contract on a Risk Basis.* Allows States to contract on a risk basis with Community and Migrant Health Centers and Appalachian Health Centers that are receiving, and for the past two years have received, at least $100,000 in grants under the appropriate sections of the Public Health Service and Appalachian Regional Development Acts.

(b) *Lock-in Provision.* Permits Community and Migrant Health Centers and Appalachian Health Centers that are contracting with the Medicaid program on a risk basis, and are receiving, and had received in each of the two preceding years, at least $100,000 in grants under the appropriate sections of the Public Health Service and Appalachian Regional Development acts to participate in the lock-in provision without regard to the 75 percent rule.

(c) *Continuation of Benefits.* Allows States to provide for continuation of benefits to individuals enrolled in certain Community, Migrant and Appalachian Health Centers on the same basis as individuals enrolled in federally qualified HMOs. The eligible Community, Migrant, and Appalachian Health Centers are those that are contracting as HMOs with the Medicaid program and are receiving, and had received in each of the two preceding years, at least $100,000 under the appropriate sections of the Public Health Service and Appalachian Regional Development Acts.

Conference agreement

The conference agreement follows the Senate amendment with an amendment clarifying the applicability of current prepayment rules to Health Insuring Organizations (HIOs). According to a recent GAO Fact Sheet, "Medicaid Requirements: Health Insuring Organizations," (HRD-86-42FS, November, 1985), current HHS regulations and guidelines do not specify minimum qualifications for an HIO that arranges for the provision of services to Medicaid eligibles; do not specify the quality assurance methods that such an HIO must employ; do not specify the standards that an HIO must meet to assure access by program beneficiaries to services to which they are entitled; do not specify the amount of savings an HIO may retain for its own financial benefit; and do not specify the frequency or content of the utilization or financial reports that an HIO must submit with regard to the services for which its has arranged. In addition, the GAO Fact Sheet states that HIOs which arrange for the provision of services to Medicaid patients are not subject to specific regulatory requirements regarding financial reporting or ownership information. The conference agreement clarifies that where an HIO does more than simply act as a fiscal agent to review and process claims for payment, but actually arranges with other providers (through subcontract or otherwise) for the delivery of services to Medicaid eligibles (even though the HIO does not itself deliver services), it is subject to all of the regulatory requirements to which any health maintenance organization or similar prepaid entity is subject under current law.

Effective Date.—Enactment. The clarification with respect to HIOs applies to entities that first become operational after January 1, 1986.

24. Use of Sampling for Medical Review in Mental Hospitals, Skilled Nursing Facilities, and Intermediate Care Facilities

Present law

Requires that the care of each person receiving medical assistance in mental hospitals, SNFs, and ICFs be reviewed annually for the adequacy of services available, the necessity and desirability of continued placement in the facility, and the feasibility of alternative institutional or noninstitutional services.

House bill

No provision.

Senate amendment

Provides that medical reviews could be limited to a sample group of individuals receiving medical assistance in mental hospitals, SNFs, and ICFs, as permitted by the Secretary.

Conference agreement

The conference agreement does not include the Senate provision.

25. Wisconsin Health Maintenance Organization Waiver (Section 9524)

Present law

The Secretary of Health and Human Services may no longer waive the one-month disenrollment requirements for certain HMOs participating in a freedom-of-choice waiver.

House bill

No provision.

Senate amendment

Upon request by the State of Wisconsin, the Secretary of Health and Human Services is required to reinstate the waiver granted to the State of Wisconsin relating to HMO participation in the lock-in provision for renewable terms of 2 years, subject to the general requirements of such waivers.

Conference agreement

The conference agreement follows the Senate amendment.

Effective Date.—Enactment.

26. Clarification of Medicaid Moratorium Provisions of Deficit Reduction Act of 1984 (Section 9521)

Present law

(a) *Clarification.* The Deficit Reduction Act of 1984 prohibits the Secretary of the Department of Health and Human Services from taking any regulatory action against a State because the State uses less restrictive standards or methodologies in determining the eligibility of Medicaid beneficiaries who do not receive cash assistance than it does for those who do. The prohibition applies during a moratorium period that will end 18 months after the Secretary submits to the Congress her recommendations on the application of cash assistance eligibility standards and other methodologies to the "medically needy" and other non-cash Medicaid eligibles.

(b) *Restoration.* When it is determined that a Medicaid beneficiary who owns his or her own home could never return home, the value of his or her residence becomes a resource that can increase his or her resources beyond the permitted level. In the past, Federal Medicaid policy gave such an individual time to dispose of the property if he or she was making a bona fide effort to do so. Recent interpretations of these policies would tend to force premature sale of the homes of institutionalized Medicaid applicants and beneficiaries.

House Bill

No provision. (An identical provision regarding clarification was included in H.R. 1868 as passed by the House, H. Rept. 99-80, Part 2).

Senate amendment

(a) *Clarification.* Clarifies that the moratorium applies whether or not the less restrictive standards or methodologies applied by the State were explicitly stated and approved as part of a State's Medicaid plan.

(b) *Restoration.* Restores for the duration of the moratorium the previous Medicaid policy governing the period when home ownership by an institutionalized individual is permitted and the period of time given for the sale of a home.

Conference agreement

(a) *Clarification.* The conference agreement follows the Senate amendment.

(b) *Restoration.* The conference agreement follows the Senate amendment with a technical amendment.

Effective Date.—Apply as though included in DEFRA as originally enacted.

27. New Jersey Demonstration Project Relating to Training of AFDC Recipients as Home Health Aides (Sction 9525)

Present law

The "Omnibus Reconciliation Act of 1980" authorized the Secretary to enter into agreements for the purpose of conducting demonstration projects to train formally AFDC recipients as homemaker-home health aides. The bill authorized 90 percent Federal matching for the reasonable costs of conducting the projects. The projects were limited to a maximum of 4 years plus an additional period of up to 6 months for planning and development and a similar period for final evaluation and reporting. Several States, including New Jersey, conducted such demonstration projects.

House bill

No provision.

Senate amendment

Extends for one additional year, at 50 percent Federal matching, the demonstration project in the State of New Jersey.

Conference agreement

The conference agreement follows the Senate amendment.

Effective Date.—Enactment.

28. Correction plans for Intermediate Care Facilities for the Mentally Retarded (ICFs/MR) (Section 9516)

Present law

Section 1910(c) of the Social Security Act authorizes the Secretary to conduct validation, or "look behind," surveys to determine the validity of Medicaid certification actions taken by the designated State survey agency. Where the Secretary finds that a facility substantially fails to meet the requirements of participation in the Medicaid program, he/she is empowered to cancel the facility's provider agreement.

House bill

No provision.

Senate amendment

Provides that if the Secretary finds that an intermediate care facility for the mentally retarded (ICF/MR) has substantial deficiencies which do not pose an immediate threat to the health and safety of residents, the State may elect to submit a written correction plan. The plan must provide for (1) a timetable for completion of necessary steps to correct staffing deficiencies within 6 months, and a timetable for rectifying all physical plant deficiencies within 6 months, or (2) a timetable for permanently reducing the number of certified beds, within a maximum of 36 months, in order to permit any noncomplying buildings (or distinct parts thereof) to be vacated and any staffing deficiencies to be corrected.

If the Secretary finds at the conclusion of an initial 6-month period, or any subsequent 6-month period, that a State has substantially failed to meet its obligations established under a plan of correction, the Secretary may (1) terminate the facility's provider agreement, or (2) disallow (in the case of a planned reduction in a facility's population) an amount of Federal financial participation equal to 5 percent of allowable Medicaid cost for all eligible facility residents for each month the State fails to meet its interim goals.

Conference agreement

Under the conference agreement, if the Secretary finds that an ICF/MR has substantial deficiencies which do not pose an immediate threat to the health and safety of residents, the State has two options. It may either (1) implement a plan of correction, approved by the Secretary, to remedy any staffing and/or physical plant deficiencies within 6 months, or, (2) implement a plan, approved by the Secretary, to permanently reduce, within a maximum of 36 months, the number of certified beds in the noncomplying facility (or distinct parts thereof). If a State which has elected option (1) fails to make the necessary corrections within the 6-month period, the Secretary may terminate the provider agreement, as under current law. The conferees expect that prompt action will be taken to terminate the facility's provider agreement in such circumstances. If a State which has elected option (2) substantially fails to meets its interim reduction goals during any given 6-month period, the Secretary must either terminate the facility's provider agreement or disallow, for each month the State remains out of compliance, 5 percent of the Federal matching payments the State would otherwise receive for the cost of care of all residents in the facility.

The Secretary's authority to approve reduction plans under this section is effective only with the promulgation of final regulations implementing this provision. The Secretary is directed to publish, in the Federal Register, a notice of proposed rulemaking implementing this provision within 60 days of enactment. The notice must allow a 30-day comment period. The Secretary's authority to approve permanent reduction plans extends for 3 years from the effective date of the final regulations. States could continue implementation of permanent reduction plans approved during this 3-year period beyond the expiration date of the Secretary's authority to approve such plans, provided of course that the State continued to comply with the terms and conditions of plans as approved. The Secretary's responsibility to monitor and enforce compliance by the States with the terms of the approved plans does not lapse with the expiration of his authority to approve new plan applications.

No later than 6 months before the expiration of the Secretary's approval authority, the Secretary is directed to report to the Congress on the implementation and results of this section. The conferees expect that the Secretary will provide the Congress with information on the impact of both the correction plans and the reduction plans on the quality of life and the availability of active treatment for the Medicaid-eligible individuals who remain in the facilities in question and for those who are placed in community settings. The conferees also expect that the Secretary's report will detail the involvement of resident's families in the process of developing the correction or reduction plans and in the placement of affected patients.

During each of the 3 years that the Secretary's authority to approve reduction plans is in effect, the Secretary may approve, on a first come, first served basis, 15 plans that meet the requirements of this section. Thereafter, the Secretary may approve reduction plans that otherwise comply with this section only if the State can demonstrate, to the satisfaction of the Secretary, that the State would have to spend at least $2,000,000 in State or local funds in order to remedy the substantial physical plant deficiencies found by the Secretary. There is no limit on the number of otherwise qualified plans that the Secretary may approve where the State meets the $2,000,000 compliance cost threshhold.

When the Secretary finds that an ICF/MR has substantial deficiencies, the State has the same period allowed under current law within which to submit a written plan of correction with the Secretary. If the State chooses to submit a written plan to permanently reduce the number of certified beds, it has the same period allowed under current law plus 35 days to accommodate the public hearing requirement described below. The Secretary must allow not less than 30 day after the submission of a proposed reduction plan by the State before approving or disapproving the proposal. During this period, interested residents, family, staff, and members of the public may comment directly to the Secretary on the State's proposal. The conferees expect that the Secretary will give careful consideration to these comments in connection with his decision.

The conference agreement imposes a number of requirements on States that elect to implement reduction plans rather than correct the deficiences cited at the facility in question. The general purpose of these requirements is to assure that any such plan is well conceived; that it has had the benefit of resident, family, staff, and public input; and that the quality of life for both the residents remaining in the facility and those receiving community placements is adequately protected. While the conferees wish to allow the States some flexibility in the allocation of capital and staff resources between institutional and community settings, the conferees intend that fiscal concerns not compromise the accessibility or quality of services to Medicaid-eligible clients. Above all, it is the primary intention of the conferees that the Secretary, in administering this provision, take extreme care that reduction plans approved under this section do not lead to the "dumping" of affected residents into substandard settings.

As a condition of approval of a reduction plan, a State must provide for a hearing to be held at the affected facility at least 35 days prior to submission of the reduction plan, with reasonable notice to the staff and residents, the residents' families, and the general public. The purpose of this hearing is to facilitate discussion of a State's proposed plan by those most directly affected.

As a condition of approval, a State must also demonstrate to the Secretary that it has successfully provided home and commu-

nity services similar to the services proposed to be provided under the reduction plan for similar Medicaid-eligible individuals. The purpose of this provision is to assure that the State, from direct experience, developed the technical and administrative capacity to implement a reduction plan without harming the affected residents. The conferees expect that, at a minimum, the Secretary will review carefully the experience of the mentally retarded and developmentally disabled under the State's relevant home and community-based services waivers, if any.

In addition, any reduction plan must meet the following requirements. First, the plan must identify the number of existing facility residents that are to be provided home or community services, must describe their individual services needs, and must specify the timetable for providing such services, in 6-month intervals, within the 3-year period.

A reduction plan must describe the methods to be used (1) to select such residents for home and community services and (2) to develop the alternative home and community services to meet their needs effectively. The conferees intend that, in selecting the residents and meeting their service need, the States will use an interdisciplinary team process that provides an opportunity for participation by the resident's family.

A reduction plan must describe the necessary safeguards that will be applied to protect the health and welfare of the residents of the facility who are to be placed in community settings. These safeguards must include, at a minimum, participation by residents and family members and providers. In addition, the State must assure that community residences in which affected residents are placed meet all applicable State licensure requirements and all applicable State and Federal certification requirements. The conferees are particularly concerned that any community settings to which Medicaid-eligible residents are transferred comply fully with Federal certification requirements. The purpose of a reduction plan is to move Medicaid-eligible residents out of deficient facilities into complying settings.

A reduction plan must provide that residents of the affected facility who are eligible for Medicaid while in the facility shall, at their (or their legal guardian's) option, be placed in another setting, or another part of the affected facility, that is in full compliance with Federal Medicaid requirements and therefore allows them to retain their Medicaid eligibility. It is the firm intent of the conferees that a reduction plan not impair the Medicaid eligibility of an affected resident without their consent. It the resident would have remained eligible for Medicaid had the State opted to eliminate the deficiencies in the affected facility, then the State may not, at any time, involuntarily place the resident in a setting where he or she loses the entitlement to Medicaid. The resident may elect to be placed in a setting where he or she does not retain entitlement to Medicaid. Of course, if the resident, or the resident's guardian, voluntarily chooses to move to a setting—for example, back home with his or her family—that causes the resident's countable income or resources to exceed the State's eligibilty standards, then the resident's Medicaid eligibility would be subject to termination under the same terms and procedures as applicable to all Medicaid beneficiaries.

A reduction plan must specify the actions that will be taken to protect the health and safety of the residents who remain in the affected facility while the reduction plan is in effect. The conferees wish to avoid a situation in which a State, rather than correct the deficiencies in a facility within 6 months, attempts to use the reduction plan option to delay making needed improvements for an additional 3 years. The reduction plan is intended as an alternative compliance mechanism, not a tool for avoiding compliance. The conferees expect that, before approving any reduction plan, the Secretary will satisfy himself that the health and safety of the residents remaining in the facility will be assured during the entire phase-out period.

In this connection, a reduction plan must also provide that the ratio of qualified staff to residents at the affected facility (or part thereof) will be the higher of (1) the ratio which the Secretary determines is necessary in order to assure the health and safety of the remaining residents, or (2) the ratio which was in effect at the time that the Secretary made the finding of substantial deficiencies. A State may use temporary staff to satisfy these staffing ratio requirements, but only if the staff are qualified for the patient treatment responsibilities that they are assigned.

Finally, a reduction plan must provide for the protection of the interests of employees affected by the reduction plan, including (1) arrangements to preserve employee rights and benefits; (2) training and retraining of such employees where necessary; (3) redeployment of such employees to community settings under the reduction plan; and (4) making maximum efforts to guarantee the employment of such employees. This requirement is not to be construed to guarantee the employment of any employee.

Substantial failure to meet any of these reduction plan requirements subjects the State to one of two sanctions; termination of the facility provider agreement, or disallowance of Federal Medicaid matching payments equal to 5 percent of the cost of care for all eligible individuals in the facility for each month of noncompliance. The Secretary has discretion as to which sanction to apply, but must apply one or the other. The conferees expect that the Secretary will vigorously enforce these requirements for the protection of the resident population affected by a reduction plan.

Effective Date.—Enactment.

29. Annual Calculation of Federal Percentage (Section 9428)

Present law

Between October 1 and November 30 of each even-numbered year the Secretary of HHB is required to promulgate the Federal percentage that will be in effect for 2-year period beginning the following October. The Federal percentage is used to determine the Medicaid matching rate. Each State's AFDC program may use the Medicaid rate or a separate rate derived from the Federal percentage. The percentages are based on the average per capita income of each State and the United States for the three most recent calendar years for which satisfactory data are available from the Department of Commerce. The Federal percentage for the fiscal years 1986-1987 is based on State and national per capita income for calendar years 1981-1983.

House bill

No provision.

Senate amendment

Provides for annual, rather than biennial, calculation of the Federal percentage.

Conference agreement

The conference agreement follows the Senate amendment with a modification moving the effective date forward to fiscal year 1987. The conferees recognize that this modification will cause several States to receive substantially less in Federal Medicaid and AFDC matching payments than they otherwise would have received under current law for fiscal year 1987 only. However, the conferees expect that, over the long run, the greater sensitivity to State economic conditions will benefit all States. A "hold harmless" provision was considered by the conferees, but its estimated cost of $155 million precluded its adoption. The conferees agree that the committees of jurisdiction will explore ways to relieve the hardship that may be suffered by the States that will receive substantially less in matching payments as a result of this provision.

30. Medicaid for Children Whose Adoption is Federally Aided (Section 9429)

Present law

The law extends Medicaid coverage to AFDC- or SSI-eligible children with special needs for whom Title IV-E adoption assistance payments are made. The State which entered into the adoption assistance agreement is responsible for providing Medicaid coverage to the child, even if the child and adoptive parents live in a different State. Similarly, children in foster care for which Federal funding is provided under Title IV-E are eligible for Medicaid coverage. The Medicaid coverage is provided by the State responsible for the foster care placement.

House bill

Specifies that, for purposes of Medicaid eligibility determinations, children receiving adoption assistance or foster care payments under Title IV-E of the Social Security Act are considered to be residents of the State in which they are placed even if this is not the State making the IV-E payment.

Senate amendment

In the case of children receiving adoption assistance, makes the State of the child's residence responsible for providing Medicaid coverage, even if the adoption assistance agreement was entered into with a different State.

Conference agreement

The conference agreement follows both the House bill and the Senate amendment. The conference agreement also clarifies that children with special medical rehabilitative needs who are receiving Medicaid and who are adopted by parents under a publicly-funded adoption program (other than a program funded under Title IV-E of the Social Security Act) are eligible for Medicaid regardless of the income and resource levels of the adoptive parents. States could, at their option, extend Medicaid coverage to such children if (1) an adoption assistance agreement (other than one under Title IV-E) is in effect; (2) the child was eligible for Medicaid under the State's plan before the adoption assistance agreement was entered into; and (3) the responsible State agency has determined that, because of the child's special needs for medical or rehabilitative care, the child would be difficult to place with adoptive parents without Medicaid coverage.

With the respect to the second requirement, the States may use either Title IV-A methodologies and standards, or Title IV-E methodologies and standards, in determining Medicaid eligibility for this population.

With respect to the third requirement, the conferees note that it is not necessary that the State Medicaid plan cover all of the services necessary to treat the child's special medical needs; the issue is simply whether, absent Medicaid coverage, the child would be difficult to place.

Effective Date.—The provision concerning residency is effective beginning with medcial assistance furnished on or after the first calendar quarter that begins more than 90 days after the date of enactment. The provision relating to coverage of children with special needs who receive State adoption assistance applies to adoption assistance agreements entered into before, on, or after enactment.

31. Elimination of 2-Year Limit for Obligation of Funds Under Maternal and Child Health Block Grants.

Present law

Under the Maternal and Child Health (MCH) Services Block Grant, States must olbigate a fiscal year's allotment prior to the close of the following fiscal year.

House bill

No provision.

Senate amendment

Would repeal the requirement that States obligate their MCH allotments within a 2-year time frame.

Conference agreement

The conference agreement does not include the Senate provision.

32. Children With Special Health Care Needs (Section 9527)

Present law

The Maternal and Child Health Services Block Grant provides funds to States to deliver services and care for children who are crippled or who are suffering from conditions leading to crippling.

House bill

No provision.

Senate amendment

Would change the term "crippled children" to "children with special health care needs" wherever the term "crippled children" appears in Title V, the Maternal and Child Health Services Block Grant.

Conference agreement

The conference agreement follows the Senate amendment. The conferees have agreed to strike the words "crippled children" and "crippled children's services" from Title V of the Social Security Act and to substitute in their place "children with special health care needs" and "services for children with special health care needs." In so doing, the conferees have simply made technical changes in the statutory language which more appropriately describe the populations to be served under the Title V program. No substantive changes in the program are intended.

Effective Date.—Enactment.

TITLE IX

SUBTITLE C—TASK FORCE ON LONG TERM CARE HEALTH POLICIES (SECTION 9601)

Present law

No comparable provision.

House bill

The House bill requires the Secretary of the Department of Health and Human Services to establish, in consultation with the National Association of Insurance Commissioners, an 18-member Task Force on Long Term Health Care Policies. It further requires that the Task Force develop guidelines for long term health care policies. Within eighteen months after its establishment, the Task Force is to report to the Secretary and to the Congress on both the guidelines it has developed and on recommendations for any additional activities it finds appropriate. The report is to be distributed to the States through a cooperative effort between the Secretary and the National Association of Insurance Commissioners. The Secretary is required to report annually to the Congress on various activities related to the guidelines.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with an amendment making changes in the statutory language, terminating the Task Force upon completion of its report, limiting the number of secretarial reports to two and clarifying that the recommendations do not preempt State law.

The conference agreement replaces "guidelines" with "recommendations" in each instance where it appears. In making this change, the Conferees wish to emphasize their intent that these recommendations be used only at the option of each State. Under the conference agreement, States are not required to consider, refer to, or otherwise use the recommendations of the Task Force if they do not think it appropriate to do so.

The Conferees intend the Task Force to complete its report 18 months after enactment of this legislation and to be discharged within 90 days of completion of the report. The Conferees also intend that the Department distribute the recommendations to the States in cooperation with the National Association of State Insurance Commissioners. Adoption of the recommendations is entirely voluntary.

In order to assess the usefulness of the work of the Task Force and the actions taken by the States in response to the Task Force recommendations, the conference agreement requires the Secretary of the Department of Health and Human Services to provide two reports to both the House Committee on Energy and Commerce and the Senate Committee on Labor and Human Resources on State efforts in utilizing the recommendations. The first report is due 18 months after the Task Force completes its work and the second report 18 months thereafter. The conference agreement limits the number of secretarial reports to two instead of the annual reporting required in the House bill.

Effective Date.—The Task Force is to be established not later than 60 days after enactment of this legislation.

TITLE X.—CONTINUED HEALTH COVERAGE

a. Employers required to provide continuation coverage; sanction for noncompliance

Present law

There is no requirement in the Internal Revenue Code or other Federal law that an employer-provided group health plan must include continuation or conversion options in order for favorable tax rules to apply or in order to comply with other statutory requirements.

House bill

H.R. 3128

Covered Employers

The bill amends the Internal Revenue Code to require that an employer-provided group health plan must provide continuation coverage for qualified beneficiaries. Although the bill includes no explicit exclusions for churches, or tax-exempt or governmental employers, the applicable sanction—denial of the employer's tax deduction—has no impact on such employers.

H.R. 3500

This bill amends the Employee Retirement Income Security Act (ERISA), rather than the Internal Revenue Code, to cover all employee welfare benefit plans. Although the bill includes no explicit exclusions for churches or governmental employers, its amendment of ERISA effectively excludes churches (but not other tax-exempt entities), as well as Federal, State and local governments.

Sanction for Noncompliance

If any group health plan maintained by an employer fails to provide continuation coverage, H.R. 3128 denies a tax deduction for employer contributions to any health plan; and H.R. 3500 permits employees, beneficiaries and the Secretary of Labor to sue the employer to enforce compliance. In addition, an employer may be liable under ERISA for certain monetary penalties.

Senate amendment

Covered Employers

Title VII of the Senate amendment generally follows H.R. 3128 by amending the Internal Revenue Code although it does include tax-exempt employers because of the additional sanction imposed on highly compensated employees. However, this provision of the Senate amendment provides explicit exclusions for churches, Federal, State and local governments and small employers. For this purpose, a small employer is defined as an employer that normally employs 25 or fewer employees.

Title IX of the Senate amendment amends the Public Health Services Act to require that each employer subject to the Fair Labor Standards Act must provide continuation coverage. This title provides explicit exclusions generally following Title VII of the Senate amendment. Despite the exclusion, no State or political subdivision with more than 25 employees could receive Federal funds under certain public health service programs unless plans maintained by such entities provide continuation coverage.

Sanction for Noncompliance

In addition to following H.R. 3128, Title VII of the Senate amendment denies an income exclusion to any highly compensated employee. An employee is considered highly compensated if the employee is one of the 5 highest paid officers, a 10-percent shareholder, or among the highest paid 25 percent of all employees.

Title IX generally permits suits for injunctive relief and imposes civil penalties on employers who fail to provide continuation coverage.

Conference agreement

Covered Employers

The conference agreement generally follows the House bill and the Senate amendment, by amending ERISA, the Code, and the Public Health Service Act. Under the agreement, the changes to the Code and ERISA do not apply to churches, Federal, State and local governments, and small employers. Small employers are defined as those with fewer than 20 employees. In addition, the amendments to the Public Health Service Act apply only with respect

to State and local governments (other than those with fewer than 20 employees.)

To avoid the issuance of duplicate and perhaps inconsistent regulations, the conferees authorized the Secretary of Labor to promulgate regulations implementing the disclosure and reporting requirements, and the Secretary of Treasury to issue regulations defining required coverage, deductions, and income inclusions. The Secretary of Health and Human Services is to issue regulations regarding the requirement that State and local governments provide continuation coverage for qualified beneficiaries. The conferees intend that any regulations issued by the Secretary of Health and Human Services will conform (in terms of actual requirements) with those regulations issued by the Secretary of Treasury and Labor. Under the agreement, enforcement of the requirements imposed through the Public Health Service Act will be through suits for equitable relief filed by qualified beneficiaries. Of course, as under present law, all affected agencies will have the opportunity to comment before regulations are issued.

Sanctions for Noncompliance

Any regulations issued pursuant to these changes are to be effective after the date of issuance. However, pending the promulgation of regulations, employers are required to operate in good faith compliance with a reasonable interpretation of these substantive rules, notice requirements, etc.

The conference agreement generally follows H.R. 3500 and the Senate amendment except that the only sanction imposed on covered State and local governments under the Public Health Service Act are suits for equitable relief.

b. Required coverage

Present law

Otherwise deductible expenses paid or incurred by an employer for a group health plan are disallowed if the plan differentiates in benefits between individuals having end stage renal (kidney) disease and other individuals (Code sec. 162(i)).

House bill

Qualified beneficiaries

Both H.R. 3128 and H.R. 3500 provide that qualified beneficiaries include widows, divorced spouses and persons whose spouse becomes eligible for Medicare, as well as dependent childern of such beneficiaries.

Type of benefit coverage

House bill

Both H.R. 3128 and H.R. 3500 require that the continuation coverage for which a qualified beneficiary must be offered an election is coverage identical to the coverage provided under the plan to similarly situated beneficiaries.

Period of coverage

Both H.R. 3128 and H.R. 3500 require that continuation coverage be provided for 5 years. However, no coverage need be provided after the qualified beneficiary becomes eligible for coverage under another plan as a result of reemployment or remarriage.

Cost of coverage

Both H.R. 3128 and H.R. 3500 provide that some or all of the cost of continuation coverage could be charged to the qualified beneficiary, whether or not the employer otherwise subsidizes some or all of the premiums for covered employees. However, in no event may the cost charged to the qualified beneficiary exceed the total applicable premium. The applicable premium is defined as the cost to the plan for the period of coverage for a similarly situated beneficiary with respect to whom a qualifying event has not occurred (without regard to whether such cost is paid by the employer or employee).

Senate amendment

Qualified beneficiaries

In addition to those classes of qualified beneficiaries described in the House bill, Title VII of the Senate amendment provides that (1) employees are qualified beneficiaries upon termination of employment (voluntary and involuntary) and (2) dependent children are also separately considered to be qualified beneficiaries when they cease to be covered as dependents under the plan.

Title IX of the Senate amendment further expands the classes of qualified beneficiaries listed to include employees whose hours are reduced, resulting in a loss of coverage. It provides that no coverage is required for employees who are terminated for cause.

Title VII of the Senate amendment requires that the continuation coverage for which a qualified beneficiary must be offered an election is coverage identical to the coverage provided immediately before the qualifying event. In addition, if the plan otherwise permits employees and beneficiaries to modify coverage, the qualified beneficiary must be entitled to modify coverage at the same time and in the same manner as other similarly situated beneficiaries.

Title IX of the Senate amendment follows the House bill.

Duration of coverage

Title VII of the Senate amendment provides that continuation coverage must be provided for 18 months.

Title IX of the Senate amendment provides that continuation coverage must be provided for 3 years (18 months with respect to terminated employees and reduced hour workers), and provides cutoff dates similar to those in the House bill.

Cost of coverage

Although Title IX of the Senate amendment follows the House bill, Title VII provides that the cost must not exceed 102 percent of the applicable premium and provides specific rules for calculating the "cost" of the applicable premium in self-insured plans.

Conference agreement

Qualified Beneficiaries

The conference agreement generally follows the House bill and the Senate amendment except that no continuation coverage is required for terminated employees if the termination occurs by reason of the employee's gross misconduct.

Type of benefit coverage

The conference agreement generally follows the House bill with a modification so that the type of benefit coverage is identical, as of the time the coverage is being provided, to the coverage provided under the plan to similarly situated beneficiaries under the plan with regard to whom a qualifying event has not occurred.

Duration of Coverage

The conference agreement generally follows Title IX of the Senate amendment, requiring that continuation coverage provided to widows, divorced spouses, spouses of Medicare-eligible employees, and dependent children who become ineligible for coverage under the plan be provided for 3 years, while coverage for terminated employees and employees with reduced hours must be provided for 18 months. The agreement provides that the coverage period begins with the date of the qualifying event. As under the House bill and Title IX of the Senate amendment, no coverage need be provided after (1) failure to make timely payment under the plan, (2) the qualified beneficiary is covered under another group health plan as a result of employment, reemployment, or remarriage, and (3) the qualified beneficiary becomes entitled to Medicare benefits. In addition, as under the House bill and Title VII of the Senate amendment, no coverage need be provided after the employer ceases to maintain any group health plan.

Cost of Coverage

The conference agreement generally follows Title VII of the Senate amendment. For a self-insured plan, the conferees agreed that the "applicable" premium for any year generally is equal to a reasonable estimate of the cost of providing coverage for such period for a similarly situated beneficiary. The cost is to be determined on an actuarial basis and takes into account such factors as the Secretary may prescribe in regulations. Alternatively, unless there has been a significant change affecting a self-insured plan (e.g., a modification of covered benefits, a significant change in the number or composition of the covered workforce, etc.), the employer may elect to use as the applicable premium, the cost for a similarly situated beneficiary for the preceding year, adjusted to reflect cost-of-living increases as measured by the GNP deflator.

In general, similarly situated individuals are those individuals defined by the plan (consistent with Treasury regulations) to be similarly situated and with respect to which no qualifying event has occurred. The Secretary of the Treasury is to define similarly situated individuals by taking into account the plan under which the coverage is provided (e.g., high or low option), the type of coverage (single or family coverage) and, if appropriate, regional differences in health costs. The conferees do not intend that similarly situated mean medically identical (for example, all employees with heart problems); nor do the conferees intend that plans can define similarly situated beneficiaries by reference to classifications that are in violation of Title VII of the Equal Pay Act.

In addition, the conferees intend that Treasury regulations defining a plan should preclude an employer from grouping employees to inappropriately increase the cost of continuation coverage for qualified beneficiaries who are rank-and-file employees (or their beneficiaries).

c. Notice requirements; election period

Present law

No provision.

House bill

Both H.R. 3128 and H.R. 3500 require that notice of the option to continue health coverage be provided in the summary plan description. In addition, the bills require that notice of a qualifying event be given to the plan administrator (1) by the employer, in the event of the employee's death; (2) by the employee, in the event that the employee is divorced, separated, or becomes eligible for Medicare.

Under both bills, the period during which a qualified beneficiary may elect continuation coverage does not expire before 60 days after the later of (1) the termination

date of coverage, or (2) the date the beneficiaries receive notice of the right to elect.

Senate amendment

Title VII of the Senate amendment provides that the Secretary of the Treasury is to prescribe notice requirements pursuant to regulations and establishes a 60-day notice period commencing with the qualifying event.

Title IX

Title IX of the Senate amendment provides that the Secretary of Health and Human Services is to prescribe notice requirements pursuant to regulations. Such regulations are to prescribe notice consistent with that required by the House bill.

Conference agreement

The conference agreement generally follows the House bill. Thus, notice of the option to continue health coverage must be provided in the summary plan description. In addition, in the event of an employee's death, separation from service, or Medicare eligibility, the employer is required to notify the plan administrator within 30 days of the qualifying event who will in turn notify the qualified beneficiary within 14 days.

In the event of other qualifying events (e.g., divorce, legal separation, or the child's becoming ineligible) the employee or qualified beneficiary affected by that event is required to notify the plan administrator. Unless the qualified beneficiary is the party providing notice, the plan administrator is in turn required to notify the qualified beneficiary. The election period begins not later than the later of (1) the date on which coverage terminates, or (2) the date on which the qualified beneficiary receives notice of the right to elect continuation coverage. Any election by a qualified beneficiary is considered an election by other qualified beneficiaries who would otherwise lose coverage by reason of the same qualifying event.

The conferees intend that the Secretary of Labor will issue regulations defining what notice will be adequate for this provision. The conferees intend that notice by mail to the qualified beneficiary's last known address is to be adequate; however, mere posting is not to be adequate. In addition, in applying these requirements to multiemployer plans, the conferees intend that the Secretary of Labor should take into account the special problems faced by those plans.

d. Conversion option

Present law

No provision.

House bill

Both H.R. 3128 and H.R. 3500 require that a conversion option be offered to qualified beneficiaries if under the plan the conversion option is otherwise available.

Senate amendment

Although Title IX of the Senate amendment follows the House bill, Title VII does not require that a conversion option be offered.

Conference agreement

The conference agreement generally follows the House bill and Title IX of the Senate amendment. Under the agreement, a qualified beneficiary must be offered a conversion option from any plan (including a self-insured plan) only if such an option is otherwise available under the plan to other participants.

Effective Date.—These provisions are effective for plan years beginning after June 30, 1986. In the case of a group health plan maintained pursuant to one or more collective bargaining agreements, the bill does not apply to plan years beginning before the later of (1) the date the last of the collective bargaining agreements terminate, or (2) January 1, 1987.

TITLE XI. PENSION BENEFIT GUARANTY CORPORATION PROVISION [1]

1. Insurance Premiums

Present law

A private defined benefit pension plan must generally pay to the Pension Benefit Guaranty Corporation ("PBGC") an annual per participant premium of $2.60. The Employee Retirement Income Security Act of 1974 (ERISA) permits the PBGC to provide for a risk-related premium (within limits).

House bill—H.R. 3128

The premium is increased to $8.00 for plan years beginning after December 31, 1985, and before January 1, 1989. For plan years beginning after December 31, 1988, the premium level returns to $2.60. The bill also provides for a study by the Treasury Department with respect to risk-related premiums.

House bill—H.R. 3500

The premium is increased to $8.50 for all plan years beginning after December 31, 1985.

Senate amendment—Title VII

The premium is increased to $8.10 for all plan years beginning after December 31, 1985. The bill also provides for a study by the Department of Labor (DOL) with respect to risk-related premiums.

Senate amendment—Title IX

No provision.

Conference agreement

The conference agreement follows H.R. 3500 except that the conferees agreed generally to require the PBGC to study the premium structure (including the feasibility of a risk-related premium) and make recommendations for change, if necessary. An advisory group appointed by the Chairman of the House Committees on Education and Labor and Ways and Means and the Senate Committees on Labor and Human Resources and Finance is required to analyze and critique the study. The study is to be filed with the Congress no later than one year from the date of enactment and the advisory group's report is due no later than six months after the PBGC submits its report to the Advisory Council.

2. Single Employer Pension Plan Amendment Act

a. Clarification of authority to freeze plans

Present law

Under present law, a plan may be amended to freeze future benefit accruals and to freeze other factors used to calculate benefits, such as compensation taken into account. In the absence of a contractual obligation, an employer is not required to provide participants with advance notice of a freeze.

House bill—H.R. 3128

No provision.

House bill—H.R. 3500

Under the bill, an amendment freezing accruals is not effective unless, subsequent to the adoption of the amendment and at least 60 days prior to the effective date of the amendment, the plan administrator gives written notice to each affected party. The term "affected party" is defined under the bill as each participant in the plan, each beneficiary of a deceased participant, each beneficiary who is an alternate payee under a qualified domestic relations order, and each employee organization representing participants in the plan and the PBGC.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

Although the bill contains no specific provisions covering plan freezes, the proposed first stage of plan termination covers similar situations (see Voluntary plan terminations—Senate amendment).

Conference agreement

The conference agreement provides that an amendment to reduce significantly future benefit accruals under a plan is not effective unless, subsequent to the adoption of the amendment and at least 15 days prior to the effective date of the amendment, the plan administrator gives written notice of the reduction to each participant in the plan, each beneficiary under the plan who is a beneficiary of a deceased participant, each beneficiary who is an alternate payee under a qualified domestic relations order, and each employee organization representing participants in the plan. This notice does not apply to any amendment (or portion thereof) to retroactively reduce plan benefits (Sec. 412(c)(8) of the Code and Section 302(c)(8) of ERISA).

The conference agreement does not affect the requirements for qualification of a plan under the Code. For example, the agreement does not change the requirement of minimum benefit accruals under a frozen top-heavy plan.

b. Voluntary plan terminations

Present law

Restrictions on plan termination.—Under present law, an employer's continued maintenance of a defined benefit pension plan is not required by statute. Thus, subject to contractual obligations, the employer generally may terminate a plan at any time upon satisfaction of the procedureal requirements described below.

Employer liability under a terminated plan.—If a single-employer defined benefit pension plan is terminated with assets sufficient to pay benefits at the level guaranteed by the PBGC (described below), the employer has no further liability to the PBGC.

If a single-employer defined benefit pension plan is terminated with insufficient assets to pay benefits at the level guaranteed by the PBGC, then the employer is liable to the PBGC for the insufficiency. However, the employer's liability is limited to 30 percent of the employer's net worth (determined as of the date of termination). The 30-percent limit applies whether or not the employer remains in business after the plan is terminated. All trades or businesses under common control are treated as a single employer.

In computing the extent to which assets are insufficient to pay guaranteed benefits, the value of any accumulated funding deficiency or outstanding waived liability under the minimum funding standard of the plan

[1] Note: H.R. 3500 as passed by the House was added as an amendment to H.R. 3128 as amended by the Senate. The PBGC provisions of both H.R. 3128 and H.R. 3500 as passed by the House are mentioned separately to indicate the legislative background of the separate House bill provisions.

(discounted for likelihood of payment) is treated as a receivable of the plan and, thus, as a plan asset. An employer's liability for amounts due to the plan under the minimum funding standards of ERISA is not limited to 30 percent of net worth.

The full amount of the employer's liability to the PBGC is generally due and payable as of the date of plan termination. However, the PBGC, in its discretion, may grant deferred payment terms for employer liability.

PBGC guaranteed benefits.—Subject to limits, the PBGC guarantees basic benefits under a plan. Basic benefits consist of nonforfeitable retirement benefits other than those benefits that become nonforfeitable solely on account of the termination of the plan. Guaranteed benefits are limited to basic benefits of $750 per month adjusted for inflation since 1974 ($1,687.50 for 1985).

Guarantees do not apply with respect to benefits in effect for fewer than 60 months at the time of plan termination unless the PBGC finds substantial evidence that the plan was terminated for a reasonable business purpose and not for the purpose of securing increased guaranteed benefits for participants. In cases in which they apply, guarantees are phased in at the rate of $20 per month or 20 percent per year (whichever is greater) for (1) basic benefits that have been in effect for less than 60 months at the time the plan terminates, or (2) any increase in the amount of basic benefits under a plan resulting from a plan amendment within 60 months before the date of plan termination.

Notice of termination.—Under present law, an employer must file a Notice of Intent to Terminate (NOIT) a plan with the PBGC not less than 10 days prior to the proposed date of termination. Participants and beneficiaries must be notified of the termination no later than the date that the NOIT is filed with the PBGC.

Distribution.—Under present law, at least 30 days prior to the proposed date of distribution, the plan administrator must submit projected asset and liability data demonstrating that the plan holds sufficient assets to pay guaranteed benefits as of the proposed date of distribution. Under certain circumstances, the plan administrator also has the option of establishing the plan's sufficiency by certification of an enrolled actuary.

Within 90 days after the proposed termination date, the PBGC is to notify the plan administrator as to whether plan assets are sufficient to satisfy plan obligations. This period may be extended by mutual agreement of the plan administrator and the PBGC. The plan administrator may distribute plan assets 30 days after the notice of sufficiency is issued. If the PBGC fails to issue a notice of sufficiency during the 90-day statutory period and the parties fail to agree to extend the 90-day period, the employer may distribute plan assets upon the expiration of the 90-day period.

Post-distribution audit.—Within 60 days of the date of distribution, the plan administrator must certify to the PBGC that plan assets have been allocated and distributed in accordance with the requirements of ERISA. The PBGC may, in its discretion, conduct a post-distribution audit of a terminated plan.

House bill—H.R. 3128

Restrictions on plan termination.—No provision.

Employer liability upon plan termination.—Unless the employer terminating a plan goes out of business, the employer is liable to the PBGC for (1) the full amount of any funding deficiency, plus (2) the full amount of any unfunded guaranteed benefits (determined by treating any funding deficiency as an available plan asset of the terminated plan). A funding deficiency consists of any accumulated funding deficiency and the outstanding balance of any waived funding deficiency. If an employer goes out of business, its liability for the unfunded guaranteed benefits described in (2) is limited to 30 percent of the Employer's net worth.

The bill also provides that the liability of an employer to the PBGC upon plan termination is the joint and several liability of all members of the controlled group of the employer. "Controlled group" is defined as all persons who are treated as a single employer under subsections (b), (c), (m) or (o) of section 414 of the Internal Revenue Code ("Code").

The bill generally provides that the full amount of the liability to the PBGC is normally due and payable as of the date of plan termination, unless the employer elects a deferred payment schedule. An employer may pay its liability to the PBGC (1) in a lump sum payment, (2) over a period of five years, or (3) over a period of 15 years. If the employer elects deferred payments over a 5- or 15-year period, liability payments include interest. Security is required if the 15-year schedule is elected and can be required if the 5-year schedule is elected. In addition, as under present law, the employer and the PBGC may agree to a special schedule of payments. The schedule may, for example, reflect the ability of the employer to pay the liability, as well as the hazards of litigation.

Procedural requirements.—No provision.

House bill—HR. 3500

Restrictions on plan termination.—Under the bill, an employer may only terminate a single-employer defined benefit pension plan under which benefits are guaranteed by the PBGC in a "standard termination" or in a "distress termination." A standard termination is permitted only if the plan holds assets sufficient to pay all benefit entitlements.

Under the bill, "benefit entitlements" include all guaranteed benefits and all benefits that would be guaranteed but for the insurance limits on the amount or value of the benefit, or the length of time that the benefit has been in effect. In addition, benefit entitlements include certain additional benefits for which a participant has satisfied all conditions of entitlement prior to termination, irrespective of whether those benefits are guaranteed. These additional benefits are (1) early retirement supplements or subsidies, (2) plant closing benefits, and (3) death benefits. The general definition of benefit entitlements excludes those benefits that have become nonforfeitable solely by virtue of the plan's termination.

A plan with assets insufficient to provide benefit entitlements may be terminated in a "distress termination" only if the PBGC determines that (1) funding waivers have been granted with respect to the terminating plan for three of the five plan years preceding the termination date, and such a waiver has been granted to each other single employer plan maintained by each contributing sponsor (as that term is defined in the bill) of the terminating plan and each substantial member (as defined in the bill) of each contributing sponsor's controlled group in any one of the three plan years preceding the termination date; (2) a petition has been filed in bankruptcy or state insolvency proceedings seeking liquidation of each contribution sponsor of the plan and each substantial member of their controlled groups, and has not been dismissed or converted to a petition for reorganization; (3) unless a distress termination occurs, each contributing sponsor of the plan and each substantial member of each contributing sponor's controlled group will be unable to pay its debts when due and will be unable to continue in business; or (4) as a result of the decline in the number of employees covered as participants under all of the plans maintained by the contributing sponsors of the terminating plan an members of each contributing sponsor's controlled group, the costs of providing pension coverage have become unreasonably burdensome. The bill contains an objective test of "burdensomeness" relating to plan costs, payroll costs, and gross income level of contributing sponsors and members of their controlled groups.

Employer liability under a terminated plan.—If an employer terminates a plan pursuant to a standard termination, with assets sufficient to fund all benefit entitlements, the employer has no further liability to the PBGC or plan participants.

Liability to the PBGC.—If a plan is terminated pursuant to a distress termination (or if the termination is instituted by the PGBC), each contributing sponsor of the plan and each member of the controlled group of a contributing sponor is jointly and severally liable to the PBGC for (1) any unfunded guaranteed benefits, plus (2) the full amount of any funding deficiency. A funding deficiency consists of any accumulated funding deficiency and the balance of any waived funding deficiency.

Under the bill, the full amount is normally due and payable to the PBGC as of the date of plan termination. However, where the amount of unfunded guaranteed benefits exceeds 30 percent of the collective net worth of the persons subject to liability, liability for the excess amount may be satisfied by payments to the PBGC each year, over a 10-year period (specified in the bill) following the plan's termination. The required payment in any year is 10 percent of the sum of the individual annual pretax profits (if any) of all persons subject to liability in connection with the plan termination. Liability to the PBGC ceases after the earlier of the tenth annual payment or the time when the liability to the PBGC is paid in full.

Liability to participants.—If a plan has assets insufficient to fund nonguaranteed benefit entitlements, each contributing sponsor to the plan and each member of the contributing sponsor's controlled group is jointly and severally liable for payments for a 10-year period (specified in the bill) following the plan's termination, of 5 percent of the sum of the individual annual pretax profits (if any) of all persons subject to liability in connection with the plan termination. The payments are to be made to a special trustee appointed by the PBGC. Employer liability to the special trustee ceases after the earlier of the tenth annual payment or the time when the nonguaranteed benefits are fully funded. The special trust makes benefit payments to participants and beneficiaries.

Notice of termination.—Not less than 60 days prior to a proposed plan termination date, a plan administrator is required to give written notice of the proposed termination to the PBGC, plan participants and benefi-

ciaries, and unions representing the participants.

Related adjudiciatory proceeding.—If, during the period between the date notice is given and the proposed termination date, the plan administrator learns of a "related adjudicatory proceeding" (as defined in the bill), the plan administrator is required to suspend the termination or to structure the termination so that the plan could be restored if it were later determined that the termination violated the contractural or statutory right of any affected person. The payment of benefits is restricted during the suspension period.

Distribution.—As soon as practicable after the proposed termination date, the plan adminstrator is required to provide the PBGC with certification by an enrolled actuary of the plan's sufficiency as of the plan's proposed date of distribution.

The plan administrator is permitted to distribute plan assets upon the expiration of the 60-day period following the date the certification of sufficiency is filed with the PBGC, provided that the PBGC has not issued a notice of noncompliance with respect to the plan, and the parties have not agreed to extend that period. The plan administrator is also required to notify each participant and beneficiary of such person's benefit entitlement at least 60 days prior to the plan's proposed date of distribution.

Post-distribution audit.—The plan administrator is required, within 30 days after the final distribution of assets, to file a notice with the PBGC certifying that assets have been allocated and distributed in accordance with the requirements of ERISA.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

Restrictions on plan termination.—Under the bill, an employer may only terminate a single employer defined benefit pension plan under which benefits are guaranteed by the PBGC in a "standard termination" or in a "distress termination."

A standard termination consists of two distinct stages: (1) a cessation of accruals stage, and (2) a liquidation or "closeout" stage. If the plan has sufficient assets to fund all "final benefit obligations" of the plan, the two stages may occur simultaneously. If assets are insufficient to fund final benefit obligations the plan may not complete the second stage until such obligations are fully funded or the plan qualifies for liquidation under the distress termination rules. A plan in the first stage of termination is a frozen plan to which the present-law rules regarding vesting apply. The bill also provides that the required annual contribution, during the stage-one period, is an amount not less than benefits currently due.

Under the bills, final benefit obligations include all "benefit entitlements" as defined under H.R. 3500, plus, (1) benefits which comes nonforfeitable solely by virtue of the plan's termination, and (2) certain ancillary benefits for which a participant satisfies the conditions of entitlement subsequent to the plan's termination.

In order to terminate a plan in a distress termination, a plan administator is required to demonstrate that (1) a petition in bankruptcy or other State insolvency proceedings has been filed seeking liquidation of each contributing sponsor (as defined in the bill) of the plan and each substantial member (as defined in the bill) of the contributing sponsors' controlled groups, and that the petition has not been dismissed or converted to one seeking reorganization; (2) a petition in a bankruptcy or State insolvency proceeding has been filed seeking reorganization of each contributing sponsor of the plan and each substantial member of their controlled groups, and the bankruptcy court has approved the plan termination; or (3) unless a distress termination occurs, each of the contributing sponsors and the substantial members of their controlled groups will be unable to pay its debts when due, and will be unable to continue in business.

Employer liability under a terminated plan.—These provisions of the bill are substantially the same as H.R. 3500, except that the contributing sponsors and members of their controlled groups are liable to plan participants for unfunded nonguaranteed "final benefit obligations" rather than benefit entitlements, and payment of those benefits is made directly by the employer to plan participants and beneficiaries, rather than through a special termination trust.

Notice.—Not less than 10 days prior to a "stage one" termination, a plan administrator is required to give written notice of the termination to the PBGC, plan participants and beneficiaries, and unions representing the participants.

Notice to the same parties is required at least 30 days prior to the second, closeout stage. If stages one and two occur simultaneously, the 30-day notice applies. In any event, if the plan is maintained pursuant to a collective, bargaining agreement, the plan administrator is required to notify unions representing participants at least 30 days prior to a stage one freeze or a stage two closeout filing.

Related adjudicatory proceeding.—No provision.

Distribution.—At least 30 days prior to the distribution of plan assets, the plan administrator is required to provide the PBGC with certification by an enrolled actuary of the plan's sufficiency as of the plan's proposed date of distribution. The plan administrator is permitted to distribute plan assets upon the expiration of the 30-day period, provided that the PBGC has not issued during that period a notice of noncompliance with respect to the plan.

Notice of benefit computations to participants.—At the same time as the plan administrator notifies each participant or beneficiary of the benefits to which the participant or beneficiary is entitled, the plan administrator must also notify the participant or beneficiary of the information used in computing the amount of such benefits, including (1) the length of service, (2) the age of the participant or beneficiary, (3) wages, and (4) such other information as the PBGC may require.

Post-distribution audit.—The PBGC is required to audit annually all participants in terminated plans after the final distribution of assets.

Conference agreement

The conference agreement generally follows the structure of H.R. 3500.

Restrictions on terminations.—Under the agreement, as under H.R. 3500, an employer may only terminate a single-employer defined benefit pension plan under which benefits are guaranteed by the PBGC in a standard termination or in a distress termination. An employer is permitted to terminate a plan in a standard termination only if the plan holds sufficient assets to pay all "benefit commitments" under the plan. Benefit commitments are defined under the conference agreement as all guaranteed benefits (including qualified preretirement survivor annuities) and all benefits that would be guaranteed but for the insurance limits on the amounts or value of the benefit, or the length of time that the benefit has been in effect. In addition, benefit commitments include certain additional benefits for which a participant has satisfied all conditions of entitlement prior to termination. These additional benefits, irrespective of whether they are guaranteed, are (1) early retirement supplements or subsidies, and (2) plant closing benefits.

With respect to the circumstances under which an employer may terminate a plan in a distress termination, the bill generally follows Title IX of the Senate amendment except that it provides an additional criteria permitting "distress" termination if pension costs become unreasonably burdensome due to a declining workforce. In addition, the conference agreement makes it clear that different members of a controlled group may separately satisfy different criteria for distress termination.

As under present law, to the extent a pension plan is an executory contract included within the scope of Section 365 (11 USC 365) or is included within the scope of Section 1113 of the Bankruptcy Code (11 USC 1113), these Bankruptcy Code Provisions are applicable to the court's decision on whether to approve the termination of the pension plan. The distress termination criteria are not intended to make any substantive changes in the bankruptcy laws. The conferees take no position on when or whether a pension plan is an executory contract.

Employer liability under a terminated plan.—Upon the termination of a plan, pursuant to a standard termination in which all benefit commitments are fully funded, the employer has no further liability to the PBGC or to plan participants.

Liability to PBGC.—Upon the termination of a plan pursuant to a distress termination, if the PBGC determines that plan assets are insufficient to fund guaranteed benefits, the PBGC is required to institute trusteeship proceedings for the plan. Each contributing sponsor of the plan and each member of the controlled group of each contributing sponsor is jointly and severally liable to the PBGC for the sum of (1) the total amount of all unfunded guaranteed benefits, up to 30 percent of the collective net worth of those persons liable to the PBGC; (2) an amount equal to the excess (if any) of (a) 75 percent of the total amount of all unfunded guaranteed benefits over (b) the amount described in (1); and (3) interest on the amount due calculated from the termination date. The total amount of unfunded guaranteed benefits is computed by treating any accumulated funding deficiency and the balance of any waived funding deficiency as a receivable of the plan and, thus, as a plan asset.

The full amount of the liability to the PBGC is generally due and payable as of the date of plan termination. However, if the liability to the PBGC for unfunded guaranteed benefits exceeds 30 percent of the collective net worth of the parties that are liable to the PBGC, the payment of that excess amount is to be made under commercially reasonable terms prescribed by the PBGC. The parties are to make a reasonable effort to reach agreement on such terms. Under the conference agreement, any terms prescribed by the PBGC must provide for the deferral of 50 percent of any amount of liability otherwise payable for

any year if the PBGC determines that no person subject to such liability has individual pretax profits for the fiscal year ending during such year.

If a plan terminates pursuant to a distress termination and is subject to PBGC trusteeship proceedings, then each contributing sponsor and each member of their controlled groups is liable to the PBGC for the sum of (1) the outstanding balance of any accumulated funding deficiency, and (2) the balance of the amount of any waived funding deficiencies. The full amount of such liability is due and payable to the PBGC as of the date of plan termination.

The conferees take no position with respect to the treatment in bankruptcy of PBGC claims and liens. Deletion of the amendments to section 4068 that appeared in S. 1730 is not intended to express any view on the meaning of the present language in section 4068. Section 4068 has been amended, however, to assure that it applies only to the liability that was covered by section 4068 prior to these amendments, i.e., the value of unfunded guaranteed benefits up to 30 percent of the employer's net worth. Section 4068 does not apply to liability being added to section 4062 by these amendments for amounts in excess of the 30 percent of net worth cap.

Liability to participants.—If the PBGC determines that there is an outstanding amount of benefit commitments, the PBGC is required to appoint a fiduciary with respect to the termination trust. The fiduciary must be independent of the contributing sponsors (and members of a controlled group including sponsors) and generally is subject to the fiduciary requirements of ERISA (other than the prohibited transaction rules). The "outstanding amount of benefit commitments" under a plan is defined as the excess of (1) the actuarial present value of the benefit commitments of each participant and beneficiary over (2) the actuarial present value of the benefits of each participant and beneficiary that are guaranteed by the PBGC or to which assets of the plan have been allocated under the distribution procedures of section 4044 of ERISA. Each contributing sponsor of the plan and each member of the controlled group of a contributing sponsor is jointly and severally liable to the termination trust for the lesser of (1) 75 percent of the total amount of outstanding benefit commitments under the plan, or (2) 15 percent of the total amount of benefit commitments under the plan. The termination trust generally will be administered by the PBGC except in cases in which PBGC determines that delegation of this responsibility is cost effective.

Under the conference agreement, payment of liability is to be made under commercially reasonable terms prescribed by the fiduciary of the termination trust. The parties are required to make a reasonable effort to reach agreement on such terms. In addition, the conference agreement provides that if liability to the termination trust is less than $100,000, the payment of liability to the trust over 10 years in equal annual installments (with interest at the applicable rate determined under sec. 6621(b) of the Code) will satisfy this requirement even if the terms are not commercially reasonable. The PBGC is permitted to increase, by regulation, the $100,000 ceiling. To phase in this $100,000 rule, the conference agreement provides that no payment under this provision is required before January 1, 1989.

The conference agreement also provides that any payment schedule is to provide for the deferral of 75 percent of the liability otherwise payable to the termination trust for any year if no person subject to liability to the termination trust has any individual pre-tax profits for such person's fiscal year ending during such year. However, the conferees intend that the fact that one person has minimal profits should not make the benefits of deferral totally unavailable. The required payments in any year should not exceed 50 percent of the otherwise payable amount plus profits. The amount of liability so deferred is payable only after payment of any liability to the PBGC arising in connection with the terminated plan.

The conference agreement provides rules governing the allocation and distribution of assets of the termination trust to participants and beneficiaries.

Under the conference agreement, a participant or beneficiary who receives distributions from a termination trust is, subject to certain requirements, permitted to roll over the distributions to an IRA or qualified plan.

Deductibility of payments.—The conference agreement provides rules as to the deductibility of payments to the PBGC and the termination trust.

Notice.—The conference agreement follows H.R. 3500.

Related adjudicatory proceedings.—The conference agreement contains no provision dealing with related adjudicatory proceedings. However, the conference agreement provides that the PBGC is not to proceed with the voluntary termination of a plan if the termination would violate the terms and conditions of a collective bargaining agreement.

Distributions.—The conference agreement generally follows H.R. 3500. As under H.R. 3500, the conference agreement provides that the assets of a terminated plan may be distributed if the PBGC fails to issue a notice of noncompliance within 60 days after receipt of a NOIT. As under H.R. 3500, the conference agreement provides that the 60-day period may be extended by PBGC and the plan administrator and that the extension may be subject to conditions to which they have agreed. The conference agreement does not change the rules of the Code for determining the qualified status of a plan (or of a trust forming a part of a plan), or the application of the minimum funding standard to a plan. Accordingly, the conference agreement does not authorize the PBGC to waive, or otherwise modify, the requirements of the Code.

Notice of benefit computations to participants.—The conference agreement generally follows Title IX of the Senate amendment except that, in addition to the other information specified in the Senate amendment, the plan administrator must supply to participants and beneficiaries the actuarial assumptions used in computing plan benefits (including, but not limited to, the interest rate assumption).

Post-distribution audit.—The conference agreement generally follows H.R. 3500. In addition, under the conference agreement the PBGC is required to perform annually an audit of a statistically significant sample of terminated plans to determine whether participants and beneficiaries have received the benefits to which they are entitled. For each plan selected for audit, the benefits of a statistically significant sample of participants and beneficiaries are to be verified.

In addition, the conference agreement authorizes the Comptroller General of the General Accounting Office to examine certain plan documents. Any information gathered under this authority shall not be available to the public.

3. Involuntary Plan Termination

Present law

Under present law, the PBGC is permitted, but not required, to commence proceedings to terminate a plan under a variety of circumstances including the inability of the plan to pay benefits when due.

House bill—H.R. 3128

No provision.

House bill—H.R. 3500

Under the bill, the PBGC is required to commence termination proceedings if the plan does not have assets available to pay benefits that are currently due under the terms of the plan.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

As under present law, the PBGC is permitted, but not required, to terminate a plan under certain circumstances. In addition, the PBGC may appoint a temporary receiver if the plan fails to meet minimum funding requirements, is not able to pay current benefits when due, or has been abandoned.

Conference agreement

The conference agreement follows H.R. 3500.

4. Waiver of Funding Standard

Present law

Present law authorizes the Internal Revenue Service to waive the requirements of the minimum funding standard no more frequently than 5 times in any 15-year period. In addition, the amortization period for liabilities under defined benefit pension plans may be extended, and a waiver previously granted by the IRS may be modified.

The IRS may grant a waiver on condition that appropriate requirements are met.

House bill—H.R. 3128

The IRS is authorized to require that security be provided as a condition of granting a waiver of the minimum funding standard, an extension of an amortization period and modifications of a previously granted waiver. The IRS is required to notify the PBGC before granting a waiver and is to consider the comments of the PBGC. The PBGC has a 15-day comment period after the date of receipt of notice.

The new provisions apply to waivers, extensions, and modifications granted on or after the date of enactment of the bill.

House bill—H.R. 3500

The bill is similar to H.R. 3128, except that (1) a "reasonable period" rather than a 15-day comment period is provided, and (2) the security, notice, and comment provisions do not apply to cases involving less than $1 million of outstanding waived liability. The bill requires that an employer that submits a request for a waiver of the minimum funding standard notify each affected party. The term "affected party" is defined under the bill as a plan participant, a beneficiary of a deceased participant, a beneficiary that has been designated as an alternate payee pursuant to a qualified domestic relations order, an employee organization representing participants in the plan and the PBGC.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

No provision.

Conference agreement

The conference agreement clarifies that the IRS is authorized to require that security be provided as a condition of granting a waiver of the minimum funding standard, the extension of an amortization period, or modification of a previously granted waiver of the minimum funding standard with respect to a single employer defined benefit plan. The conference agreement requires that, before granting an application for a waiver, extension or modification to a single employer defined benefit plan, the IRS notify the PBGC of the receipt of a completed application for a waiver, extension, or modification, and consider the views of any interested party, including the PBGC, submitted in writing. The PBGC has a 30-day period after the date of receipt of notice to submit to the IRS comments on the application.

The conference agreement provides that the notice of the application and any other information or materials relating to the application that is sent to the PBGC by the IRS constitutes tax return information and is subject to the safeguarding and reporting requirements of section 6103(p) of the Code.

Under the conference agreement, the security, notice, and comment provisions do not apply if, with respect to the plan for which a waiver is requested, the sum of (a) the accumulated funding deficiencies (including the amount of any increase in the accumulated funding deficiency that would result if the request for a waiver were denied); (b) the outstanding balance of any previously waived funding deficiencies; and (c) the outstanding balance of any decreases in the minimum funding standard allowed under section 303 of ERISA, is less than $2 million. As under current law, the mere creation of a security interest at the direction of the Secretary of the Treasury as a condition for granting a waiver does not by itself constitute a prohibited transaction. The provisions of the conference agreement relating to security are intended by the conferees to provide appropriate rules for the future. The conferees intend that no inference is to be drawn from this provision with respect to the application of present law to such transactions.

The conference agreement also contains an amendment to the Code requiring that if the IRS grants a request for a waiver, extension, or modification, the interest on the waived amount must be computed by using a rate prescribed in section 6621(b) of the Code.

Finally, under the conference agreement, an employer that submits an application for a waiver of the minimum funding standard is required to notify any employee organization representing participants in the plan of the application.

5. Special Enforcement Rules

House bill—H.R. 3128

A nondeductible excise tax applies if termination liability payments are not made as required.

The initial tax is 5 percent of any payment not made when due. The tax increases by an additional 5 percent of any portion of such payment that is not made within 90 days of the payment's due date, and increases by an additional 5 percentage points for each 30-day period thereafter that the amount remains unpaid. The total additional tax imposed on any unmade payment is limited to the amount of such payment that has not been made within 90 days of the payment's due date.

There is allowed as a credit against the excise tax (up to the amount of the excise tax) any amount paid by the employer to the PBGC, with respect to the employer's termination liability, no later than two years after the final determination of that liability. Liability for the excise tax is the joint and several liability of the controlled group.

House bill—H.R. 3500

The bill adds a new section to ERISA that would expressly confer, upon an adversely affected plan fiduciary, employer, employee organization representing plan participants, contributing sponsor, participant or beneficiary, a private right of action to enjoin certain acts or practices of any party in violation of the employer liability provisions. Other appropriate equitable relief could also be provided by a court.

Under the bill, district courts have exclusive jurisdiction over these actions. A plan could be sued as an entity under these provisions. The bill also provides for venue and for awards of attorney's fees ad expenses under certain circumstances.

A copy of the complaint in any action under these provisions would be served on the PBGC. The PBGC could intervene in the action.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

No provision.

Conference agreement

The conference agreement generally follows H.R. 3500.

6. Evasion of Employer Liability

House bill—H.R. 3128

Certain transactions undertaken by a person would not be treated as transferring employer liability away from that person or any member of a controlled group including that person. This treatment would apply to transactions undertaken within 10 years before the date of termination of single-employer defined benefit pension plan if a principal purpose of the transaction was to fraudulently evade any employer liability to the PBGC.

House bill—H.R. 3500

If a principal purpose of any person in entering into any transaction is to evade employer liability in connection with the termination of a single-employer defined benefit pension plan, and the transaction becomes effective within 5 years before the termination date, then that person and the members of that person's controlled group (determined as of the termination date) are subject to employer liability in connection with the termination as if that person were a contributing sponsor of the terminated plan as of the termination date. Post-transaction benefit increases or improvements would not be taken into account in computing the liability such an entity.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

Rules would be provided for tracing liability in the case of certain corporate reorganizations.

Conference agreement

The conference agreement generally follows H.R. 3500, except that the conference agreement provision is effective only with respect to transactions occurring on or after the earlier January 1, 1986, or the date of enactment. The provisions of the conference agreement relating to evasive transactions are intended by the conferees to provide appropriate rules for the future. The conferees intend that no inference is to be drawn from these provisions with respect to the application of present law to such transactions. In addition, the conference agreement makes it clear that only contributing sponsors (and members of a controlled group including the contributing sponsors) are affected by this provision.

7. Special Rule for Pending Cases

House bill—H.R. 3128

No provision.

House bill—H.R. 3500

No provision.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

In the case of an employer that (1) had filed an NOIT with the PBGC prior to the date of enactment and had not yet received a notice of sufficiency or (2) files an NOIT in a standard termination subsequent to the date of enactment and prior to March 1, 1986, the bill requires that the processing of the plan be delayed if the lesser of 10 or 10 percent of plan participants file complaints with respect to the termination.

The plan administrator of such a plan is not permitted to distribute plan assets until final benefit obligations are fully funded and the PBGC a notice of sufficiency with respect to the plan. The PBGC issues generally is not permitted to issue a notice of sufficiency to the plan until 90 days subsequent to the date that the PBGC determines the plan to be sufficient, except if the employer demonstrates that it is experiencing substantial business hardship. During this additional 90-day period, the PBGC is required to consider and respond to participants' complaints. (Under a special rule, the processing of a plan can be delayed no more than 14 days if the PBGC was previously granted an extension of the period in which to determine the plan's sufficiency because of circumstances wholly within the control of the PBGC.)

Conference agreement

The conference agreement generally follows Title IX of the Senate amendment, except that (1) the processing of a plan is delayed only if the employer is to receive a reversion of surplus assets in excess of $1 million, and the lesser of 200 or 10 percent of plan participants file complaints with respect to the termination; and (2) the PBGC is not permitted to issue a notice of sufficiency for 90 days after the plan is determined to have assets sufficient to fund all benefit commitments, even if an extension period within which PBGC must determine the plan's sufficiency was granted at the request of the PBGC and because of circumstances wholly within the control of the PBGC.

8. Plan Assets

Present law

As a general rule, the assets of an employee benefit plan must be held in trust for the exclusive benefit of plan participants. Those individuals or entities with discretion over the management and disposition of plan assets are subject to a number of fiduciary duties enumerated in ERISA. In addition, ERISA prohibits any transaction in which the assets of a plan inure to the benefit of

the employer, plan fiduciaries or other interested parties enumerated in ERISA.

Proposed regulations issued by DOL define plan assets for purposes of the fiduciary duty and prohibited transactions rules of ERISA. Under the regulations, if a plan acquires an equity interest in certain types of entities, the investing plan's assets are considered to include both its investment and an undivided interest in each of the underlying assets of the entity. The regulation is effective for purposes of identifying plan assets on or after 90 days after publication of the final regulation.

House bill—H.R. 3128

No provision.

House bill—H.R. 3500

No provision.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

The bill provides to certain publicly held real estate entities transitional relief from final regulations, to be issued by DOL, defining "plan assets."

Conference agreement

The conference agreement generally follows Title IX of the Senate amendment. Except as a defense, no rule or regulation adopted after date of enactment that defines the term plan assets for purposes of ERISA shall apply to any asset of certain public real estate programs if investments by plan investors in such programs occur prior to the expiration of a specified period of time following the issuance of such rule or regulation. A plan investor is any plan, account, or arrangement (including an individual retirement account).

The conference agreement does not contain a substantive amendment to ERISA but, rather, provides transitionl relief in connection with plan asset regulations that are to be issued under ERISA. This will enable public real estate programs to avoid the disruption of normal business arrangements during the development of final regulations by the DOL.

The transitional relief provided in the conference agreement for certain real estate entities is limited to regulations which the DOL currently has under consideration. The conferees have instructed, and expect, the Secretary to adopt final regulations pursuant to the proposal by December 31, 1986.

The transitional relief provided applies to a real estate program that meets certain conditions, including the requirement that the economic rights of ownership with respect to a security issued by such program are "freely transferable." Whether a particular security is "freely transferable" is to be determined based upon all the facts and circumstances; however, the conference agreement also lists several kinds of restrictions which, absent unusual circumstances, will not (either alone or in any combination) cause a security to fail to be freely transferable. The categories are based upon restrictions commonly found in public offerings of securities of real estate entities which are imposed in order to comply with State and Federal laws, to assure continued eligibility for favorable tax treatment, and to avoid certain practical administrative problems. The conferees understand that such restrictions do not, alone or in combination, present any substantial impediment to the ability of investors to readily dispose of their investments and do not prevent such securities from being described as "freely transferable" in prospectuses required under the Federal securities laws. Such a description need not be included in a prospectus in order for a security offered or acquired thereunder to be considered "freely transferable" for purposes of this section.

One of the factors listed is the requirement that transfer or administrative fees be reasonable. It is intended that a fee will not be unreasonable if it does not exceed the cost of effecting transfers of interest on the program's books and the cost of complying with State filing requirements.

It is the intention of the conferees that the requirement that every interest in a real estate entity must be registered under Federal securities laws shall not apply to interests issued to initial limited partners solely for partnership organizational purposes in compliance with State limited partnership laws, provided that such interests are nominal in amount when compared to all other interests in the partnership as of the date of the completion of the offering of such entity, and such partnership was organized prior to enactment. Generally, an interest will be considered nominal if the interest has a value as of the date of issue of less than $20,000 and represents less than one percent of the total interests outstanding as of the completion of the offering period.

Although this section only covers certain public real estate entities, no inference should be drawn concerning the status of any other entity.

9. Additional studies

House bill.—H.R. 3128

No provision.

House bill—H.R. 3500

No provision.

Senate amendment—Title VII

No provision.

Senate amendment—Title IX

The bill requires that DOL conduct a study of terminations of overfunded pension plans. DOL is required to submit a report on the study, together with any recommendations for statutory changes, to the House Committee on Education and Labor, the Senate Finance Committee, and the Senate Committee on Labor and Human Resources by February 1, 1986.

The bill also requires that the PBGC conduct a study on the purchase of insurance contracts from an insurer in satisfaction of all final benefit obligations under ERISA. The PBGC is required to submit a report on the study to various committees of Congress by one year from the date of enactment.

Conference agreement

The conference agreement requires the Secretary of Labor to conduct a study of terminations of overfunded pension plans. The report, together with any recommendations for statutory change, must be submitted to the Committees named above by February 1, 1986.

10. Effective dates

The provisions of the conference agreement relating to amendments to reduce significantly future benefit accruals apply to amendments adopted on or after the earlier of January 1, 1986, or the date or enactment.

The provisions of the conference agreement relating to voluntary plan terminations apply to terminations for which a NOIT is filed on or after the earlier of January 1, 1986, or the date of enactment. The provisions relating to involuntary plan terminations apply to terminations for which termination proceedings are instituted on or after the earlier of January 1, 1986, or the date of enactment.

The provisions relating to waivers of the minimum funding standard apply to applications for waivers, extensions of an amortization period, and modifications of a previously granted waiver, submitted to the IRS on or after the earlier of January 1, 1986, or the date of enactment.

The provisions of new ERISA section 4070 relating to enforcement apply to actions filed on or after the earlier of January 1, 1986, or the date of enactment.

As noted above, the provisions of the conference agreement relating to evasion of liability apply to transactions becoming effective on or after the earlier of Janaury 1, 1986, or the date of enactment.

Special effective dates, as described above, are provided for the provisions of the conference agreement relating to PBGC premiums, the special processing rule for pending cases, the DOL plan asset regulations, and the studies authorized.

TITLE XII—INCOME SECURITY AND RELATED PROGRAMS

1. Minor and Federal amendments

(a) Demonstration Projects Involving the Disability Insurance Program (Section 760 of the Senate amendment)

Present law

The Social Security Disability Amendments of 1980 directed the Secretary of Health and Human Services to develop and carry out experiments and demonstration projects to test the advantages of various ways to facilitate and encourage the return to employment of individuals who would otherwise remain dependent on disability benefits. A key element in conducting these demonstration projects is the authority for the Secretary to waive requirements of the Social Security Act related to the subject matter of the projects. A provision of the 1980 amendments calling for a final report within 5 years of the enactment of that statute has been interpreted as terminating the Secretary's authority to make such waivers. Without this waiver authority the Secretary is unable to carry out demonstration projects that have not yet been implemented.

House bill

No provision.

Senate amendment

Extends the waiver authority for 5 years. The deadline for a final report on the OASDI projects is extended to June 9, 1990. Since this requirement is made applicable only to OASDI, the provision could be interpreted to grant a permanent extension of authority to waive the Supplemental Security Income program rules.

Effective date.—Requires a final report to Congress by June 9, 1990.

Outlay effect (in millions):

Fiscal years:	
1986	$3
1987	5
1988	5
3-year total	13

Conference agreement

House recedes to the Senate amendment.

(b) Disability Advisory (Section 761 of the Senate amendment)

Present law

The Social Security Act requires an Advisory Council on Social Security to be appointed every 4 years, at the beginning of

each Presidential term, and to report by January 1 of the second year after appointment. The disability amendments enacted in 1984 require that the Council to be appointed in 1985 make recommendations on the medical and vocational aspects of disability.

House bill

No provision.

Senate amendment

Establishes a special ad hoc Disability Advisory Council in lieu of the general council scheduled to be appointed in 1985. The ad hoc Council shall report to Congress by December 31, 1986.

Outlay effect.—None

Conference agreement

House recedes to the Senate amendment.

(c) Taxation of Social Security Benefits Received by Certain Citizens of Possessions of the United States (Section 762 of the Senate amendment)

Present law

Citizens of American Samoa are treated as non-resident aliens and are subject to withholding of taxes from their social security benefits at a 15-percent rate. Citizens of other U.S. territories are exempt from the withholding requirement.

House bill

No provision.

Senate amendment

Eliminates U.S. tax withholding on social security payments to citizens of American Samoa, to make it consistent with the tax treatment of citizens of other U.S. possessions.

Effective date.—Applies to benefits received after December 31, 1983, in taxable years ending after such date.

Revenue effect (in millions):

Fiscal years:	
1986	−$1
1987	−1
1988	−1
3-year total	−3

Conference agreement

House recedes to the Senate amendment.

(d) Application of Dependency Test to Adopted Great-Grandchildren for Purposes of Child's Insurance Benefit (Section 763 of the Senate amendment)

Present law

A grandchild (under age 18) of a social security beneficiary may be entitled to benefits if the child is adopted by and lives with the grandparent for at least 1 year before applying for benefits and received half his support from the beneficiary.

House bill

No provision.

Senate amendment

Extends the provision to great-grandchildren of the beneficiary.

Effective date.—Applies with respect to benefits for which an application is filed after the date of enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

(e) Elimination of Requirement for Publication of Revisions in Pre-1979 Benefit Table (Section 764 of the Senate amendment)

Present law

The Secretary is required to publish the pre-1977 Amendments table of benefit amounts as revised by each general benefit increase. (This table applies to those eligible for benefits in 1978 or earlier.)

House bill

No provision.

Senate amendment

Eliminates the requirements to publish the revised tables, but would not affect the revisions themselves.

Effective date.—The month after the month of enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

(f) Notification Formula Clarification (Section 765 of the Senate amendment)

Present law

Under the 1983 Amendments, the Board of Trustees is required to notify Congress whenever it determines that the reserves in any of the trust funds at the beginning of any calendar year may become less than 20 percent of expenditures

House bill

No provision.

Senate amendment

Clarifies the Congressional intent that the determination should utilize a measure of reserves which includes the taxes credited to the trust funds on the first day of each month.

Effective date.—The month after the month of enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

(g) Extension of 15-month Reentitlement Period to Childhood Disability Beneficiaries Subsequently Entitle (Section 766 of the Senate amendment)

Present law

Disabled individuals who complete a 9-month trial work period and still have a disabling impairment, may be automatically reinstated to active benefit status during the next 15 months for any month in which their earnings fall below substantial gainful activity (SGA) level, currently $300 per month. However, a person entitled to benefits as a disabled adult child who has used this provision once cannot subsequently be covered by it again.

House bill

No provision.

Senate amendment

Extends the subsequent 15-month reentitlement periods to reentitled childhood disability beneficiaries.

Effective date.—Applies to individuals who are disabled on or after December 1, 1980.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

(h) Charging of Work Deductions Against Auxiliary Benefits in Disability Cases (Section 767 of the Senate amendment)

Present law

When a person receiving auxiliary benefits on the record of a disabled worker has earnings which exceed the exempt amount allowed under the earnings test, work deductions are imposed against the auxiliary worker's benefits which could be payable after any reduction for the family maximum limit. However, the amount withheld from the working individual is redistributed to others in the family so that the family continues to receive benefits up to the family maximum. As a result of a technical error in the 1980 amendments, this provision uses the regular (retired) family maximum formula for computing the amount to be withheld from the working family member instead of the disability family maximum formula which is used to determine the amount actually payable to the entire family.

House bill

No provision.

Senate amendment

Requires the use of the disability family maximum limit for computing the individual's deductions as well as for computing the total family entitlement.

Effective date.—Effective with respect to benefits payable for months after December 1985.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

(i) Perfecting Amendments to Disability Offset Provision (Section 768 of the Senate amendment)

Present law

The 1981 Omnibus Budget Reconciliation Act expanded the social security disability offset (reduction in social security disability benefits due to receipt of other types of benefits) to include most governmental disability benefits paid to individuals. Previously, the offset was applicable only to workers' compensation payments. However, unclear wording led to confusion with regard to the continued application of the offset to certain workers' compensation benefits. Present law also treats State and local disability payments differently than similar Federal payments.

House bill

No provision.

Senate amendment

(a) Clarifies that all disability benefits paid under a Federal or State workers' compensation law or plan would continue to be subject to the disability offset.

(b) Clarifies that both Federal and State or local workers must have had substantially all their service covered by social security to be excluded from the disability offset.

Effective date.—(a) is effective as if it were in effect upon implementation of the Omnibus Budget Reconciliation Act of 1981. (b) is effective for persons becoming disabled after the month of enactment.

Outlay effect (in millions):

Fiscal years:	
1986	(*)
1987	−$1
1988	−1
3-year total	−2

*Less than −$500,000.

Conference agreement

House recedes to the Senate amendment.

(j) State Coverage Agreements (Section 769 of the Senate amendment)

Present law

Coverage of State and local employees under social security is, in most cases, effective on the date that an agreement is mailed by the State to the Secretary of Health and Human Services. However, for workers paid on a fee basis and for those whose coverage is retroactive, the agreement becomes effective on the date it is signed by both parties, which may result in complications and loss of coverage for some employees.

House bill

No provision.

Senate amendment

Makes all agreements and modifications of agreements effective on the date the agreement is mailed or delivered by other means to the Secretary.

Effective date.—For agreements or modifications mailed or delivered on or after the date of enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

(k) Effect of Early Delivery of Benefit Checks (Section 769A of the Senate amendment)

Present law

When the normal delivery date for social security benefits (the third day of the month) falls on a Saturday, Sunday or legal holiday, checks must be delivered on the nearest preceding banking day. This may result in checks being delivered in the previous month. If this situation arises at the end of a year, it could cause distortion of year-end trust fund balances, possibly making them low enough to trigger the stabilizer provision, which could effect the amount of cost-of-living increases. This could also result in exaggerated beneficiary tax liability in the earlier year and reduced tax liability in the later year.

House bill

No provision.

Senate amendment

Eliminates these problems by providing that, for purposes of asset-expenditure ratio calculations and taxation of benefits, Social Security benefits delivered prior to their scheduled delivery date would be deemed to have been paid on the regular delivery date.

Effective date.—For benefit checks issued for months ending after the date of enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

2. Exemption from Social Security coverage for retired Federal judges on active duty (Section 769C of the Senate amendment)

Present law

The 1983 Social Security Amendments (Public Law 98-21) provided that the wages of all active Federal judges would be subject to Social Security taxes beginning January 1, 1984. This provision applied to both current and future judges. P.L. 98-21 also specifically provided that amounts received by judges who achieve senior (retired) status but who continue on active duty would be subject to Social Security taxes on so much of their pay as was attributable to periods when they were performing judicial services. Those earnings would also cause reductions in the judges' benefits under the social security retirement test. (Subsequently, P.L. 98-118 delayed the effective date of this provision until January 1, 1986.)

House bill

No provision.

Senate amendment

Excludes, from the definiton of wages for Social Security purposes, the amounts received by Federal judges who meet the criteria for retirement on salary (e.g., age 65 with 15 years of service or 70 with 10 of service), who retire, and who perform active duty. The effect of this exclusion would be to exempt their pay from Social Security taxes and to preclude it from being counted for Social Security earnings test purposes.

Effective date.—Effective for services performed after December 31, 1983.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

3.. Recovery of overpayments (Section 769D of the Senate amendment)

Present law

Under the Social Security Act, entitlement to Social Security benefits ends with the month before the month of death and eligibility for Supplement Security Income (SSI) benefits ends with the month of death. Under current reclamation procedures, benefits erroneously paid to a deceased individual by means of direct deposit are recovered by the Department of the Treasury from the financial organization which accept the deposit. In most cases, the financial organization debits the account to which the amounts were finally credited. When an account is debited, the financial organization is required to provide concurrent notice to any individuals shown as owners.

House bill

No provision.

Senate amendment

Provides that when (1) a payment is made to a deceased individual by means of direct deposit; (2) such payment is credited by a financial organization to an account jointly owned by the deceased individual and another person; and (3) such other person is (a) entitled to a Social Security benefit based on the same wages and self-employment income as the deceased person for the month immediately preceding the month in which the deceased person died; or (b) such other person is the surviving spouse of the deceased person and was eligible for an SSI payment (or federally administered State supplement) as an eligible spouse (including either member of an eligible couple) in the month in which the deceased individual died; such payment shall be treated as an overpayment to the surviving individual.

Effective date.—Applies to deaths of which the Secretary of Health and Human Services is first notified on or after the date of enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

4. Study of benefit formula notch (Section 769E of the Senate amendment)

Present law

Some workers who reach age 62 in 1979 (or later) and have their Social Security benefits determined under the computation provisions included in the 1977 Social Security amendments can get significantly lower monthly benefits than similar workers who reach age 62 in 1978 (or earlier), have similar earnings histories, retire at the same age and have their benefits computed under the old system. This difference in benefit amounts is commonly referred to as the "notch."

Because benefits are generally lower under the new system than the old one, a transitional provision was included in the 1977 amendments to smooth the differences between benefits computed under the two systems in the early years of the new system. A worker who reaches age 62 in 1979-1983 gets a benefit figured under the transitional provision if the benefit is higher than the one figured under the new system. While the transitional provision lessens the extent of the benefit differential, it does not eliminate it.

House bill

No provision.

Senate amendment

Directs the Secretary of HHS to appoint a panel to study the Social Security "notch". The panel is to study the extent of the benefit differential known as the "notch", as well as the nature and desirability of actions for addressing this benefit differential. The report is to include estimates of the short- and long-range costs of such proposals. The panel's report will be submitted to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives by December 15, 1986.

Effective date.—On enactment.

Outlay effect.—None.

Conference agreement

Senate recedes to the House bill.

5. Coverage of Connecticut State police (Section 769H of the Senate amendment)

Present law

Under the Social Security Act, only States specifically listed in the Act may extend social security coverage to policemen who are covered under other retirement programs. Connecticut is not listed. Listed States may only extend coverage in one of two ways: (1) by covering all current and future employees of the affected group; or (2) by covering all future employees and those current employees who desire coverage.

House bill

No provision.

Senate amendment

Allows Connecticut, if the Governor so requests, to cover State police hired on or after May 8, 1984 without conducting a referendum.

Effective date.—Applies to individuals hired on or after May 8, 1984 who are members of the Tier II plan of the Connecticut State Employee Retirement System, with respect to services performed after enactment of this Act.

Revenue effect (in millions):

Fiscal years:	
1986	[1]
1987	$1
1988	1
3-year total	2

[1] Less than $500,000.

Conference agreement

house recedes to the Senate amendment.

6. Removal of comment prohibition by Social Security and Medicare actuaries relating to economic assumptions (Section 735 of Senate amendment) (See also item 54 in Part I Medicare provisions)

Present law

Requires Board of Trustees annual report on the financial status of the Social Security trust funds (including the Medicare trust funds) to include an actuarial opinion certifying that the assumptions and cost estimates used in the report are reasonable. According to Section 154 of the Social Security Amendments of 1983 (P.L. 98-21), that certification may not refer to the economic assumptions underlying the Trustees' reports.

House bill

No provision.

Senate amendment

Eliminates the language of current law prohibiting Social Security and Medicare actuaries from commenting on the economic assumptions underlying the Trustees' reports.

Effective date.—Enactment.

Outlay effect.—None.

Conference agreement

House recedes to the Senate amendment.

7. Restoration of trust fund investments (Section 769G of the Senate amendment) [Related measures are contained in House and Senate amendments to H.J. Res. 372]

House bill

No provision.

Senate amendment

For Social Security Trust Funds and other retirement funds:

(a) Requires the Secretary of the Treasury, on the basis as if H.J.Res. 372 (as deemed passed by the House on August 1, 1985) had been enacted on August 1, 1985, to:

(1) immediately reissue securities redeemed on or after September 1, 1985 that would not have been redeemed;

(2) pay the interest that would have accrued but for "non-investment, redemptions, and disinvestments" on or after September 1, 1985;

(b) Requires the Secretary to pay to the trust funds the present value of the permanent interest loss resulting from limitations on the public debt from September 1, 1984 to September 1, 1985.

The determinations of interest loss for Social Security and Medicare would be made by the Secretary of the Treasury and the Commissioner of Social Security, and by the Secretary and Chairman of the Railroad Retirement Board for railroad retirement. All determinations would be certified by the Comptroller General, and also by the public members of the Board of Trustees with respect to Social Security and Medicare.

(c) Requires the Secretary to provide 15 days prior notice to Congress and to each member of the Board of Trustees of any planned action to disinvest or not invest trust fund assets due to debt limit constraints.

Effective date.—Immediately with respect to reissuance of trust fund holdings; by June 30, 1986 with respect to the payment of lost interest (with April 1, 1986 or earlier notice to Congress of any disagreements in making the interest determinations).

Outlay effect.—None.

Conference agreement

Senate recedes with amendment to restore the 1984 losses of the Civil Service Retirement trust funds.

Civil Service

On December 31, 1985, the Secretary of the Treasury shall pay to the Civil Service Retirement and Disability Fund, from amounts in the general fund of the Treasury not otherwise appropriated, an amount determined by the Secretary to be equal to the sum of—

(i) the excess of the amount of interest which would have been earned by such fund, during the period beginning with September 28, 1984 and ending with December 31, 1984 on all monies transferred to such fund on September 28, 1984, if all such moneis had been invested on September 28, 1984, over the amount of interest actually earned by such fund on such moneis during such period;

(ii) interest that would have been earned on the amount described in clause (i) during the period starting with January 1, 1985 and ending with June 30, 1985;

(iii) the excess of the amount of interest which would have been earned by such fund, during the period beginning on January 1, 1985 and ending on June 30, 1985, on all monies transferred to such fund on September 28, 1984, if all such monies had been invested on September 28, 1984, over the amount of interest actually earned by such fund on such monies during such period; and

(iv) the interest that would have been earned on the amounts described in clauses (i), (ii) and (iii) during the period starting with July 1, 1985 and ending with December 31, 1985.

Military

On March 31, 1986, the Secretary of the Treasury shall pay to the Department of Defense Military Retirement Fund, from amounts in the general fund of the Treasury not otherwise appropriated, an amount determined by the Secretary of the Treasury, in consultation with the Secretary of Defense, to be sufficient to compensate such fund, to the maximum extent practicable, for losses arising from the inability to invest, on October 1, 1984, all monies transferred to such fund on such date.

SUBTITLE B—SSI PROGRAM

1. Amendments relating to State supplementation under the SSI program

Present law

When there is an increase in the Federal SSI benefit standard, States which supplement the Federal standard are required to "passthrough" the Federal increase by not decreasing State supplementary payments. States are allowed to meet this requirement under two different options. Under the payment level option, a State can meet the passthrough requirement by not reducing the State supplementary payment levels (the net State payment over and above the Federal payment) below those in effect in March, 1983 but with a reduction in State payment levels allowed after July, 1983 to provide only a cost-of-living increase instead of the full $20 individual and $30 couple increase in the Federal SSI supplementary payment levels below their December, 1976 levels. As an alternative to the payment level option, a State can meet the passthrough requirement by spending as much in total for State supplementary payments in the 12-month period following the Federal increase as the State spent in the previous 12-month period.

House bill

No provision.

Senate amendment

The passthrough requirement under the payment level option would be modified to allow a State to meet the passthrough requirement by using either the current law's 1983 payment level base or the previous law's December, 1976 State supplementary payment level base but with a full passthrough of the July, 1983 $20/$30 increase. This would allow any State that has increased its State supplementary payment levels above those in effect in December, 1976 to reduce those levels (but not below those in effect in December, 1976). This change would be effective for months beginning after March, 1983.

Conference agreement

The Conference agreement follows the Senate bill but with the following modifications. In addition to the current methods of compliance with the passthrough requirement, a State would be found to be in compliance with the passthrough requirement for calendar years 1984 and 1985 if in calendar year 1986, the State supplementary payment levels are such that, since December, 1976, the State has increased its State supplementary payment levels (other than for residents of medical facilities) by no less than the total percentage increase in the Federal SSI benefit standard between December, 1976 and February, 1986 including the cost-of-living increase for 1986.

The Conference agreement also provides that the Social Security Administration shall, at the request of a State, administer State supplementary payments provided to residents of medical institutions who are eligible for the $25 a month Federal SSI personal needs allowance.

2. Third-party liability collections (SSI eligibility)

Present law

Medicaid recipients are required, as a condition of eligibility for Medicaid, to assign their rights to medical support payments and other payments for medical care to the State.

House bill

No provision.

Senate amendment

Requires applicants and recipients, as a condition of SSI eligibility, to cooperate with the Secretary of HHS in identifying and pursuing third parties liable for health coverage unless such individual has good cause for refusing to cooperate as determined in accordance with standards prescribed by the Secretary.

Conference agreement

The Conference agreement follows the House bill.

3. Preservation of benefit status for disabled widows and widowers who lost SSI benefits because of 1983 changes in actuarial reduction formula

Present law

The Social Security Amendments of 1983 raised the amount of benefits for disabled widows and widowers aged 50 to 59, effective January 1984. As a result of the increase, some beneficiaries lost eligibility for Supplemental Security Income (SSI) and, consequently, Medicaid.

House bill

No provision.

Senate amendment

Requires that those low-income widows and widowers who lost SSI eligibility because of the January 1984 disability benefit increase may file an application for protection with the State within 15 months after enactment and be deemed to be receiving SSI benefits for the purpose of Medicaid eligibility. The provision further directs the Secretary to inform the States of the identities of affected individuals, solicit their applications for Medicaid coverage and process their applications promptly. Effective for months starting at least 2 months after enactment.

Conference agreement

The conference agreement follows the Senate bill.

Part VI: AFDC, Adoption Assistance, and Foster Care

1. AFDC and Medicaid quality control

(Section 301 of House bill)

Present law

AFDC: Federal regulations outline AFDC quality control procedures for measuring errors in eligibility and payment, identifying causes of error, and taking corrective action. A State's error rate is determined annually from the State's full sample and a Federal subsample.

Before enactment of P.L. 97-248, regulations required States to reach a 4 percent AFDC error tolerance level, in phased stages between fiscal years 1981 and 1984. Starting in FY 1984, the law reduced the tolerance level to 3 percent for erroneous excess payments (overpayments to eligibles and payments to ineligibles).

The law prescribes fiscal sanctions (withholding of some program matching funds) for State AFDC payment error rates that exceed tolerances. Fiscal sanctions have been assessed, but not collected. By regulation, the payment error rate tolerance is 4 percent for Puerto Rico, Guam, and the Virgin Islands. The statute allows fiscal incentives to be paid to those jurisdictions for dollar error rates (including underpayments) that are below 4 percent.

The law permits the HHS Secretary to waive all or part of fiscal sanctions if a State is unable to reach the target despite a good faith effort. This finding is limited to extraordinary circumstances.

Medicaid: Federal regulations require States to operate a Medicaid quality control eligibility system that identifies, on a sample basis, erroneous payments resulting from ineligibility, incorrect beneficiary liability, or third-party liability. States are required to take action to correct any eligibility, third-party liability, or other errors found in the sample cases. A State's error rate is determined annually from a State's full sample and a Federal subsample.

Effective with calendar quarters beginning April 1, 1983, P.L. 97-248 required States to keep their Medicaid payment error rates at or below 3 percent. Payment errors are Medicaid payments made for individuals of families in the sample subject to quality control review who were ineligible or who had not met beneficiary liability requirements prior to receiving services.

Technical errors that do not affect the amount of medical assistance paid are excluded from the calculation of a State's erroneous payments. Payments made on behalf of aged, blind or disabled individuals whose eligibility determinations were made exclusively by the Social Security Administration are excluded from the calculation of a State's erroneous payments.

States with Medicaid payment error rates in excess of 3 percent are subject to a disallowance of Federal Medicaid matching funds. These reductions are imposed prospectively, using an anticipated error rate projected by the Health Care Financing Administration (HCFA) based upon a State's previous error rates. At the end of each annual period, when actual payment error rates have been determined, the appropriate adjustment in Federal matching payments is made. Fiscal sanctions have been assessed and collected.

Puerto Rico, Guam, the Virgin Islands and American Samoa are not subject to a Medicaid payment error rate standard.

The Administrator of HCFA is authorized to waive all or part of the fiscal sanctions if the State is unable to meet the 3 percent standard despite a good faith effort. This finding is limited to extraordinary circumstances.

House bill

AFDC: Establishes basic AFDC quality control procedures in law. Permits States to use 6-month or annual samples, but not to reduce sample size.

Sets a national tolerance level of 3.5 percent for erroneous AFDC payments (payments to ineligibles and overpayments to eligibles). Requires individual tolerance rates for States, which can range as high as 5 percent depending on the existence of the AFDC-UP program in the State, the share of earners among the State's AFDC families and the State's population density.

Revises calculation of a State's error rate by: excluding technical errors that do not affect the AFDC payment levels and by setting a State's error rate at the lower bound rather than the midpoint of the range within which its true error rate falls in cases where the sample size is sufficient to produce a lower bound that is no more than 2.5 percentage points below the midpoint.

Sets a State's fiscal sanction equal to the Federal portion of AFDC benefits paid above the State tolerance level, using the adjusted State error rate. Reduces a State's sanction by the Federal share of overpayments collected by the State in the fiscal year to which the sanction applies.

Requires the HHS Secretary to take into account factors beyond the State's control and other matters in replying to waiver requests. Requires the Secretary to waive fiscal sanctions if a State submits a corrective action plan that would increase its administrative costs by as much as 50 percent of the sanction. These expenditures would be a federally matched administrative expense.

Bill provisions would not apply to Puerto Rico, Guam and the Virgin Islands.

The legislation would be effective for quarters in fiscal 1983 and later, except at State option and in accordance with regulations to be prescribed by the HHS Secretary, changes may take effect for quarters in FY 1981 and 1982, or in FY 1982.

Medicaid: No provision.

Senate amendment

AFDC and Medicaid: Prohibits collection of AFDC or Medicaid fiscal sanctions, including any as yet uncollected sanctions for 1981 and later years, for 2 years after enactment. Requires sanctions for the 2-year moratorium period and for earlier times to be subsequently calculated on the basis of rules in the restructured program.

During the 2-year moratorium of fiscal sanctions, continues data collection and calculation of error rates as under current law.

Requires the HHS Secretary to conduct a study of quality control systems for AFDC and Medicaid, examining how best to operate them to improve administration and obtain reasonable data on which to base fiscal sanctions. Requires the Secretary to contract with the National Academy of Sciences to conduct a concurrent study. Sets one year after enactment as the deadline for reports on both studies.

Requires the Secretary, not later than 18 months after enactment, to publish regulations to restructure the quality control systems for AFDC and Medicaid to the extent he determines appropriate and to establish criteria for adjusting fiscal sanctions calculated for quarters before the new systems so as to eliminate penalties that would not have been imposed had the new rules been in effect then. Requires the Secretary to take into account the prescribed quality control studies in revising the systems. Requires the Secretary to implement the revised systems beginning with the first calendar year after the 2-year moratorium.

The provision would be effective on the date of enactment.

Conference agreement

The conference agreement follows the Senate amendment.

2. Grants for teenage pregnancy program

(Section 302 of House bill)

Present law

Although some States operate pilot pregnancy service programs for teenage families, there is no specific block grant program designed to provide these services to AFDC recipients in each State.

House bill

Authorizes $50 million in fiscal year 1986 and $100 million in 1987 for grants to State AFDC agencies to operate teenage pregnancy programs for children and young parents up to age 25 who are eligible for AFDC. Limits funds to areas with high rates of teenage pregnancy or infant mortality. Requires each site receiving funds to act to discourage teenage pregnancy and to give services to teenage mothers and fathers.

Goals of pregnancy prevention program include: encouraging children to postpone sexual activity and child bearing and to develop education and employment goals; identifying factors that determine teenage contraceptive use and sexual activity.

Makes eligible for services to help them become self-sufficient: AFDC-eligible persons under age 25 who are pregnant or are parents of children under 6 and who have not completed high school (or its equivalent) and who volunteer for the program. Requires participants to seek a high school diploma (or equivalent). Requires State programs to provide each participant with academic or vocational training, job counseling, employment readiness and job placement services, and an individualized assessment and plan. Provides that States could obtain permission from the Secretary to require participation if funds are sufficient to provide all necessary services for all eligible persons.

Prohibits use of these grant funds for abortions or counseling to have an abortion except when the mother's life would be endangered if the fetus were carried to term.

Allocates funds to States on the basis of their share of national AFDC benefit spending. Provides that unused funds would be reallocated where needed.

Requires applicant States to submit a program plan with provision for specified services. Requires participating States to report on progam activities by March 1, 1987.

Requires the HHS Secretary to report to Congress on program evaluation and recommendations for the future by July 1, 1987.

Specifies that payments made and services given to program participants shall not be considered income or resources by AFDC.

The program would be effective from October 1, 1985 until September 30, 1987. (However, funds allocated to States before September 30, 1987 could be carried over to fiscal year 1988.)

Senate amendment

No provision.

Conference agreement

3. AFDC for families with unemployed parents

(Section 303 of House bill)

Present law

States have the option to provide AFDC to financially eligible two-parent families in which the principal earner is "unemployed," defined as working fewer than 100 hours per month.

For eligibility, the law requires that the unemployed parent have worked 6 or more quarters in any 13-calendar quarter period ending within 1 year before applying for AFDC-UP.

States without an AFDC-UP program are: Alabama, Alaska, Arizona, Arkansas, Colorado, Florida, Georgia, Idaho, Indiana, Kentucky, Louisiana, Mississippi, Nevada, New Hampshire, New Mexico, North Carolina, North Dakota, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, and Wyoming.

House bill

Requires all State AFDC programs to offer coverage to financially eligible two-parent families in which the principal earner is "unemployed," defined as working fewer than 100 hours per month.

Permits States to substitute for 4 of the 6 quarters of work, quarters of full-time attendance in elementary or secondary school or full-time participation in vocational training, but sets a lifetime limit of 4 quarters creditable to vocational training.

The provision would be effective October 1, 1986.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill with an amendment establishing January 1, 1988 as the effective date for the mandate.

4. Recovery of excess funding for incomplete automated AFDC systems

(Section 771 of Senate amendment)

Present law

A Federal matching rate of 90 percent is paid for the development and installation of automated claims processing and information retrieval systems for AFDC. Systems must be designed and developed in accordance with a planning document approved by the Secretary of Health and Human Services.

House bill

No provision.

Senate amendment

Requires the Secretary to recover 40 percent of the amounts spent on automated systems from any State that fails to implement those systems by the implementation date called for in the approved planning document. Authorizes the HHS Secretary to extend the deadline if the failure to meet the deadline occurs for reasons which the State cannot control. The provision would be effective on the date of enactment, but applicable only to funds spent after that date.

Conference agreement

The House recedes. The managers intend that the Secretary of Health and Human Services extend any deadlines and waive any penalty if the deadline is not met for reasons which the State cannot control. Specifically, this would include extending the deadline for contractor delays and delays in hardware delivery which cause implementation delays. The conferees also recognize that the deadlines set in the advanced planning document are established very early in the system development process. Frequently, these deadlines are unrealistic given the system design that is eventually chosen. States should be permitted to revise these deadlines, subject to the approval of the Secretary.

5. Counting certain payments to Indians as income

(Section 772 of Senate amendment)

Present law

A 1973 law, as amended in 1982, generally exempts from taxation certain per capita distributions to Indian tribal members from Indian trust funds and provides that such payments will be disregarded by Federally-funded benefit programs. As an exception to this rule, per capita payments in excess of $2,000 can be counted as income for Federally-assisted programs other than those under the Social Security Act.

House bill

No provision.

Senate amendment

Applies the $2,000 limit on uncounted income to Social Security Act programs. Calculates (for purposes of all Federally-assisted programs) the $2,000 limit on the aggregate of all per capita payments received in a year by all members of a family unit. The amendment would be effective January 1, 1986.

Conference agreement

The Conference agreement generally follows the House bill. The Conference committee believes that there is need for a thorough review and evaluation of the current provisions of law concerning the manner in which various forms of per capita income received by members of Indian tribes and organizations is taken into account in determining the eligibility for and the amount of income and medical assistance under the Social Security Act and other federal programs.

Such an evaluation needs to take into account the unique responsibility that the Federal government has to members of Indian tribes and organizations. The evaluation also needs to consider how such responsibilities should fit within the broader Federal responsibilities to provide income and medical assistance to low income individuals and in an equitable manner irrespective of membership in a particular group or historical circumstances.

The Conferees, therefore, direct the General Accounting Office (GAO) to conduct a study of the extent, size, nature and frequency of payments to Indians from various funds which are based on their status as a member of an Indian tribe or organization. The study should also describe how these payments are treated under current law for purposes of eligibility for programs authorized under the Social Security Act and other means tested programs. As part of the study, the GAO would also gather information on the justification which has been given for special exceptions in the counting of certain types of income received by members of Indian tribes or organizations.

It is intended that there port would be submitted to the Finance Committee and Agriculture Committee and Select Committee on Indian Affairs of the Senate and the Committee on Ways and Means, Committee on Energy and Commerce, Committee on Agriculture, Committee on Interior and Insular Affairs of the House. There port shall be submitted no later than one year from the date of enactment of this Conference Report.

6. Third-party liability collections (AFDC eligibility)

(Section 746 of Senate amendment)

Present law

Medicaid recipients are required, as a condition of eligibility for Medicaid, to assign their rights to medical support payments and other payments for medical care to the State.

House bill

No provision.

Senate amendment

Requires applicants and recipients, as a condition of AFDC eligibility, to cooperate with the Secretary of HHS in identifying and pursuing third parties liable for health coverage unless such individual has good cause for refusing to cooperate as determined by the State agency in accordance with standards prescribed by the Secretary. The provision would be effective for calendar quarters beginning on or after October 1, 1985, except delay is permitted where State legislation is required.

Conference agreement

The conference agreement follows the Senate amendment with a modification clarifying that individuals are required to identify, to the extent they are able, potentially liable insurers and other third parties, and to provide information to assist the State in pursuing third parties. Beneficiaries are not required to pursue the collections themselves. Pursuit is the responsibility of the provider or the State.

The Managers also note that, under current law, State child support enforcement agencies, which are required to enforce the child support obligations on behalf of all AFDC families, must also petition the court for medical support when it is available to the absent parent at a reasonable cost.

The conference agreement also follows the Senate amendment provision which excludes, from the calculation of AFDC fiscal sanctions, errors resulting from the application of this policy.

PART 1—Foster Care and Adoption Assistance

7. PROVISIONS RELATING TO MEDICAID COVERAGE UNDER THE ADOPTION ASSISTANCE AND FOSTER CARE PROGRAMS

Present law

Under the Title IV-E adoption assistance program, only children for whom adoption assistance payment are being made under an Adoption Assistance Agreement are deemed to be receiving AFDC and thus eligible for Medicaid.

House bill

No provision.

Senate amendment

Removes the need for an actual adoption assistance payment to be made for the adopted child to be deemed eligible for Medicaid. If an Adoption Assistance Agreement under Title IV-E is in effect, the child would be deemed eligible for Medicaid. Applies to medical assistance furnished on or after the first calendar quarter that begins more than 90 days after the date of enactment.

Conference agreement

The Conference agreement follows the Senate amendment

(b) Medicaid Eligibility in State of Residence

Present law

The State which entered into the Adoption Assistance Agreement related to a particular child is responsible for providing Medicaid coverage to that child, even if the child and adoptive parents live in a different State. Similarly, for children in foster care the Medicaid coverage is provided by the State responsible for the foster care placement.

House bill

Amends Title XIX to specify that, for purposes of Medicaid eligibility, children receiving adoption assistance or foster care payments under Title IV-E of the Social Security Act are eligible for Medicaid from the State in which they reside even if this is not the State making the Title IV-E foster care or adoption assistance payment.

Senate amendment

Amends the Title IV-E adoption assistance law to provide that in the case of a child for whom an Adoption Assistance Agreement is in effect under Title IV-E, the State of the child's residence would be responsible for providing Medicaid to the child.

Conference agreement

The Conference agreement follows both the House bill and Senate amendment with modifications. The agreement provides that for purposes of Medicaid eligibility, children with respect to whom there is an Adoption Assistance Agreement in effect under Title IV-E and foster care children for whom payments are being made under Title IV-E would be eligible for Medicaid from the State in which the child resides. The Conference agreement would amend both the Title XIX Medicaid statute and the Title IV-E adoption assistance and foster care program statute to provide for Medicaid eligibility in the State in which the child resides.

The provision is effective beginning with medical assistance furnished on or after the first calendar quarter that begins more than 90 days after the date of enactment.

(c) Medicaid Eligibility for Children Prior to Decree of Adoption

Present law

Adoption assistance and, therefore, Medicaid—to the extent that it is based on adoption assistance—are available only after a child is placed for adoption and an interlocutory decree of adoption is issued or the adoption is finalized under a judicial order.

House bill

No provision.

Senate amendment

Establishes Medicaid eligibility at the time a child is placed for adoption in accordance with applicable State law and for whom an adoption assistance agreement is in effect whether or not an interlocutory decree of adoption or a judicial decree of adoption has been issued. The amendment would apply to medical assistance furnished on or after the first calendar quarter that begins more than 90 days after the date of enactment.

Conference agreement

The Conference agreement follows the Senate amendment.

8. Extension of ceiling on AFDC foster care funds and of State authority to transfer funds to child welfare services

Present law

State-by-State ceilings on Federal AFDC foster care maintenance funds were imposed through fiscal year 1985 by Public Law 96-272, as amended, for any year in which Congress appropriated a specified sum of Title IV-B child welfare funds. Each State's ceiling was based on funding for previous years or the State's under-18 population. The mandatory ceilings were not in effect in fiscal years 1983-85 because child welfare funds remained below the trigger level ($266 million). However, many States chose to operate under a voluntary ceiling.

The law provided that through fiscal year 1985, when operating under a foster care funding limit, whether mandatory or voluntary, and under certain conditions, States could transfer at least some of their allocation of unused foster care funds to child welfare services (all unused foster care funds if a mandatory ceiling were in effect).

House bill

No provision.

Senate amendment

Extends through fiscal year 1987 the ceilings on AFDC foster care funds when annual child welfare services appropriations equal at least $266 million. Extends formulas for calculating each State's ceiling and provisions allowing States to transfer unused foster care funds to child welfare services through fiscal year 1987. Effective October 1, 1985.

Conference agreement

The Conference agreement follows the Senate amendment.

9. Extension of authority for AFDC foster care payments on behalf of children placed in foster care under a voluntary placement agreement

Present law

Title IV-E AFDC foster care payments were authorized through fiscal year 1985 by P.L. 96-272, as amended, for children removed from their home under a voluntary placement agreement, provided States met specified protections and procedures.

House bill

No provision.

Senate amendment

Extends through fiscal year 1987 provisions allowing payments for children placed in foster care under a voluntary agreement. Effective October 1, 1985.

Conference agreement

The Conference agreement follows the Senate amendment.

10. Independent living initiatives

Present law

AFDC foster care maintenance payments are intended for such essentials as food and shelter and generally end when the child reaches age 18 (although some States continue aid to high school students under age 19). Specific services to help foster children prepare for independent living as adults must be funded either by the State or by other Federal programs, such as the Title XX block grant or Title IV-B child welfare services.

House bill

No provision.

Senate amendment

Authorizes $45 million each for fiscal years 1987 and 1988 for State entitlement programs to help AFDC foster care children age 16 and over prepare for independent living. Each State's share of funds would equal its proportion of the fiscal year 1984 AFDC foster care caseload. Provides that any unused funds would be reallocated to States needing them. Requires no State matching funds, but stipulates that program funds shall not replace those already available for the same general purpose.

Cites as examples of services that would promote the program's objective: enabling children to complete high school or receive vocational training; providing training in daily living skills such as budgeting and career planning; counseling; coordinating services; outreach activities; and developing individuals plans for the transition to independent living. The services will be provided directly by the State agency or under contracts with local governmental entities or private nonprofit organizations that have children in their care.

Requires State case plans for Title IV-E foster care children, where appropriate, to include a description of programs and services that will help them prepare for independent living.

Requires States to submit a report by March 1, 1988, on the uses of program funds and the attainment of program goals. Requires the DHHS Secretary to submit to Congress by July 1, 1988, a description and evaluation of the program and recommendations for the future. The effective date except as noted, would be upon enactment.

Conference agreement

The Conference agreement follows the Senate amendment.

SUBTITLE D—UNEMPLOYMENT COMPENSATION

1. Supplemental unemployment compensation for certain individuals

Present law

The Federal Supplemental Compensation program (FSC), which provided additional weeks of unemployment compensation to individuals who had exhausted their regular State benefits, was due to expire on April 6, 1985. Public Law 99-15, enacted on April 4, 1985, allowed individuals who were receiving FSC benefits for the week of March 31-April 6, to continue to receive the remainder of their benefits. No new FSC benefits were payable after April 6, 1985. Under Public Law 99-15, the remaining weeks of FSC benefits had to be collected in consecutive weeks of unemployment. Any interruption of benefits, for whatever reason, ended an individual's eligibility for FSC benefits.

House bill

The bill allows certain individuals in the State of Pennsylvania to collect the remainder of their FSC benefits, notwithstanding the requirement in Public Law 99-15 that such benefits be collected in consecutive weeks. These individuals were receiving FSC for the week of March 31, 1985-April 6, 1985, and were eligible to collect the remainder of their benefits under Public Law 99-15. The collection of their remaining benefits was interrupted. However, when they were called up in the National Guard in early June to provide services during a major disaster.

The provision applies only to individuals who were called up for National Guard duty by the Governor in a disaster declared by the President on June 3. It applies to weeks

of unemployment occurring after the individual had completed his Guard duty but during which he may not have met the work search or availability requirements of State law because he failed to file claims believing he was no longer eligible (having failed to file in consecutive weeks). It applies only until an individual's FSC benefits were exhausted or he became employed, whichever occurred earlier.

Effective date.—For weeks of unemployment beginning after March 31, 1985.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill.

2. Recovery of overpayments

Present law

When a State finds that it has made an overpayment of unemployment benefits, it may (after observing appropriate procedural safeguards) collect that overpayment by withholding a subsequent unemployment benefit due to the same individual.

This procedure, however, is permitted only when both the incorrect payment and the withheld payment are funded from the State's own unemployment trust fund. In some circumstances, unemployed workers receive benefits which are paid by the same State agency and appear to the worker as though they were the same type of unemployment benefit but are funded from different sources. This can occur, for example, when a worker moves from one State to another and receives some benefits from the State from which he moved. It also happens when a worker's entitlement is extended by reason of trade adjustment assistance or other Federally-financed unemployment programs.

House bill

No provision.

Senate amendment

Allows reciprocal withholding of overpaid unemployment benefits regardless of the funding source. The same procedural safeguards would be required, but an overpayment of State benefits could be recovered by withholding from subsequent Federally-funded benefits if the State also agreed that it would recover incorrect Federal benefits. Similarly, States would be allowed to withhold benefits payable under their program to recover payments of benefits incorrectly made to the same individual by other States. Implementation of this provision would be at the option of each State.

Effective date.—October 1, 1985.

Conference agreement

The conference agreement follows the Senate amendment.

The House Conferees from the Committee on Energy and Commerce were appointed solely for the consideration of issues related to authorization of expenditures from the Superfund and took no part in the consideration of the Superfund revenue aspects of the Senate amendment.

TITLE XIII—TRADE, CUSTOMS, INCOME SECURITY, AND RELATED PROGRAMS

SUBTITLE A—TRADE AND CUSTOMS PROVISIONS

Part 1—Trade Adjustment Assistance

Short title (Section 13001 of Conference Agreement).

House bill

No provision.

Senate amendment

"Trade Adjustment Assistance Reform and Extension Act of 1985."

Conference agreement

House recedes.

A. WORKER ADJUSTMENT ASSISTANCE

1. Petitions (section 13002 of conference agreement; section 778A of Senate amendment)

Present law

Section 221 permits any group of workers or their authorized representative to file a petition with the Secretary of Labor for a certification of eligibility to apply for TAA.

House bill

No provision.

Senate amendment

Provides explicitly that workers in agricultural firms or subdivisions may petition for TAA certification.

Effective date.—1 year after import fee imposed; i.e., 1 year after the earlier of 2 years after enactment or 30 days after the President certifies that the GATT allows such a fee.

Conference agreement

House recedes with an amendment to make the provision effective upon date of enactment.

2. Group eligibility requirements section 13002 of conference agreement; section 201 of House bill; section 778A of Senate amendment)

a. Agricultural workers

Present law

Any group of workers may be certified eligible to apply for TAA if they meet the statutory criteria.

House bill

No provision.

Senate amendment

Provides explicitly that workers in agricultural firms or sudivisions may be certified eligible to apply for TAA (conforms to amendment above).

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes with an amendment to make the provision effective upon date of enactment

b. Component parts, services

Present law

Under section 222, the Secretary of Labor must certify a group of workers as eligible to apply for TAA benefits if he determines (1) a significant number or proportion of the workers in a firm or subdivision have been laid off or are threatened with layoff; (2) sales and/or production of the firm or subdivision have decreased absolutely; and (3) increased imports of articles like or directly competitive with articles produced by the firm or subdivision "contributed importantly" to the layoffs and sales/production declines.

House bill

No provision.

Senate amendment

Expands certification eligibility to encompass those workers in firms that supply essential parts or essential services for articles produced by directly affected firms.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes.

c. Relocation overseas

Present law

Because increased imports must be an important cause of layoffs and sales/production declines, workers laid off as a result of firm or plant relocations overseas may be certified if increased imports of the article produced by that firm or plant preceded its closing and move.

House bill

Expands certification eligibility to workers in a firm or subdivision who are laid off or threatened with layoff "by reason of the relocation of the production functions of that firm or subdivision to a foreign country or instrumentality".

Effective date.—Petitions filed after September 30, 1985.

Senate amendment

No provision.

Conference agreement

House recedes.

3. Qualifying requirements for workers (section 13003 of conference agreement; Section 202 of House bill; Section 778B of Senate amendment)

a. Cash assistance

Present law

Under section 231, individual certified workers who meet the qualifying requirements on pre-layoff employment are entitled to weekly cash payments (trade readjustment allowances) equal to the amount of their unemployment compensation (UC) after they have first exhausted all UC for the balance of 52 weeks of unemployment. Workers may receive up to 26 additional weeks (maximum of 78 weeks) of TRA benefits while in approved training.

House bill

No provision.

Senate amendment

Adds a new requirement for workers to qualify for TRA payments:

1. The worker must be enrolled in a training program approved under section 236(a); or

2. The worker must have completed such approved training after layoff.

Such workers would be entitled to up to the balance of 78 weeks of TRA benefits.

Alternatively, a worker would be entitled to TRA for up to the balance of 52 rather than the balance of 78 weeks if the worker has received a written statement after layoff from the Secretary of Labor certifying that he was unable to approve a training program under section 236(a) (Secretary must review and certify any such determination by a State or State agency). The Secretary must submit an annual report to the Ways and Means and Finance Committees on the number of certifications.

If the Secretary determines the worker has failed to begin or ceased to participate in the training program without justifiable cause, no TRA may be paid to the worker until he begins or resumes participation.

No TRA would be paid to the worker for any week he receives on-the-job training.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes with amendments: (1) to clarify that the Secretary of Labor is to certify workers for whom it is not feasible or appropriate to approve a training program under section 236(a); and (2) to remove the requirement that certification may be made

only by the Secretary and to include State responsibility for such certifications in cooperative agreements under section 239.

The Conferees intend to emphasize that the purpose of the exception to the general rule requiring enrollment in retraining is to continue benefits to the worker for whom, through no fault of his own, there is no suitable or reasonably available training program. The Secretary will make the finding on the basis of the criteria under section 236(a), taking into account factors such as age and mobility of the worker, and location of retraining programs or work for which the worker could be retrained. The Conferees expect the Secretary of Labor to issue regulations setting forth guidelines and a time frame for the States and State agencies to make certifications under cooperative agreements. The Conferees also expect that the terms of any cooperative agreement will provide for prompt termination of this delegation in the event that a State or State agency fails to comply with such guidelines.

b. Employment requirements

Present law

An individual worker must have at least 26 weeks of employment at weekly wages of $30 or more in adversely affected employment during the 52 weeks preceding layoff to be eligible for TRA payments. Qualifing 26 weeks may include:

Up to 3 weeks of employer-authorized leave (e.g., vacation sickness) or to serve as full-time union representative;

Up to 7 weeks of disability covered by workmen's compensation; or

Up to 7 weeks combining disability and leave, of which not more than 3 weeks may be employer-authorized or union leave.

House bill

Increases the maximum number of weeks that may be counted as weeks of employment toward the 26-week minimum preceding layoff from 3 to 7 for employer authorized or union leave; from 7 to 26 weeks for disability; and from 7 to 26 weeks combining disability and leave, or which authorized leave cannot exceed 7 rather than the present 3 weeks.

Effective date.—Petitions filed after September 30. 1985.

Senate amendment

Identical provision.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes.

4. Limitations on trade readjustment allowances (section 13003(d) of conference agreement; section 203 of House bill)

Present law

Under section 233(a)(2) a worker may collect basic TRA only during the 52-week period beginning with the week immediately following the first week covered by the certification with respect to which the worker has first exhausted all rights to regular unemployment compensation.

House bill

Extends the collection period for basic TRA benefits from 52 to 104 weeks following exhaustion of regular unemployment compensation.

Effective date.—October 1, 1985.

Senate amendment

No provision.

Conference agreement

Senate recedes with an amendment to make the provision effective upon date of enactment.

5. Training (section 13004 of conference agreement; section 204 of House bill; section 778C of Senate amendment)

a. Approval standards

Present law

Under section 236(a) if the Secretary of Labor determines that (1) there is no suitable employment available for an eligible worker; (2) the worker would benefit from appropriate training; (3) there is a reasonable expectation of employment after such training; (4) training approved by the Secretary is available; and (5) the worker is qualified to undertake and complete such training, then the Secretary may approve training for the worker.

House bill

Adds the stipulation that a "reasonable expectation of employment" does not require that employment opportunities for a worker be available or offered immediately upon the completion of training.

Effective date.—Certifications issued after September 30, 1985.

Senate amendment

Clarifies that "no suitable employment available" criterion refers to adversely affected workers.

Amends "training approved by the Secretary" criterion to be "reasonably" available.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes to the Senate provision and Senate recedes to the House provision with amendments to make the provisions effective upon date of enactment.

b. Training approval

Present law

The Secretary may, but is not required to, approve training for a certified worker if the five criteria are met. Upon approval the worker is entitled to have the costs of training paid by the progam.

House bill

No provision.

Senate amendment

Requires approval of training for a certified worker if the five criteria for approval are met.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes.

c. Types of training

Present law

Under section 236(a), training approved by the Secretary may be available from either governmental agencies or private sources, insofar as possible on-the-job.

House bill

No provision.

Senate amendment

Includes list of types of training that may be approved, including but not limited to, on-the-job, training provided by States or approved by a private industry council under JTPA, or any other training program approved by the Secretary.

Amends section 247 to include a definition of "on-the-job training."

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes with an amendment to make the provision effective upon date of enactment.

d. Training direct payment or voucher

Present law

If training is approved, the worker is entitled to have payment of costs of training paid on his behalf by the Secretary of Labor, through reimbursements to the States under cooperative agreements.

House bill

No provision.

Senate amendment

Directs the Secretary of Labor to pay training costs, up to $4,000, either directly or through a new voucher mechanism, for each worker for whom training has been approved. (There may be one or more vouchers to a qualified worker with respect to a particular separation.) Prohibits double Federal reimbursement of training costs.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes.

e. On-the-job training

Present law

Section 236(a) requires the Secretary to provide or assure training on-the-job insofar as possible, including related education necessary for occupational skills.

House bill

No provision.

Senate amendment

Applies section 143(b) of JTPA to TAA training (provisions for no displacement or infringement of promotion opportunities of currently employed workers, etc.). Permits payment of on-the-job training only if the training is not for the same occupation from which the worker was laid off and certified, the employer certifies he will employ the worker for at least 26 weeks after training completion if the worker desires and the employer does not have due cause to terminate, and the employer has not violated section 143(b) of the JTPA or any other certification of paid on-the-job training.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes with amendments: (1) to adopt actual language of the provisions of section 143(b) of the JTPA; and (2) to make the provision effective upon date of enactment.

6. Job search allowances (section 13005 of conference agreement; section 778D of Senate amendment)

Present law

Under section 237, the Secretary of Labor may provide reimbursement for 90 percent of the costs of necessary job search by a certified worker, up to $800, if the worker has been laid off, cannot reasonably be expected to secure suitable employment within his commuting area, and applies within specified time limits.

House bill

No provision.

Senate amendment

Adds a benefit of reimbursement for necessary expenses of a job search program approved by the Secretary, available to any certified worker regardless of whether the worker has enrolled in an approved training

program or meets the eligibility criteria for existing job search allowances. A reimburseable job search program includes either a job search workshop (short seminar to provide participants with knowledge, e.g., interview techniques, resume writing, to enable them to find jobs) or a job finding club (the same except it includes a one-two week period of supervised activity in which participants attempt to obtain jobs).

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes.

7. Agreements with States (section 13004 of conference agreement; section 205 of House bill; section 778C of Senate amendment)

Present law

Section 239(a) authorizes the Secretary of Labor to enter into cooperative agreements with any State or any State agency to receive applications, make payments of TAA benefits, and afford adversely affected workers who apply for payments testing, counseling, referral to training, and placement services.

House bill

Adds requirements that each cooperating State agency (1) advise each adversely affected worker to apply for training at the time the worker applies for TRA benefits; and (2) within 60 days after the worker applies for training, to interview and review with that worker suitable training opportunities available under section 236.

Effective date.—October 1, 1985.

Senate amendment

Adds provision that agreements may be made with one or more State or local agencies, including State employment service agencies, State agencies carrying out the JTPA dislocated worker program, or any other State or local agency (e.g., private industry council) administering job training or related programs.

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes to the Senate provision and Senate recedes to the House provision with amendments to make the provisions effective upon date of enactment.

B. FIRM ADJUSTMENT ASSISTANCE

8. Petitions and determinations (section 13006 of conference agreement; section 211 of House bill; section 778A of Senate amendment)

a. Agricultural firms

Present law

Section 251 permits any firm or its representative to file a petition with the Secretary of Commerce and be certified eligible to apply for TAA if they meet the statutory criteria.

House bill

No provision.

Senate amendment

Provides explicitly that any agricultural firm may petition and be certified for TAA eligibility (conforms to amendment for agricultural workers).

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes with an amendment to remake the provision effective upon date of enactment.

b. Component parts, services

Present law

Under section 251, the Secretary of Commerce must certify a firm eligible to apply for TAA benefits if (1) a significant number or proportion of the workers in such firm have been laid off or are threatened with layoff; (2) sales and/or production of such firm have decreased absolutely; and (3) increased imports of articles like or directly competitive with articles produced by that firm contributed importantly to the layoffs and sales/production declines.

House bill

No provision.

Senate amendment

Expands certification eligibility to encompass firms that supply essential parts or essential services to directly affected firms (conforms to amendment for workers).

Effective date.—1 year after import fee imposed.

Conference agreement

House recedes.

c. Significant product lines

Present law

Under present criteria, total sales and/or production of the firm must have decreased absolutely for the firm to be certified eligible to apply for TAA.

House bill

Includes an alternative sales/production criterion if sales and/or production of an article that accounts for not less than 25 percent of the firm's total sales or production decline absolutely during the 12 months preceding the most recent 12-month period for which data are available.

Effective date.—Petitions filed after September 30, 1985.

Senate amendment

No provision.

Conference agreement

Senate recedes with an amendment to make the provision effective upon date of enactment.

9. Financial assistance (section 13006 of conference agreement; section 214 of House bill; section 778E of Senate amendment)

Present law

Section 252 authorizes the Secretary of Commerce to provide a certified firm either technical assistance, financial assistance, or both, if he determines that the firm's application (including an economic adjustment proposal) meets the statutory approval criteria.

Financial assistance under section 254 consists of direct loans and/or loan guarantees to be used for fixed asset investment or as working capital to enable the firm to implement its adjustment proposal. If the Secretary determines that the required funds are not available from the firm's own resources or the private capital market and that there is a reasonable assurance of repayment, he may provide direct loans up to $1 million per firm and/or loan guarantees up to $3 million per firm.

House bill

Clarifies that single loans or a combination of loans or loan guarantees may be made for mixed uses.

Effective date.—October 1, 1985.

Senate amendment

Eliminates financial assistance, i.e., authority to provide any new direct loans or loan guarantees; conforming amendment eliminates approval criterion that the firm has no reasonable access to financing through the private capital market.

Effective date.—Enactment.

Conference agreement

House recedes.

10. Technical assistance (section 13006 of conference agreement sections 212,213 of House bill)

a. Types of technical assistance

Present law

Section 252(b) authorizes technical assistance to certified firms to implement acceptable adjustment proposals; section 252(c) authorizes technical assistance to certified firms to help them prepare adjustment proposals. Section 253 authorizes technical assistance to assist firms in preparing petitions for certification, as well as to certified firms to prepare and implement adjustment proposals.

House bill

Amends section 252 to clarify that three forms of technical assistance are available to firms, consistent with section 253.

Effective date.—October 1, 1985.

Senate amendment

No provision.

Conference agreement

Senate recedes with amendment: (1) to make conforming changes; and (2) to make the provision effective upon date of enactment.

b. Matching requirements

Present law

Section 253(b)(2) limits the U.S. Government share to 75 percent of the cost of technical assistance provided by private individuals, firms, or institutions.

House bill

Removes the 75 percent limitation on the U.S. Government share of the cost of technical assistance to assist firms in preparing petitions for certification or in preparing economic adjustment proposals (including diagnostic surveys). The matching share requirement would continue to apply to assistance for implementing economic adjustment proposals.

Effective date.—October 1, 1985.

Senate amendment

No provision.

Conference agreement

Senate recedes with amendments: (1) to retain the 75 percent limitation on the U.S. Government's share of the cost of peparing economic adjustment proposals; and (2) to make the provision effective upon date of enactment.

11. Protective provisions (section 215 of House bill)

Present law

Section 258(d) prohibits the provision of financial assistance to any firm unless the owners, partners, or officers execute an agreement binding them and the firm for 2 years after the assistance is provided not to employ or retain for professional services any person who on the date the assistance was provided or within one year prior thereto occupied a position or engaged in activities involving discretion in providing the assistance.

House bill

Requires that the agreement bind the owners, partners, or officers on behalf of the firm, but not themselves individually.

Effective date.—October 1, 1985.

Senate amendment

No provision.

Conference agreement

House recedes.

C. EXTENSION OF TRADE ADJUSTMENT ASSISTANCE

12. Termination date section 13007 of conference agreement; (section 221 of House bill; section 778F of Senate amendment)

Present law

Section 285, as amended in 1983, terminated the worker and firm TAA programs on September 30, 1985. Public Law 99-107 extended the termination date until November 14, 1985; Public Law 99-155 further extended the programs through December 14, 1985.

House bill

Amends the termination date in section 285 to reauthorize the worker and firm TAA programs for 4 years through September 30, 1989.

Senate amendment

Reauthorizes worker and firm TAA for 6 years from date of enactment.

Conference agreement

House recedes.

D. FUNDING OF TRADE ADJUSTMENT ASSISTANCE

13. Program funding (section 13009 of conference agreement; section 778H of Senate amendment)

Present law

Worker and firm TAA are funded from general revenues.

House bill

No provision.

Senate amendment

Imposes a small fee on all imports into the United States, up to a maximum one percent, to be set at a uniform ad valorem rate sufficient to provide the necessary funding for the TAA programs and for allowable payment of drawbacks and refunds of such fee. The fee is to be assessed regardless of any duty-free treatment accorded articles under other provisions of law, except on goods or belongings of returning tourists or Americans living abroad. One year after imposition of the import fee, the entire program would be funded by the fee, rather than by general revenues.

Effective date.—Earlier of 2 years after enactment or 30 days after President certifies that GATT allows import fee.

The President is directed to undertake negotiations to achieve changes in the GATT to allow any country to impose such a small uniform fee on all imports to fund any program which assists adjustment to import competition. The President must report to Congress on the progress of negotiations within 6 months of enactment and submit a statement of certification on the date the GATT allows such a fee.

Effective date.—Enactment.

Conference agreement

House recedes with amendments to exempt from the import fee: (1) most articles treated as duty free under schedule 8 of the Tariff Schedules of the United States; and (2) entries valued at less than $1,000.

14. Authorization of appropriations (section 13008(a) of conference agreement; section 778G(a) of Senate amendment)

Present law

Sections 245 and 256(b) authorize to be appropriated to the Secretaries of Labor and Commerce such sums as may be necessary to carry out their program functions.

House bill

No provision.

Senate amendment

Authorizes appropriations of such sums as necessary for worker and firm TAA for fiscal year 1986 through the earlier of 1 year after imposition of the import fee or fiscal year 1989.

Conference agreement

House recedes.

15. Trust fund (section 13008(b) of conference agreement; section 778G(b) of Senate amendment)

Present law

No provision.

House bill

No provision.

Senate amendment

Establishes within the Treasury of the United States a Trade Adjustment Assistance Trust Fund. The Secretary of the Treasury is to transfer to the Trust Fund, from the General Fund of the Treasury, amounts equivalent to receipts from the import fee at least quarterly, adjusted for any shortfall or overage in previous transfers. The Secretary must submit an annual report to the Ways and Means and Finance Committees on the actual and expected financial condition and operation of the Fund. The Secretary must invest such portion of the Fund which is not required to meet current withdrawals; interest and proceeds would be credited to the Fund.

Effective date.—Same date as import fee is imposed.

Conference agreement

House recedes.

16. Annual appropriations (section 13008(b) of conference agreement; section 778G(b) of Senate amendment)

Present law

The program is funded from general revenues under annual appropriations bills for the Departments of Labor and Commerce.

House bill

No provision.

Senate amendment

Payments out of the Trust Fund would be subject to the annual appropriations process.

Effective date.—Same date as import fee is imposed.

Conference agreement

House recedes.

17. Taxation of training benefits (section 13010 of conference agreement; section 778I of Senate amendment)

Present law

Section 85 of the Internal Revenue Code provides a limited exclusion from gross income for amounts received by a taxpayer that are in the nature of unemployment compensation. There is no express provision exempting training cost from income.

House bill

No provision.

Senate amendment

Expressly excludes payments of training costs or vouchers entirely from gross income for purposes of income taxation.

Effective date.—Taxable years ending on or after 1 year after imposition of the import fee.

Conference agreement

House recedes.

Part 2—Authorization of Appropriations for Trade and Customs Agencies

18. U.S. International Trade Commission (sec. 13021 of conference agreement; sec. 241 of House bill)

Present law

Section 330(e), Tariff Act of 1930, restricts sums to be appropriated to the ITC to the amount authorized by law; no authorization exists beyond October 1, 1985. (H.R. 2965, as agreed in conference, appropriates $28,600,000 for fiscal year 1986, including not be exceed $2,500 for official reception and representation expenses).

House bill

Authorizes appropriations of $28,901,000 for fiscal year 1986 (including for rental of conference rooms), of which not to exceed $2,500 may be used, subject to the Chairman's approval, for reception and entertainment expenses.

Senate amendment

No provision. (S. 1146, as reported but not included in this bill, authorizes appropriations of $28,901,000 for fiscal year 1986).

Conference agreement

The conferees agreed to the House Provision.

19. U.S. Customs Service (sec. 13022 and 13024 of conference agreement; sec. 242 of House bill, section 799A of Senate amendment)

Present law

Section 301 of the Customs Procedural Reform and Simplification Act of 1978 requires annual enactment of an authorization Act of 1978 annual enactment of an authorization of appropriation to the U.S. Custom Service.

House bill

For fiscal year 1986 the House bill authorizes appropriations for salaries and expenses of the U.S. Customs Service of an amount not to exceed $769,067,000 of which $50,425,000 if for the operation of the air interdiction program and not to exceed $14,000,000 is for the implementation of "Operation Exodus" and related programs. The authorization level approved by the House not only would restore the proposed cut of 887 positions but would also allocate $27.9 million for the hiring of 800 new frontline customs officers.

The House bill also includes provisions relating to the use of savings from administrative consolidation, criteria for closing ports, the Customs air program, consolidation of drawback liquidation centers, sureties on customs bond, appropriations for the Customs Forfeiture Fund, and user fees at certain small airports.

Senate amendment

Although the Senate amendment has no provision for overall authorization of appropriations for the U.S. Customs Service, it does provide for an additional authorization of appropriations of $27.9 million for each of fiscal years 1986, 1987 and 1988 to hire 800 additional front-line customs officers. The Commissioner of Customs is directed to

ensure that sufficient resources are devoted to customs headquarters in newly created customs districts. (S. 1146, as reported but not included in this bill, would also restore Customs' proposed cut of 887 positions.)

Conference agreement

The conferees agreed to the House provision with several modifications. First, the overall authorization level and air program authorization level were changed to $772,141,000 and $53,500,000 respectively. Provisions were also added providing for the allocation of resources to statutorily created district headquarters offices; extending the application of users fees at certain small airports provided for in section 236 of the Trade and Tariff Act of 1984 to additional airports and continuing a provision requiring Customs to notify the Committees before taking certain actions. The conferees also agreed to continue the funding for new Customs personnel in fiscal years 1987 and 1988.

With regard to the provision extending the application of section 236 of the Trade and Tariff Act, the conferees urge the Secretary to give favorable consideration to the application on behalf of the airport at Pontiac/Oakland, Michigan for designation as an airport subject to this provision.

The provision relating to the allocation of resources to Customs district headquarters offices was added to provide explicit and detailed instructions to the Customs Service in the administration of a customs district designated by statute, such as the Columbia Snake Customs District designated by the Trade and Tariff Act of 1984.

20. U.S. Trade Representative (sec. 13023 of conference agreement; sec. 243 of House bill)

Present law

Section 141(f), Trade Act of 1974, authorizes to be appropriated to the USTR such sums as are provided by law (H.R. 2965, as passed by the House and Senate, appropriates $13,158,000 for fiscal year 1986, of which not to exceed $72,000 is available for official reception and representation expenses).

House bill

Authorizes appropriations of $13,582,000 for fiscal year 1986, of which not to exceed $68,000 may be used for official entertainment and representation expenses.

Senate amendment

No provision. (S. 1146, as reported but not included in this bill, authorizes appropriations of $13,582,000 for fiscal year 1986, including $80,000 for official entertainment and representation expenses.)

Conference agreement

The conferees agreed to the House provision with an amendment increasing the ceiling for official entertainment and representation expenses from "$68,000" to "$80,000".

Part 3—*Customs Fees* (Sec. 13031 of conference agreement; Sec. 251 of House bill; section 777 of Senate amendment)

1. Schedule of fees

Present law

The U.S. Customs Service does not currently have the general legal authority to collect fees for the processing of persons, aircraft, vehicles, vessels, and merchandise arriving in or departing from the United States. They do, however, have authority to charge fees under certain limited circumstances, such as when they are providing services (such as pre-clearance of passengers and private aircraft) which are of special benefit to a particular individual. They also have the authority to assess fees on operators of bonded warehouses and foreign trade zones and on the entry of vessels into ports and are authorized to receive reimbursement from carriers for overtime for services provided during non-business hours and reimbursement from local authorities for services provided to certain small airports.

House bill

Amends section 214 of the Customs Procedural Reform Act (19 U.S.C. 58a) to establish the following fee structure to cover the costs of Customs processing of arrivals of:

Commercial vessels (100 tons or over)	$425
Railroad cars	5
Commercial trucks	5
Private aircraft and boats (per year)	25
Passengers (on commercial vessels, aircraft or trains):	
From Canada, Mexico, insular possessions and adjacent islands	1
From all other countries	5

Such fees would be applicable 180 days after enactment.

Senate amendment

As a free-standing provision establishes the following fee structure in addition to any other fees authorized by law:

Commercial vessels (100 net tons or more)	$397
Commercial vessels, less than 100 net tons	25
Commercial trucks	5
(Total fees not to exceed $100 per truck in calendar year)	
(Would not apply if train originates and terminates in same country)	
Private aircraft and boats	[1] 25
(Total fees not to exceed $500 per aircraft or boat in calendar year)	
Passengers (commercial vessel or aircraft):	
From Mexico, Canada, Insular possessions and adjacent islands	0
From all other countries	5
Informal entries prepared by customs officer	5
(No fee if passenger arrival fee collected)	
Dutiable mail entries prepared by customs officer	5
In-bond shipments	10
Customs broker permits (per year)	125

[1] On arrival.

Such fees would be applicable 90 days after the date of enactment.

Conference agreement

The conferees agreed to the House provision on vessels under 100 net tons and private aircraft and boats, the Senate provisions on vessels over 100 net tons, trucks, railroad carts, passengers, broker permits and dutiable mail entries and agreed to drop the Senate provision on in-bound shipments and informal entries. The conference agreement fee schedule is as follows:

Commercial vessels (100 net tons or more)	$397
Commercial trucks	5
(Total fees not to exceed $100 per truck in calendar year)	
Railroad cars	5
(Total fees not to exceed $100 per car in calendar year)	
(Would not apply if train originates and terminates in same country)	
Private aircraft and boats (per year)	25
Passengers (commercial vessel or aircraft):	
From Mexico, Canada, Insular possessions and adjacent islands	0
From all other countries	5
Dutiable mail entries prepared by customs officer	5
Customs broker permits (per year)	125

The conferees agreed to the Senate effective date provision except that with respect to passengers fees, such fees would apply to customs services rendered to passengers using transportation for which documents or tickets were issued more than 90 days after the date of enactment.

The processing fee imposed on commercial vessels weighing 100 net tons or more is in addition to existing fees on commercial vessels. The conferees expect the Customs Service to consolidate the new processing fee with existing fees to the extent an existing fee represents a standard charge on every vessel. Overtime should not be included in such a consolidated fee since overtime charges vary according to each vessel's schedule.

Although the conferees agreed to "cap" the annual fee paid by each train car, or truck, they expect the Customs Service to administer this fee as a one-time fee. Thus, the Customs Service should develop regulations for the prepayment of such fees so that those subject to the fee may choose between paying the fee at the time of each entry, or once annually.

The fee on each truck entry is intended to apply to self-propelled vehicles designed and used for the transportation of property.

The annual fee authorized to be imposed by this legislation on private boats, like the other fees, is intended to cover Customs' processing costs in clearing such boats. The conferees recognize, however, that in border states, there are many owners of small pleasure boats (i.e., less than 30 feet) who frequently travel across the border without carrying imported goods. Since Customs processing costs are not incurred in the clearance of such boats, it is the conferees' intention that such pleasure boats should not be subject to this fee. The Secretary is therefore directed to issue regulations exempting such boats from the application of this fee so long as they are not carrying imported goods required to be declared to the U.S. Customs Service.

The conferees further agreed that the users fees provided for under section 13031 shall not apply to crew members on commercial aircraft or commercial vessels or to diplomats entering the United States.

Finally, with regard to the application of the annual fee imposed on permits for customs brokers it is noted that in Public Law 98-573, Congress provided for the imposition of fees on customs brokers to defray the costs of administration. Every individual, corporation, association, or partnership wishing to conduct customs business for those other than themselves must hold a valid customs brokers license. Every person granted a license will be subsequently issued a permit to conduct business in a particular Custom district. Thus, a license holder may have several permits depending upon the number of districts in which he conducts business. Additionally, every person granted

a license must file a triennial report pursuant to the Act.

The conferees have agreed to a provision imposing an annual fee for each permit that is issued pursuant to Public Law 98-573. It is through a fee on permits that the bill will help to defray the costs of regulating the customs brokerage industry. The number of permits is a measure of the cost of regulating these brokers.

The conferees anticipate that Customs will also charge a one-time fee for the issuance of a brokers license and accompanying permits, as well as an administrative fee to accompany each filing of the triennial report. The purpose of the latter fees are exclusively to defray the costs of issuing licenses and permits and of processing the receipt and storage of the triennial reports. We understand, for example, that Customs will charge a one-time fee of $300 for licenses and $100 for permits.

The conferees expect that Customs will confine itself to these fees on brokers and avoid arbitrarily increasing the amount charged.

a. Collection of passenger fees

Present law

No provision.

House bill

Provides for passenger fees to be collected by the commercial carriers and separately identified on the ticket as a Federal inspection fee. Fees are to be remitted to the Secretary of Treasury on a quarterly basis.

Senate amendment

Same provision in substance but also provides for the collection of the fee at the time of departure from the U.S. if the ticket is issued in a foreign country and the fee was not collected as part of the original ticket price.

Conference agreement

The conferees agreed to merge the two provisions together and clarify that whoever issues the ticket is authorized to collect the fee. The Senate language was agreed to with regard to tickets issued in foreign countries and the House language was accepted on remittance of the fees.

b. Status of fees

Present law

Section 214 of the Customs Procedural Reform Act (19 USC 58a) authorizes the collection of specified fees for certain customs services.

House bill

Authorizes Secretary to continue to collect fees to cover the cost of services provided for under 19 USC 58a, as in effect before this Act to the extent not covered in the new fee schedule.

Senate amendment

Since Senate provision is a free-standing provision which does not amend 19 U.S.C. 58a, the authority to collect the fees set out in 19 U.S.C. 58a would continue to exist.

Conference agreement

The conferees agreed to merge two provisions by accepting the Senate free-standing approach and by specifically providing that the Secretary continues to have the authority to charge fees under 19 U.S.C. 58a.

c. Treatment of scheduled airline flights.

Present law

No provision.

House bill

With regard to scheduled airline flights, requires customs services to be adequately provided without additional costs (such as for overtime) to airlines or passengers other than the fees set out in the bill.

Senate amendment

Similar provision except an exception is made with respect to designated airports under section 236(c) of the Trade and Tariff Act of 1984, which provides for reimbursement for Customs services.

Conference agreement

The conferees agreed to accept the Senate provision.

d. Deposit and disposition of proceeds

Present law

Section 524 of the Tariff Act (19 USC 1524) provides for receipts for any reimbursable charges or expenses to be deposited as a refund to Customs' appropriation.

House bill

Repeals section 524 and provides for all receipts for reimbursable charges and expenses to be covered into the Treasury as miscellaneous receipts and placed in a proprietary account.

Senate amendment

Retains section 524 and provides for all the fees collected under this Act to be deposited in a separate "Customs Users Fee Account" within the general fund of the Treasury.

The Secretary is authorized and directed to refund out of this account to its appropriation an amount to cover Customs overtime inspectional services for which a reimbursement is not required. Such refunds should be made at least quarterly with appropriate adjustments, as needed.

Conference agreement

The conferees agreed to accept the Senate provision.

e. Definitions

Present law

No provision.

House bill

No provision.

Defines terms "vessel" (to exclude ferry), "arrival", "customs territory of the United States", and "customs broker permit".

Conference agreement

The conferees agreed to accept the Senate provision.

22. Promulgation of rules and regulations

Present law

Secretary has general authority (19 USC 66) to prescribe rules and regulations in carrying out provisions of law.

House bill

No provision.

Senate amendment

Grants Secretary explicit authority to prescribe rules and regulations to carry out this provision.

Conference agreement

The conferees agreed to accept the Senate provision.

23. Advisory Committee

Present law

No provision.

House bill

Provides for the establishment of an advisory committee to meet on a periodic basis and to advise the Secretary on issues relating to performance of Customs' services. The committee is to be made up of representatives from the airline, shipping and other transportation industries, the general public, and others who may be subject to the fees authorized by section 13031. It is contemplated that the advice include, but not be limited to, such issues as the time periods during which such services should be performed, the proper number and deployment of inspection offices and the level of fees. The Secretary is directed to give substantial consideration to the views of this Committee in the exercise of his duties.

Senate amendment

No provision.

Conference agreement

The conferees agreed to the House provision.

1. Railroad unemployment repayment tax

Present law

Loan authority.—The railroad unemployment insurance (RRUI) program, which provides unemployment and sickness benefits, is funded by unemployment taxes paid by rail employers. The RRUI program can borrow from the railroad retirement program as needed to pay benefits. Such loans are repaid when the Railroad Retirement Board determines that the RRUI account has sufficient funds to make such a repayment. The program's authority to borrow additional funds from the railroad retirement program is scheduled to expire after December 19, 1985.

Loan repayment tax.—The Railroad Retirement Solvency Act of 1983 established a repayment tax scheduled to begin on July 1, 1986 and to expire on September 30, 1990 (Code secs. 3321-3323). The present-law tax rate, applicable to the first $7,000 in wages paid annually to a rail employee, is as follows (sec. 3321):

	Percent
1986	2.0
1987	2.3
1988	2.6
1989	2.9
1990	3.2

House bill

Loan authority.—The House bill makes permanent the authority of the RRUI program to borrow from the railroad retirement program.

Loan repayment tax.—The rate of the present-law loan repayment tax is modified under the House bill to be as follows, beginning July 1, 1986 and expiring September 30, 1990:

	Percent
1986	4.3
1987	4.7
1988	6.0
1989	2.9
1990	3.2

Loan surtax.—Under the House bill, an automatic surcharge of 3.5 percent on the loan repayment tax base will be levied if the RRUI program must borrow from the retirement program. The surtax proceeds are to be used to repay such loans made after September 30, 1985, and is in effect for any year if on September 30 of the prior year any principal or interest from a loan after September 30, 1985 remains unpaid.

Effective date.—The tax provisions will apply to remuneration paid after June 30, 1986. The extension of borrowing authority is effective on enactment.

Senate amendment

The Senate amendment includes the same provisions on loan authority, loan repayment tax, and loan surtax as in the House bill.

In addition, under the Senate amendment a portion of the tier 2 railroad retirement tax equal to one percent of the payroll subject to that tax will be diverted from the railroad retirement program to the RRUI program. These revenues would then be returned to the railroad retirement program to help repay the principal and interest on loans made prior to October 1, 1985. This diversion provision will apply effective January 1, 1986 and will terminate on April 1, 1990.

Conference agreement

The conference agreement is the same as the House bill.

2. Extension of Medicare coverage, hospital insurance tax to State and local government employees

Present law

State and local government employees are covered for social security and Medicare benefits, and such employees and their employers are subject to the FICA tax (including the hospital insurance portion), only pursuant to voluntary agreement between the State and the Secretary of Health and Human Services (Code sec. 3121(b)(7)). Governmental units whose employees have such coverage purusant to voluntary agreement may not later withdraw their employees from coverage.

Medicare coverage (and the corresponding hospital insurance payroll tax) is mandatory for Federal employees.

For wages paid after 1985, the employer-employee hospital insurance tax rate will be 2.9 percent of the first $42,000 of wages (sec. 3101, 3111, and 3121(a)).

House bill

The House bill extends Medicare coverage on a mandatory basis to State and local government employees hired after December 31, 1985, for service performed after that date. These employees and their employers will be liable of the hospital insurance portion of the FICA tax.

Under the House bill, Medicare coverage and the hospital insurance tax are not extended to individuals hired by a State or political subdivision to relieve unemployment; patients or inmates working in a hospital, home, or other institution; temporary workers hired for certain emergencies; or certain students working in District of Columbia hospitals.

The House bill makes technical changes relating to payment of hospital insurance taxes and definition of Medicare-qualified government employment.

Senate amendment

The Senate amendment extends Medicare coverage on mandatory basis to all current and new State and local government employees, effective for service performed after September 30, 1986. These employees and their employers will be liable for the hospital insurance portion of the FICA tax. Under the Senate amendment, employees who perform State or local government service during and before October 1986 will be given credit toward Medicare eligibility for such past State or local government employment.

The Senate amendment provides that hospital insurance taxes for Medicare-qualified State or local government employment are to be collected in the same manner as in the case of such taxes paid by nongovernmental employers.

Conference agreement

The conference agreement follows the House bill, except that a State may extend Medicare coverage (without extending coverage under social security cash benefits) to State and local government employees hired prior to 1986 by voluntary agreement with the Secretary of Health and Human Services. Such employees and their employers would also be liable for the hospital insurance portion of the FICA tax. Under this provision, the collection of Medicare contributions for State and local govenment employees who are newly covered by this bill will be carried out by the State social security office in cases where the local jurisdiction (or State government) currently has in effect an agreement covering some employees of the jurisdiction under social security. Those jurisdictions (e.g., a city, county, or other government subdivision) within a state that have no employees currently covered under a section 218 agreement will be required to make their payments for Medicare coverage of their employees under the same procedures as private employers currently follow.

3. Tobacco excise tax provisions

a. Extension of present cigarette excise tax rates

Present law

A manufacturers' excise tax equal to $8 per thousand is imposed on small cigarettes; this produces a tax of 16 cents on a pack of 20 cigarettes. Large cigarettes (those weighing more than 3 pounds per thousand) are taxed at $16.80 per thousand. These tax rates are scheduled to decrease by one-half after December 19, 1985.

House bill

The House bill makes permanent the present cigarette excise tax rates (e.g., 16 cents per pack of 20 small cigarettes).

Senate amendment

The Senate amendment is the same as the House bill.

Conference agreement

The conference agreement follows the House bill and the Senate amendment.

b. Excise taxes on smokeless tobacco

Present law

Present law does not impose any excise taxes on smokeless tobacco products (e.g., chewing tobacco and snuff).

House bill

No provision.

Senate amendment

The Senate amendment imposes an excise tax of 8 cents per pound on chewing tobacco and 24 cents per pound on snuff, effective for taxable products removed after September 30, 1985.

Conference agreement

The conference agreement follows the Senate amendment with a modification providing that the excise taxes on chewing tobacco and snuff are effective for taxable products removed after March 31, 1986.

c. Tobacco Equalization Trust Fund

Present law

Revenues from the cigarette excise tax are deposited in the Treasury as part of general revenues.

House bill

The House bill dedicates a portion of the cigarette excise tax revenues to a new trust fund to assist in defraying the costs of the tobacco price support program, through September 30, 1990.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the Senate amendment.

4. Coal excise tax; Black Lung Disability Trust Fund repayable advances

a. Coal excise tax

Present law

A manufacturers excise tax is imposed on domestically mined coal (other than lignite) sold or used by the producer (Code secs. 4121, 4218).

The tax rate is the lesser of (1) $1 per ton for coal from underground mines and 50 cents per ton for coal from surface mines, or (2) four percent of the price for which the coal is sold. These rates are to revert to pre-1982 rates (50 cents/25 cents per ton; two percent ceiling) on January 1, 1996, or, if earlier, on the January 1 as of which all principal and interest owed the Treasury by the Trust Fund have been paid.

House bill

The House bill increases the coal excise tax rate and sales price ceiling as follow, effective for sales of taxable coal on or after January 1, 1986:

For calendar years 1986–1990, the tax on underground coal will be $1.50 per ton, the tax on surface coal will be $0.75 per ton, and the ceiling will be six percent of the sales price.

For calendar years 1991–1995, the tax on underground coal will be $1.60 per ton, the tax on surface coal will be $0.80 per ton, and the ceiling will be 6.4 percent of the sales price.

For 1996 and later years, the tax on underground coal will be $1.50 per ton, the tax on surface coal will be $0.75 per ton, and the ceiling will be six percent of the sales price. However, the 1985 rates ($1/0.50 per ton; four percent ceiling) will be reinstated for 1996 or any later calendar year if throughout the two most recent fiscal years ending before the beginning of such calendar year there was no balance of repayable advaces made to the Trust Fund, and no unpaid interest on such advances.

Senate amendment

No provision.

Conference agreement

The conference agreement will increase the coal excise tax rate, effective January 1, 1986 through December 31, 1995, to the lesser of (1) $1.10 per ton for coal from underground mines and 55 cents per ton for coal from surface mines, or (2) 4.4 percent of the sales price.

b. Black Lung Disability Trust Fund repayable advances

Present law

Amounts equal to the coal excise tax revenues are automatically appropriated to the Black Lung Disability Trust Fund. The Trust Fund pays black lung disability benefits to coal miners (or their survivors) who have been totally disabled by black lung disease in cases where no coal mine operator is found responsible for the individual miner's disease.

Present law includes an unlimited authorization for advances, repayable with interest, from general revenues to the Trust Fund (sec. 9501(c)).

House bill

No provision.

Senate amendment

Under the Senate amendment, no further advances from general revenues to the

Black Lung Disability Trust Fund may be made after September 30, 1986. Under the provision, the Trust Fund may not borrow prior to October 1, 1986, amounts to be used to make expenditures after September 30, 1986, or during post-1986 years.

Conference agreement

The conference agreement follows the House bill, except that a one-time, five-year forgiveness of the current interest payments on the cumulative indebtedness of the Trust Fund is provided.

6. Certain exemptions from FUTA tax

a. Certain nonresident farm workers

Present law

An exemption from FUTA is provided for wages paid for agricultural labor performed by aliens admitted to the United States pursuant to section 214(c) and 101(a)(15)(H) of the Immigration and Nationality Act (Code sec. 3306(c)(1)(B)). This exemption is scheduled to expire on December 31, 1985.

House bill

No provision.

Senate amendment

The FUTA exemption for certain nonresident farm workers is extended on a permanent basis for wages paid on or after January 1, 1986.

Conference agreement

The conference agreement follows the Senate amendment, except that the FUTA exemption is extended only for wages paid before January 1, 1988.

b. Summer camp counselors

Present law

A one-year exemption from FUTA was provided for wages paid for 1983 by certain summer camps for employees who were full-time students (sec. 276(b) of P.L. 97-248).

House bill

No provision.

Senate amendment

The Senate amendment provides a permanent FUTA exemption for wages paid to summer camp counselors who are full-time students, effective for wages paid after September 19, 1985.

Conference agreement

The conference agreement follows the Senate amendment.

c. Fishing boat crew members

Present law

An exemption from FUTA was allowed for remuneration paid during 1981-84 to certain fishing boat crew members. This exemption applied only if the remuneration depended on the boat's catch and the crew normally consisted of fewer than 10 members (sec. 822(b) of P.L. 97-34).

House bill

No provision.

Senate amendment

The Senate amendment provides a permanent FUTA exemption for wages paid to certain fishing boat crew members, effective for wages paid after December 31, 1980.

Conference agreement

The conference agreement follows the Senate amendment.

7. Tax treatment of railroad retirement benefits

Present law

Under present law (Code sec. 86), a portion of Railroad Retirement system benefits computed by using the social security benefit formula (tier 1) is subject to Federal income tax in the same manner as social security benefits, i.e., for individuals whose incomes exceed certain levels (generally, $25,000 for unmarried individuals and $32,000 for married individuals filing a joint return). These benefits may be available at an earlier age under the Railroad Retirement system than under the social security system. Other benefits under the Railroad Retirement system are subject to Federal income tax for all recipients to the extent the payments exceed the amount of the individual's previously taxed contributions to the plan.

House bill

The portion of tier 1 Railroad Retirement benefits that is taxable in the same manner as social security benefits will be limited to the portion of tier 1 benefits that equals the social security benefits to which the individual would have been entitled if all of the individual's employment on which the annuity is based had been employment for social security benefit purposes. In addition, a minimum monthly annuity benefit (described in sec. 3(f)(3) of the Railroad Retirement Act of 1974) will be taxed in the same manner as social security benefits. Other tier 1 Railroad Retirement benefits will be taxed under the rules that apply to all other payments under the Railroad Retirement system.

These provisions will be effective for monthly benefits for which the generally applicable payment date is after December 31, 1985.

Senate amendment

No provision.

Conference agreement

The conference agreement follows the House bill. The conferees expect that the IRS will exercise its authority to waive penalties for failure to make estimated tax payments for 1986, to the extent such failure is solely attributable to increased tax liability of the taxpayer resulting from the amendments made by this provision, in light of the short time between enactment of this bill and the effective date of this provision.

8. Income averaging for former full-time students

Present law

An individual whose income in a year is more than 40 percent higher than his or her average income during the prior three years may use income averaging to reduce tax liability (Code sec. 1301).

To be eligible for income averaging, the individual must have been self-supporting during each of the prior three years. Subject to this requirement, an individual beginning full-time employment after completing college or graduate school is eligible for income averaging.

House bill

No provision.

Senate amendment

The Senate amendment provides that an individual is not eligible for income averaging for a year if he or she was a full-time student during any of the prior three years.

This rule does not apply to a married individual who files a joint return if 25 percent or less of the adjusted gross income of the return is attributable to that individual. Thus, income averaging will remain available where one spouse had been a full-time student during the base period, but did not contribute substantially to the current-year income to be averaged.

This provision is effective for taxable years beginning after December 31, 1985.

Conference agreement

The conference agreement follows the Senate amendment.

9. Fringe benefit provisions

a. Parents of airline employees; airline affiliate employees

Present law

Under the Deficit Reduction Act of 1984, the value of "no-additional-cost" services provided by an employer for use by the employee, or the employee's spouse or dependent children, is excluded from income and wages if certain conditions are met, including a line-of-business limitation (Code sec. 132).

House bill

No provision.

Senate amendment

Parents.—Under the Senate amendment, the value of the use of free or discounted airline passes by parents of an airline employee is excluded from the employee's income and wages on the same basis as where such benefits are used by the employee's spouse or dependent children, effective January 1, 1985.

Airline affiliates.—The Senate amendment excludes from income and wages the value of the use of airline passes by certain individuals who are directly engaged in providing airline-related services. This treatment applies to employees of a corporation predominantly engaged in airline-related services that is a member of an affiliated group which includes an airline. The exclusion applies on the same basis as in the case of employees of the airline corporation who perform airline services. The term airline-related service means (i) catering; (ii) baggage handling; (iii) ticketing and reservations; (iv) flight planning and weather analysis; (v) restaurants located at an airport; (vi) gift shops located at an airport; and (vii) such other similar services provided to and directly benefiting airlines as may be prescribed by Treasury regulations.

Also, a grandfather exception is provided to the line-of-business limitation for tax-free treatment of airline passes furnished (after 1984) to individuals employed, as of September 12, 1984, by Pan American World Services, Inc.

These provisions relating to certain airline affiliate employees are effective January 1, 1985.

Conference agreement

The Conference agreement follows the Senate amendment, with a modification to reflect the House airline affiliate technical corrections provision (in H.R. 3838).

b. Faculty housing

Present law

Several court cases have held that on-campus housing furnished to faculty or other employees by an educational institution does not qualify for the exclusion under Code section 119 (certain lodging furnished for the convenience of the employer), and that therefore the rental value of the housing (less any amounts paid by the employee) is includible in income and wages.

The Deficit Reduction Act of 1984 prohibits Treasury from issuing, prior to 1986, regulations treating as income the excess of the value of qualified campus lodging over the greater of (1) the operating cost paid in furnishing the lodging, or (2) the rent received,

in the case of such lodging furnished in 1984 or 1985.

House bill

No provision.

Senate amendment

The Senate amendment provides that the rental value of qualified campus lodging for a year may not be treated as greater than five percent of the appraised value for the year of the lodging, provided that an independent appraisal is obtained by a qualified appraiser. Thus, the value of the lodging will be excluded from the employee's income and wages if the rent paid by him or her to the educational institution equals or exceeds (on an annualized basis) five percent of the appraised value. Also, rents charged by an educational institution to nonemployees for comparable lodging may be used to define fair rental value.

This safe-harbor valuation rule will apply for post-1985 taxable years. For prior years, the IRS also is to follow the valuation rule, except that the assessed valuation of the property for local real estate tax purposes would be treated as meeting the requirement of a qualified appraisal.

Conference agreement

The conference agreement follows the House bill.

10. Minimum tax on certain capital gains of insolvent individuals

Present law

Individuals are subject to an alternative minimum tax (Code sec. 55), applying at a 20 percent rate to a base determined by adding certain preferences to the taxpayer's regular taxable income (in addition to certain other adjustments). The minimum tax preference items include the portion of net capital gain excluded for regular tax purposes under section 1202.

House bill

No provision.

Senate amendment

The Senate amendment provides that an insolvent individual who transfers real property used in the active conduct of a trade or business of the taxpayer is not required to treat certain capital gain on the transfer as a minimum tax preference if the transfer was made to a creditor in cancellation of indebtedness or to a third party under threat of foreclosure. The amount of the capital gain exclusion that is not treated as a preference item pursuant to the new rule may not exceed the amount of the individual's insolvency immediately prior to the transfer.

The amendment is effective for transfers of real property occurring after December 31, 1981.

Conference agreement

The conference agreement generally follows the Senate amendment, except that the provision will apply only to farmers and not to other taxpayers. For this purpose, a farmer is defined as an individual more than 50 percent of whose gross income over the past three years was derived from farming. In addition, the provision applies only to transfers of farmland, not of all real property.

11. Tax-exempt bonds for a regional pollution control authority

Present law

Tax-exempt industrial development bonds (IDBs) generally may not be used to acquire a facility, if a substantial user of the facility before acquisition remains as such thereafter (Code sec. 103). Additionally, under a rule enacted in the Deficit Reduction Act of 1984, IDBs may not be used to acquire any existing facilities unless a rehabilitation requirement is satisfied.

A provision enacted in 1982 permitted the Gulf Coast Waste Disposal Authority to acquire certain existing air or water pollution control facilities with the proceeds of IDBs.

House bill

No provision.

Senate amendment

The Senate amendment authorizes up to $200 million of IDBs for acquisition of 23 specific pollution control facilities for the Gulf Coast Waste Disposal Authority. This provision perfects the authorization for these bonds as originally enacted in 1982.

Conference agreement

The conference agreement follows the Senate amendment.

12. Netting of gains and losses by cooperatives

Present law

Cooperatives may exclude from their taxable income amounts distributed to patrons in the form of patronage dividends, and certain other amounts paid or allocated to patrons, to the extent of the net earnings of the cooperative from business done with or for patrons, provided that there is a pre-existing obligation to distribute such amounts (Code sec. 1382). Cooperatives that qualify as tax-exempt farmers' cooperatives also may exclude such amounts from income to the extent of all net income, and also may deduct to a limited extent dividends paid on common stock (sec. 521).

The Code does not contain any explicit provisions regarding whether a cooperative may offset the earnings and losses of its various allocation units in computing its net earnings for the purpose of determining the amounts to be distributed or allocated to patrons, or providing that a cooperative that so computes its net earnings may qualify as a tax-exempt farmers' cooperative. Under present law, the Code does not require a cooperative to notify its patrons that it has offset earnings and losses of its various allocation in computing its net earnings.

House bill

No provision.

Senate amendment

Netting.—The Senate amendment provides that a cooperative is not ineligible for treatment as a tax-exempt farmers' cooperative if it offsets certain earnings and losses in determining any amount available for distribution to patrons. For this purpose, the losses that are attributable to one or more allocation units (including a loss that is carried over from another year) may be offset against earnings of one or more other allocation units, but only to the extent such earnings and losses are derived from business done with or for patrons. Such patronage earnings and losses may be offset without regard to whether the allocation units whose earnings or losses are offset are functional, divisional, departmental, geographic, or otherwise.

The Senate amendment also provides that the offsetting of earnings and losses may be used, at the option of the cooperative, for computing its net earnings in determining the amount of patronage dividends to be paid or allocated to patrons. In addition, the Senate amendment provides that if a cooperative acquires the assets of another cooperative in a transaction specified in section 381(a) and exercises its option to offset earnings and losses, the acquiring cooperative may not, in computing its net earnings for taxable years ending after the date of acquisition, offset losses of one or more of the allocation units of the acquiring or the acquired cooperative against earnings of the acquired or acquiring cooperative, respectively, to the extent that (a) the earnings that are offset are not properly allocable to periods after the date of acquisition, and (b) such earnings and losses could not have been offset if derived from allocation units of the same cooperative.

The provisions relating to netting generally are effective for taxable years beginning after December 31, 1962.

Notice requirement.—Cooperatives that engage in the practice of offsetting earnings and losses are required to notify their members that the amount of the member's distribution or allocation may have been affected by the cooperative's netting, effective for taxable years beginning after the date of enactment of the bill. The notice also must specify the identity of the allocation units whose earnings and losses have been offset, as well as what additional information the member is entitled to under governing law.

Conference agreement

The conference agreement generally follows the Senate amendment with modifications.

The conference agreement clarifies that if a cooperative acquires the assets of another cooperative in a transaction described in section 381(a) and exercises its option to offset earnings and losses, the acquiring cooperative may, in computing its net earnings for taxable years ending after the date of acquisition, offset losses of one or more allocation units of the acquiring or acquired cooperative against earnings of the acquired or acquiring cooperative, respectively, but only to the extent that (a) such earnings are properly allocable to periods after the date of acquisition,[1] and (b) such earnings could have been offset by such losses if such earnings and losses had been derived from allocation units of the same cooperative.

13. Extension of moratorium on application of research and experimental expense allocation regulation

Present law

The foreign tax credit is limited so that it cannot offset U.S. tax on U.S. source taxable income. In general, the Code requires allocation of all expenses between U.S. and foreign source gross income to determine U.S. and foreign source taxable income. A Treasury Regulation (sec. 1.861-8) rule generally requires taxpayers with foreign source income from products in a product area in which the taxpayers do U.S. research to allocate part of their U.S. research and experimental expense against their foreign source income. In 1981, the Congress suspended this rule for two years, so that research expenditures made for research conducted in the United States were allocated against U.S. source gross income only. In 1984, the Congress extended the moratorium for two additional years. The moratorium generally expired for taxable years beginning after August 1, 1985.

[1] Where an acquisition takes place during a taxable year, the conferees intend that the cooperative's earnings for the entire year are to be allocated pro rata between the pre-acquisition and post-acquisition periods.

House bill

No provision.

Senate amendment

The Senate amendment effectively extends for one year, the moratorium on the application of the research and experimental expense allocation rules of Treas. Reg. sec. 1.861-8. For taxable years beginning on or before August 1, 1986, all of a taxpayer's research and experimental expenditures attributable to research activities conducted in the United States will be allocated to U.S. source gross income for purposes of computing U.S. source and foreign taxable income and taxable income from sources partly within and partly without the United States. The extension of the moratorium applies only to the allocation of research expenses for the purpose of geographic sourcing of income. It does not apply for other purposes, such as the computation of combined taxable income of a FSC (or DISC) and its related supplier.

Conference agreement

The conference agreement follows the Senate amendment.

14. Limitation on issuance of U.S. bonds

Present law

U.S. bonds have a maturity when issued of more than 10 years. The interest rate paid on U.S. bonds may not exceed 4¼ percent, except for $200 billion of bonds specified by statute that may be issued for sale to the public, at interest rates above 4¼ percent. This exception is expected to be exhausted during the first calendar quarter in 1986.

House bill

No provision.

Senate amendment

The Senate amendment increases the exception from the interest rate limitation on U.S. bonds from $200 billion to $250 billion. The increase is expected to meet Treasury's anticipated needs through calendar year 1986.

Conference agreement

The conference agreement follows the Senate amendment.

15. Awards of attorneys fees and other court costs in tax litigation

Present law

Attorneys fees for tax litigation and other court costs of up $25,000 may be awarded to a taxpayer who prevails in the litigation in a Federal court if the taxpayer shows that the Government's position in the litigation was unreasonable (Code sec. 7430). Under present law, this provision will not apply to court proceedings commenced after December 31, 1985.

House bill

No provision.

Senate amendment

The Senate amendment makes permanent the authorization of attorneys fees and other court costs for tax litigation under section 7430. Also, the Senate amendment makes the following modifications which would apply to court proceedings commencing after December 31, 1985:

(1) If it is determined that the taxpayer prevailed in the tax litigation, the burden is on the Government to show that its position was substantially justified or that special circumstances exist that make an award of litigation costs unjust;

(2) Whether an award is made is determined based upon a "substantially justified" standard;

(3) No award is allowed to a prevailing party who unreasonably protracted the proceedings;

(4) The $25,000 cap of present law is eliminated (as under present law, recoverable costs would not include costs of the administrative process); and

(5) Limits are imposed on hourly charges by attorneys and expert witness fees recoverable under the provision.

Conference agreement

The conference agreement follows the House bill (i.e., contains no provision).

16. Increase in IRS budget

Present law

The Administration's initial budget request for fiscal year 1986 recommended a decrease in IRS funding levels as compared with fiscal year 1985. The conference report on H.R. 3036 (the Treasury, Postal Service and General Government Appropriations Act for fiscal year 1986) would have restored that decrease and provided for an increase in fiscal year 1986 of $76 million over the Administration's revised budget request. The President vetoed H.R. 3036 on November 15, 1985.

House bill

The House bill provides a sense of the Congress resolution that both the restoration of the funding cuts initially proposed by the Administration to the IRS budget for fiscal year 1986 and the further increase in the IRS budget as recommended by the House Committee on Appropriations in H.R. 3036 as reported are necessary for the efficient operation of the Government and to carry out the purposes of the budget reconciliation bill.

Senate amendment

The Senate amendment authorizes to be appropriated $46.5 million for each of fiscal years 1986, 1987, and 1988 for the use of the IRS to employ 1,550 additional agents and examination employees. This appropriation is in addition to any other amounts authorized to be appropriated to the IRS for those fiscal years.

Conference agreement

The conference agreement includes the provisions of both the House bill and the Senate amendment.

5. Superfund revenue provisions

Present law

Trust fund provisions.—Amounts equivalent to taxes on petroleum and feedstock chemicals (described below) were deposited in the Hazardous Substance Response Trust Fund ("Superfund"). These taxes expired on September 30, 1985.

In addition to taxes, $44 million was authorized to be appropriated to the Superfund from general revenues for each of fiscal years 1981-85 (an aggregate of $220 million). Total tax and general revenue appropriations were intended to equal $1.6 million over the five-year period.

Amounts in the Superfund are available for cleanup and certain other expenditures in connection with hazardous substance release.

Petroleum taxes.—An excise tax of 0.79 cent per barrel was imposed on (1) crude oil received at a U.S. refinery, and (2) imported petroleum products. The tax expired on September 30, 1985.

Tax on feedstock chemicals.—A tax was imposed on the sale of 42 organic and inorganic substances ("feedstock chemicals") by a manufacturer, producer, or importer. The tax rates ranged from 22 cents per ton to $4.87 per ton of the specified feedstock chemical. The tax expired on September 30, 1985.

Exceptions to the tax were provided for:

(1) butane or methane used as a fuel;

(2) nitric acid, sulfuric acid, ammonia, or methane used to produce ammonia, if used to produce fertilizer;

(3) surfuric acid produced solely as a by-product of (and on the same site as) air pollution control equipment;

(4) any taxable feedstock to the extent derived from coal;

(5) petrochemicals used to manufacture or produce motor fuel, diesel fuel, aviation fuel, or jet fuel, and

(6) certain compounds which exist in transitory form in the process of refining non-taxable metal ores or compounds into other (or purer) non-taxable compounds.

Post-closure Liability Trust Fund and tax.—A separate trust fund, the Post-closure Liability Trust Fund, is to assume completely the liability of owners and operators of hazardous waste disposal facilities that have been granted permits and have been properly closed under Subtitle C of the Resource Conservation and Recovery Act (RCRA). The Fund also may be used to pay certain monitoring and maintenance costs.

An excise tax of $2.13 per dry weight ton was imposed on the receipt of hazardous waste at a qualified facility, in order to finance the Post-closure Fund.

The authority to collect the Post-closure tax expired on September 30, 1985.

Tax-exempt bonds for hazardous waste treatment facilities.—Tax-exempt industrial development bonds (IDBs) may be issued to financial solid waste disposal facilities (sec. 103(b)(4)(E)). Facilities for the disposal of liquid or gaseous waste (including most hazardous wastes) do not qualify for this financing.

Hazardous waste removal costs treated as qualifying distributions by private foundations.—To avoid penalty excise taxes, a private foundation must annually make expenditures or grants for charitable purposes in an amount (the "distributable amount") equal to five percent of the fair market value of its investments (sec. 4942).

House bill

No provision in H.R. 3128. On December 10, 1985, the House passed H.R. 2005, which included Superfund revenue provisions (title V). (The Committee on Ways and Means reported H.R. 2817 on October 26, 1985 (H. Rept. 99-253, Pt. 2), which included Superfund revenue provisions (title IV).)

Senate amendment

Trust fund provisions.—The Senate amendment reauthorizes revenues for the Superfund program for five years, and generally retains present law trust fund provisions, except:

(1) amounts equivalent to revenues from the Superfund Excise Tax are appropriated to the Trust Fund;

(2) no further appropriations are authorized from general revenues; and

(3) Trust Fund provisions are placed in the Internal Revenue Code.

Cumulative Superfund revenues are intended to be $7.5 billion over the five-year period (including interest on trust fund balances).

Petroleum tax.—The Senate amendment extends the prior law for five years, through September 30, 1990, effective October 1, 1985.

The tax would be suspended or terminated earlier than September 30, 1990, if cumu-

lative Superfund receipts from taxes and interest during the 5-year period reach $7.5 billion. The tax also would expire under certain circumstances if the unobligated balance of the Superfund exceeds $2.225 billion on September 30, 1988 or $3 billion on September 30, 1989.

Tax on feedstock chemicals.—The Senate amendment extends the present law tax for five years, through September 30, 1990 (with the same termination date provisions as for the petroleum tax).

Additional exceptions to the tax are provided for:

(i) exported feedstocks,

(ii) substances used to produce animal feed, and

(iii) domestically recycled nickel, chromium, or cobalt.

Certain inventory exchanges of chemicals are not treated as sales.

This provision generally is effective October 1, 1985. The amendment regarding inventory exchanges applies as of the original effective date of the feedstock chemicals tax. Exchanges before January 1, 1986, do not qualify for this treatment if the exchange was treated as a taxable sale by the taxpayer. Registration requirements apply to inventory exchanges on or after January 1, 1986.

Manufacturers' excise tax.—The Senate amendment imposes an excise tax on the sale, lease, or transfer of tangible personal property by the manufacturer of the property, in connection with a trade or business. The tax equals 0.08 percent of the sales price of, or gross lease payments for, the property (i.e., $8 of tax per $10,000 of taxable amount).

The tax also is imposed (at a 0.08 percent rate) on importers of tangible personal property based on the customs value plus duties (or, if no customs value is available, the fair market value) of the imported property.

The tax is deductible from Federal income taxes.

Under the Senate amendment, a credit equal to 0.08 percent of the taxpayer's qualified inventory costs is allowed against the tax. Credits may be carried forward but are not refundable. "Qualified inventory costs" are amounts paid or incurred for purchases of tangible personal property and which are allocable to the inventory of a manufacturer using the full absorption accounting method (unless otherwise provided in regulations). Property manufactured for lease is treated in the same manner as property manufactured for sale. In lieu of any allowance for depreciation or amortization, qualified inventory costs include amounts paid or incurred for depreciable or amortizable property (i.e., expensing treatment).

A manufacturer with $5 million or less of annual taxable receipts is effectively exempt from tax via a minimum $4,000 allowable credit. (The minimum credit is not available to importers, is nonrefundable, and may not be carried over).

Exemptions from the tax are provided for:

(1) Import shipments with an aggregate value of $10,000 or less.

(2) Items sold or leased (but not imported) by governmental units or organizations exempt from taxation under section 501(a) (Other than in unrelated trades or businesses).

(3) Exports from the United States.

"Manufacturing" includes mining, raw material production, and the production of tangible personal property. Manufacturing does not include services incidental to storage or transportation of property; preparation of food in a restaurant or other retail establishment; or incidental preparation of property by a wholesaler or retailer.

"Tangible personal property" includes natural gas and other gaseous products and materials. Tangible personal property does not include electricity, unprocessed agricultural products, or unprocessed food products.

The tax is effective on January 1, 1986 and terminates after December 31, 1990. The tax would be suspended or terminated earlier under similar conditions as the petroleum and feedstock chemical taxes.

GAO study.—The Senate amendment directs GAO to report to the Finance Committee by January 1, 1988, its findings on various mechanisms for financing the Superfund, including a study of the effect of a tax on hazardous waste on the generation and disposal of such waste.

Post-closure Liability Trust Fund and tax.—The Senate amendment repeals the Post-closure Liability Trust Fund and the associated waste disposal tax, effective October 1, 1985. Amounts in the Post-closure Trust Fund at that time are appropriated to the Superfund. Refunds of the tax (without interest) would be paid out of the Superfund, effective March 1, 1989, unless certain Congressional action has been taken prior to March 1, 1989.

IDB's for hazardous waste treatment facilities.—The Senate amendment allows tax-exempt IDBs to be issued to finance facilities for the treatment of hazardous waste, as these terms are defined under sec. 1004 of the Solid Waste Disposal Act. This exemption is limited to facilities which are subject to permitting requirements under RCRA.

Bonds issued under this provision would be subject to the income and other restrictions applicable to solid waste IDBs. The provision applies to bonds issued after the date of enactment.

Hazardous waste removal costs.—The Senate amendment provides that, subject to certain limitations, the distributable amount of a private foundation (under sec. 4942) is to be reduced by amounts paid or incurred by the foundation for removal or remedial action with respect to a hazardous substance release at a facility owned or operated by the foundation. This provision is effective for taxable years beginning after December 31, 1982.

Conference agreement

a. Hazardous Substance Superfund

The conference agreement redesignates the "Hazardous Substance Response Trust Fund" as the "Hazardous Substance Superfund" and continues and expands the Superfund by allocating to the fund amounts equivalent to revenues derived from expanded taxes on petroleum and chemical feedstocks; a new Superfund excise tax on manufacturers; and a tax (beginning in 1987) on imported substances derived from taxable chemical feedstocks or petroleum. Other amounts allocated to the Fund under present law (including penalties, punitive damages, amounts recovered on behalf of the fund, and interest on Trust Fund balances) are not affected by the conference agreement. Superfund revenues from taxes, general revenues, interest on Fund balances, and recoveries are estimated to total $9.5 billion over the reauthorization period.

Under the conference agreement, the expenditure purposes of the Superfund generally are amended to conform to the expanded list of Superfund activities under section 111 of CERCLA.

Termination provisions.—The petroleum tax, chemical feedstock tax, and the Superfund excise tax that finance the Superfund would terminate under either of two trigger mechanisms. First, these taxes would terminate at the end of the calendar quarter in which the Secretary estimates that the amount collected under these taxes exceeds $10 billion. Second, these taxes would terminate on September 30, 1988 (or September 30, 1989) if the Secretary determines that the unobligated balance of the Super fund exceeds $3 billion ($4 billion) and if the taxes were terminated the unobligated balance of the Superfund on September 30, 1989 (September 30, 1990) would exceed $3 billion ($4 billion).

The conference agreement generally continues the present law provisions regarding administration of the Superfund, and authorizes the Fund to borrow amounts from the Treasury as repayable advances for any authorized fund purpose. Any such advances are required to be repaid before September 30, 1990. The conference agreement also transfers the trust fund provisions to the Internal Revenue Code.

The conference agreement specifies that no funds raised for the Superfund, the Leaking Underground Storage Tank Trust Fund, or the Oil Spill Liability Trust Fund under the provisions of this agreement may be spent until authorization of these programs. The amendments to the Superfund trust fund provisions are effective on January 1, 1986. Special effective date provisions apply for certain of the Superfund taxes (as described below).

b. Excise tax on petroleum

The conference agreement re-enacts the prior law environmental excise tax on petroleum and increases the tax from 0.79 cent per barrel tax to 3.85 cents per barrel. This tax is to apply from January 1, 1986 through September 30, 1990. Thus, the conference agreement repeals the termination provisions of present law (sec. 4611(d)), which would have terminated the tax if the unobligated balance in the Superfund exceeded specified amounts, and section 303 of CERCLA, which provided for termination of the environmental excise taxes when aggregate tax collections exceed $1.38 billion.

In addition to re-enacting the petroleum tax as a Superfund financing source, the conference agreement imposes a new 1.3-cent per barrel tax on crude oil and imported petroleum products to finance the Oil Spill Liability Trust Fund (discussed below).

c. Excise tax on chemical feedstocks

Tax rates.—The conference agreement generally re-enacts the prior law environmental excise tax on chemical feedstocks. Specifically, the conference agreement provides that specified organic and inorganic substances sold by the manufacturer, producer, or importer are to be taxed in accordance with the following table (Table 1).

TABLE 1.—*Chemical feedstock tax rates under conference agreement, 1986*

[Dollars per ton]

Substance	*1986*
Organic Substances:	
Acetylene	4.87
Benzene	4.87
Butadiene	4.87
Butane	4.87
Butylene	4.87
Ethylene	4.87
Methane	3.44
Naphthalene	4.87
Propylene	4.87

Substance	1986
Toluene	4.87
Xylene	9.81
Inorganic Substances:	
Ammonia	2.64
Antimony	4.45
Antimony trioxide	3.75
Arsenic	4.45
Arsenic trioxide	3.41
Barium sulfide	2.30
Bromine	4.45
Cadmium	4.45
Chlorine	2.70
Chromite	1.52
Chromium	4.45
Cobalt	4.45
Cupric oxide	3.59
Cupric sulfate	1.87
Cuprous oxide	3.97
Hydrochloric acid	0.29
Hydrogen fluoride	4.23
Lead oxide	4.14
Mercury	4.45
Nickel	4.45
Nitric acid	0.24
Phosphorus	4.45
Potassium dichromate	1.69
Potassium hydroxide	0.22
Sodium dichromate	1.87
Sodium hydroxide	0.28
Stannic chloride	2.12
Stannous chloride	2.85
Sulfuric acid	0.26
Zinc chloride	2.22
Zinc sulfate	1.90

Beginning in calendar year 1987, the rates specified in Table 1 are to be adjusted for inflation. In the case of organic substances, the inflation adjustment for any year is to be the percentage by which the average producer price index for basic organic chemicals, published by the Bureau of Labor Statistics, for the 12-month period ending in September of the preceding year, exceeds the comparable average of the index for the 12 months ending in September 1985. In the case of inorganic substances the inflation adjustment for any year is to be the percentage by which the average producer price index for basic inorganic chemicals for the 12-month period ending in the preceding September exceeds the comparable average for the 12 months ending in September 1985. Tax rates would not be reduced below the levels shown in Table 1, even if the producer price index declines relative to 1985; however, if this occurs, the conferees expect to consider whether such a reduction is appropriate. It is anticipated that the Treasury Department will publish annual tables setting forth increased tax rates resulting from the inflation adjustment.

The conference has addressed a technical problem under prior law concerning the appropriate point at which to levy the tax on the production of xylene. Under the conference agreement, for purposes of this tax, xylene includes separated isomers of xylene only in the case of imported or exported xylene. The conference adopted this rule because it understands the separated isomers of xylene (meta-xylene, ortho-xylene, and para-xylene) are isolated from a mixed stream of xylenes produced in a reformation process. Accordingly, separated isomers will have been previously taxed (when the mixed stream of xylene is used in the reformation process) except when those separated isomers are imported; thus, the conference expects that no future loss of revenue will occur as a result of this provision. The conference agreement also repeals the prior law tax on xylene for periods before October 1, 1985. Manufacturers, producers, and importers of xylene who paid the tax under prior law will be permitted to obtain a refund of those taxes together with interest. To offset the resulting revenue loss, the tax rate on xylene in Table 1 incorporates an increase over the rates that would otherwise apply, in order to recapture the tax liability that had been expected under prior law for periods before October 1, 1985.

The conference agreement also includes a special rule with respect to nitric acid consumed by the manufacturer in the production of nitrocellulose. Under this rule, nitric acid used in this manner will continue to be taxed at not more than the prior law rate (24 cents per ton) applicable to that substance.

Exemptions.—The conference agreement repeals the prior law exemption for coal-derived feedstocks. The remaining prior law exemptions are retained.

In addition to prior law exceptions, the conference agreement provides three new exceptions to the chemical feedstocks tax:

Exports of taxable chemicals.—The conference agreement provides that the tax on chemical feedstocks does not apply to feedstocks that are exported from the United States. In particular, any feedstock that is sold by the manufacturer or producer for export, or for resale to a second purchaser for export is exempt from tax.[2] If the purchaser cannot certify in advance that a feedstock will be exported, or if a tax has otherwise been paid on the exported feedstock, the person who paid the tax could claim a refund or credit (without interest) for the amount of the tax previously paid. Such person would be required to pay the amount refunded or credited to the exporter, or to obtain the exporter's written consent to his receiving the credit or refund. The Treasury is authorized to prescribe necessary regulations for administering these provisions.

Substances used to produce animal feed.—An exemption from the feedstock tax is provided for nitric acid, sulfuric acid, or ammonia (or methane used to produce ammonia) used in a qualified animal feed use by the manufacturer, producer, or importer, or sold for use (or for resale for ultimate use) in a qualified animal feed use. Qualified animal feed use means any use in the manufacture or production of animal feed or animal feed supplements, or of ingredients used in animal feed or animal feed supplements. Under Treasury regulations, if tax is paid and a qualifying substance is subsequently used in a qualified animal feed use, the person so using the substance is entitled to a credit or refund (without interest) of the tax paid. Conversely, if an exemption is allowed and a substance is subsequently sold or used for a non-animal feed purpose, the person so selling or using the substance is to be subject to tax as if such person had manufactured the substance.

Certain recycled metals.—An exemption is provided under the conference agreement for nickel, chromium, or cobalt which is diverted or recovered in the United States from solid waste (as defined under section 1004 of the Solid Waste Disposal Act) as part of a recycling process (and not as part of the original manufacturing or production process). The exemption does not apply to metals which are diverted recovered from the byproduct, coproduct, or other waste of a metal refining, smelting, or other extraction process.

The recycling exemption does not apply for any period during which the taxpayer has failed to complete a corrective action required by EPA (or an authorized State program) under CERCLA or the Solid Waste Disposal Act. The exemption also does not apply to taxable substances which are recycled outside the United States.

For purposes of the credit for previously taxed chemical feedstocks, recycled metals that are exempt under this provision are treated as previously taxed (effectively preventing the imposition of further tax on the metal).

Exchanges of taxable chemicals.—The conference agreement provides that, when a manufacturer, producer, or importer exchanges a taxable chemical, as part of an inventory exchange with another person, the exchange is not to be treated as a taxable sale for purposes of the feedstock tax. Instead, the person receiving the chemical in the exchange is to be treated as the manufacturer, producer, or importer (as appropriate), and the tax is to be imposed upon the later sale (or use) by such person. Further, beginning January 1, 1986, the rule would apply only if (1) both parties to the exchange have registered with the Treasury Department as manufacturers, producers, or importers of taxable chemicals, and (2) the person receiving the chemical has notified the person exchanging the chemical of the recipient's registration number and Internal Revenue district.

For purposes of this provision, an inventory exchange is defined as an exchange of properties each of which is property described in section 1221 of the Code (relating to inventory, stock-in-trade, and property held primarily for sale to customers in the ordinary course of trade or business) with respect to both the transferor and transferee of the property. A transaction may be treated as an exchange although one or both parties pay reasonable transportation or similar costs in connection with the exchange.

The provision regarding tax-free exchanges is retroactive to the original effective date of the feedstock tax. However, for exchanges before January 1, 1986, the provision does not apply unless (1) the manufacturer, producer, or importer treated the exchange as a tax-free transaction for purposes of the feedstock tax, and (2) there was an agreement (including a blanket agreement covering a series of transactions) that the person receiving the taxable chemical would be treated as the manufacturer, producer, or importer of the chemical for purposes of the tax.

Termination date.—The chemical feedstocks tax expires after September 30, 1990.

Effective date.—The re-enactment of and modifications to the chemical feedstocks tax are effective January 1, 1986.

d. Tax on imported chemical derivatives and credit—for exported deviations

The conference agreement imposes a new tax on imported substances more than 50-percent of the value of which is derived from taxable feedstocks (as defined under sec. 4662) that are used as feedstock materials or as process fuels. The 50-percent test is determined using the predominant method of production for the product. The Treasury Department is directed to issue regulations identifying the specific products which are subject to the tax based on this criterion. The Treasury is to have authority to change this list at any time; however, only items identified in the regulations at the time of

[2] Rules similar to the rules of section 4221(b) (regardless of proof of export for excise tax purposes) would apply for this purpose.

sale or use by the importer would be subject to the tax.

The amount of tax imposed on any taxable imported substance is to be equal to the amount of tax which would have been imposed (under secs. 4662) on the component taxable feedstocks (that are used as feedstock materials or process fuels in the manufacture of the import), had these components been sold in the United States for an equivalent use. If the importer does not furnish sufficient information (as established by Treasury regulations) to determine the amount of tax under this method, then the tax is to be imposed at a rate determined by the Treasury based on the composition of imported derivatives determined by using the predominant method of production. These rates will be adjusted annually to account for indexing. If no such rates are published by Treasury and the importer does not furnish sufficient information, a rate of 5 percent of the appraised value of the imported substance at the time of import applies.

The tax is imposed on the sale or use of taxable substances by the importer thereof. Importers subject to tax include any person entering a taxable substance into the United States for consumption, use, or warehousing. The term "United States" is defined as it is for purposes of the petroleum and feedstocks taxes. If an importer uses a taxable substance, tax is imposed on the importer as if he had sold the substance. Revenues from the tax are not to be paid to Puerto Rico and the Virgin Islands under the cover over provisions of section 7652 of the Code. The tax on imported chemical derivatives does not apply to any substance if the petroleum tax (sec. 4611) or the chemical feedstock tax (sec. 4661) is imposed on the sale or use of such substance.

The tax on imported chemical derivatives and the credit for exports is effective on January 1, 1987.

A credit would be provided for exports of substances more than 50-percent of the value of which is derived from taxable feedstocks (as defined in sec. 4662) that are used as feedstock materials or process fuel. The amount of credit for any exported substance is to be equal to the amount of tax which was imposed under section 4662 on the component taxable feedstocks. If the exporter does not furnish sufficient information, then the amount of credit is to be determined by Treasury based on the composition of derivatives using the predominant method of production.

e. Study of trade impact of waste management tax

The Department of the Treasury and GAO are instructed to evaluate the effect of a waste management tax on the generation and disposal of hazardous waste and the ability of domestic manufacturers to compete in international trade, and to deliver recommendations for mitigating any adverse trade impacts to the House Committee on Ways and Means and the Senate Finance Commiittee by October 1, 1987. The study is to include recommendations regarding an export credit, an import equalization fee, and a cap on the amount of tax for economically distressed industries.

f. Superfund excise tax

General rules

The conference agreement establishes a new Superfund Excise Tax on manufacturers and importers. The tax, which is at a 0.1 percent rate, is imposed on the sale, lease, or import of tangible personal property by the manufacturer or importer of property. Exports of tangible personal property are exempt. In addition, unprocessed agricultural products, food, fertilizer, and unprocessed timber are exempt. To avoid the imposition of duplicative taxes in multi-stage production, manufacturers will be allowed a credit based on their purchases of tangible personal property (e.g., materials and equipment) allocable to the manufacturers of tangible personal property. Small manufacturers (with less than $10 million of otherwise taxable receipts) and small import shipments (under $10,000) are exempt from the tax.

Imposition of the tax

Under the conference agreement, the Superfund Excise Tax is imposed on the sale or lease (in connection with a trade or business) of tangible personal property by the manufacturer. The tax is generally imposed on the sale or leasing of tangible personal property for use, consumption, or disposition in the United States.[3] The tax is not imposed on sales or leases of tangible personal property for use outside the United States. The tax rate is 0.1 percent ($10 per $10,000 of taxable amount). The taxable amount in the case of a sale is the price (in money or the fair market value of other consideration) charged to the purchaser by the seller, including consideration) charged to the purchaser by the seller, including items payable to the seller during the taxable period with respect to the transaction (including Federal, State, and local sales and excise taxes, other than the Superfund Excise Tax and certain other specified Federal excise taxes on manufacturers, imposed on the transaction). A transfer or exchange, other than a gift within the meaning of sections 102 or 170 of the Code, is treated as a sale for purposes of the Superfund Excise Tax.

In the case of a lease by the manufacturer of the taxable property, the taxable amount is the gross lease payments received during the taxable period (including Federal and State sales and excise taxes, other than Superfund Excise Tax and certain other specified Federal excise taxes on manufacturers, imposed on the lease). The tax applies to lease payments received (or considered received under the partial year proration rules described below) during the period the Superfund Excise Tax is in effect, regardless of when the lease was entered into. The manufacturer is liable for the tax.

The sale or lease of tangible personal property by a person who included the cost of such property in qualified inventory cost is treated as a sale or lease by the manufacturer. Thus, the tax applies to the resale or sublease of tangible personal property in the same manner that the tax applies to the originalsale or lease of the tangible personal property. This rule prevents the claiming of excess credits with respect to resales or subleases.

The tax is also imposed on the import of tangible personal property into the United States by the importer of the tangible personal property. The taxable amount is the customs value plus customs duties (and any other duties) that may be imposed. The tax on imports is to be collected in the same manner as duties by the customs service. Shipments for which the taxable amount is less than $10,000 are exempt from the tax. The importer is liable for the tax.

The Superfund Excise Tax is deductible in determining Federal income tax liability.

Definitions and special rules

Manufacturer.—"Manufacturer" includes any producer of tangible personal property, including raw materials. The conferees intends that the term "manufacturer" be read broadly to include mining and extraction. The categories of mining and manufacturing establishments set forth in Divisions B and D of the Standard Industrial Classification ("SIC") Manual, published by the Office of Management and Budget, generally reflect the conferees' intent as to the proper line separating manufacturing from nonmanufacturing activity. The SIC Manual generally excludes from manufacturing agriculture, forestry, fishing and construction. The production of films, videos, tapes, discs, and records would be treated as manufacturing for purposes of the Superfund excise tax.

The following activities are not taken into account for purposes of determining whether a person is a manufacturer. Manufacturing does not include services furnished incidental to the storage or transportation of property or the incidental preparation of property by a retailer or wholesaler, including routine assemblage. For example, the incidental preparation of property would include the routine preparation of an automobile for the retail customer by a retail automobile dealer.

Tangible personal property.—Tangible personal property, for purposes of this tax, generally includes all property that is not either real property or intangible property. It includes gases, such as natural gas, and other gaseous materials, but does not include electricity.

Tangible personal property does not include mineral rights (including oil or gas rights), since these interests are themselves considered to be real property. Minerals (or oil or gas) are, however, considered to be tangible personal property after they have been mined or otherwise extracted. Additionally, tangible personal property does not include rights to or interests in intellectual property, such as copyrights or royalty payments on property such as books. These interests are considered to be intangible property. Tangible personal property does, however, include the actual property produced, such as the books or other printed material produced by the manufacturer.

Containers, transportation charges, constructive sales price.—The Secretary of the Treasury is to issue regulations specifying that charges for coverings, containers, and packing are included in the taxable amount. The regulations are also to provide that (1) transportation (including pipeline transportation) and related charges (including insurance and installation) and (2) the Superfund Excise Tax and certain other specified Federal excise taxes imposed on manufacturers (but no other excise tax) are excluded from the taxable amount (but only to the extent the amount of the transportation and related charges is established to the satisfaction of the Secretary in accordance with regulations).

The regulations are also to provide rules establishing a constructive sales price when, for example, a manufacturer sells directly at retail or sells only or primarily to related persons. If a natural gas pipeline company sells natural gas that it has produced itself ("pipeline-owned" production), these Treasury regulations should provide that the constructive sales price for purposes of the Su-

[3] For these purposes, the United States includes the 50 States, the District of Columbia, and any Commonwealth or possession of the United States.

perfund Excise Tax is the price established under the Natural Gas Policy Act and Federal Energy Regulatory Commission (FERC) regulations. These FERC regulations treat pipeline-owned production in the same manner as natural gas produced by an affiliated company. The natural gas is considered sold, for purposes of the Superfund Excise Tax, when it is transferred from the well to the pipeline.

These regulations are to be similar to the rules of sections 4216 (a) and (b) (relating to containers, packing, and transportation charges, and constructive sales prices for excise tax purposes).

Timing of receipt and expenses.—In computing the taxable amount and qualified inventory costs of a taxpayer, an amount shall be treated as recognized, paid, or incurred at the time it is recognized, paid, or incurred under the taxpayer's method of accounting for Federal income tax purposes.

A special rule applies to installment sales. The taxable amount of the seller includes, for a taxable period, only the principal payments received during that taxable period. The qualified inventory costs of the buyer includes, for a taxable period, only the portion of the costs corresponding to the principal paid during the taxable period. Thus, the seller is taxed, and the buyer obtains credit for the item purchased, over the term of the installment sale. This rule matches the timing of the seller's tax with the timing of the buyer's credits.

Credit against tax

The conference agreement provides manufacturers a credit against the Superfund Excise Tax that is the greater of two amounts:

(1) The first amount is equal to the Superfund Exicse Tax imposed on sales and leases (but not imports), to the extent it does not exceed $10,000.[4] Persons under common control (whether corporations, partnerships, proprietorships, or other entities) are to be treated as one taxpayer for purposes of the standard $10,000 credit. The rules of section 52 (originally drafted for purposes of the targeted jobs credit) apply to determine whether persons are under common control. Thus, a manufacturer (but not an importer) with a taxable amount of $10 million or less would be exempt from the tax ($10 million times 0.1 percent equals $10,000).

(2) The second amount is equal to the qualified inventory costs of the taxpayer multiplied by 0.1 percent.

The conferees recognize that these rules may provide the taxpayer with a credit against tax that is larger than the tax actually paid. (For example, sellers with less than $10 million of receipts are exempt, and buyers include Superfund and other manufacturers' excise taxes as well as wholesale margins in computing credits.) Excess credits could be avoided by limiting the credit to the amount of tax shown on invoices; however, the desire of the conferees to make administration of the tax as simple as possible, in conjunction with the low rate of tax, outweighs concerns about the technical perfection of the credit mechanism.

Qualified inventory costs are direct material and other costs (including the Superfund Excise Tax on such materials) of tangible personal property that are allocable to the manufacturer's inventory and are paid or incurred during the taxable period for which the manufacturer is liable for the Superfund Excise Tax. Thus, the inventory tax accounting rules used in the definition of qualified inventory costs identify the items includible in qualified inventory costs, but not the time when the cost of these items is recognized for purposes of the Superfund Excise Tax. The cost is recognized at the time it is paid or incurred by the manufacturer.

Qualified inventory costs for any taxable period are amounts paid or incurred during the taxable period for tangible personal property (other than exempt products and property used to manufacture exempt products) which is allocable to the inventory of a manufacturer under the full absorption method of accounting (sec. 471). Exempt products include food, fertilizer, and unprocessed agricultural, fishery, and timber products (see below). Taxpayers that do not use the full absorption method of inventory accounting for income tax purposes are, nevertheless, required to use the standards of full absorption accounting for purposes of determining qualified inventory costs.

In lieu of any allowance for depreciation and amortization, with respect to tangible personal property, qualified inventory costs include the amount paid or incurred for such property in the year placed in service.[5] In the case of any tangible personal property purchased under the installment method, the cost of such property shall be taken into account, for purposes of determining qualified inventory costs, only when paid (see above).

Qualified inventory costs generally include the cost of utilities subject to the Superfund Excise Tax. Thus for example, the cost of natural gas, but not the cost of electricity would be included in qualified inventory costs. Qualified inventory costs include lease payments on qualifying equipment paid or incurred during the period the Superfund Excise Tax is in effect. Qualified inventory costs do not, however, include any cost or amount with respect to an item acquired before the effective date of the tax. Additionally, qualified inventory costs do not include the inventory costs of any nonmanufacturing operation. For purposes of computing qualified inventory costs, tangible personal property that is manufactured for lease is treated in the same manner as property that is manufactured for sale.

The amount of the credit allowed to be claimed for a particular taxable period may not exceed the liability for the Superfund Excise Tax. The amount by which the credit for qualified inventory costs exceeds the liability for a particular taxable period may be carried to the next taxable period and added to the credit potentially allowable for that period. No carryover is permitted for the excess, if any, of the standard $10,000 credit over the tax liability for any taxable period.

The conference agreement also provides that the amount of the Superfund Excise Tax credit for any particular item of tangible personal property must be subtracted from the income tax basis of that item. The amount of the basis adjustment is determined as 0.1 percent of the cost of the property included in qualified inventory costs. (In the case of an installment sale, the basis adjustment is computed as 0.1 percent of the principal amount of the installment obligation). Taxpayers not otherwise required to file returns for this tax must file returns and make this basis adjustment to claim the item of tangible personal property in qualified inventory costs.

The credits will carry over in a corporate reorganization in any situation in which there is a carryover of credits under section 381.

Exempt transactions

The conference agreement exempts several types of transactions from the Superfund Excise Tax. First, the Superfund Excise Tax is not imposed on the sale of any property that is to be exported outside the United States, as provided in regulations. The conferees intend that these regulations follow the principles of section 4221(b) (relating to excise taxes), and the regulations thereunder, for purposes of proving that an article has been exported. In particular, the conferees intend that Treasury regulations adopt the rule in section 4221(b) that provides that the exemption from tax ceases to apply to the sale of an article unless, within six months of the earlier of either the date of sale or date of shipment by the manufacturer, the manufacturer receives proof that the article has be n exported.

The confe nce agreement exempts from the Superfund Excise Tax the sale or lease of tangible personal property by the United States or any other governmental entity or by an organization that is exempt from the income tax under section 501(a) (unless the transaction is part of an unrelated trade or business within the meaning of section 513). Imports by governmental entities and organizations that are exempt from the income tax are subject to the Superfund Excise Tax.

The conference agreement exempts small imports from this tax. A small import is any shipment (whether formal or informal) the taxable amount of which is less than $10,000. The conferees intend that "shipment" be interpreted for purposes of this tax in the same manner that it is generally interpreted for customs purposes. Thus, a shipment is generally all articles on one carrier for one consignee on one day.

The conference agreement exempts from the tax food (whether for humans or animals), any product used as fertilizer, unprocessed agricultural or fishery products, and unprocessed timber. The term "food" does not include pharmaceuticals or other forms of medicine, whether available over the counter or by prescription only. Food generally includes beverages, except that it does not include alcoholic beverages. Food does include any additives. Any material, component, or packaging of food or fertilizer is considered to be part of the food or fertilizer. The conferees intend that Treasury regulations coordinate the definitions of unprocessed agricultural products and food products with the 5-digit tariff code for purposes of exempting from this tax imports of these items.

Time for filing returns and related administrative matters

Taxpayers are required to file a Superfund excise tax return annually, at the same time they file their regular income tax return. Thus, for example, a corporation that has as its taxable year the calendar year would be required to file the Superfund Excise Tax return by March 15 of the following year, which is the same date that

[4] This amount is prorated for taxable periods that do not include 12-full months. Thus, for example, a manufacturer subject to this tax for 6 months of a 12-month taxable year would be entitled to a maximum credit of $5,000 under this provision. The amount is also prorated for short taxable periods.

[5] If only a portion of depreciation or amortization is allocable to the inventory of a manufacturer, then the same portion of the amount paid or incurred for the property is allocable to qualified inventory costs.

its corporate income tax return (Form 1120) is due. As with other tax returns, the Secretary may grant a reasonable extension of time for filing a Superfund Excise Tax return (*see* sec. 6081).

The conference agreement provides that a manufacturer who has $10 million or less of aggregate receipts from the sale or lease of tangible personal property (excluding exports) is not required to file a Superfund Excise Tax return.[6] These taxpayers have no tax liability because of the credit mechanism (described above). Taxpayers who are under common control are treated as one person for purposes of this exemption from the requirement to file a return. In addition, the Secretary may provide by regulations that certain other taxpayers with more than $10 million of sales or lease receipts, but who may have no tax liability, need not file returns. Taxpayers not otherwise required to file returns must, however, file returns and make the income tax basis adustment (described above) in order to claim items of tangible personal property in qualified inventory costs to carry forward credits into future years.

The taxable period for which liability for the Superfund excise tax must be determined is the taxable person's taxable year for purposes of the income tax. If the taxpayer does not have a taxable year for purposes of the income tax, then the taxable period for purposes of the Superfund Excise Tax is the calendar year.

The penalties for failure to file a tax return or to pay tax that are applicable to the income tax (sec. 6651) are made applicable to the Superfund Excise Tax. In addition, the civil negligence penalty (sec. 6653(a)) that is applicable to the income tax is made applicable to the Superfund Excise Tax. The criminal penalties of the Code are generally applicable to the Superfund Excise Tax.

The conference agreement generally requires that the Superfund Excise Tax be deposited quarterly after the first taxable period in which a taxable sale or lease occurs. For the first taxable year that a manufacturer is potentially subject to this tax, any manufacturer is potentially subject to this tax, any manufacturer with more than $50 million of sales or lease payments determined in the prior year is required to deposit quarterly. (For this purpose, controlled groups are treated as one taxpayer.) In subsequent taxable years, any manufacturer not previously liable for a payment of Superfund Excise Tax will not be required to deposit quarterly. Thus, for example, a manufacturer who paid Superfund Excise Tax for 1986 would be required to deposit quarterly in 1987, whereas a manufacturer not required to pay any Superfund Excise Tax in 1986 would pay the Superfund Excise Tax (if any) for which the manufacturer is liable for 1987 with the manufacturer's return. The existing penalty for failure to make deposits (Code sec. 6656) applies to failures to deposit the Superfund Excise Tax. This penalty will not apply, however, if the manufacturer deposits at least the lesser of 90 percent of the tax due or 100 percent of the previous year's liability.[7]

The tax on imports is to be collected in the same manner as duties by customs agents. Consequently, the conference agreement does not specify deposit rules for the tax on imports.

Revenues from the Superfund Excise Tax are not paid to Puerto Rico or the Virgin Islands or any other possession or territory under the cover over provisions of section 7652 of the Code or similar provisions.

The Secretary of the Treasury is authorized to issue regulations to carry out the purposes of the Superfund Excise Tax.

Effective dates

The Superfund Excise Tax applies with respect to taxable amounts received or accrued after April 1, 1986. The tax will not apply with respect to taxable amounts received or accrued after March 31, 1991.

The conference agreement provides special rules for any taxable period including but not beginning on April 1, 1986 or April 1, 1991. In the case of such a taxable period, the taxpayer must, in computing its taxable amount and credit for the Superfund Excise Tax, prorate its receipts and purchases on a daily basis. For example, a taxpayer whose taxable year runs from May 1 through April 30 must, under this special rule, prorate 30/365 of its receipts and 30/365 of its purchases as representing those amounts for the period for May 1 through April 30, 1986. In addition, the $10,000 standard credit similarly would be prorated.

h. Repeal of Post-Closure Liability Tax and Trust Fund

The conference agreement retroactively repeals the tax on hazardous wastes under section 4681 of the Code, effective October 1, 1983, and terminates the Post-Closure Liability Trust Fund as of that date. Refunds (with interest) would be allowed for taxpayers who paid taxes on hazardous wastes under section 4681.

i. Leaking Underground Storage Tank Trust Fund and Tax

a. Leaking Underground Storage Tank Trust Fund

The conference agreement establishes a new trust fund, the Leaking Underground Storage Tank Trust Fund, under the Internal Revenue Code. The purpose of this trust fund is to pay for the costs of corrective actions involving leaks of petroleum and petroleum products from underground storage tanks. The Trust Fund generally is to be used to pay cleanup and related costs involving tanks where no solvent owner can be found, or the owner or operator refuses or is unable to comply properly with a corrective action order necessary to protect human health and the environment. The Trust Fund would also be available to provide grants to States authorized to carry out corrective actions. Claims filed against the Trust Fund may be paid only out of such Trust Fund. Claims in excess of the Trust Fund balance shall be paid in full (to the extent of such balance in the order in which the claim was finally determined.

The trust fund will be financed by (1) a tax on gasoline, diesel and special motor fuels (described below), (2) interest on balances in the Trust Fund, and (3) amounts recovered from responsible parties for costs incurred by the Administrator of the EPA (or by State) in undertaking a corrective action with respect to the release of petroleum and petroleum products from an underground storage tank.

The conference agreement provides that amounts in the Trust fund may not be expended until the Solid Waste Disposal Act (or other provision of law) is amended to authorize a program to clean up leaks of petroleum and petroleum products from underground storage tanks.

b. Tax on gasoline, diesel and special motor fuels

Under present law, an excise tax is imposed on gasoline sold by a producer or importer thereof (sec. 4081), and on the sale (or use) of diesel fuel and special motor fuels (sec. 4041). Special motor fuels include benzol, benzene, naptha, liquid petroleum gas, casing head and natural gasoline, and any other liquid (other than kerosenes, as oil, fuel oil, or gasoline) sold for use in motor vehicles or motor boats. No tax is imposed on diesel and special motor fuels used for use on a farm for farming purposes. Gasoline, diesel and special motor fuels sold for use as a fuel in an aircraft in noncommerical aviation are taxable. Exemptions are provided for certain aircraft museums and helicopter uses. Gasoline mixed with certain alcohol products is subject to tax at a reduced rate.

Under the conference agreement, an additional tax of 0.2 cent per gallon is imposed on the sale (or use) of gasoline, diesel and special motor fuels subject to tax under sections 4041, 4042 and 4081 of the Code Tax is also imposed on liquid fuels used in boats, planes, and trains. Revenues from this tax, or equivalent amounts, are to be deposited in the Leaking Underground Storage Tank Trust Fund.

The tax is effective on January 1, 1986. The tax terminates after September 30, 1990. Earlier termination would occur at the end of any month in which the Secretary of the Treasury first determined that cumulative net revenues equal or exceed $850 million.

j. Oil Spill Liability Tax and Trust Fund

a. Oil Spill Liability Trust Fund

Expenditure purposes.—The conference agreement establishes an Oil Spill Liability Trust Fund under the Internal Revenue Code. Amounts in the Trust Fund are available for the payment of removal costs incurred in cleaning up or preventing oil pollution from vessels or offshore facilities, including costs incurred by government officials in carrying out oil pollution cleanup requirements under the Federal Water Pollution Control Act and the Intervention on the High Seas Act. The fund may also be used to pay removal costs the liability for which is transfered to the fund from the Deepwater Port Liability Fund (established under the Deepwater Port Act of 1974) or the Offshore Oil Pollution Compensation Fund (established under the Outer Continental Shelf Lands Act Amendments of 1978). No fund moneys may be used to pay natural resource damage claims or to pay governmental entities for costs incurred other than for removal actions and related administrative costs. Funds could be used for compensating loss or income and private

---

[6] This exemption is prorated for taxable periods that do not include 12 full months. Thus, for example, a manufacturer subject to this tax 6 months of a 12-month taxable year would not be required to file a return if it had less than $5 million of sales or lease receipts in that taxable year. This exemption is also prorated for short taxable periods.

[7] A taxpayer may avoid this penalty with respect to any year the taxpayer is liable for Superfund Excise Tax by depositing at least 90 percent of the tax due for that taxable year. A taxpayer may, however, avoid this penalty with respect to a year the taxpayer is liable for this tax by depositing 100 percent of the previous year's liability for this tax only if the taxpayer prorates this amount for a full 12-month period. Thus, if a taxpayer was liable for $100,000 of Superfund Excise Tax for its taxable year July 1, 1985 through June 30, 1986, the taxpayer would be considered to have deposited 100 percent of the previous year's liability by depositing $400,000.

damage claims under certain circumstances. No amounts could be paid for loss of State and local tax revenue.

Amounts in the Trust Fund are available to pay contributions to the fund established by the 1984 International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, if this convention (and a related liability convention) comes into force with respect to the United States. Trust Fund moneys may also be used to pay administrative costs. However, such contributions shall be reduced to the extent that the International Fund is used for expenditure purposes that are not permissible uses of the Oil Spill Liability Trust Fund.

The liability of the Trust Fund cannot exceed $200 million for any single incident.

The conference agreement provides that amounts in the Trust Fund may not be expended until a program is authorized to clean up or prevent oil pollution from vessels or offshore facilities.

Claims against the Trust Fund can be paid only out of the Trust Fund. If the fund is unable to pay all claims, claims will be paid in full (subject to the limitations above) in the order in which the claims are finally determined.

Other financing sources

The following amounts are to be deposited in the Trust Fund:

(1) A 1.3-cents-per-barrel tax on crude oil and imported petroleum products (described below),

(2) Amounts recovered, collected, or received from responsible parties under subtitle A of the Comprehensive Oil Pollution Liability and Compensation Act, as reported by the authorizing committees,

(3) Amounts remaining in the Deepwater Port Liability Fund and the Offshore Oil Pollution Compensation Fund after the new Trust Fund and petroleum tax become effective,

(4) Income on Trust Fund investments, and

(5) The proceeds of authorized borrowing by the Fund (which is not to exceed $300 million in outstanding indebtedness at any time).

Effective date.—These provisions are effective on January 1, 1986.

b. Tax on petroleum

Imposition of tax.—The conference agreement imposes a new excise tax of 1.3 cents per barrel on domestic crude oil and on petroleum products (including crude oil) imported into the United States. The tax is imposed on the same crude oil and petroleum products, and is subject to the same definitional and other provisions, as is the Superfund petroleum tax (discussed above), and is in addition to that tax. Amounts equivalent to the revenues from the tax are to be deposited in the Oil Spill Liability Trust Fund.

The collection, enforcement, and penalty provisions that are applicable to the Superfund petroleum tax are also applicable to this petroleum tax.

Effective date.—The tax applies from January 1, 1986 through September 30, 1990.

k. Hazardous waste removal costs treated as qualifying distributions by private foundations

Senate recedes to the House (no provision).

l. IDBs for hazardous waste treatment facilities

House recedes to the Senate (Senate provision is included).

TITLE XIV.—GENERAL REVENUE SHARING

Senate amendment

The current authorization of the general revenue sharing program, which provides unrestricted grants totaling $4.6 billion annually to local governments, is scheduled to expire on September 30, 1986. The Senate amendment would terminate the program on October 1, 1986, by a repeal of the Revenue Sharing Act.

Under the Senate amendment, local governments would have until March 1, 1986 to demand an adjustment in future payments for prior underpayments or overpayments. In addition, amounts paid to local governments would have to be used, obligated or appropriated by such governments by April 1, 1987. Only such sums as are necessary for the purposes of administering the provisions of this section and the orderly phaseout of the Revenue Sharing Program are authorized for fiscal year 1987.

House amendment

No provision.

Conference agreement

Generally follows the Senate amendment, but incorporates several changes. Although the current authorization expires on September 30, 1986, the repeal of the Revenue Sharing Act would be delayed until the earlier of December 31, 1986 or adjournment sine die of the 99th Congress. In no event would an early effective date prevent the payment of any allocation for the fiscal year 1986 entitlement period, including any funds held in reserve pursuant to Section 6702(d) of Title 31, U.S.C.

In addition, local governments would be required to have used, obligated or appropriated payments to them by October 1, 1987. This allows local governments six months more to allocate such funds than was available under the Senate amendment.

As under the Senate amendment, only such sums as are necessary to administer the provisions of this section are authorized for Fiscal Year 1987.

TITLE XV.—CIVIL SERVICE, POSTAL SERVICE, AND GOVERNMENTAL AFFAIRS GENERALLY

POSTAL SERVICE ISSUES

1. Reduction of authorization for revenue forgone

House provision

The House bill (Sec. 7104(a)) limits the FY 1986 authorization for the "revenue forgone" appropriation to $749 million. (The revenue forgone appropriation subsidizes the postage rates paid by nonprofit organizations and other "preferred rate" mailers.)

Senate provision

The Senate bill (Sec. 801) contains a substantially similar provision

Conference agreement

The conference agreement contains the House language.

2. Reduction of transitional appropriation

House provision

The House bill (Sec. 7104(b)) reduces to zero the amount authorized to be appropriated for FY 1986 for the transitional appropriation to the Postal Service. (The transitional appropriation is used by the Postal Service to reimburse the Department of Labor for workers' compensation costs arising from injuries to employees of the pre-1971 Post Office Department). The House bill further provides that the amount which would have been authorized for this appropriation for FY 1986 shall be authorized for FY 1989, in addition to the amount already authorized for FY 1989 pursuant to 39 U.S.C. 2004. The House bill provides further that the Postal Service's obligations for FY 1986 shall be met using any amounts in the Postal Service Fund.

Senate provision

The Senate bill (Sec. 802) provides that no funds shall be appropriated for the FY 1986 transitional appropriation prior to FY 1989.

Conference agreement

The conferees agree to delete both provisions.

3. Delay of step 16 rates to January 1, 1986

Senate provision

The Senate bill (Sec. 803) provides that the increase in postage rates for nonprofit organizations and certain other mailers announced by the Postal Service Board of Governors on September 6, 1985, shall not take effect until January 1, 1986. The Senate bill also amends section 3626(a) of title 39, United States Code, to eliminate the rate "phasing" schedule and provide that effective January 1, 1986, the rates paid by nonprofit organizations and other affected mailers will recover the full costs attributable to their mail.

House provision

The House has no comparable provision.

Conference agreement

The House recedes and concurs with an amendment making it clear that the rate increase announced by the Board of Governors in Resolution No. 85-7 shall not take effect before January 1, 1986 and that any changes in rates shall be established in accordance with chapter 36 of title 39, United States Code. Additionally, in order to obtain needed savings, the conferees agree to eliminate the authorization for that part of the revenue forgone appropriation which makes possible the "limited circulation" second-class rate. The conferees intend that this rate be eliminated upon enactment.

4. Appropriation ceiling and study concerning third-class commercial material mailed at reduced rates

Senate provision

The Senate bill (Sec. 804) reduces by 50 percent the authorized appropriation for FY 1987 and FY 1988 for third-class nonprofit bulk rate mail which advertises or promotes the sale of, recommends the purchase of, or announces the availability of any article, product, service, insurance, or travel arrangements. The Senate bill also directs the Postal Rate Commission to prepare and transmit to Congress within 6 months of enactment a report containing legislative recommendations to achieve the required 50 percent savings. The Commission's study shall also include second-class nonprofit rate and fourth-class library rate mail. The Commission is to invite and consider the views of all interested parties.

House provision

The House has no comparable provision.

Conference agreement

The House recedes and concurs with an amendment striking the mandatory authorization reduction but directing that the Postal Rate Commission conduct an expanded study covering three subject areas. The first subject shall be the use of third-class nonprofit bulk rate mail, second-class nonprofit mail, and fourth-class library rate mail for advertising, promotion, and solicitation purposes (as provided for and defined in the Senate bill). The second subject shall

be the general use of the second-class "in-county" publication rate. The focus of the Commission's inquiry in this area shall be the accumulation and synthesis of data and information concerning the number and types of publications which use this subsidized rate, the users' needs for this rate, and the potential impact both on the publications and on their readers of further modification or total elimination of the authorization for this rate. The conferees take specific note of their agreement in section 15104 to amend the Senate bill's provision concerning eligibility for the in-county rate by deleting the limit of 20,000 copies per issue. The conferees hereby direct the Postal Rate Commission to include in its study a specific determination of the number and types of publications which would have been adversely affected had the 20,000 "cap" remained in the new 39 U.S.C. 3626(f). The third subject for the Commission's study is the accuracy, or inaccuracy, of the current method of computing revenue forgone and the development and assessment of alternative methods. The Postal Service is to cooperate fully in the conduct of every phase of the study (including the provision to the Commission of adequate financial, technical, and personnel resources).

5. Restriction on eligibility for in-county second-class rates of postage

Senate provision

The Senate bill (sec. 805) amends 39 U.S.C. 3626 by limiting application of the in-county rate (which is subsidized by the revenue forgone appropriation). The rate shall not apply to an issue of a publication if the number of copies of that issue distributed within the county of publication is less than half of the issue's total paid circulation. This limitation shall not apply if the issue's total paid circulation is less than 10,000 copies. In no case shall the rate apply to more than 20,000 copies of an issue.

House provision

The House has no comparable provision.

Conference agreement

The House recedes and concurs with an amendment striking the Senate provision which would have limited applicability of the subsidized rate to not more than 20,000 copies of any issue. The conferees note that this provision will be a subject of the study to be conducted by the Postal Rate Commission pursuant to section 15103.

6. Curbing of subsidies for advertising-oriented "plus issues" mailed to subscribers at in-county rates

Senate provision

The Senate bill (Sec. 806) further amends 39 U.S.C. 3626 with regard to application of the subsidized in-county rate to nonsubscriber copies of subscription publications. The number of nonsubscriber copies to which the rate is applied in any calendar year may not exceed 10 percent of the number of copies mailed to subscribers in that year.

House provision

The House has no comparable provision.

Conference agreement

The House recedes.

CIVIL SERVICE ISSUES

1. Federal employee pay adjustments

House provision

The House bill (Sec. 7101) freezes civilian pay for FY 1986 and provides 5% pay increases effective January 1, 1987, and January 1, 1988. Prevailing rate pay adjustments are limited to 5% and are delayed 90 days in FY 1987 and 1988. Agencies are required to absorb 33% of the cost of the pay increases.

Senate provision

The Senate bill (Sec. 811) freezes pay for civilian workers of the Federal Government for fiscal year 1986 and makes the effective date of any future pay raises the first applicable pay period after January 1 of each year. In addition, the Senate bill approves legislation, previously done in the appropriations process, that provides Federal Wage System employees with the same pay increases as General Schedule workers and delays those increases for 90 days, similar to the delay for the General Schedule.

The Senate achieves out-year savings in accordance with the conference report on the First Concurrent Budget Resolution for fiscal year 1986. The Senate bill does not mandate a pay raise for fiscal years 1987 and 1988, but, rather, retains the current process for pay increases. However, any pay proposal must save at least $746 million in FY 1987 and $1,264 million in FY 1988 which is consistent with the budget resolution. The estimates are based on the resolution's pay assumptions of 3.8 percent and 4.7 percent in fiscal years 1987 and 1988, respectively.

Conference agreement

The conference agreement freezes civilian pay for FY 1986 and requires the President to exercise his authority under section 5305 of title 5, United States Code, to limit pay adjustments in FY 1987 and FY 1988 to achieve savings of $746,000,000 in FY 1987 and $1,264,000,000 in FY 1988. These savings are to be computed using the baseline for the First Concurrent Resolution on the Budget for Fiscal Year 1986 (S. Con. Res. 32, 99th Congress, 1st Session) agreed to on August 1, 1985. The conferees note that these savings could be achieved if FY 1987 and FY 1988 pay increases were each limited to approximately 5 percent and employing agencies were required to absorb approximately one-third of the cost of the pay increases. The conference agreement also delays FY 1987 and FY 1988 civilian pay adjustments until January 1, 1987, and January 1, 1988, respectively. In FY 1987 and FY 1988, prevailing rate pay adjustments are limited to the average percentage adjustment under section 5305 of title 5 and are delayed 90 days.

2. Health insurance program reserves

House provision

The House bill (Sec. 7102(a)) requires OPM to determine minimum level of necessary reserves under the FEHBP and requires each carrier to refund excess reserves to the FEHBP Fund. Required refunds may not be less than $800 million in FY 1986 and $300 million in FY 1987. The House bill prohibits transfer of any amount in contingency reserves to the general fund of the U.S. Treasury as a result of any refund of excess reserves.

Senate provision

The Senate bill (Sec. 814) is similar to the House except that it requires the Government's share of the refunds to be held in the health benefits fund and to be used to pay for future increase in Government's contributions for health insurance premiums.

Conference agreement

The conference agreement requires OPM to determine the minimum level of necessary reserves under the FEHBP and requires each carrier to refund excess reserves to the FEHBP Fund. Required refunds cannot be less than $800 million in FY 1986 and $300 million in FY 1987. The agreement further provides no funds may be transferred to the general fund of the Treasury of the United States as a result of a refund required by the conference agreement. The conference agreement specifically authorizes the use of the Government's share of refunded amounts to fund the Government's share of subscription charges for annuitants participating in the FEHBP. The conference agreement permits refunds to the Government of the District of Columbia and the United States Postal Service in amounts attributable to the employer's share of subscription charges paid by those entities. Beginning in FY 1987, the Postal Service shall be required to pay all FEHBP costs for future postal annuitants.

3. Health insurance premium cap

Health provision

Under existing law, the Government's health insurance premium contribution may not exceed 75% of the total premium for a particular plan. The House bill (Sec. 7102(b)) suspends application of the 75% cap for the 1986 and 1987 contract years.

Senate provision

The Senate has no comparable provision.

Conference agreement

The conference agreement amends section 8902(b)(2) of title 5, United States Code, to repeal permanently the 75 percent limitation on the Government contribution to FEHBP premiums. The conference agreement further provides that the amendment to section 8902(b)(2) shall be effective with respect to pay periods commencing after March 1, 1986.

4. Pay based on 2,087 hours per year

House provision

The House bill (Sec. 7103) provides for continued use of the 2,087 hour pay computation factor through FY 1988.

Senate provision

The Senate bill (Sec. 812) permanently extends use of the 2,087 hour pay computation factor.

Conference agreement

The House recedes to the Senate and concurs with an amendment which makes the provision effective beginning with pay periods which commence on or after March 1, 1986.

5. Health benefits in medically underserved areas

Senate provision

The Senate bill (Sec. 813) permanently reauthorizes a program that expired on December 31, 1984, which required FEHB plans to provide benefits for the services of any state licensed health care provider if the service is provided in a state designated as a medically underserved area.

House provision

The House has no comparable provision.

Conference agreement

The Senate recedes to the House. The conferees note that this issue is addressed in other legislation currently pending before the Senate.

6. Retirement benefits for part-time employment

Senate provision

The Senate bill (Sec. 815) provides prospectively that the total service of an employee who has performed part-time service

shall be prorated to reflect such part-time service when computing the employee's civil service retirement annuity.

House provision

The House has no comparable provision.

Conference agreement

The House recedes to the Senate and concurs with an amendment making technical and clerical changes.

. *Wage rates of certain employees in Tuscon, Arizona*

Senate provision

The Senate bill (Sec. 816) prohibits any reduction in the wage schedules or rates applicable to prevailing rate employees in the Tucson, Arizona, wage area during FY 1986.

House provision

The House has no comparable provision.

Conference agreement

The House recedes to the Senate and concurs with an amendment which takes into account the fact that reductions in wage schedules for the affected area have already occurred and back payments will be necessary in order to fully implement the conference agreement.

ESTIMATED BUDGETARY IMPACT OF RECONCILIATION PROVISIONS: SUBCONFERENCE 24 [1]

TABLE 1.—SUMMARY BY SECTION OF NET BUDGETARY EFFECTS OF SUBCONFERENCE 24 PROVISIONS

[By fiscal year, in millions of dollars]

Section and program	1986	1987	1988	Total 1986–88
Section 15201. Pay adjustments:

Civilian Agency Multiyear Contracting Authority

Senate provision

The Senate bill contains a provision that amends title 3 of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 251 et seq.) by adding a new section 306 on Multiyear Contracts. This section, which is identical to S. 678, the Civilian Agency Multiyear Contracting Act of 1985, authorizes civilian procuring agencies to enter into multiyear contracts, not to exceed five years, when it is determined to be in the government's best interest.

House provision

The House bill contains no comparable provision.

Conference agreement

The Senate agrees to recede to the House provision.

Sections 15301–15303. Federal Motor Vehicle Expenditure Control

House amendment

The House amendment contains no provision relating to reduction of Federal motor vehicle expenditures.

Senate amendment

Sections 15301-15313 of the Senate amendment require executive agencies, the Administator of General Services, and the Director, Office of Management and Budget, to take a number of actions designed to reduce the costs of acquiring, operating, maintaining, and disposing of motor vehicles. Agencies would establish data collection systems, study the costs and benefits of contracting with private fleet management firms, and provide with their budget requests statements of motor vehicle costs. Appropriations otherwise available for motor vehicle expenditures would be reduced $225 million by fiscal year 1988.

Conference agreement

The conferees agreed to the Senate provision with an amendment.

The conferees agree that significant savings can be achieved by finding more efficient means to acquire, operate, maintain, and dispose of motor vehicles in Federal agencies. Therefore, the conferees support establishment of the basic mechanisms in the Senate bill to require executive agencies, the General Services Administration, and the Office of Management and Budget to improve government motor vehicle fleet management. However, the conferees believe there are insufficient data on current costs of fleet management to mandate specific dollar savings. The government's accounts do not separately identify the specific cost of motor vehicles acquisition, operation, maintenance, and disposal.

The amendment agreed to by the conferees requires the President to establish cost reduction goals aimed at reducing outlays for motor vehicle fleet management by fiscal year 1988 to an amount which is $150 million less than the amounts requested for this purpose in the fiscal year 1986 budget. While the agencies would not be required by law to actually reduce their appropriations by that cumulative amount, the conferees expect all agencies to make every effort, while giving consideration to performing their missions, to comply fully with the President's goals. The reporting requirements have been modified to assure that Congress will be fully informed not only of the projected savings in future budgets, but also progress in meeting established goals. Certain other minor changes were made in the Senate bill's study and reporting requirements to eliminate redundancy.

The conference amendment also exempts the Postal Service, the Postal Rate Commission and the Tennessee Valley Authority. These organizations in large part are not normally subject to direct Presidential control and reductions in their motor vehicle costs would not result in significant budgetary savings. In addition, the GSA Administrator is authorized to exempt agencies' special purpose vehicles. The conferees expect this latter authority to be used sparingly. The total savings goal was reduced from $225 million to $150 million in recognition of the exemption of the Postal Service, which bears a large percentage of government motor vehicle costs.

TITLE XXV—HIGHER EDUCATION PROGRAMS

The Senate language requires recall of state agency advances of $75 million in FY 1988. The House recedes on the amount.

The House bill states that agencies less than five years old at the time of the recall are exempt, the Secretary must take into consideration the solvency and maturity of the insurance and reserve funds of the agencies as determined by the Comptroller General in determining how much of their advances to recall. The Senate recedes with an amendment that prohibits repayment from any state if that repayment encumbers the reserve fund requirement mandated by state statute.

Both the House and Senate bills require multiple disbursement of student loans. The House language states that loans are to be multiply disbursed to students on the basis of their academic terms (i.e. semester, quarter, etc.) lenders receive subsidies only on the disbursed portion of the loan and the origination fee is charged proportionately on each disbursement. The effective date is July 1, 1986. The Senate recedes.

The Senate also recedes to the House language on the copayability of GSL checks. The Senate language requires the GSL check to be made copayable to the student and the institution the student is attending. The House language requires the check to be made payable to the student, but sent to the school the student is attending. Because some public schools are required to deposit the GSL checks made copayable to them into their state accounts, this would have resulted in the delay of disbursement of GSL money to the student. By sending the check to the school, the conferees are confident that the goals of copayability will be met, without the administrative problems and delay in giving the GSL proceeds to the student. The Senate conferees receded to the House on this language based on the administrative problem, not because of any other alleged problems with certain schools not disbursing GSL proceeds as required.

The Senate and House bills extend the period that state guarantee agencies are required to attempt to collect defaulted loans before submitting them to the Secretary for reinsurance. The House recedes with an amendment that extends to 270 days the period that loans must be held before reinsurance is collected. This period includes 180 days during which the lender or other holder must attempt to collect the loan and an additional 90 days during which the state guarantee agency must pursue collection efforts. This extends the current time period by 150 days.

Both the House and Senate bills include language to strengthen preclaims assistance activities. Lenders and guaranty agencies may be reimbursed through Federal reinsurance for use of collection agencies in reinstating delinquent loans in repayment status. The maximum allowable reimbursement is the lesser of $100 or 2% of the loan value. This section shall take effect immediately upon enactment rather than waiting until regulations are promulgated in order to accomplish savings in FY '86.

The Senate bill requires mandatory payment of administrative cost allowances. The Secretary is required to pay the full 1% ACA for each fiscal year beginning after September 30, 1984. The House recedes.

The Senate bill requires states to establish lenders-of-last resort. The House recedes with an amendment, clarifying the intent.

The Senate bill includes a new loan consolidation program. Borrowers with indebtedness in excess of $5,000 in loans made under the NDSL or GSL program may consolidate those loans at a rate of 10 percent (unless ALAS loans are also consolidated, then the rate is the rate of the highest ALAS loan). Lenders, Sallie Mae, State guaranty agencies, and secondary markets, and eligible higher education institutions may consolidate loans. The yield to lenders on consolidation loans is T-bill plus 3 percent. The House recedes.

The House bill extends the Guaranteed Student Loan program for two years, through fiscal year 1988. The GSL family contribution section of the Student Financial Assistance Technical Amendments Act of 1982 is also extended. The Senate recedes.

The Senate bill requires acceleration of Sallie Mae's repayment schedule to the Federal Financing Bank in FY 86 by $30 million. The increased FY 1986 repayment cannot be used as credit to reduce its payments in FY 1987 or FY 1988. The House recedes.

Both the House and Senate bills include language to help tighten collection efforts. Collection efforts are to be enhanced by the use of credit bureaus, stiffer penalties for late payments, increased auditing of state agencies; disbursement of GSLs through postsecondary education institutions; and a standard federal statute of limitations on collection efforts. The conferees also agreed to language in the credit bureau reporting section that would cover the Secretary of Education, guaranty agencies, eligible lenders, and subsequent holders of loans. The conferees recommend that these entities adhere to the generally accepted standards of credit bureau operations when providing information to and requesting information from these organizations. Nothing in this legislation is intended to regulate the ordinary business practices of a credit bureau.

The House bill includes language requiring discounting income from foreclosures or bankruptcy. Proceeds from the sale of farms or businesses which results from bankruptcy, foreclosure, or forfeiture cannot be counted in determining family income for the purposes of Pell Grant or GSL eligibility. The Senate recedes.

The House bill requires students to have a determination of their Pell Grant eligibility or ineligibility before applying for a GSL. The Senate recedes with a clarifying amendment.

The Senate, but not the House proposal, reduces special allowance payments by 0.25 percent. The Senate recedes.

The House, but not the Senate proposal, requires a need assessment for all students in the Guaranteed Student Loan program. The House recedes.

The House bill requires that all students be charged a 3 percent insurance premium. The House recedes.

The Senate measure contained a provision amending the Walsh-Healey Act and the Contract Work Hours and Safety Standards Act. The House had no comparable provision.

The Senate recedes because of a similar provision currently contained in Public Law 99-145.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 13, 1985.

Hon. AUGUST F. HAWKINS,
Chairman, Committee on Education and Labor, U.S. House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the attached estimate of the budget impact of the reconciliation provisions within the jurisdiction of subconference 27. Table 1 reflects the budget impact of the provisions assuming an October 1, 1985 date of enactment. The estimates in Table 2 assume a December 31, 1985 date of enactment.

If you wish further details on this estimate, we will be pleased to provide them.

With best wishes,
Sincerely,

JAMES BLUM,
(For Rudolph G. Penner, Director.)

TITLE XVII—GRADUATE MEDICAL EDUCATION COUNCIL AND TECHNICAL AMENDMENTS TO THE PUBLIC HEALTH SERVICE ACT

1. Council on graduate medical education (section 17001)

Present law

No comparable provision.

House bill

No provision.

Senate amendment

The Senate amendment establishes a permanent Council on graduate Medical Education. The Council would make recommendations to the Secretary of the Department of Health and Human Services concerning the supply of physicians, physicians needed in primary care and specialties in shortage, foreign medical graduates, appropriate Federal policies concerning graduate medical education, and efforts by schools to meet the recommendations of the Council. Membership of the Council would include Federal officials and private individuals, and would be appointed by the Secretary.

Conference agreement

Section 17001 provides for the establishment of a Council on Graduate Medical Education under Title VII of the Public Health Service Act. This Council would have the responsibility for assessing physician manpower needs on a long-term basis. It would recommend the appropriate Federal and private sector efforts necessary to address these needs and would provide a forum to enable fair consideration of changing medical personnel needs.

Specifically, the Council is charged with providing advice and recommendations to the Secretary and the appropriate House and Senate Committees concerning:

(a) The supply and distribution of physicians in the United States;

(b) Current and future needs in the medical and surgical specialties and subspecialties, in terms of both shortage and excess;

In making these determinations, the Council should consider which disciplines are the most appropriate to provide primary patient care and the supply of physicians available to fill the needs of rural and low-income inner city areas.

The Council is charged to assure, in cooperation with the Secretary of the Department of Health and Human Services, the availability of a data base for graduate physician education of sufficient detail and accuracy to carry out its mission.

(c) Issues relating to foreign medical graduates;

These include: an analysis of the extent to which the service needs of institutions with a high proportion of foreign medical graduates supersede the educational goals of their graduate medical education programs; the quality of education provided in these programs; the validity of the certification process for foreign medical graduates; the question of establishing an accreditation or approval process for schools located outside the United States and Canada; and, the ability of alien foreign medical graduates to obtain exchange visitor visas to enter U.S. training programs.

(d) Appropriate Federal policies with respect to these issues, including recommended policy changes in the financing of undergraduate and graduate medical education training programs and changes in the types of medical education training in graduate medical education programs; and

(e) Appropriate efforts to be carried out by hospitals, schools of medicine, schools of osteopathy, and accrediting bodies with respect to the matters outlined in (4), including efforts for changes in undergraduate and graduate medical education programs.

The role of the accrediting bodies and the residency review committees in assuring the quality of programs should be particularly emphasized.

In addition, the Council is expected to encourage entities providing graduate medical education to conduct activities to achieve voluntarily the recommendations of the Council.

Effective date.—Enactment.

2. Technical amendment to the Public Health Service Act (sections 17002–17004)

Conference agreement

The conference agreement includes four technical amendments to the Public Health Service Act.

Section 17002(a) of the conference agreement amends Section 208 of the Public Health Service Act providing for compensation and allowances. Section 3 of the Health Services Amendments of 1985 (P.L. 99-117) amended Section 208 of the Public Health Service Act to eliminate additional special pay for National Health Service Corps (NHSC) obligees. The purpose of that amendment was to conform the authorizing law with the language in recent Labor-HHS appropriations acts that prohibited such additional special pay. The Labor-HHS appropriations acts did not, however, prohibit the additional special pay for those NHSC obligees serving in the Indian Health Service. The Conferees agreed to correct this mistake by restoring additional special pay for NHSC obligees serving in the Indian Health Service.

Section 17002(b) of the conference agreement further amends Section 208, regarding the compensation of civilian employees of the Gillis W. Long Hansen's Disease Center. This provision is intended to ensure that current employees continue to receive the traditional special pay without interruption, rather than being frozen at current pay levels for extended periods. The language does not affect newly hired employees or those employees who cease to work at the Center. Under this arrangement, current workers will suffer no financial hardships and the special pay program will be phased out through the normal attrition of employees.

Section 17003 of the conference agreement provides authority for the Secretary of the Department of Health and Human Services to contract with fiscal agents to perform claims payment, processing and audit functions with respect to services purchased on a contact basis by the Public Health Service on behalf of eligible Indians, in the case of public health emergencies, or in the case of persons detained at the request of the Immigration and Naturalization Service. Fiscal agents must either be entities which could qualify as carriers for Medicare purposes, or Indian tribes or tribal organizations acting under Indian Self-Determination Act contracts. While the fiscal agents need not be Medicare carriers, they must meet the same requirements as Medicare carriers regarding efficiency and effectiveness of operations, surety bonds, and financial controls.

Section 17004 of the conference agreement amends Section 1910 of the Public Health Service Act authorizing grants for emergency medical services for children. This provision is intended to ensure that in addition to States, accredited medical schools may apply for grants and that only one grant may be made to a State (or to a medical school in that State) in any fiscal year.

Effective date.—Except for Section 17002 (a) which is effective as of October 7, 1985, each of these sections is effective upon enactment.

TITLE XVIII—SMALL BUSINESS PROGRAMS

CBO OUTLAY SAVINGS ESTIMATE FOR FISCAL YEARS 1986–88 RELATIVE TO THE BASELINE

[In millions of dollars]

	Fiscal year—			Total
	1986	1987	1988	
Reconciliation instruction to committees pursuant to Senate Concurrent Resolution 32	−509	−972	−998	−2,479

Surety bond guarantees	1,213	900	1,142
Pollution control contract guarantees	163	50	75

4. 1986 authorizations

For 1986, the House bill authorizes the appropriation of $593.34 million, of which $376 million is for business loan programs; $12 million is for surety bond guarantees; and $205.34 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

The Senate bill authorizes the appropriation of $534 million, of which $312 million is for business loan programs; $12 million is for surety bond guarantees; $210 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

The conference substitute authorizes the appropriation of $515 million, of which $295 million is for business loan programs; $12 million is for surety bond guarantees; $208 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

5. 1987 authorizations

For 1987, the House bill authorizes the appropriation of $627.34 million, of which $410 million is for business loan programs; $12 million is for surety bond guarantees; and $205.34 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

The Senate bill authorizes the appropriation of $561 million, of which $331 million is for business loan programs; $16 million is for surety bond guarantees; $214 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

The conference substitute authorizes the appropriation of $605 million, of which $381 million is for business loan programs; $14 million is for surety bond guarantees; $210 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

6. 1988 authorizations

For 1988, the House bill authorizes the appropriation of $634.34 million, of which $417 million is for business loan programs; $12 million is for surety bond guarantees; and $205.34 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

The Senate bill authorizes the appropriation of $566 million, of which $333 million is for business loan programs; $15 million is for surety bond guarantees; and $218 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

The conference substitute authorizes the appropriation of $634 million, of which $409 million is for business loan programs; $13 million is for surety bond guarantees; $212 million is for salaries and expenses; and such sums as may be necessary for disaster loans.

7. Guaranteed loans—utilization of program guarantee authority

Existing law authorizes SBA to make loans to small businesses through its various guaranteed lending programs as established by annual program ceilings. There is no requirement that SBA utilize the entire guarantee authority provided by law.

The House bill does not change existing law.

The Senate amendment would require the SBA to enter into commitments to guarantee loans, debentures and other types of financial assistance in the full amounts provided by law, subject only to the availability of qualified applications, and limitations contained in appropriation Acts.

The conference substitute adopts the Senate provision with an amendment that this provision apply to MESBIC financings and direct loans as well as guaranteed loans, and other guarantees.

8. Guaranteed loans—percent of loan guaranteed

Existing law provides that guaranteed loans of $100,000 and less made under the 7(a) guaranteed loan program must carry at least a 90 percent guarantee; that guaranteed loans over $100,000 receive a guarantee of between 70 percent and 90 percent; and that SBA only reduce such guarantees below 90 percent on a case by case basis.

The House bill does not change existing law.

The Senate amendment would permit SBA to reduce its guarantee for loans of $100,000 and less from 90 percent to 80 percent; and for loans of more than $100,000 reduces the maximum authorized guarantee from 90 percent to 80 percent.

The conference substitute includes the Senate provision, with an amendment that guaranteed loans of $155,000 or less must carry a mandatory 90 percent guarantee. Guaranteed loans of $155,000 or more may carry a maximum guarantee of 85 percent. Any loan approved as part of the Preferred Lenders Program may carry a lesser guarantee.

9. Guaranteed loans—guarantee fee

Under its current regulations, SBA charges a 1 percent fee for loans it guarantees under the 7(a) guaranteed loan program.

The House bill would require SBA to impose on the small business borrower a 3 percent fee on any guaranteed loan with a term of more than one year.

The Senate bill would require SBA to impose on the small business borrower a 2 percent fee on any guaranteed loan with a term of more than one year.

The conference substitute adopts the Senate provision.

10. SBIC debentures—financing through the Federal Financing Bank (FFB)

Under existing law, Small Business Investment Company (SBIC) financings are funded through the Federal Financing Bank (FFB) when SBICs present their 100 percent SBA guaranteed debentures.

The House bill would prohibit the FFB from purchasing all or any part of SBIC debentures, any interest in SBIC debentures, or any obligation secured by an SBIC debenture or a share in an SBIC debenture.

The Senate bill contains an identical provision.

The conference substitute adopts this provision.

11. SBIC debentures—pooling

The conference substitute adopts this provision.

11. SBIC debentures—pooling

The House bill would provide authorization for the sale of SBIC government guaranteed debentures under the same terms and conditions established for the SBA secondary market under section 5(g) of the Small Business Act, which permits the pooling of loans for sale into the secondary market and the issuance of trust certificates.

The Senate bill contains no comparable provision.

The conference substitute adopts this provision.

11. SBIC debentures—pooling

The House bill would provide authorization for the sale of SBIC government guaranteed debentures under the same terms

and conditions established for the SBA secondary market under section 5(g) of the Small Business Act, which permits the pooling of loans for sale into the secondary market and the issuance of trust certificates.

The Senate bill contains no comparable provision.

The conference substitute adopts the House provision with an amendment that would enact pooling provisions for SBIC debentures under the Small Business Investment Act of 1958 similar to the statutory pooling provisions for 7(a) guaranteed loans under section 5(g) of the Small Business Act. The conferees have established a 60-day time limit within which the Administration shall have selected an agent and issued final rules and regulations. Because of the urgent and compelling need for prompt action by the Administration, the conferees intend that the Administration's actions be exempt from standard federal procurement practices.

12. Section 503 pilot program

Under existing law, section 503 development companies receive financing for projects when they present their SBA-guaranteed debentures to the Federal Financing Bank for financing.

The House bill would establish a pilot program for the public or private sale of section 503 debentures up to $235 million and $280 million in fiscal years 1986 and 1987, respectively, and authorizes the sale of these debentures into the secondary market under the same terms and conditions as provided for under section 5(g) of the Small Business Act. SBA would be required to report on the results of the pilot program either 90 days after all pilot program debentures are sold in each year, or October 1st of each year, whichever date occurs first.

The Senate bill contains no comparable provision.

The conference substitute includes the House provision with an amendment authorizing up to $200 million and $155 million in fiscal years 1986 and 1987, respectively, to be financed through the Federal Financing Bank, and authorizing a pilot program for financing of 503 debentures through the private capital markets up to $200 million and $295 million in fiscal years 1986 and 1987, respectively. In addition, the method of financing of debentures through the pilot program is conformed to the secondary market pooling provisions adopted for the financing of SBIC debentures. Utilization of the pilot program authority for Fiscal Year 1988 was not addressed by the conferees. The conferees have established a 60-day time limit within which the Administration shall have selected an agent and issued final rules and regulations. Because of the urgent and compelling need for prompt action by the Administration, the conferees intend that the Administration's actions be exempt from standard federal procurement practices.

13. User fees

The House bill would require SBA to establish user fees as follows: (1) for SBA publications, the lesser of $5 or cost; (2) loan applications, not to exceed $100; and (3) determinations of eligibility of small concerns for assistance or preferential treatment as a small business concern, not to exceed $100. Fees would be used to offset costs to the extent provided by appropriation Acts.

The Senate bill contains no comparable provision.

The conference substitute does not include the House provision.

14. Report on feasibility of other user fees

The House bill would require SBA, within one year, to report on the feasibility of charging fees for management assistance or other counseling.

The Senate bill contains no comparable provision.

The conferees agreed to a substitute amendment requiring SBA to submit a report by September 30, 1986, specifying user fees currently being charged, and making a recommendation as to whether user fees should be charged for services where there is currently no user fee, and whether statutory authority is necessary to impose a fee.

15. Disaster loans—program levels

Existing law authorizes the appropriation of $500 million for fiscal year 1986 for the disaster loan program.

The House bill repeals the $500 million cap on the disaster loan program for FY 1986. (See item 4)

The Senate bill contains an identical provision.

The conference substitute adopts this provision.

16. Disaster loans—eligibility of agricultural enterprises

Existing law permits agricultural enterprises to apply for and receive SBA assistance if they meet eligibility criteria applied to non-agricultural enterprises, except that if the assistance sought is for a disaster loan, the agricultural enterprise must be declined for, or would be declined for emergency loan assistance at substantially similar interest rates from the Farmers Home Administration.

The House bill specifically removes agricultural enterprises from eligibility for any assistance under the disaster loan program.

The Senate bill contains an identical provision.

The conference substitute adopts this provision, with an amendment that SBA should fund qualified applicants for disasters declared in Fiscal Year 1985, both as to applications on file and applications filed in the future.

17. Duplication of assistance of other agencies

Existing law provides (1) that nothing contained in the Small Business Act shall be construed to authorize SBA to duplicate the activity of other agencies unless expressly provided in the Act; and (2) that if loan applications are being refused or loans denied by another agency due to withholding from obligations or apportionment or due to administratively declared moratorium, then no duplication shall be deemed to have occurred.

The House bill does not change existing law.

The Senate bill repeals this language.

The conference substitute does not change existing law.

18. Disaster loans—technical amendment

The House bill removes the undesignated paragraph provisions following 7(c)(4) of the Small Business Act, which have been superseded by section 7(c)(5) of the Act.

The Senate bill contains an identical provision.

The conference substitute adopts this technical amendment.

19. Nonphysical disaster loans—1986 authorization

Existing law authorizes $100 million in 1986 for the nonphysical disaster loan programs authorized by sections 7(b)(3) and 7(b)(4) of the Small Business Act.

The House bill repeals the $100 million authorization for 1986 for the nonphysical disaster loan programs.

The Senate bill contains an identical provision.

The conference substitute adopts this provision, with an amendment that SBA should fund qualified applicants for disasters declared in Fiscal Year 1985, both as to applications on file and applications filed in the future.

20. Elimination of the nonphysical disaster loan programs

Existing law established nonphysical disaster loan programs in subsections 7(b)(3) and 7(b)(4) of the Small Business Act.

The House bill repeals these nonphysical disaster loan programs and provides no new substitute.

The Senate bill contains an identical provision.

The conference substitute adopts this provision.

21. Labor surplus area

The House bill provides for a maximum population criterion of 25,000 when population criteria are used in labor surplus areas for purposes of priority of award of contracts under section 15 of the Small Business Act.

The Senate bill contains no comparable provision.

The conference substitute adopts the House provision.

22. Contract fraud

The House bill establishes a criminal violation, permitting imprisonment of up to 5 years, and a fine of up to $50,000, or both, for anyone making an intentional misrepresentation of small business status or disadvantaged status in order to obtain: prime contracts under sections 9 or 15 of the Small Business Act, subcontracts under section 8(a) of the Small Business Act, contracts included in subcontracting plans under section 8(d) of the Small Business Act, or any contract awarded under Federal law that uses criteria of section 8(d) of the Small Business Act for a definition of program eligibility.

The Senate bill contains no comparable provision.

The conference substitute adopts the House provision with an amendment specifying that this fraud provision apply only to a misrepresentation made in writing.

23. Report on 7(a) loan guarantee program

The House bill would require the SBA to report by December 15, 1985, to the Small Business Committees of the Congress on the options available for establishing a non-federal government 7(a) guaranteed loan program, specifically including an evaluation of the establishment of a federal government-owned corporation to make such loans. The House bill also required an evaluation of charging participating financial institutions an annual fee of between ¼ of 1 percent and 1 percent of the outstanding balance of all 7(a) loan guarantees to that institution, and further the feasibility of suing such fees for a loss reserve or the cost of administration.

The Senate bill contains no comparable provision.

The conference substitute adopts the House provisions.

24. Limitation on use of SBA loans

The House bill prohibits loans under section 7(a) of the Small Business Act to any

applicant who performs abortions, engages in abortion research, promotes abortions or trains any individual to perform abortions, except that it allows financing of applicants involved in performing, promoting, or recommending abortions in cases where the life of the mother would be endangered if the fetus were carried to term.

The Senate bill contains no comparable provision.

The conference substitute does not include this provision.

25. Surety bond maximum contract guarantee

Existing law permits SBA to issue a surety bond guarantee to qualified applicants on a contract up to $1 million.

The House bill makes no change in existing law.

The Senate bill would increase from $1 million to $1,500,000 the contract amount that SBA may guarantee under the surety bond program.

The conference substitute adopts the Senate provision with an amendment that the maximum contract guarantee amount be set at $1,250,000.

26. Eligibility of Indian tribes as socially and economically disadvantaged small business concerns

Existing law specifically identifies persons who are Black Americans, Hispanic Americans, Native Americans, and Asian Pacific Americans among those individuals who may be considered as socially disadvantaged persons. Existing law also defines what economically disadvantaged means and provides that a "socially and economically disadvantaged small business concern" is any small business concern which is at least 51 per centum owned by one or more socially and economically disadvantaged individuals; or, in the case of any publicly owned business, at least 51 per centum of the stock of which is owned by one or more socially and economically disadvantaged individuals, and whose management and daily business operations are controlled by one or more of such individuals.

The House bill makes no change in existing law.

The Senate bill amends existing law by adding "Indian Tribes" to the list of groups that are specifically recognized as socially disadvantaged and establishes criteria that should be used and considered in determining the "economic disadvantage" of Indian Tribes and their eligibility for assistance on equal terms with other socially and economically disadvantaged businesses.

The conference substitute adopts the Senate provision. The conferees, recognizing that some tribally-owned businesses may not pay federal taxes due to the sovereign status of tribes, which may provide an advantage over other section 8(a) program participants, direct the Small Business Administration to carefully monitor this situation and, if SBA finds a problem, report its findings and recommendations to the House and Senate Small Business Committees.

27. Size standard for agricultural enterprises

By regulation, SBA has established a maximum of $100,000 in annual receipts as the size standard for eligibility of agricultural enterprises for assistance under the Small Business Act.

The House bill contains no provision pertaining to the size standard that should be used for agricultural enterprises.

The Senate bill establishes a maximum of $500,000 in annual receipts as the size standard for eligibility of agricultural enterprises for assistance under the Small Business Act.

The conference substitute adopts the Senate provision with a technical amendment. The conferees have agreed on substitute language for the Senate amendment governing eligibility of agricultural enterprises for SBA assistance, including regular business loans under section 7(a). Thus, farms having not more than $500,000 in average annual revenue will be eligible for assistance.

28. Veterans business resource councils

The House bill contains no provision regarding Veterans Business Resource Councils.

The Senate bill encourages the Small Business Administration to evaluate the effectiveness of and work toward the formation of Veterans Business Resource Councils.

The Conferees have agreed on the Senate amendment urging the Administrator to encourage the establishment of Veterans Business Resource Councils in as many districts as practical, and also to evaulate the usefulness of such councils in meeting the needs of veterans. No additional appropriation is authorized for this purpose, and the Committee expects that the financial commitment by SBA for each council should not exceed $2000.

TITLE XIX—VETERANS' PROGRAMS

On October 24, 1985, the House passd H.R. 3500, the proposed "Omnibus Budget Reconciliation Act of 1985". Title X of the bill included the provisions of H.R. 1538, ordered reported by the House Committee on Veterans' Affairs on September 11, 1985, to satisfy its reconciliation instructions contained in section 2 of the First Concurrent Resolution on the Budget for Fiscal Year 1986 (S. Con. Res. 32).

On November 14, the Senate passed H.R. 3128, the proposed "Deficit Reduction Amendments of 1985", after striking out the House-passed text and inserting in lieu thereof the text of S. 1730, title XI of which contained the legislation reported by the Senate Committee on Veterans' Affiars to satisfy its reconciliation instructions in section 2 of the FY 1986 budget resolution.

On December 5, the House amended the Senate-passed H.R. 3128 by inserting the House-passed texts of H.R. 3500 and H.R. 3128, and requested a conference with the Senate. Title X of H.R. 3500 as it originally passed the House was redesignated as Title X (sections 1951-1982) of Division A of the House amendment to the Senate amendment to H.R. 3128.

The following material refers to the Senate amendment to H.R. 3128 as the "Senate bill", to the House amendment to the Senate amendment as the "House bill", and to title XIX of the Reconciliation Act conference report as the "conference agreement".

SUBTITLE A—HEALTH CARE

Both the House bill (section 1972) and the Senate bill (sections 1101-07) would, as discussed below, amend chapter 17 of title 38, United States Code, to revise existing eligibilities for health care furnished by the Veterans' Administration, and to establish a "health-care income threshold" for purposes of determinations of eligibility based on "inability to defray" the cost of needed care.

The conference agreement (section 19011) contains such provisions as discussed below.

Hospital Care

House bill

The House bill would amend the eligibility requirements, set forth in present section 610(a) of title 38, for veterans seeking VA hospital care. The six categories of veterans eligible for such health care under current law would be revised and restated as nine separate categories, and the separate basis of eligibility for non-service-connected veterans 65 years of age or older (without regard to income) contained in current law would be eliminated.

Under the House bill, the Administrator would be required to furnish hospital care determined by the Administrator to be necessary to:

(1) any veteran for a service-connected disability;

(2) a veteran discharged for a disability incurred or aggravated in line of duty;

(3) a veteran entitled to receive disability compensation;

(4) a veteran disabled as a result of VA treatment or vocational rehabilitation;

(5) certain Vietnam veterans exposed to certain toxic substances and veterans exposed to ionizing radiation from nuclear explosions;

(6) former prisoners of war;

(7) veterans of the Spanish American War, Mexican border period, or World War I; and

(8) veterans who are unable to defray the expenses of necessary care.

The current limitation on furnishing hospital care "within the limits of Veterans' Administration facilities" would no longer be applicable to these eight categories of eligible veterans.

A veteran would be eligible for necessary medical care under category (8) if the veteran's family's income in the 12 months preceding the application for care was no greater than 3.34 times the maximum annual rate of VA pension payable to totally disabled veterans (referred to below as the "health-care income threshold"). In determining the incomes of veterans for the purpose of this category, the Administrator would be required to use the same methods and criteria used to determine annual income (including taking into account family income) for the purposes of VA improved pension eligibility under chapter 15 of title 38, United States Code. The maximum income level for health care would be increased each year by the same percentage increase applicable to the maximum pension rate. Thus, as of the time the House passed the bill, the "health care income threshold" would be $19,068 for a veteran with no dependents and $24,977 for a veteran with one dependent, plus $3,233 for each additional dependent. On December 1, 1985, the VA pension income standard increased by 3.1 percent, by virtue of present section 3112(a) of title 38, United States Code, and reference to the consumer price index.

The House bill would establish, as a ninth category of veterans eligible for hospital care, those seeking care for treatment of non-service-connected disabilities who do not fall into one of the eight other categories. Thus, this last category would consist of those veterans whose income and assets exceed the health-care income eligibility threshold. They would be required to make an annual payment equal to the Medicare deductible ($492 in 1986) in order to receive needed care. Such care could be provided only "within the limits of Veterans' Administration facilities".

The House bill would also provide that nothing in these provisons would (1) require the Administrator to furnish hospital care in a facility other than a VA facility or to furnish care to a veteran to whom another agency of a Federal, State, or local government has a duty to provide care in an institution of that government, or (2) restrict the Administrator's discretion to determine the appropriateness of furnishing medical services, therapies, or programs under chapter 17 of title 38 or in what manner they will be furnished.

Senate bill

The Senate bill would create three categories of eligibiity for hospital care. Under the first category, the Administrator would be required to furnish hospital care determined to be reasonably necessary for service-connected disabilities and for any disability of veterans who have service-connected disabilties rated at 50 percent or more. This care would be required to be furnished through VA facilities or, to the extent authorized, through non-VA facilities except in the case of a veteran under incarceration as to whom the Administrator could (1) decide not to furnish care in a VA facility if to do so would not be feasible in terms of the security that would be necessary and (2) provide care under contract in a non-VA facility to the extent authorized.

Under the second category, which would remain essentially unchanged from current law (except that the separate basis of eligibility for veterans 65 years of age or older would be eliminated), the Administrator would be authorized, through VA facilities or, to the extend authorized, through non-VA facilities, to furnish reasonably necessary hospital care to veterans with service-connected disabilities rated at less than 50 percent; veterans who, but for the receipt of retired pay, would be entitled to disability compensation; veterans who are eligible for compensation for disabilities incurred as VA patients or as participants in a VA vocational rehabilitation program; veterans who were discharged from military service for disabilities incurred or aggravated in the line of duty; former prisoners of war; Vietnam veterans exposed to certain toxic substances and veterans exposed to ionizing radiation from nuclear explosions; Spanish-American War, Mexican border period, or World War I veterans; and veterans unable to defray the cost of necessary care.

Under the third category, the Administrator would have the authority, through VA facilities or, to the extent authorized, through non-VA facilities, to furnish, to the extent facilities and resources are otherwise available, reasonably necessary hospital care for the non-service-connected disability of a veteran not included in categories one or two whose annual family income for the calendar year preceding the veteran's application for care exceeds $25,000 and who agrees to make certain payments to the United States in connection with such care. In determining the incomes of veterans for the purpose of this category, the Administrator would be required to use the same methods and criteria used to determine annual income (including taking into account family income) for the purposes of VA improved pension eligibility. Further, the Administrator would be given authority to prescribe regulations defining the circumstances under which a non-service-connected veteran having an annual income or estate above a certain level would be ineligible for VA care.

Conference agreement

The conference agreement (section 19011(a)) generally follows the House provision. It would establish two groups of VA health-care eligibilities. Under the first group, the conference agreement would require the Administrator to furnish needed hospital care through VA facilities, and authorize the Administrator to furnish needed hospital care in non-VA facilities as authorized, to the first eight categories from the House bill except that the third category from the House bill is subdivided into two categories—veterans with service-connected disabilities rated at 50 percent and above and any other veterans who have service-connected disabilities. The ninth category of veterans would consist of veterans who are unable to defray the expenses of necessary care—those who are receiving chapter 15 VA improved pensions or are eligible for Medicaid or whose annual family incomes" do not exceed the "Category A threshold" ($15,000 for veterans with no dependents and $18,000 for veterans with one dependent with an increase of $1,000—approximately equal to the amount of the VA pension allowance ($999 as of December 1, 1985)—for each additional dependent). These amounts would be increased on January 1 of each year (beginning January 1, 1987) by the same percentage by which VA chapter 15 improved pension benefits are increased on the preceding December 1 (pursuant to section 3112 of title 38).

The conferees intend that, for the categories of veterans specified in section 610(a)(1) of title 38 (as revised by this section)—those to whom the Administrator is required to furnish hospital care—the VA's sole obligation with respect to needed hospital care for these veterans is (1) if a veteran is in immediate need of hospitalization, to furnish an appropriate bed at the VA facility where the veteran applies or, if none is available there, to furnish a contract bed (as authorized under current law as recodified in new section 603) or to arrange to admit the veteran to the nearest VA medical center (VAMC), or Department of Defense facility with which the VA has a sharing agreement, with an available bed, or (2) if the veteran needs non-immediate hospitalization, to (A) schedule the veteran for admission where the veteran applied, if the schedule there permits, or (B) refer the veteran for scheduling and admission to the nearest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed and facilitate the veteran's admission there. The VA, of course, as also noted above, would also retain any existing discretionary authority to furnish health care to these veterans.

Also, if there are 2 or more veterans applying for the same bed at a particular facility on a non-emergent basis and one is seeking care for a service-connected disability or has a 50-percent-or-more service-connected disability, the conferees intend that that veteran should receive the bed. With respect to the remaining veteran, he or she, as noted above, would be scheduled for the next available bed at the VA facility where the veteran applies or, if none is available there, would be furnished a contract bed (as authorized under current law as recodified in new section 603) or arrangements would be made (1) to admit the veteran to the nearest VA medical center (VAMC), or Department of Defense facility with which the VA has a sharing agreement, with an available bed, or (2) if the veteran needs non-immediate hospitalization, to (A) schedule the veteran for admission where the veteran applied, if the schedule there permits, or (B) refer the veteran for scheduling and admission to the nearest VAMC, or DOD facility with which the VA has a sharing agreement, with an available bed and facilitate the veteran's admission there. The VA, of course, as also noted above, would also retain any existing authority to furnish health-care to that veteran.

The conference agreement (section 19011(a)) would provide for a second eligibility group as to which the Administrator "may", through VA facilities and through non-VA facilities as authorized, furnish needed hospital care to the extent that resources and facilities are available, to non-service-connected veterans with incomes above $15,000 for those with no dependents and $18,000 for those with one dependent, plus $1,000 for each additional dependent. For those non-service-connected veterans with incomes above the "Category B" threshold ($20,000 for those with no dependents and $25,000 for those with one dependent, plus $1,000 for each additional dependent), the Administrator "may", through VA facilities and through non-VA facilities as authorized, and to the extent that resources and facilities are otherwise available, furnish needed hospital care if the veteran agrees to make certain payments to the VA in connection with that care. Each of the amounts would be increased on January 1 of each year (beginning January 1, 1987) in accordance with the VA pension-COLA increase percentage.

The conference agreement further includes a provision specifying that nothing in section 610 of title 38, relating to eligibility for hospital and nursing home care (as revised by the conference agreement), requires the VA to furnish care to a veteran to whom another government entity has a legal duty to provide care in a government institution—for example, this would apply to an incarcerated veteran.

With respect to the revisions in hospital-care eligibility, the conferees intend that care be furnished to service-connected disabled veterans, low-income veterans, and, to the extent resources are available, other eligible veterans.

The conferees note with approval the statements made by the Chairman and Ranking Minority Member of the Senate Committee on Veterans' Affairs during the debate on the Senate bill (pages S 15467 and S 15471, respectively, of the CONGRESSIONAL RECORD for November 14) with respect to the effect of the use of the word "may" in providing VA health-care eligibility (in current law and the revised eligibility provisions) from the standpoint that the term does not connote discretion, on the part of the Administration, to withhold funds appropriated for the furnishing of care or, on the part of the VA, to withhold needed care that the VA has the capacity to provide. As indicated there, and the conferees agree, the amount of care that the VA provides to eligible veterans necessarily depends upon the level of funds appropriated for that purpose.

The conferees further note that this legislation would not change current law or practice regarding the beneficiary travel program.

The conferees recognize that in some cases it may not be readily determined with certainty, at the time that the veteran first applies for VA care during a calendar year, to which eligibility category the veteran belongs. Thus, where necessary to avoid delay-

ing medical attention beyond the point at which it may be needed, the conferees intend that the VA make tentative eligibility-category determinations based on the available evidence at the time, subject to modification when a final determination can be made.

Also, in light of the uncertainties that may exist at the time of application and in view of the fact that even determinations based on apparently sufficient information may need to be changed on the basis of new evidence, the conferees expect the VA to require at least those veterans applying for VA care for the first time during a calendar year to sign an agreement to make the payments required by law if it is ultimately determined, by reason of their income during the preceding calendar year and any other matters relating to eligibility, that their eligibility is contingent upon their agreeing to make such payments. Of course, the agreement should also state what those payment amounts are.

In a similar vein, the conferees note that veterans with annual incomes above the applicable income threshold for payments would generally be eligible for care or services only upon the veteran (or someone authorized to act for him or her) agreeing to pay for those services before they are furnished. However, the VA has full authority under current section 611(b) to furnish hospital care or medical services in emergency cases and to charge appropriately for such care, and the conferees stress that this emergency authority would be applicable in the case of a veteran in this category of eligibility who is unable to execute such an agreement prior to the commencement of care. What, if any, payments the veteran would ultimately be required to make would, of course, depend on the eligibility determination made after the fact.

The conferees expect that the form used for the agreement to pay would clearly state eligibility criteria as well as potential liability

Nursing Home Care

House bill

The House bill would provide that the VA "may within the limits of Veterans' Administration facilities" furnish nursing home care to the nine categories of veterans eligible for hospital care (as discussed above) under the House bill. Those veterans having incomes above the applicable "health-care income threshold" in the House bill could be furnished nursing home care if they agreed to make certain prescribed payments in connection with their care.

Senate bill

The Senate bill would provide that the Administrator, through VA facilities or through non-VA facilities as authorized, "shall" furnish nursing home care determined to be reasonably necessary for a service-connected disability and "may" furnish nursing home care determined to be reasonably necessary for any veteran having hospital care eligibility under the Senate bill (as discussed above). Those having incomes above the applicable health-care income eligibility threshold in the Senate bill could be furnished nursing home care if they agreed to make certain prescribed payments in connection with their care.

Conference agreement

The conference agreement (section 19011(a)) makes no change in VA nursing home care eligibilities in current law except to provide that non-service-connected veterans with incomes above the "Category B threshold" would be eligible only upon agreeing to make certain payments in connection with their care.

Domiciliary Care

House bill

The House bill contained no provision regarding eligibility for VA domiciliary care.

Senate bill

The Senate bill would authorize the Administrator to furnish reasonably necessary domiciliary care through VA facilities to veterans who are determined by the Administrator to be incapacitated from earning a living and to have no adequate means of support.

Conference agreement

The conference agreement makes no change in VA domiciliary care eligibilities in current law.

In leaving current law intact regarding domiciliary-care eligibility, the conferees are not expressing their satisfaction with the status quo. Both Committees on Veterans' Affairs plan to hold hearings next year to consider appropriate revisions to the eligibility for domiciliary care as provided by section 610(b)(2) of title 38.

Outpatient Treatment and Home Health Services

House bill

The House bill would require the Administrator to furnish outpatient treatment to those veterans with outpatient treatment eligibility under current law, but would also specify that there is no requirement to furnish services to those non-service-connected disabled veterans with incomes that exceed the applicable health-care income eligibility threshold discussed above (under the heading "Hospital Care") unless they agree to make payment in connection with such services.

The House bill would make no change in eligibility for home health services except to provide that the eligibility of a non-service-connected veteran whose income exceeds the health-care income eligibility threshold would be contingent upon the veteran's agreement to make payment in connection with such services.

Senate bill

The Senate bill would amend current law to require the Administrator—"shall" rather than "may" as in current law—to furnish (directly or by contract) outpatient treatment and home health services determined to be reasonably necessary to any veteran for a service-connected disability and for any disability of a veteran with a service-connected disability rated at 50 percent or more, except in the case of a veteran under incarceration as to whom the Administrator could (1) decide not to furnish care in a VA facility if to do so would not be feasible in terms of the security that would be necessary and (2) provide care under contract in a non-VA facility to the extent authorized. Otherwise, the Senate bill would not modify current eligibilities for outpatient treatment and (except to increase the maximum amount that may be expended for home structural alterations from $600 to $2,500 for a veteran with a 50-percent-or-more-service-connected disability) home health services except to specify that non-service-connected disabled veterans with incomes above the applicable health-care income eligibility threshold would be eligible only upon agreeing to make payment in connection with such treatment or services and to the extent that resources and facilities are otherwise available.

Conference agreement

The conference agreement (section 19011(b)) would make no change in current law eligibilities relating to outpatient treatment or home health services (except with respect to the cap on home health structural alterations payments, described above) except to provide that non-service-connected veterans with incomes above the Category B threshold (discussed below under the heading "INCOME THRESHOLDS") would be eligible only upon agreeing to make payment in connection with such treatment or services and to the extent that resources and facilities are otherwise available.

Amount of Payments

Both the House and Senate bills contain provisions to specify the amounts that veterans with incomes above the income thresholds must agree to pay in order to be eligible for VA health care.

House bill

The House bill would establish payment requirements as follows:

Hospital care or nursing home care, or both: During any 12-month period, the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect at the beginning of the applicable 12-month period ($492 in 1986).

Outpatient treatment: For each visit (except for outpatient services furnished to complete treatment following hospitalization), the amount equal to 20 percent of the estimated average cost of an outpatient visit to a VA facility during the fiscal year in which the treatment is furnished.

During any 12-month period, a veteran would not be required to pay in total for any mode of care or combination of modes of care an amount greater than the amount of the inpatient Medicare deductible.

Senate bill

The Senate bill would establish payment requirements as follows:

Hospital care or nursing home care, or both: For each 60 days of care during an episode of care (a period beginning on the first day of hospital or nursing home care and ending at the close of the first period of 60 consecutive days thereafter during which the veteran receives neither hospital nor nursing home care), the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect when the care is furnished.

Outpatient treatment: For each visit, the amount equal to a percentage—the percentage that Medicare generally does not pay for such treatment (20 percent at present)—of the estimated average cost of an outpatient visit in a VA facility during the fiscal year in which the treatment is furnished.

Conference agreement

The conference agreement (section 19011(a)(2) and (b)(2)(F)) contains provisions specifying, in the cases of veterans who must agree to make payments in order to be eligible for VA health care (those with incomes above the Category B level), the amounts that they must pay, as follows:

Hospital care: During any 365-day period (1) for the first 90 days of care (or part thereof), the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible in effect at the beginning of the 365-day period, and (2) for each succeeding 90 days of care (or part thereof), the lesser of the cost of furnishing the care or one-half of the amount of that inpatient Medicare deductible.

Nursing home care: During any 365-day period, for each 90 days of care, the lesser of the cost of furnishing the care or the amount of the inpatient Medicare deductible.

Outpatient treatment: For each outpatient or home health visit, the amount equal to 20 percent of the estimated average cost of an outpatient visit to a VA facility during the fiscal year in which the treatment is furnished, but not to exceed during any 90-day period the amount of the inpatient Medicare deductible in effect at the beginning of that period.

Combination of hospital and nursing home care: In the case of a veteran who pays the inpatient-Medicare-deductible amount in connection with VA-furnished hospital or nursing home care and who, before using 90 days of the initial mode of care (hospital or nursing home) within a 365-day period, is furnished the other mode of care, the veteran would not be required to make any payment for the second mode until either (1) the number of days of hospital and nursing home care combined exceed 90, or (2) the beginning of the next 365-day period, whichever occurs first. If the veteran pays an amount equal to one-half of the inpatient-Medicare-deductible amount in connection with receiving hospital care (as when the veteran is receiving more than 90 days of hospital care in a 365-day period) and, before using 90 days of hospital care within the applicable 365-day period, receives VA-furnished nursing home care, the veteran would be required to pay one-half of the deductible amount in connection with the number of days of nursing home care that, when added to the hospital days, do not exceed 90 within that 365-day period.

Payments for combinations of outpatient treatment and hospital and nursing home care: A veteran would not be required to pay an amount greater than the inpatient Medicare deductible in connection with any combination of outpatient and inpatient care furnished during any 90-day period.

The conferees stress that the legislation makes no change in current eligibility for contract hospital, nursing home, or outpatient care and the way that eligibility is applied and intend the Administrator to ensure that expenditures for veterans eligible for care by virtue of agreeing to make payment to the VA have the lowest priority for the use of funds available for contract care as well as the lowest priority for inpatient, outpatient, and nursing home care furnished through VA facilities.

Priorities

House bill

The House bill would repeal the provision, section 612(i) of title 38, requiring the Administrator to implement through regulations the priorities specified in that section for the furnishing of outpatient treatment.

Senate bill

The Senate bill would require the Administrator to prescribe regulations to ensure the implementation of priorities specified in the Senate bill in the furnishing of hospital, domiciliary, and nursing home care and medical services and would require the Administrator to ensure that no guideline, regulation, or other VA issuance has the effect of encouraging the furnishing of care or services in any way inconsistent with such priorities to a veteran whose eligibility is based on agreement to make payments.

Conference agreement

The conference agreement does not contain any such provisions related to priorities except a provision (in section 19011(b)(4)) adding veterans in receipt of VA improved pension under chapter 15 of title 38, as a new, sixth priority for outpatient care under present section 612(i).

Income Thresholds

House bill

The House bill would amend section 622 of title 38, relating to evidence of veteran's "inability to defray the cost of necessary expenses" in connection with establishing eligibility for VA health care, so as to provide that (in addition to veterans in receipt of any VA pension benefits or eligible for Medicaid) a veteran shall generally be presumed to be "unable to defray" the cost of care if the veteran's family income for the 12-month period preceding the veteran's application for care was equal to or less than 3.34 times the maximum annual rate of improved pension payable to totally disabled veterans under chapter 15 of title 38 (as increased annually pursuant to section 3112 of title 38). Thus, this income threshold amount at the time the House bill was passed was $19,068 for veterans with no dependents and $24,977 for veterans with one dependent, plus $3,233 for each additional dependent. In determining a veteran's annual family income, the Administrator would consider the same items and sources of income and would allow the same exclusions as are considered and allowed under the improved pension program.

Senate bill

The Senate bill would amend section 622 to provide generally that (in addition to veterans in receipt of any VA pension benefits or eligible for Medicaid) a veteran shall be determined to be "unable to defray" the cost of care if, during the calendar year preceding the date of the veterans's application for care, the veterans' family income is not greater than $25,000 and would provide for that amount to be increased by the same percentage and at the same time as each cost-of-living adjustment is made in chapter 15 VA improved pension benefits pursuant to section 3112 of title 38. In determining a veterans' annual family income, the Administrator would be required to consider the same items and sources of income and to allow the same exclusions as are considered and allowed under the improved pension program.

The Senate bill would also provide the Administrator with discretionary authority, in order to avoid hardship, to increase the above-mentioned income level for a specified geographic area.

Conference agreement

The conference agreement (section 19011(c)) would amend present section 622 to provide generally that a veteran shall be determined to be unable to defray the necessary expenses of hospital care if the veteran receives VA improved pension or is eligible for Medicaid, or if, during the calendar year immediately preceding the veteran's application for care, the veteran's family income is not greater than $15,000 for a veteran with no dependents or $18,000 for a veteran with one dependent, plus $1,000 for each additional dependent.

A veteran would be considered not unable to defray the necessary expenses of care and thus liable for making certain payments for care (discussed above under the heading, "AMOUNT OF PAYMENTS") if the veteran's family income exceeds the Category B threshold—is greater than $20,000 for a veteran with no dependents or greater than $25,000 for a veteran with one dependent, plus $1,000 for each additional dependent. Each of the above amounts would be increased on January 1, of each year (beginning January 1, 1987) by the precentage that chapter 15 VA improved pension benefits are increased, pursuant to section 3112(a) of title 38, effective the preceding December 1.

In determining a veteran's annual income, the Administrator would be required to consider the same items and sources of income and to allow the same exclusions as are considered and allowed under the chapter 15 VA improved pension program.

Consideration of Assets in Determining Eligibility

House bill

The House bill would provide that the Administrator may refuse to determine that the veteran is unable to defray necessary medical expenese if the veteran or the veteran's immediate family has sufficient assets so that, under all the circumstances, it is reasonable that some part of those assets be consumed for the veteran's maintenance.

Senate bill

The Senate bill would provide that the Administrator shall not determine that a veteran is "unable to defray" the cost of care if the veteran or the veteran's immediate family has sufficient assets so that, under all the circumstances, the Administrator would be required to consider the same items as the Administrator considers in determining the amount of assets for purposes of the chapter 15 improved pension program.

Conference agreement

The conference agreement (section 19011(c)) follows the House bill. In determining a veteran's assets for this purpose, the Administrator would be required to consider the same items as the Administrator considers in determining the amount of assets for purposes of the chapter 15 VA improved pension program.

Certain Adjustments of Income Eligibility Determinations

The conference agreement (revised section 622(b) of title 38) would enable the Administrator to adjust a veteran's income threshold status where necessary in order to avoid hardship to the veteran in certain cases in which the veteran's income has dropped off substantially from the preceding calendar year amount.

Reports

Both the Senate bill (section 1108) and the House bill (section 1975) would require the Administrator of Veterans' Affairs to submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives reports relating to the furnishing of health care to veterans after the enactment of this Act.

The conference agreement (section 19011(e)) would blend the Senate and House reporting requirements, with three annual reports due by February 1 of 1987, 1988, and 1989, and require the Administrator to include in the reports information regarding the numbers and characteristics of, and health care furnished to, veterans (and amounts of payments by them where appropriate) who are eligible for VA care by reason of any of the proposed new income threshold criteria, and the numbers of and health care furnished to veterans in each of the other categories of eligibility, with breakdowns, in the case of such veterans

with service-connected disabilities, for each percentile disability rating.

Technical Revision of Authority to Contract for Hospital Care and Medical Services

The Senate but not the House bill (1) would delete section 601(4)(C) of title 38, which includes within the definition of "Veterans' Administration facilities"—and thus, in conjunction with provisions in sections 610 and 612, authorizes the VA to contract for hospital care or medical services with—private facilities in certain cases when VA facilities are not capable of furnishing economical care because of geographical inaccessibility or of furnishing the care of services required, and (2) replace that provision with a new section 603, which would recodify current law under section 601(4)(C), for purposes of clarity, without making any substantive change.

The conference agreement (section 19012) follows the Senate provision.

Recovery by the United States of the Cost of Certain Health Care and Services

Both the Senate bill (section 1111) and the House bill (section 1973) would amend present section 629 of title 38, United States Code—relating to the United States' authority to recover under workers' compensation laws or plans, from automobile accident reparation (auto no-fault) insurers, and from crime-victim compensation programs the reasonable costs of VA-furnished non-service-connected health care to the extent that the insurer or program would be liable to a non-Federal provider—so as (1) to add authority for the United States to recover from a third party under a health-plan contract (a defined term that includes, for example, health-insurance policies) the reasonable costs of VA care furnished to a veteran who does not have a service-connected disability and is entitled to care or reimbursement for care from the insurer; (2) to require the Administrator to prescribe regulations to govern determinations of the reasonable cost of care or services; (3) expressly to authorize the Administrator to compromise, settle, or waive claims of the United States under section 629; (4) to specify that money collected under section 629 shall be deposited in the Treasury; and (5) to provide for the changes in existing law made by amendments to section 629 to a apply prospectively, that is, only with respect to care furnished after the date of enactment and only with respect to heatlh-plan contracts that are entered into, renewed, or modified after the date of enactment.

The conference agreement (section 19013) contains these provisions.

The conferees note that, in revsing the wording of existing provisions of section 629 pertaining to recovery under workers' compensation laws or plans, from automobile accident reparation insurers, and from crime-victim compensation programs, the conferees do not intend to make any substantive revisions in current law or in its application or to overrule any judicial interpretations of these provisions.

The Senate bill, but not the House bill, would delete from section 629(b) provisions specifying that the amount that the United States may recover under that section may not exceed the lesser of (1) the reasonable cost of the care involved as determined by the Administrator, or (2) the maximum amount specified by applicable State or local law or by any relevant contractual provision.

The conference agreement (revised section 629(a)(1) of title 38) follows the Senate provision.

The conferees agree that, in light of the provisions in section 629(a) providing for recovery by the United States of the reasonable cost of the VA-furnished care "to the extent" that the veteran (or the provider of the care) would be eligible for payment for the care had it been furnished by a non-Federal provider, the provisions being deleted are surplusage.

The Senate bill, but not the House bill, would specify, in the case of a health-plan contract containing the requirement for payment of a deductible or copayment by the veteran, (1) that the veteran's not having paid the deductible or copayment with respect to VA-furnished care does not preclude recovery under section 629, (2) that the amount that the United States may recover under section 629 shall be reduced by the appropriate deductible or copayment amount, or both, and (3) that a veteran eligible for VA care shall not be required by reason of section 620 to make any copayment or deductible payments in order to receive such care.

The conference agreement (revised section 629(a)(3) contains these provisions.

The Senate bill, but not the House bill, would (1) require the Administrator, before prescribing the regulations for determining the reasonable cost of care or services (discussed above), to consult with the Comptroller General of the United States; (2) require the Comptroller General, within 45 days after the regulations (or any amendment to them) are prescribed, to submit to the Committees on Veterans' Affairs of the Senate and the House of Representatives the Comptroller General's comments on and recommendations regarding such regulations (or amendments); and (3) require that the regulations provide that in no event may such reasonable cost exceed an amount equal to what the third party would pay for the care or services under the prevailing rates applicable under its contracts with non-Federal facilities in the geographic area in which the VA facility that provided the care or services is located.

The conference agreement (revised section 629(c)(2)) follows the Senate amendment.

The House bill, but not the Senate bill, would provide the Administrator with express authority to enter into agreements with health-plan contractors for the purpose of determining reasonable costs.

The conference agreement does not contain this provision.

The conferees note that the Administrator is already authorized by section 213 of title 38, relating to the Administrator's authority to enter into contracts for necessary services, to enter into such agreements.

Both the Senate and the House bills would require that the medical records of a health-plan beneficiary for the cost of whose care recovery is sought be made available for the purpose of enabling the third party to verify that the care for which recovery is sought was furnished. The Senate bill, but not the House bill, would also provide that the records shall be made available under such conditions to protect their confidentiality as the Administrator shall prescribe in regulations and that the records may also be made available to permit the third party to verify that the provision of the care involved meets criteria generally applicable under the health-plan contract.

The conference agreement (revised section 629(h)) follows the Senate bill.

The Senate bill, but not the House bill, would require the Administrator to submit to the Committees on Veterans' Affairs a 6-month report and annual reports on the process for and results of the implementation of the amendments to section 629.

The conference agreement would require two such reports, one due not later than 6 months after the date of enactment and the other, to provide information through at least the end of fiscal year 1987, due not later than February 1, 1988.

Medicare Providers' Acceptance of Veterans' Administration Beneficiaries at Medicare Rates

The House bill (section 1974), but not the Senate bill, would amend chapter 17 of title 38, United States Code, relating to VA health care, to insert a new section 625 to require non-Federal providers of hospital services under the Medicare program to accept VA beneficiaries on a basis similar to that on which they accept Medicare beneficiaries; to require those providers to accept VA payments made in accordance with VA regulations as payment in full; to authorize the Administrator to report violations of these requirements to the Secretary of Health and Human Services; and to authorize the Secretary to terminate a provider's participation in the Medicare program on the basis of such violations.

The conference agreement does not contain this provision.

SUBTITLE B—COMPENSATION RATE INCREASES

DISABILITY COMPENSATION

House bill

The House bill (sections 1962 through 1964) would amend chapter 11 of title 38, United States Code, relating to compensation for service-connected disability, to increase by 3.7 percent, effective December 1, 1985, the basic rates of service-connected disability compensation for veterans, the rates payable for certain severe disabilities, the dependents' allowances payable to veterans rated 30-percent or more disabled, and the annual clothing allowance for certain disabled veterans.

Senate bill

The Senate bill (section 1121) would limit the fiscal year 1986 disability compensation COLA to a maximum of 3.7 percent—the same percentage that the Congressional Budget Office projected for the fiscal year 1986 Social Security/VA pension cost-of-living adjustment at the time the Senate Veterans' Affairs Committee reported its reconciliation recommendations to the Senate Budget Committee. Thereafter, on December 2, 1985, the Senate passed S. 1887 providing (in sections 101 through 103) for a 3.1-percent increase, the same percentage as the actual percentage increase for the Social Security/VA pension cost-of-living adjustments, effective December 1, 1985.

Conference agreement

The conference agreement (sections 19021 through 19023) would increase these rates and allowances, effective December 1, 1985, by 3.1 percent.

DEPENDENCY AND INDEMNITY COMPENSATION

House bill

The House bill (sections 1965 through 1967) would amend chapter 13 of title 38, relating to dependency and indemnity compensation (DIC) for service-connected deaths, to increase by 3.7 percent, effective December 1, 1985, rates of DIC payable to the surviving spouses and children of veterans whose deaths were service connected.

Senate bill

The Senate bill (section 1121) would limit the fiscal year 1986 DIC increases to a maximum of 3.7 percent—the same percentage that the Congressional Budget Office projected for the fiscal year 1986 Social Security/VA pension cost-of-living adjustment at the time the Senate Veterans' Affairs Committee reported its recommendations to the Senate Budget Committee. S. 1887 as passed by the Senate provided for a 3.1-percent COLA.

Conference agreement

The conference agreement (sections 19024 through 19026) would amend chapter 13 to increase these rates, effective December 1, 1985, by 3.1 percent.

SUBTITLE C—MISCELLANEOUS PROVISIONS

Epidemiological Study of Female Vietnam Veterans

The House bill (section 1982), but not the Senate bill, would require the Administrator to provide for the conduct of an epidemiological study of any long-term adverse gender-specific health effects in female Vietnam veterans that may result from their exposure to Agent Orange or to other phenoxy herbicides and would authorize the Administrator to expand the scope of the study to evaluate any long-term adverse gender-specific health effects in females resulting from other aspects of service in Vietnam. However, the Senate, on December 2, 1985, passed a similar provision in S. 1887, the "Veterans' Compensation and Benefits Improvements Act of 1985" (section 507), that would unless determined not to be scientifically feasible, require the Administrator to provide for the conduct of a female Vietnam veterans health-experience study and permit investigation of any long-term adverse health effects which may have resulted from traumatic experiences, exposure to phenoxy herbicides (including Agent Orange), or other experience or exposure.

The conference agreement (section 19031) follows the Senate provision.

Advisory Committee on Native-American Veterans

The House bill (section 1981), but not the Senate bill, would provide for the establishment of a VA Advisory Committee on American-Indian Veterans to examine and evaluate VA programs and activities with respect to the needs of American-Indian veterans and to transmit reports on its examinations and evaluation to the Administrator of Veterans' Affairs for subsequent transmittal to the Congress. However, on December 2, 1985, the Senate passed a comparable provision in S. 1887, the "Veterans' Compensation and Benefits Improvements Act of 1985" (section 505), which would provide for the establishment of a VA Advisory Committee on Native American Veterans (including Alaska Natives).

The conference agreement (section 19032) contains such a provision, blending together aspects of the two provisions, naming the Advisory Committee the "Advisory Committee on Native-American Veterans" and specifying that representatives of American Indians and of other Native Americans each would serve on the Committee.

Waiver of waiting Period for Administrative Reorganization of Certain Veterans' Administration Automated Data Processing Activities

The conference agreement (section 19033) also contains a provision that would waive the waiting period prescribed by section 210(b)(2) of title 38—which provides, in part, that the VA may not in any fiscal year implement certain administrative reorganizations unless the Administrator, not later than the date on which the President submits the budget for that year, submits a report containing a detailed plan and justification for the reorganization—with respect to a reorganization, described in letters dated November 1, 1985, that were submitted to the chairmen and ranking minority members of the Committees, involving the transfer of certain functions from the VA's Office of Data Management and Telecommunications to the VA's Department of Veterans' Benefits and requesting a waiver of that waiting period.

The conferees have determined that the information contained in the November 1 letters, together with other information subsequently provided to the Committees, constitutes a sufficiently detailed plan and justification (as that term is proposed to be defined by section 501 of S. 1887, as passed by the Senate on December 2, 1985) for this proposed reorganization and that the reorganization will serve to improve the operations of the VA's service and benefits delivery system. Since, under the provisions of section 210(b)(2), the reorganization would not be permitted to be implemented prior to the beginning of fiscal year 1987, the conference agreement would waive the required waiting period in order to permit the Administrator to implement this reorganization prior to October 1, 1986.

In agreeing that this statutory waiver be granted, the conferees intend that the Administrator, as part of implementing the reorganization, develop and implement plans for better coordination and integration between the Department of Medicine and Surgery and the Department of Veterans' Benefits in automated data processing modernization, and are not necessarily expressing agreement with the recommendations of the October 25, 1985, report of McManis Associates. The conferees believe that the Administrator should proceed cautiously in adopting recommendations from that report (particularly those relating to procurement). In that regard, the confereees recommend that the Administrator take full cognizance of the review being conducted by the General Accounting Office, pursuant to a request from the Chairman of the House Veterans' Affairs Committee and the Ranking Minority Member of the Senate Veterans' Affairs Committee, pertaining to certain aspects of the report

RATIFICATION OF CERTAIN TEMPORARILY EXPIRED AUTHORITIES

Veterans' Administration Regional Office in the Philippines

The compromise agreement (section 19034(a)) contains a provision ratifying any action taken by the Administrator during the period beginning on November 1, 1985, and ending on December 3, 1985, in connection with the exercise of the Administrator's authority under section 230(b) of title 38, relating to the establishment of a regional office in the Republic of the Philippines. This authority to operate such an office expired on October 31, 1985, but was extended for three additional years by section 402 of Public Law 99-166.

Contract Care Authority in Puerto Rico and the Virgin Islands

The compromise agreement (section 19034(b)) also contains a provision ratifying any action taken by the Administrator of Veterans' Affairs in connection with entering into any contract to provide, during the period beginning on November 1, 1985, and ending on December 3, 1985, care described in subclause (v) of section 601(4)(C) of title 38, United States Code, relating to the Administrator's authority to provide hospital care and medical services in certain noncontiguous "States" (defined in present section 101(20) to include United States Territories and possessions and the Commonwealth of Puerto Rico), including any waiver made by the Administrator of the applicability to the Commonwealth of Puerto Rico or the Virgin Islands of the restrictions described in that subclause for that period. This authority to provide such care and services also expired on October 31, 1985, but was made permanent in the case of the Virgin Islands, and was extended (with certain limitations) for an additional three years in the case of Puerto Rico, by section 102 of Public Law 99-166, enacted on December 3, 1985

ALCOHOL AND DRUG TREATMENT AND REHABILITATION CONTRACT PROGRAM

The compromise agreement (section 19034(c)) also contains a provision ratifying any action taken by the Administrator of Veterans' Affairs in connection with entering into any contract to provide, during the period beginning November 1, 1985, and ending December 3, 1985, care described in section 620A of title 38, relating to contracts for certain care and treatment and rehabilitative services for eligible veterans suffering from alcohol or drug dependence or abuse disabilities. This authority to provide such care and services also expired on October 31, 1985, but was extended for an additional three years by section 101 of Public Law 99-166.

From the Committee on the Budget, for consideration of the entire Senate amendment and the entire House amendment to the Senate amendment, except for sections 778H, 778I, 780, 781, 783 through 789B, 789D through 789G, subpart A of part 3 of subtitle I of title VII, section 793, subsections (a), (b), (c), (f), and (g)(1) of section 794, and sections 795 and 796 of the Senate amendment, and except for sections 2502(a) and 2503 of division B of the House amendment to the Senate amendment:

WILLIAM H. GRAY III,
BUTLER DERRICK,
MICHAEL D. BARNES,

REPORT ON RESOLUTION PROVIDING FOR REJECTION OF CONFERENCE REPORT ON H.R. 3128, CONSOLIDATED OMNIBUS RECONCILIATION ACT OF 1985

Mr. DERRICK, from the Committee on Rules, submitted a privileged report (Rept. 99-454) on the resolution (H. Res. 349) providing for the House to reject the conference report on the bill (H.R. 3128) to provide for reconciliation pursuant to section 2 of the first concurrent resolution recede from its amendment to the Senate amendment, and to concur in the Senate amendment with an amendment; which was referred to the House Calendar and ordered to be printed.

□ 2000

CONSOLIDATED OMNIBUS RECONCILIATION ACT OF 1985

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 349 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 349

Resolved, That upon the adoption of this resolution the conference report on the bill (H.R. 3128) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, Ninety-ninth Congress) shall be considered as having been rejected, and the House shall be considered to have receded from its amendment to the Senate amendment to said bill, and to have concurred in the Senate amendment with an amendment inserting in lieu of the Senate amendment an amendment consisting of the text of the conference report, with the following modification: strike out Subtitle B of Title XIII.

The SPEAKER pro tempore. The gentleman from South Carolina [Mr. DERRICK] is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the gentleman from Ohio [Mr. LATTA], pending which I yield myself such time as I may consume.

Mr. Speaker, this resolution provides that upon adoption of the rule, the House is deemed to have rejected the conference report to accompany H.R. 3128, the Deficit Reduction Amendments of 1985. It further provides that the House shall be deemed to have receded from its position, and to have concurred in the Senate amendment to the bill, with an amendment.

The amendment to the Senate amendment shall consist of the substitute amendment reported from the committee on conference as modified by the deletion of certain sections of the conference's amendment. The sections which would be stricken from the conference committee's amendment are those which relate to the broad-based tax proposed by the conferees as a means of funding the Superfund Program. The adoption of the rule would effectively remove Superfund funding from the bill, leaving the other body to deal with this modified version of the conferees' decision.

Mr. Speaker, the procedure being employed by this rule is an unusual one. The Rules Committee chose to recommend this approach after sensing that the House indeed wants to see the enactment of a reconciliation measure but has indicated opposition to the use of the broad-based tax to finance the Superfund Program. The committee made its decision after hearing the concerns of several Members of the House earlier this evening who voiced strong opposition to the adoption of the manufacturers' excise tax. While the other body considers the approach an appropriate one, the House clearly rejected it during consideration of Superfund reauthorization legislation on the floor of the House. Further, it has been the position of the House to deal with the taxing provisions related to Superfund

as part of the overall reauthorization of that program. And as our colleagues are aware, that issue was recently considered on the floor of the House.

Adoption of this rule, therefore, allows the reconciliation process to be concluded in the Congress tonight while leaving the issue of Superfund financing to be resolved next year by the conferees on the Superfund reauthorization bill.

Mr. Speaker, having been very much involved in the reconciliation process as chariman of the budget process and reconciliation task force of the Budget Committee. I am pleased that agreement has been reached on this very important piece of legislation. This represents the tireless efforts of 16 House committees and 12 Senate committees, working since the Congress adopted the conference report on the budget resolution on August 1. The 3-year reconciliation instructions in the budget resolution were $75.5 billion. The House passed its reconciliation measures in October and the Senate followed suit in November. This conference agreement, representing the work of 31 subconferences and over 200 Members has resulted in estimated savings of $81.6 billion over 3 years—over the target set in the budget resolution by at least $6 billion. I should note, Mr. Speaker, that this estimate does include the revenues which will be raised by Superfund. Which, by operation of this rule, will not be included in this reconciliation conference report. They will be enacted separately at a later date.

It is imperative that we pass this measure prior to adjourning so that these savings can be achieved. This is the budget process working. This is the commitment the Congress made when it passed the budget resolution last August. This is real deficit reduction, not just talk about reducing the deficit.

Mr. Speaker, this is the 11th hour. This rule provides the Members of the House a single-up-or-down vote on reconciliation for fiscal year 1986. I urge adoption of this rule.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me say I believe that this resolution lives up to the commitment that the majority leader made as far as the deletion of the funding for Superfund is concerned. The matter dealing with teenage pregnancies was removed in conference before it came to the Rules Committee.

So what will happen, if we adopt this rule, we move the funding for Superfund from the legislation, we are merely delaying this question until January or February when we can take it up again. We are doing nothing with Superfund itself, only with revenues.

So I cannot understand why there would be any opposition at this late hour to this resolution.

If you oppose the resolution, what you will be doing is, for all practical purposes, killing this reconciliation bill which saves billions of dollars.

Now I do not think anybody wants to do that. I know there are some interests that would like to see the new VAT that is being proposed in this legislation written into our tax laws. Well, let me say I do not think that is going to happen. Even if this House would turn down this resolution and come forth with another resolution, the President says he will not accept the VAT tax.

To start a new system of taxation for the American people would be absolutely wrong.

Go back and look at the history of the income tax. You know, when they came forth with that, $3,000 was the limit; $3,000, and look at how it expanded, the income tax.

The same thing could happen on VAT if we opened up this whole keg of worms.

Every time the Congress wanted more money for this program or that program, it would increase the VAT. We do not want to get into the history of VAT's in some of these other countries, how detrimental they have been to the economies of these countries. That was fully debated.

I believe that the Rules Committee has taken the proper approach, with the full support of the majority leader, to resolving this matter tonight insofar as reconciliation is concerned and putting over the question of revenues for Superfund until the next session of this Congress.

So I urge my colleagues to support this resolution.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 4 minutes to the gentleman from New York [Mr. DOWNEY].

Mr. DOWNEY of New York. Mr. Chairman, the issues before us tonight are compelling, and I think that for those of us who have been on the VAT patrol for the last 12 hours, we need not drag this out, but it is important to understand what is at stake here tonight.

The House of Representatives has already spoken on the value-added tax; by a margin of 220-204, we turned it down. The House of Representatives has every reason to expect and demand from its conferees, whether they are new or old ones, that the House position be presented to the Senate. What happened in the naming of conferees prior to that vote, we have conferees that decided because the numbers were wrong to recede and concur with the Senate position on the value-added tax. The other body is so desperate and understands the President's opposition and that of the American people that they have decided to hide the VAT under the skirts of reconciliation. People have worked very, very hard on reconciliation. Without the VAT, it is a good bill and should be voted on.

When you vote "aye" tonight for the rule, you will be able to say a couple of things, that you are not intimidated by the other body, that you believe you can make the savings, and that you are unalterably opposed to a value-added tax.

As the gentleman from Ohio mentioned, this is the foot in the door. If we adopt, at the 11th hour, a value-added tax to finance Superfund as part of reconciliation, history will not smile on us. They will say that in a rush to go home, in a rush to close the door on this contentious problem, we found the easy way out. It is not the easy way out. It is the wrong way. Vote "aye" on the rule, send reconciliation back to the other body absent the VAT, and we will have done our job. We will have saved the money that we needed to save, and we will have shut the door once and for all on this most pernicious tax.

Please, please, vote "aye" on the rule when it comes up if you want to kill the VAT and keep reconciliation.

The last point should be an obvious one: The supreme legislator at 1600 Pennsylvania Avenue has already indicated that this legislation is history with the value-added tax. If you want to see it succeed, make sure it is not part of the legislation.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Vermont [Mr. JEFFORDS].

Mr. JEFFORDS. Mr. Speaker, I am sorry to burden the House again with the question of policy and procedure. I asked, along with others, to have a provision in this rule which would allow us—those of us who come from those States that still have not been bludgeoned by the Federal Government to raise their drinking age—to have an opportunity to get all Members to vote on it, and I can understand the Rules Committee desire to protect you from that vote. But I would hope that you would remind yourselves—the next time we show that movie around this country, you know the one we all introduce on film, that shows how the process in Congress works, with Chairman JOHN DINGELL starring and with all of the hearing process—the great committee debates, the floor debates, and so forth, by comparing it as to how this law was enacted. For it did not come from those debates and hearings, it did not come from that process. It came to us without hearings. It came from a sneak attack on the House floor when we were told it was not going to come up. It came to us again as a sneak attack at 1 o'clock in the morning on a

unanimous-consent request after we were told no more legislative business would be considered. And now, after we succeeded in getting it out of the continuing resolution yesterday, here it is again, right now, in this bill which will be coming before us on reconciliation, buried and untouchable.

I would like to see the civics professor or the civics teacher that is able to explain this reprehensible process to his young people, and that this is how Congress really works; or, from another perspective, how a professor of constitutional law, in defending States' rights, is able to say how this law, contrary to the Constitution and the 21st amendment—when this very aspect of Federal involvement was considered and rejected in the constitutional process—is the way the Constitution ought to work with respect to States' rights. One can only imagine where this abrogation of States' rights will lead us in other areas.

It is the saddest moment in my time here, to see this procedure is abusing those young people who have not had the courtesy to be heard, or the ability to ever be represented or meaningfully voted on in this body.

Residents of my home State of Vermont and the Vermont Legislature has passed a joint resolution which, and I quote:

Expresses on behalf of the people of the State of Vermont its outrage and opposition to very instrusive actions by the Federal Government on the drinking age.

The 10th amendment to the U.S. Constitution states:

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

The 21st amendment to the U.S. Constitution states:

The transportation or importation into any State, territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

The legislative history of the 21st amendment shows that a proposed section 3 was deleted, and that said deleted section 3 would have stated that:

Congress shall have concurrent power to regulate or prohibit the sale of intoxicating liquors to be drunk on the premises where sold.

One opponent of the deleted section 3 of the 21st amendment expressed the intent of Congress by saying during the 1933 congressional debate on the amendment:

If Congress gave itself power to regulate the saloon, it would have the power to regulate the place and hours of purchase as well as the age and sex of purchasers. By striking section 3, the Congress reserved these powers to the States.

The proponents of this legislation have used every conceivable tactic to get this bill past this House with no debate and no vote. It was tacked on to the continuing resolution, and now it shows up on the budget reconciliation bill. I guess if we keep adding this amendment to every bill where it is possible to waive points of order and limit debate, eventually it will pass without Members having to vote on the issue.

This should not be in the reconciliation bill. There will be an opportunity for meaningful debate on the merits of the issue when the House considers the Surface Transportation Act next session. So why must we ramrod this amendment through the House on the reconciliation bill? Why make a mockery of the legislative process? Not only is this an unnecessary and unwarranted intrusion of rights specifically granted to States in the Constitution, it is an unnecessary and unwarranted circumvention of the legislative process. I must challenge the treatment of this issue and the process which has allowed the inclusion of this nongermaine issue in the reconciliation bill. There will be no budget savings if this amendment is included in the reconciliation bill.

Back in 1971, after prolonged national debate, the Congress voted to lower the age of voting to 18. The States followed by lowering the age of majority. We judged that those old enough to die for our country are old enough for all rights, obligations, and privileges of citizenship.

But last year, with no meaningful debate, without even a meaningful vote, the Congress approved legislation which instructs the Department of Transportation to withhold highway trust fund money from those States which do not have a 21-year-old drinking age. This is money that the taxpayers of these States have paid into the highway trust fund. Yet we say, "We know what's best for your State, so we're going to take your money away until you do what we say."

How can the Federal Government claim to know what is best for the States? What about the unique problems of the States which border Canada or Mexico? Proponents of the national minimum drinking age cite the benefits of uniformity among the States. However, this legislation creates a whole new set of problems for border States. The largest city in Vermont with a college population of 13,400 is a quick drive to the Quebec Province where the drinking age is 18. This situation exists all across the northern tier where cities such as Buffalo, Detroit, Duluth, Grand Forks, Spokane, and Seattle, with an estimated combined population of 180,000 18- to 21-year-olds, are all within striking distance of Canadian Provinces where the drinking age is less than 20. Along our Mexican border, cities such as Brownsville, Corpus Christi, El Paso, Tucson, and San Diego are all within easy reach of a drinking age less than 21. The combined population of 18- to 21-year-olds in these cities is approximately 152,000. All in all, the total 18 to 21 population that will be tempted to cross international borders is probably close to a half million. The paternal approach taken by Congress disregards the special circumstances involved in this issue, and blackmails Vermont and other border States into taking action which could cost young lives.

In taking this ill-conceived action, Congress is led to believe that it is addressing the national tragedy of drunk driving. Is it? No, because drunk driving is a national problem which cuts across the entire age spectrum.

We are all aware of the statistic that 18- to 21-year-olds make up 9 percent of the country's drinking population, yet they are involved in 17 percent of all alcohol-related accidents. This figure is high, but what of the remaining 83 percent of the accidents?

On a national basis, under 20-year-old drivers account for a high percentage of all fatal car accidents, alcohol related or not. This can be explained in part by their inexperience and propensity to drive with a "heavy foot." The insurance companies certainly see it this way and adjust their rates accordingly. I know this for a fact—I pay for my son's car insurance.

When looking at raising the drinking age to reduce the number of car accidents involving individuals under 20, I think we have to realize that this group, historically, are problem drivers. Data for all fatal car accidents in 1970 show that drivers less than 20 years old accounted for 15 percent of all accidents. This is of course prior to the time the drinking age was generally reduced to 18 across the country. In 1983, this group still accounted for 15 percent of all fatal accidents.

Proponents of the national minimum drinking age often cite statistics which show that States which have raised their drinking age to 21 have experienced reductions in alcohol related fatalities among 18- to 20-year-olds. However, many of these States have also simultaneously toughened drunk driving laws and increased enforcement. I believe that the tougher penalties and enforcement efforts had a more significant impact on the reduction of fatalities than raising the drinking age.

In some States, a higher drinking age has resulted in more fatalities among the age group concerned. Illinois, which raised its drinking age from 19 to 21 effective January 1980, saw alcohol-related fatalities among 19- and 20-year-olds increase by 15 percent in 1981, then decrease by 15 percent in 1982, then increase by 12 percent in 1983. Florida raised their drinking age from 18 to 19, effective

January 1981. Alcohol-releated fatalities among 18-year-olds dropped 5 percent in 1981, then increased 21 percent in 1982 and 26 percent in 1983. I fail to see the connection in these cases.

A few other statistics of interest are worth noting at this time. In 1983, 17- to 20-year-olds were involved in 18.8 percent of all alcohol-related fatal accidents. In this same year, 21- to 24-year-olds accounted for 22.2 percent of these accidents. Figures from my own State of Vermont show roughly the same relationship with 17- to 20-year-old drivers accounting for 22 percent of alcohol-related fatal accidents and 21- to 24-year-olds accounting for 27 percent. If the answer to drunk driving is raising the drinking age, shouldn't we be looking at raising the age to 24? Or, is not the more logical answer to direct educational and other special programs toward our younger generation?

I am concerned because this national minimum drinking age legislation is a phony solution to a very real problem. We need to find real solutions to this national problem, not raise the drinking age and pat ourselves on the back. Many States are enacting tough new drunk driving laws and increasing enforcement of drunk driving laws. State and local governments and school officials are developing innovative education programs.

In my home State of Vermont, bar and restaurant owners are implementing call-a-cab programs. Students at the University of Vermont have organized a "free ride home" for students and local residents who have had too much to drink. We should be commending these students, not taking away the opportunity to make responsible choices about alcohol. We should be educating students about the dangers of drinking and driving, and increasing public awareness of the tragedy of drunk driving with alcohol education programs.

This Congress should be looking at the approach that student groups such as the U.S. Student Association have taken to address the national tragedy of drunk driving. The U.S. Student Association has undertaken a grassroots campaign to educate young adults about the dangers of drunk driving. They have received literally thousands of requests for the pamphlet, "5 Things a Young Adult Can Do About Drunk Driving." We should be commending the efforts of student groups around the country.

I would like to commend the efforts of all individuals and groups committed to increasing awareness about drunk driving. I believe the country is now painfully aware of the tragedy of drunk driving. We are focusing our efforts, through the media and through our schools, on the young people who will be making decisions about drinking and driving.

The Congress should be looking at providing incentives to States to take actions which will have a real impact upon our drunk driving problem. States should be encouraged to adopt strict penalties such as mandatory jail terms for offenders. We should continue to provide Federal support for special drunk driving enforcement units which patrol our highways on Friday and Saturday nights, when over 50 percent of drunk driving fatalities occur. There is no better deterrent to drunk driving than strict penalties and the knowledge that there is a good chance of being arrested. Sweden and other countries with strict drunk driving laws have virtually no drunk driving problems.

Many States would not agree that raising the drinking age is the best way to address the drunk driving issue. Some States with 21-year-old drinking ages also have some of the most lax penalties for drunk driving. Tough penalties and strict enforcement will deter drunk drivers. A 21-year-old drinking age will not. What we are doing if we take this action is allowing business as usual for those over 21 who drink and drive while singling out 18 to 20 year olds for blame, even though statistics show that the majority of drunk driving arrests occur in the 21 to 24 age group.

Proponents cite statistics about how many young lives can be saved by the higher drinking age. I wonder how many more lives could be saved by mandatory installation of airbags. There are many laws we could pass that would save lives. Why must we single out a certain group of adults for discrimination?

The Congress is sticking its nose in somewhere it doesn't belong. This is a State issue. Even as we pass historic legislation which will shift massive Federal responsibilities back to the States, we choose blackmail on an issue which is unquestionably under the jurisdiction of the States. There are important considerations which each State must take into account when considering the drinking age issue. The border with Canada is one such issue.

Mr. Speaker, I resent the way this issue has been brought before the House. With no opportunity for debate, on a bill which has nothing to do with the issue, and on a bill which the House must pass to keep the Government operating, this was a prime example of bending the rules to circumvent the legislative process. What a perfect example for our young voters of how democracy should not work.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Louisiana [Mr. BREAUX].

Mr. BREAUX. Mr. Speaker, I urge a no vote on the rule. I think there is one basic reason why Members who might be for some of the provisions should vote no on the rule. The rule simply kills budget reconciliation. The other body, by a 78-to-1 version, has already passed their version of budget reconciliation. It is incredible information that we get a rule here in the House that allows us to get the Senate to accept what they have passed already.

All of those who voted no on the Downey amendment should vote no on this rule. I think that is very, very clear. For those who might have voted yes on the Downey rule and are looking for a reason to change, let me suggest that if you have any concern about the black lung program, you ought to vote no on this rule; if you have any concern about railroad retirement, you ought to vote no on this rule; if you have any concern about the coal excise tax, you ought to vote no on this rule; if you have any concern about protecting fringe benefits for airline employees, you better vote no on this rule—because all of those provisions are far better if we can get a no vote on this rule and proceed to move forward and get a new rule, which we could do in 5 minutes, and get budget reconciliation adopted.

A no vote on this rule ensures that we have a chance to do budget reconciliation and save about $25 billion over three years besides improve all of those programs that I just mentioned. A no vote on the rule does that, and I would urge my colleagues to vote no.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Louisiana [Mr. MOORE].

Mr. MOORE. Mr. Speaker, at the end of a session, we always get into this. We start doing things in a peculiar and unusual way. And this rule is precisely that. You know and I know that it is very unusual to bring a conference report to the floor minus certain provisions. I do not think I have seen that done before, nor do you. Let me tell you how serious it is. The provision we are cutting out of here is the one that funds Superfund. We all voted overwhelmingly very recently to fund Superfund. Yet in an unusual way, we are cutting that out of here tonight.

As a result, let me tell you what is going to happen. The whole reconciliation bill is going to fall. I have just been told—and there are people you can ask in this Chamber who will confirm that—that if this conference report goes back to the other body with this excised out of it, that is the end of reconciliation for this session. Then you are looking at some time in 1986 and you are looking at the Gramm-Rudman complication that is going to cause this to be an extremely unwise move on the part of the House.

I would urge each of you to think about that and to vote down this rule.

It is a mistake to do this. We are angering the other body. You are doing something that is very unusual. Let us take the reconciliation conference report and vote for it. Let us vote down the rule so that we can approve a rule that will allow us to do that.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 4 minutes to the gentleman from Oklahoma [Mr. JONES].

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would like to remind all Members they should not refer to the vote taken in the other body.

Mr. JONES of Oklahoma. Mr. Speaker, if this body is interested in passing reconciliation and taking credit for $81 billion of spending cuts—deficit cuts—the only way to do that is to vote down this rule and allow the Rules Committee to come right back with a rule that lets us vote up or down on the conference agreement.

This reconciliation package has been the subject of long and arduous conference meetings. This evening, we reached agreement. There is nothing in this conference report that is in disagreement.

The House came out very, very well. We came out essentially with what we wanted with regard to Medicare and the coverage of State and local employees. Only prospective new employees will be covered, and that helps every one of our States. The House came out in this conference report with essentially what we wanted on the Black Lung Disability Trust Fund. The House came out with the extension of the cigarette tax. The House came out with a fringe benefit program and railroad unemployment. We have gotten virtually everything we want. And the other body passed it overwhelmingly.

Now, if we vote for this rule, you have taken out $10 billion of savings. But what is even more important, the other body is not even going to consider a partial conference, and you have done away with all of the reconciliation for this year and you are going to have to go back home and say you dumped reconciliation.

Now, let me refer specifically to the point of this rule that would take out the financing of Superfund.

First of all, it is not a value-added tax. The Tax Code does not identify it as that. They have said that this would be vetoed if this funding mechanism were in there. I can assure you the other body, of the President's party, would not pass in such overwhelming numbers this funding mechanism if they thought the President was going to veto the conference report. They just would not do it. The President or people speaking on behalf of the President has said he would veto it because of trade adjustment, because of the offshore payments, because of Medicaid quality control, because of Medicare cost savings and because of this.

Why did not the Rules Committee come back and take all of those other things out? The financing mechanism for Superfund was passed by the House conferees by a vote 9 to 4. It was not even close.

Now, for rules to come in and just wipe out what 9 out of 13 House conferees said they wanted in this bill is just not right.

So if you really believe and if you want to go home and say you saved reconciliation, that you cut $81 billion over the next 3 years from the deficit, the only way you are going to be able to do that is to vote this rule down and then to vote for a rule immediately thereafter that allows an up or down vote on the conference.

Mr. CAMPBELL. Mr. Speaker, will the gentleman yield?

Mr. JONES of Oklahoma. I yield to the gentleman from South Carolina.

Mr. CAMPBELL. If this rule passes, is it your opinion, as I believe I have heard you state, that the other body would not take this mechanism and that all of reconciliation would be lost and therefore we would lose, in fact, $81 billion in reconciliation over 3 years, inclusive of the Superfund legislation?

Mr. JONES of Oklahoma. The leaders of the other body have made that explicitly clear. The gentleman is absolutely correct. The leaders of the other body, who have gone through this difficult conference and reached an agreement on all points in good faith, have said publicly that if the entire conference is not agreed to, then they will not take up a partial conference; and this session of Congress will close and there will be no reconciliation savings, and those who vote for a rule with that will be responsible for deep-sixing $81 billion of deficit reduction over the next 3 years.

Vote no on the rule.

Mr. LATTA. Mr. Speaker, I yield myself 1½ minutes, and I do so to disagree—I hate to disagree with the former chairman of the Budget Committee, my good friend, JIM JONES. But I just heard him say and the other Members did that if you vote down this rule, you destroy reconciliation, you lose x number of billions of dollars. Humbug. That is crazy.

We could bring back another rule or we could take the same matter up in January. He knows it. So let us not try to deceive anybody that the reconciliation is dead. We can take reconciliation up in January, we can take it up tomorrow. If you defeat the rule, that does not mean that the bill is dead. We had the same thing this week on tax reform, remember? So let us correct the record and not let that stand.

Mr. JONES of Oklahoma. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I yield to the gentleman if he wants to correct his statement.

Mr. JONES of Oklahoma. Well, I do not want to correct my statement. I want to correct the gentleman's understanding of my statement.

My statement was that if this rule passes that that will be the end of reconciliation and we can come back immediately with a new rule and pass it.

Mr. LATTA. Well, I am sure if he checks his statement that was taken down, that he will find that he said you are killing $81 billion, or some fantastic figure like that, in reconciliation if you pass this rule.

Mr. JONES of Oklahoma. Only if this particular rule passes.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Mr. Speaker, I think the thing we ought to keep in mind, if we need a source of revenue for environmental purposes, the measure that we have agreed to in our conference committee provides for that.

We ought to accept that so that we can do something about the environmental concern.

Now, I grow weary of the constant contention of a group that says, "Oh, this is a value-added tax and we must not advance it." It is an excise tax, similar to many other approaches already in the code. And it ought to be put into place. We have long since passed the time when we are just going to fund these measures by general revenue. We ought to have a steady, reliable source of funding, and this particular approach would do it.

There is no hiding behind a contention that there is a value-added tax. It simply is not true—it is not a value-added tax and we ought not to be fooled by those who say it is.

Now, if this bill, without the Superfund element, does go back to the other side, I can tell you that there will be a filibuster, and it will go on and on. That will be the end of reconciliation. You might ask for another rule, but they are going to filibuster unless we include the Superfund. The fact of the matter is, you have got a chance, if you defeat this rule, to move reconciliation and the Superfund forward, and that is the thing that we ought to do. Keep in mind we do not have any provision for an extension for the research and development credits and other expiring provisions that are still out there and have not been touched. They are not in this bill.

So we ought to defeat this rule and we ought to allow this House to move forward on Superfund and reconciliation.

I do not know whether there is another rule in place. You sound like you already have one, but if we adopt it without Superfund, that is the end of it. And I think, therefore, in fairness, we ought to have this broad-based tax, which is going to be the avenue you are going to be following in the years to come, anyway. We ought not to throw up a bugaboo now that this is something you ought to be afraid of. That is what you are going to be faced with from now on.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana [Mr. COATS].

Mr. COATS. I thank the gentleman for yielding.

Mr. Speaker, I cannot help but agree with the gentleman from Oklahoma when he says we have a good reconciliation bill, that it is almost everything the House wanted and virtually all that we worked for and effects some savings.

□ 2030

Where I disagree is with his inclusions, because by the inclusion of the one provision which allows for the VAT tax or MET tax or SET tax, whatever you want to call it, the value-added tax, by that one provision I think we invite a certain veto of this bill. We have gotten a strong—more than strong—word from the White House or from the administration repeatedly for months as to their veto of any kind of a VAT, SET, MET, or whatever you want to call it, any tax on this Superfund.

What is happening here tonight is that we have taken an issue where we have a provision in the House and a provision in the Senate, and we are splitting that issue right down the middle, and by a sleight of hand we are moving the funding into a larger bill that all of us want because we want to effect these savings so that we can avoid the prospect of a conference next year.

Members should not be fooled. We are still going to have to meet to resolve the programmatic differences in this Superfund bill next year. What we are trying to do here or the attempt here this evening is to split out the tax portion so we do not have to deal with that.

What kind of a deal did the House get? The House voted for zero VAT funds. The Senate voted for $5.4 billion of a tax on manufacturers, and the reconciliation of that ends up with $5.7 billion. I do not call that a very good deal for the House. When you go from zero to even higher than what the other body voted, that is not a good deal for the House.

The House expressed its will on this matter. It defeated the VAT tax. It voted for an alternative tax, and the House is being robbed and cheated of its position by this mechanism that we are going through this evening.

Mr. Speaker, I urge support for this rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Ohio [Mr. ECKART].

Mr. ECKART of Ohio. Mr. Speaker, the issue is real clear here. You cannot say you are for Superfund and cleaning up hazardous waste in your back yard or in your district and vote for this rule.

The bottom line is that we have had two votes on Superfund this year. We had a vote a week or so ago when we passed by 380 to 30 a provision to create a program and to fund it, and now you have a chance. You have $10 billion in your hands to end business as usual.

Now, let us look at history here. In 1980, when this body passed Superfund, it came charging out here with $4 billion, and the other body came back with $1 billion. We left here last week with $10 billion and the other body came in with $7 billion. Now, if you want to gamble that come next February, March, April, or May we are going to come back in here with $10, $9, $8, or $7 billion against the fact that we have in our hands 10 billion real hard Gramm-Rudman-proof dollars to effect the cleanup that we know needs to be done in each of our districts, then take the bird in the hand.

This was a difficult trade and an extensive conference. I was on four parts of it. We got what we wanted on black lung. The other body had a 50-percent tax; we knocked them down to 10.

We got what we wanted on public employees on Medicare coverage by only getting new hires. In exchange for that, frankly, we got something that perhaps some of us did not appreciate, but we got our number. We got 10 billion real dollars to start that cleanup with, and I do not think I can bear to stand the crying come next January, February, March, or April when somehow we come up a little light.

When we come up a little light, remember this night here in this Chamber when we had a chance to go home with real money for a real cleanup. Remember this night when we had a chance to get black lung eradicated. Remember this night when we had a chance to protect State and public employees. Remember this night when we had a chance to give quality Medicare and Medicaid coverage for people. Reject the rule. Save your programs. Kill the rule.

Mr. Speaker, let me just simply say that killing this rule is going to save our programs. This is our vote, this is our chance, this is our night.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentlewoman from Rhode Island [Mrs. SCHNEIDER].

Mrs. SCHNEIDER. Mr. Speaker, in reference to the comments previously made by my colleagues, I would like to address the House and to assure the Members that if we are genuinely concerned about environmental cleanup, if we have in our hearts a feeling for the appropriate financing of Superfund, and our philosophy is in fact that the polluters should pay rather than having a consumer tax straight across the board to be borne by every single individual, then certainly we want to be guaranteed that we take advantage of this opportunity to excise the Superfund financing mechanism from reconciliation.

Let me assure the Members that funding for Superfund is totally extraneous to the reconciliation bill. It has nothing to do with deficit reduction. If this VAT does pass, we can be assured that the President will veto it.

But to follow up on my colleagues' comments, if you are going to return to your constituents and say that you made an environmental vote by voting "no" on this rule, you are misleading your constituents. The environmental community has made it clear that they want a "yes" vote on this rule. It is a "yes" vote only that they want.

Mr. LATTA. Mr. Speaker, I yield myself 30 seconds.

I take this time to commend the gentlewoman from Rhode Island [Mrs. SCHNEIDER] for turning the cards up. We might just as well face the issue. The question is whether or not the people who dirtied up the environment want to pay for it or whether they want everybody to pay for it. That is the issue, and I want to commend the gentlewoman for bringing it out.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Texas [Mr. FROST].

Mr. FROST. Mr. Speaker, it is with great reluctance that I rise in opposition to a rule produced by my own committee.

The issue is very, very clear. Either we want $81 billion of savings in reconciliation or we do not. If this rule passes, reconciliation is dead. As the gentleman from Oklahoma [Mr. JONES], the former chairman of the Budget Committee, pointed out, the Senate has passed one version, we will have passed another version, and we will all go home and there will be no reconciliation.

I would urge this body to defeat the rule and send it back to the Rules Committee. There is an alternative way to go. We could report out another rule providing for a separate vote on the question of the VAT. Those Members who feel strongly

about the VAT would have a separate vote; those Members who feel strongly on the other side would have a separate vote.

However, by rolling this into a self-executing rule, we are killing $81 billion of reconciliation.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. THOMAS].

Mr. THOMAS of California. Mr. Speaker, it is interesting sometimes how we take an object that fills several boxes and narrow it down to one particular issue. We have 16 House committees, 12 Senate committees, and thousands of man-hours of labor over 167 items, with subheadings, so that you can multiply the 167 by 10, and you have a number of items that the House had in this provision that the Senate did not. You also have a number of items the Senate had that the House did not. And what we did was reconcile the differences.

Over every single issue that was in disagreement, we came to an agreement. A majority of the Senate conferees signed every single item. A majority of the House conferees signed every single item. There was agreement across the board. You have before you now a rule that imposes someone else's wishes on the conferees that you appointed from both the House and the Senate.

I understand the peculiarities which got this rule in front of us. A commitment was made, and in this rule that commitment is honored, but it is up to the House to decide whether or not it is appropriate.

Now, I know the deck is stacked because it has been folded into the rule. We can unfold it by voting down this rule and by allowing, at the suggestion of the gentleman from Texas, another rule which would provide a separate vote.

We have talked about whether or not the President is going to veto this measure. There was a threatened veto by the Treasury on every single item that came up. I can tell the Members that tonight there is one certainty. The one certainty that we have to hang onto is that if this rule passes and we vote reconciliation out, it is not going beyond those double doors. That is as far as it is going to go tonight. It will not cross the Capitol; it will not pass the Senate. Our only chance is to vote this rule down and let us do it right.

□ 2040

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. Mr. Speaker, there is no way that the value added tax provision should be part of the reconciliation package we are now considering. This rule must be adopted. Not to adopt is essentially to write off the kind of taxation policy and the kind of environmental policy that this House went on record in clear and unmistakable fashion in asserting just a few days ago.

The issue is very clear. We are talking about a value added tax. Members who vote against this rule today will effectively be affirming their willingness to launch into this new unchartered course of value added taxes in this country, and that is a tax that is regressive. To those of you who are talking about saving money for the taxpayers, how about saving a dollar for the consumer?

The fact of the matter is that the value added tax is regressive. It comes down disproportionately upon the poor, upon the elderly, and it makes no sense from the standpoint of environmental policy.

Let it be understood that many of the same people who have fought diligently over many months to get a strong Superfund reauthorized in the $10 billion amount certainly do not intend to abandon the basic principle that the polluter should pay, and yet that is what we are being asked to do this evening, to forget sound taxation policy, forget sound environmental policy, and allow ourselves to be intimidated by the other body. We cannot allow that to happen.

I would argue that all of the discussion about reconciliation should be an equal concern of the other body, as it is of ours. The other body can stay in session and we can get this matter resolved, but let there be no effort at intimidation, such as we have seen this evening.

The real issue is are we going to insist that those industries principally responsible for pollution pay the bill, or are we going to spread it to other innocent parties?

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. Mr. Speaker, this body did not send to a reconciliation conference the issue of how to finance Superfund. Our conferees, I do not know how nine of them could have voted to do this when the House just rejected that method of financing Superfund; so I think they have some explaining to do; but more than that, I think we ought to recognize a point that was just made by the previous speaker.

The other body has just as much at stake in reconciliation as we do. It cannot be something that we get rolled on tonight.

So I think the question is whether or not you want a conference on Superfund with our version in the conference, where the tradeoffs can be made from the bucket of money as to whether or not the list has 600 or 600,000 toxic waste sites on it.

The dilemma that you might face if you do not get a chance to have a conference with some money in conference is whether or not we want to leave here for Christmas with the question on some people's minds, did the Congress want to satisfy oil and gas or the President of the United States?

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, we had a debate on Superfund financing not long ago in this body and the House, not by a large margin, but by a clear margin decided that it did not want what the sponsors call a manufacturers' excise tax and what the people are calling a sales tax or a VAT. Instead, we opted for an increased version of the same kind of taxes that are now being applied, plus a new waste-end tax.

Our conferees went into conference with nothing on this reconciliation bill on Superfund financing and came back with that sales tax, or VAT, and they came back with no waste-end tax, something environmentalists have been looking to for a number of years. They came back with an unreliable financing system for our Superfund activities.

We have been told tonight that the Senate will reject this if we give it back to them. I think it is far more pertinent that the President is pretty clearly ready to veto anything we give him with a VAT in it. Therefore, I think we take a much greater risk with the President than we do with the Senate.

If we do not believe that we should have a national sales tax, if we do not want to see reconciliation vetoed by the President, it is important to pass the rule. The Rules Committee when it gave us this rule understood those things. It said, "We want to preserve reconciliation. We want it to have the best possible shot. We don't want it vetoed. Therefore, we are going to give you a rule to take out the VAT from the conference report."

I believe that the Rules Committee should be sustained. We should vote aye on the rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 2 minutes to the gentleman from California [Mr. Bosco].

Mr. BOSCO. Mr. Speaker, there is certainly no shortage of predictions tonight. On one side we have a group that predicts that the President will veto this measure with the broad-based tax. On the other side, we have a group that says that the other body will not take it up without the broad-based tax.

Well, I would like to say as someone who has worked very hard on this bill that Superfund or the broad-based tax

is not the only issue in the bill. In fact, there are thousands of issues in this bill of importance to our entire country.

Now, 31 subconferences met in the consideration of this one bill. Hundreds of Members put in a lot of time and work. All 31 of those subconferences agreed, there is no disagreement in the conference report, and yet by some quirk of fate we have a rule before us that in effect will not allow us to vote on the conference report that was agreed to by all 31 subconferences. The only way we can vote on that conference report is to defeat this rule, to have the Rules Committee quickly bring back another one and then to vote up or down on the reconciliation bill. If we vote it up, we will be in agreement with the other body, send it to the White House, and if the President wants to veto a bill with 80 billion dollars' worth of savings in it, let him veto it.

Mr. LATTA. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. Mr. Speaker, I thank my friend, the gentleman from Ohio, for yielding me this time.

I would like to talk a little bit about the substance of the reconciliation bill that is now pending before that House. It raises certain questions as to whether or not it truly is an effort to reduce the deficit that is projected for fiscal year 1986.

We all know that we began this year with the goal of some $50 billion in deficit reduction for fiscal year 1986. The bill before us suggests that we will achieve a deficit reduction of some $17.4 billion, but there is a very basic policy question that should be addressed concerning a measure that is represented to be a deficit reduction proposal; namely, whether we should permit such a vehicle to be used as a means of adding programs.

The bill before the House right now makes very clear that the answer is that we will use this deficit reduction package as a means of adding programs.

What I would like to bring to the attention of my colleagues is that in the area of health care costs, this vehicle for deficit reduction adds $222 million of new programs over a 3-year span of the bill.

Mr. Speaker, in Medicare part B, we have new spending proposals totaling $170 million. In these two areas of health care costs, the total increased programs are $392 million over the 3-year span.

In one of the committees on which I serve, the Energy and Commerce Committee, we were directed to achieve reductions of some $15 billion over the 3-year span. Our committee actually achieved $9.67 billion, leaving some $5.33 billion unachieved.

With respect to what we are doing in the area of taxes, I might point out to my colleagues that this bill represents the implementation of the second rule that drives the liberal welfare state in America; namely, "If it grows, tax it."

Now, we all know that imports have been growing by leaps and bounds over the last 2 or 3 years. In fact, the negative trade balance is in excess of $150 billion in the current calendar year, so we propose to tax it at 1 percent. I think the theory is that whatever we tax, we get less of.

I submit to my colleagues that imposing a tax on imports is not the way to serve the consumers of this country. It is not the way that we can serve the interests of free trade in the world.

Mr. OXLEY. Mr. Speaker, will the gentleman yield?

Mr. DANNEMEYER. I am happy to yield to my friend, the gentleman from Ohio.

Mr. OXLEY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, while we are on the area of taxes and also on spending add-ons, I am sure the gentleman is aware of the increased appropriations for public broadcasting of $990 million.

Mr. DANNEMEYER. I thank my colleague for pointing that out. This is supposed to be a deficit reduction bill.

I am opposed to a VAT to finance Superfund. The rule is crafted so that a yes vote on the rule means a rejection of the VAT. I would prefer a rule which would permit an unhindered vote on the reconciliation package and separately on the VAT. Therefore I suggest a no vote on the rule.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield 1 minute to the gentleman from Illinois [Mr. DURBIN].

Mr. DURBIN. Mr. Speaker, the defeat of reconciliation will also spell the defeat of language from the other body that makes permanent the reduction in Federal highway funds for a State's failure to establish a minimum drinking age of 21.

The Rules Committee considered efforts to delete this important language and wisely decided to keep the other body's language intact.

The passage of reconciliation with the other body's language will send a message to recalcitrant States that their refusal to join in an effort to establish a national minimum drinking age of 21 will continue to cost them Federal highway funds, and the passage of reconciliation will save hundreds of lives of our children who are needlessly killed each year in the slaughter alleys between States with different drinking ages.

Members wanting a solid record on the issue of drunk driving should vote yes for the rule and yes for reconciliation.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. DURBIN. I am happy to yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Speaker, contained within this reconciliation bill is a very important provision that will make permanent the restriction on a portion of Federal highway assistance funds for States which fail to pass laws raising the drinking age for alcohol in their respective States to 21. Of all times of the year to take such action, the holiday season makes perhaps the most sense—a season during which, historically, hundreds of lives are taken at the hands of drunk drivers.

Mr. Speaker, we have all come to realize in the past several years there is a horror which exists on the streets and highways of our Nation. That horror is drunk driving. Those responsible for this carnage are individuals who drink and then get behind the wheel of an automobile without any consideration given to the rights and safety of others on the road. Not one of us is safe from this menace.

This is a grassroots problem—one which can most effectively be dealt with at that level. However, leadership must be provided at the Federal and State levels. The administration and the Congress had begun this process by requiring that the States raise their minimum drinking ages to 21 by 1987, or lose a percentage of their Federal highway assistance. So far, 35 States have enacted this minimum drinking age requirement, while 15 other States and the District of Columbia have not yet followed suit.

Mr. Speaker, I cannot understand the failure of these 15 States and, particularly, the District of Columbia to enact legislation to establish this uniform drinking age. It should not be reduced to a simple revenue issue—you cannot put a price tag on the lives of our youth—you cannot deny that our future is dying out there.

The action on the reconciliation bill not only makes it more difficult for the District of Columbia and those other 15 States to resist passage of drinking age legislation, it virtually guarantees that many of the States who have enacted the 21 drinking age will not revert to 18- or 19-year-old drinking ages now that the threat of Federal highway fund loss will not be lifted.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. Mr. Speaker, as a conferee on certain parts of the reconciliation conference report before us tonight, I must express my dismay at many parts of said conference report. Admittedly, there are many good items that address the needs of the elderly and the poor; however, to say

that the conference committee went overboard on certain items is to say the least. We are in the midst of the most difficult deficit situation this country has ever faced. Yet, during the conference, there was a reluctance to stop the creation of expensive new spending programs. I was particularly dismayed that the Energy and Commerce conferees had to make judgments on new expensive programs that we had never had hearings on. Additionally, on the provision pertaining to the annual calculation of the Federal medical assistance percentage, outright selfishness was exhibited. Rather than accept Senate language to provide for an annual, rather than biennial calculation of the Federal medical assistance percentage effective in 1988, an amendment was accepted to accelerate this date to 1987. Some of the States that will be the biggest losers under this acceleration are: Florida, $8.4 million; Georgia, $13.3 million; and Virginia, $8.2 million. Other losing States are Arizona, Maine, Minnesota, Missouri, New Hampshire, North Carolina, Ohio, Rhode Island, South Carolina, and South Dakota. Those States which stand to gain the most are Texas, $30 million; and Louisiana, $17 million.

Whether you like Medicaid or not, it is a reality. In my own State of Florida 45 percent of the Medicaid budget is devoted to care for the elderly, and is the major source of funds for long-term care. Approximately a third of Florida's Medicaid budget is spent on nursing home care. This loss of $8-plus million in funds becomes even more crucial when one considers that Florida leads the Nation in growth of the age 65-plus population. Even though language is contained in the conference report expressing my dissatisfaction with the acceleration, it isn't strong enough. It says the conferees agree that the committees of jurisdiction will explore ways to relieve the hardship that may be suffered by the States that will receive substantially less in matching payments as a result of this provision. Mr. Speaker, I deeply regret that I must vote against this package before us. However, I was sent to Washington to represent the people and this package is not representative of my constituents.

Mr. BARNES. Mr. Speaker, as a member of the House Budget Committee and a member of the conference committee, I strongly support enactment of the reconciliation bill. I am particularly pleased by the provision which makes permanent the incentives to States to adopt a minimum drinking age of 21, an issue for which I have been an advocate for much of my career in the House. This is a goal I have long worked for.

But, Mr. Speaker, I cannot support the Senate's outrageous tactics to try to force this House to accept the value added tax provision for the Superfund. The VAT is misguided and doesn't belong in this bill. It belongs in the Superfund conference to be discussed—and hopefully rejected—there. That is why I cannot vote to concur in the Senate amendment and why I must oppose the motion offered by the gentleman from Pennsylvania [Mr. GRAY] my chairman.

The House should stand firm against the VAT, and also stand for a rational and sensible legislative process.

Mr. SKELTON. Mr. Speaker, I want to take a few minutes to bring to the attention of this body my concern about the affect Medicare's prospective payment system for hospitals is having on the rural health-care system. As chairman of the congressional rural caucus, I feel obligated to raise these concerns because flaws in the PPS threaten the access of all rural Americans to high-quality health care, not just the access of senior citizens who depend on Medicare.

While we were assured that how a hospital would fare under the PPS would depend on how efficiently it was operated, 2 years of experience have made it abundantly clear that how a hospital fares under the current system depends in a large part on its location. With certain narrow exceptions, hospitals located outside metropolitan statistical areas are forced to accept substantially lower payments from Medicare than their urban counterparts. While theoretically there may have been some justification for different urban and rural payment rates, the actual payment differences that have resulted under this arbitrary classification scheme are incomprehensible. In many instances, the rural payment rates are not sufficient to allow even the most efficient hospitals to treat Medicare beneficiaries without incurring a loss.

I cannot overstate the threat unjustifiably low Medicare payments to rural hospitals poses to the access of rural Americans to health-care services. At a time when stress brought on by the depressed farm economy is adding to the already substantial health-care problems of rural America, the current system causes increased financial pressure on the cornerstone of the rural health care system. Because Medicare patients comprise a very large proportion of their caseloads, inadequate Medicare payments threaten the continued existence of many rural hospitals. Some have already closed, including one in my own district; others will surely follow unless corrective action is taken. To make matters worse, the closing of rural hospitals encourages physicians to leave the communities involved, exacerbating the physician shortage that already exists in much of rural America.

To those of us who were raised in rural areas and who are old enough to remember what it was like to be without reasonable access to necessary hospital services, this is a most serious situation. By allowing an adjustment in Medicare payments to rural hospitals of 100 beds or more that serve a disproportionately high number of poor and elderly, this bill will provide some relief. However, I urge members of the committee to more fully address the problems of rural hospitals, and other hospitals that are suffering unwarranted losses under the current system, next session by giving consideration to price-blending legislation like that which I have already introduced. I believe there is ample evidence to show that such legislation would make the PPD fairer for all hospitals, regardless of their locations, while maintaining the incentives that have helped slow the rate of increase in Medicare expenditures for hospital care.

Mr. RAHALL. Mr. Speaker, the conference report on H.R. 3128, the Deficit Reduction Amendment Act, before us today contains a most important compromise regarding the black lung excise tax.

As passed by the House, the black lung tax on coal would have been increased by 50 percent. The other body, however, proposed to end the automatic borrowing authority between the black lung trust fund and the Treasury.

Both of these positions were unacceptable to me, and to all of us concerned with the viability of the coal industry and the welfare of those individuals suffering from the crippling effects of black lung disease.

Because of this situation, members of the coal industry and the United Mine Workers of America formulated a compromise which I adopted and diligently pursued with those members on the Ways and Means Committee assigned to the revenue subconference on this legislation.

I am pleased to say the conferees accepted this compromise and that it is contained in H.R. 3128. The bill before us today incorporates that compromise largely due to the persistent efforts on its behalf by the gentleman from Florida, a member of the Committee on Ways and Means, SAM GIBBONS. To him, the coal industry owes a debt of gratitude. As for myself, I extend my deepest appreciation to SAM GIBBONS for his work and perserverance on this matter.

Also to be commended for accepting this compromise is the distinguished chairman of the Committee on Ways and Means, DAN ROSTENKOWSKI, as well as the other House conferees.

The black lung provisions of H.R. 3128 provide for a 10-percent increase in the coal excise tax—rather than the 50-percent originally proposed by the House—and a 5-year forgiveness of the interest payments on the indebtedness of the black lung disability trust fund. In addition, the proposal of the other body to end the borrowing authority between the trust fund and the Treasury was dropped.

Mr. Speaker, this is a great victory for the coal industry and coal labor. It represents an attempt by coal management and labor to meet the responsibilities for achieving solvency in the black lung disability trust fund, which is currently $1.5 billion in debt, at the lowest possible cost to an industry which is currently in a depressed state.

Mr. HAWKINS. Mr. Speaker, I rise in support of the conference report on H.R. 3128. Title XI contains provisions urgently needed to put the Pension Benefit Guaranty Corporation [PBGC], the agency which insures that workers get their private pen-

sions when their companies are in financial difficulty, back on a sound financial footing. The bill would strengthen the PBGC plan termination insurance program in two significant ways. First, the premium that single-employer plans pay the PBGC is raised from $2.60 per year per plan participant to $8.50, effective January 1, 1986. Second, the single-employer program is restructured to limit access to PBGC assistance only to those cases in which worker's pensions are jeopardized because their employers are in genuine financial difficulty.

The termination insurance program is administered by a self-financing Government corporation, the Pension Benefit Guaranty Corporation. The PBGC was created in 1974 to assure that pension benefits earned by workers would be paid even if the employer terminated the plan in an underfunded condition. The program covers about 30 million retired and working Americans and is financed solely by premiums paid by covered plans and by liability paid to the PBGC by employers that terminate underfunded plans.

Both the premium rate—currently $2.60 per plan participant—and the employer liability rules under current law have proven inadequate. The program is now responsible for benefit payments to about 160,000 current and future retirees in about 1,100 terminated plans and has a deficit of over $1 billion. The conference has agreed on a premium increase to $8.50 effective January 1, 1986, and reforms to protect this program against unwarranted claims.

The bill also provides an explicit provision on the important issue of transactions intended to evade liability to the PBGC for an underfunded plan. Although there is not an explicit provision under current law regarding evasive transactions intended to insulate an employer from liability, current law does not permit such abusive shifting of liability to the insurance program. In the case of *Solar* v. *PBGC*, 504 F. Supp. 1116 (D.C.N.Y. 1981), affirmed 666 F.2d 28 (2nd Cir. 1981), the court held that a transaction intended to avoid liability should be disregarded for title IV liability purposes. See also III Legislative History of ERISA of 1974 at 4741–42 (remarks of Sen. Williams); *Nachman Corp.* v. *PBGC*, 592 F.2d 947 (7th Cir. 1979), aff'd., 446 U.S. 359 (1980).

The PBGC and the courts have always been expected to look at the substance of a transaction rather than its form, and to disregard transactions where the substance, viewed in light of the purposes of title IV, indicate that a company improperly transferred its pension obligations to the insurance program. See joint report of the Senate committee, 126 Cong. Rec. 510, 117 (daily ed. July 29, 1980). The following is an example of such a transaction:

Company P has a division or subsidiary S whose employees are covered by the S pension plan. At the time of the transaction, the S plan has unfunded benefits. P sells the stock or assets of S to B, and transfers all or part of the unfunded benefits in the S plan to B's plan. B is a company that, after the transaction, does not have a reasonable prospect of funding the benefits. B's plan later terminates. At the time of the termination, the plan does not have sufficient assets to provide all PBGC-guaranteed benefits. Under current law, when substance rather than form is considered, the transaction is really a delayed termination of the transferred benefits; the seller is not exempted from title IV liability merely because the transaction, in form, provides for continuation of the plan. Under both the bill and current law, company P is liable.

Revision of the employer liability rules is also an essential part of this bill. As under current law, the bill provides for liability for unfunded guaranteed benefits, up to 30 percent of the employer's net worth, with a tax priority status in bankruptcy proceedings. The bill improves the PBGC's recoveries over current law by creating additional liability equal to the excess, if any, of 75 percent of unfunded guaranteed benefits over 30 percent of the employer's net worth. This additional liability has general unsecured status in bankruptcy proceedings. As under current law, PBGC, as plan trustee, collects unpaid contributions due the plan. The bankruptcy status of PBGC's claim for these contributions is the same under the bill as under current law; unpaid contributions that accrue after a bankruptcy petition have administrative expense priority; those that accrue within 180 days before the petition have employee benefit status—subject to the $2,000 per employee limit on priority employee wage and benefit claims—and remaining unpaid contributions have general unsecured status.

Finally, the bill contains an explicit provision requiring that PBGC not proceed with a plan termination if the termination would violate the terms and conditions of an existing collective bargaining agreement. The enactment of this provision is in no way meant to diminish the already clear meaning of section 404(a)(1)(d) of Employee Retirement Income Security Act of 1974 [ERISA] which expressly requires that a fiduciary's duties be discharged "in accordance with the documents and instruments governing the plan * * *." Rather, this provision is an endorsement of judicial decisions such as *Terones* v. *Pacific States Steel Corp.*, 526 F. Supp. 1350 (N.D. Calif. 1981), holding that a company cannot unilaterally terminate a collectively bargained pension plan, when such termination is in violation of the terms of any agreement between the parties.

Because the bill the conferees adopted is similar to the Committee on Education and Labor's provisions contained in title III of H.R. 3500, for purposes of determining congressional intent in adopting those provisions, the most authoritative source of legislative history on the single-employer termination insurance reforms can be found in the report on H.R. 3500, the Omnibus Budget Reconciliation Act of 1985 (H. Rept. 99–300, 99th Congress, 1st session, pp. 278–320).

The Committee on Education and Labor has been working for over 4 years on these issues. We are delighted that the conference report before the House today contains provisions to strengthen the PBGC program established under title IV of ERISA. I want to take this opportunity to commend the members of the Subcommittee on Labor-Management Relations, especially its chairman, Congressman BILL CLAY, and the ranking member, Congresswoman MARGE ROUKEMA, for their tireless efforts to get this legislation passed. In addition, thanks must go to the ranking Republican member of the full committee, Congressman JIM JEFFORDS, for his assistance in assuring that this critical worker protection legislation was considered this session. Finally, I want to thank the conferees for their diligent work in producing the bill before us today. We are most appreciative of the cooperation we received from or colleagues on the Committees on Ways and Means and Judiciary, as well as the Senate Committees on Labor and Human Resources and Finance.

The report on H.R. 3500 cited above also contains the committee's views on the health insurance continuation coverage provisions found in title X of bill before us today. We are pleased that the conferees have included provisions in the bill that require group health plans to offer a continuation option to certain groups of qualified beneficiaries, including widows and dependent children, divorced spouses and dependent children, Medicare-ineligible spouses and dependent children, the unemployed—and those who have a reduction of hours such that they would lose health coverage—and dependent children who no longer qualify under the plan. This is an important step forward toward meeting the pressing need for those groups to have available continued access to affordable medical care.

I urge support of the conference report.

Mr. ROSTENKOWSKI. Mr. Speaker, the provisions of law within the jurisdiction of the Committee on Ways and Means contained in H.R. 3128 represent many months of hard work. The Medicare provisions save some $11.2 billion over 3 years and were the result of bipartisan efforts of the committee. These provisions contain some important reforms in hospital reimbursement.

In AFDC, the conference agreement mandates AFDCP-UP coverage in all States. This will help some of the neediest children in this Nation a 2-year moratorium is established on the collection of fiscal sanctions.

The Trade Adjustment Assistance Program is reauthorized for 6 additional years. The Customs Service authorization for the number of personnel is increased, which will greatly strengthen the enforcement capability of the service.

The current cigarette excise tax is permanently extended. The House upheld its position on coverage of State and local employees, and consequently only new employees will be covered.

With the exception of the Superfund revenue provisions, this is an excellent agreement which saves some $25.5 billion over the next 3 years.

Mr. ROGERS. Mr. Speaker, I would like to bring to the attention of my colleagues to vitally important portions of the bill before us this evening.

First, the bill includes the legislative culmination of many months of negotiation among tobacco growers, cigarette manufacturers, tobacco congressmen and the committees of jurisdiction. These provisons provide for the drawdown of existing tobacco stocks, so we can remove this ominous burden from our tobacco growers' backs and bring the no net cost fees back down to a reasonable level.

It establishes a new system for setting tobacco marketing quotas, requires manufacturers to share in the no net cost fees now paid only by growers, and most importantly, limits the maximum reductions in marketing quotas to 6 percent per year for the next 4 years, and to 10 percent in subsequent years. This last provision is especially important, representing a substantial improvement over current year and offering our American tobacco growers some measure of protection from imports.

Tobacco is the only commodity in the United States which pays its own program at USDA. The legislation before us today continues that system, but significantly improves it by requiring the manufacturers to join in bearing these costs which up until now have been paid only by the tobacco growers.

Second, I would like to bring to my colleagues' attention an important provision relating to black lung taxes. As my colleagues know, the House version of the bill included a 50-percent increase in black lung taxes, an increase which if enacted would have caused serious hardship for American coal companies and seriously worsened their competitive position in the world market.

The conference agreement includes a compromise provision, calling for only a 10-percent increase in the black lung taxes, and enabling the black lung trust fund to remain solvent instead through a moratorium on interest payments made to Treasury.

While I would have preferred no increase at all, this is a masterful compromise which will provide for the financial well-being of the trust fund without placing an onerous burden on our coal operators.

I commend the members of the conference committee, most notably Mr. ROSE and Mr. HOPKINS for their diligent efforts on the tobacco agreement, and Mr. ROSTENKOWSKI and Mr. DUNCAN for their effective assistance on the black lung compromise. I urge my colleagues to support this conference agreement.

Mr. RINALDO. The reconciliation budget package (H.R. 3128) contains major spending reductions and will help to reduce the Federal deficit.

But there are other items which have no budgetary impact and which do not belong in or near this piece of legislation.

In the explanatory material accompanying H.R. 3128, there are extraneous remarks dealing with the Federal Communication Commission's local cross-ownership rules. This material is not part of the act, and is strictly superfluous.

I object to addressing such a serious matter in this fashion.

This is not a new issue. We have had, and continue to have, opportunities to deal responsibly with this question. Legislation has been introduced. The Subcommittee on Telecommunications, however, of which I am the ranking Republican member, has not held any hearings or markups on the topic: There has not even been any formal discussion by our Members regarding this question.

The FCC cross-ownership rules are designed to limit concentration of control of mass media. Generally the rules ban certain combinations, such as an ownership or control of both a radio and television station in the same market.

The Commission has granted only one permanent waiver of its local ownership rules in the last few years that did not involve a clearly de minimis overlap for the rules. In that case, involving the Capital Cities/ABC merger, it granted the waiver only after careful consideration and after the FCC fully explained its rationale.

All other recent waivers have been granted for a limited period of time, generally 18 months. Although in previous administrations such waivers had been granted for as long as 3 years. Even when considering temporary waivers, the FCC has based its decisions on public interest factors and has not rested its decisions on purely private considerations. In view of the records of these proceedings, including the showings made by the parties and the other public interest considerations set out by the FCC, it is clear that the FCC has carefully scrutinized each waiver request and determined that the applicants had provided a clear showing of the need for such waivers. In so doing, the FCC has demonstrated serious concern that the purpose of the local ownership rules be given full and appropriate weight.

The language in the report appears to be a general restatement of the existing legal standard in this area as well as the present practice of the FCC and, therefore, does not impose any different or additional obligations on the FCC.

Mr. DASCHLE. Mr. Speaker, I want to express my strong support for a provision of H.R. 3128, Deficit Resolution Amendments of 1985, which will establish an Advisory Committee on Native American Veterans in the Veterans' Administration. The purpose of this committee will be to examine and evaluate programs and other activities of the VA with respect to the needs of Native American veterans, including American Indian veterans. Special emphasis will be given to health care, rehabilitation, outreach, employment, and other programs.

Continuing the traditions of their ancestors, many American Indians served with distinction in our Nation's Armed Forces during World War I and II, the Korean conflict and during the Vietnam era. According to the 1980 census, 44,500 American Indiana served during World War II, 29,700 during the Korean conflict, and 73,681 during the Vietnam era, and it has been estimated that an astonishing 23 to 26 percent of all Indians are also veterans.

I provide this background so that all of us in this body may understand the depth of patriotism demonstrated by American Indians during times of national peril. In spite of this long history of Indian participation in our Nation's military conflicts, no major scientific study regarding veterans has identified American Indian veterans as a specific group and no assessment of their particular needs has ever been conducted.

I believe that we might recognize the contribution made by American Indians and other Native Americans during times of war and the effect those wars may have had on them after their return home. Vice President Hubert Humphrey made the following observation,

It was once said that the moral test of Government is how that Government treats those who are in the dawn of life—the children; those who are in the twilight of life—the elderly; and those who are in the shadows of life—the sick, the needy and the handicapped.

The establishment of the Advisory Committee on Native American Veterans will enable us to more accurately evaluate the status of these veterans who have so faithfully served in our Nation's armed services. Are they in the shadows of life? Do they need vital assistance that they are not now receiving? Have their particular needs been overlooked in the past? If so, we as a nation have a particular obligation to assist American Indians and other Native American veterans. The findings of the advisory committee will direct us to the actions we must take.

Membership on the advisory committee will consist of the Secretary of Labor—or a representative of the Secretary of Labor designated by the Secretary after consultation with the Assistant Secretary of Labor for Veterans' Employment—the Chief Medical Director and Chief Benefits Director of the Veterans' Administration; and members appointed by the Administrator from the general public including representatives of veterans who are Native Americans, including American Indians and Alaska Natives and individuals who are recognized authorities in the fields pertinent to the needs of Native American veterans.

The legislation will also permit the Administrator of Veteran's Affairs to invite representatives of other departments and agencies of the Federal Government to participate in the meetings and other activities of the committee. It is my expectation that representatives of the Bureau of Indian Affairs, the Indian Health Service and other agencies concerned with issues relating to American Indians will be included by the Administrator in advisory committee activities.

The advisory committee will submit reports to the VA Administrator on November 1, 1986, and November 1, 1987, regarding its findings. On January 1, 1987, and January 1, 1988, the Administrator will transmit to the Congress the committee reports together with comments and recom-

mendations the Administrator considers appropriate. The committee will terminate 90 days after the Administrator submits the final report. There are no new costs associated with the establishment of this advisory committee.

As the original proponent of this measure, I want to again express my enthusiasm and full support for the establishment of the Advisory Committee on Native American Veterans. I also want to thank SONNY MONTGOMERY, chairman of the full committee, JOHN PAUL HAMMERSCHMIDT, ranking minority member of the full committee, DOUG APPLEGATE, chairman of the Subcommittee on Compensation, Pension and Insurance, and JERRY SOLOMON, ranking minority member of that subcommittee, for their strong support for this proposal when it was considered as an amendment to H.R. 1538 and later to H.R. 3500. I believe the needs of Native American veterans have been overlooked too long, and this advisory committee will go a long way toward righting that wrong.

□ 2055

Mr. LATTA. Mr. Speaker, I yield back the balance of my time.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ECKART of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 205, nays 151, not voting 78, as follows:

□ 2105

Messrs. McCAIN, CHAPPIE, and RINALDO changed their votes from "yea" to "nay."

Messrs. McCAIN, EVANS of Iowa, McMILLAN, COBLE, and COBEY changed their votes from "nay" to "yea."

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to the provisions of House Resolution 349, the conference report on H.R. 3128 is rejected, and the House recedes from its amendment to the Senate amendment and concurs with an amendment inserting in lieu of the Senate amendment an amendment consisting of the text of the conference report, with the following modifications: Strike out subtitle B of title XIII.

REQUEST TO CONSIDER H.R. 3992, EXTENSION OF CERTAIN TAX PROVISIONS FOR A TEMPORARY PERIOD

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 3992) to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions which would otherwise expire at the end of 1985, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

□ 2120

Mr. WALKER. Reserving the right to object, Mr. Speaker.

Mr. Speaker, I reserve the right to object in order to ask the distinguished chairman of the Committee on Ways and Means just exactly

which bill this is. Is this the one that does a number of different extensions, but also involves some changes in present law including the provisions, some provisions that were passed by the House in 3838?

Mr. ROSTENKOWSKI. Yes, the gentleman is correct.

Mr. WALKER. So, in other words, we are passing new provisions in the Tax Code if we in fact agree to this particular bill.

Mr. ROSTENKOWSKI. If the gentleman will yield.

Mr. WALKER. I am glad to yield to the gentleman.

Mr. ROSTENKOWSKI. The gentleman would like to point out that unless we pass something, there will be no extensions as of January 1.

Mr. WALKER. Well, further reserving the right to object, I do not think that there would be any problem on this side of the aisle for passing a bill that would be a simple extension of all these present programs.

However, there is concern on this side of the aisle with passing provisions that would make new law, and/or begin the enactment of 3838 before the Senate has even considered it.

I would feel constrained to object to any resolution that moves us in that particular direction. If we do a simple extension of the present code, I think that would be perfectly acceptable to me, and to a number of other Members who have similar concerns.

Mr. ROSTENKOWSKI. Well, if the gentleman, on his reservation, will allow me to explain just what the bill presently before the House will do, I think we can clarify a lot of language.

The gentleman would also like to point out that unless this legislation is passed, there is a revenue loss incurred; and that is one of the reasons why it is the gentleman from Illinois' opinion that should we be able to pass this, we then give an opportunity to the Senate to work on the tax reform legislation.

Mr. WALKER. Further reserving the right to object, Mr. Speaker, I think it is incumbent upon us on this side, in these kinds of circumstances, to be reasonable. I would suggest to the majority it is also incumbent to be reasonable.

To come here at the 11th hour and try to pass new law, and make changes in the Tax Code at the 11th hour, it seems to me is unreasonable. What we will accept as a reasonable solution is the fact that you take and you extend the present code as it now exists; we do not lose the revenue that way, and we assert ourselves in a way which assures that we do retain the present code.

That seems to me to be an entirely reasonable proposition, given the lateness of the hour and the situation we are in.

I will be glad to yield to the gentleman from Mississippi.

Mr. LOTT. I understand the gentleman is asking unanimous consent on this, but the gentleman does have rules that were reported by the Committee on Rules on this and two other measures that you might ask unanimous consent on?

Mr. ROSTENKOWSKI. The gentleman is correct.

Mr. LOTT. To save our Members time so that we will not drag this out, Mr. Speaker, I object.

The SPEAKER. Objection is heard.

PROVIDING FOR CONSIDERATION OF H.R. 3992, EXTENSION OF CERTAIN TAX PROVISIONS FOR A TEMPORARY PERIOD

Mr. BONIOR of Michigan, from the Committee on Rules, reported the following privileged resolution (H. Res. 350, Rept. No. 99-455) which was referred to the House Calendar and ordered to be printed.

H. RES. 350

Resolved, That upon the adoption of this resolution it shall be in order to consider in the House the bill (H.R. 3992) to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions which would otherwise expire at the end of 1985, and for other purposes, the bill shall be considered as having been read, all points of order against the bill and against its consideration are hereby waived, debate on the bill shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means or their designees, and the previous question shall be considered as ordered on the bill to final passage without intervening motion except one motion to recommit.

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 350 and ask for its immediate consideration.

The Clerk will report the resolution.

The Clerk read the resolution.

The SPEAKER pro tempore. The question is, Will the House now consider House Resolution 350?

The question was taken.

Mr. WALKER. Mr. Speaker, on that, I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 210, nays 142, not voting 82, as follows:

□ 2130

Mr. PASHAYAN changed his vote from "yea" to "nay."

Messrs. BATEMAN, RITTER, WHITTAKER, ROWLAND of Connecticut, LIVINGSTON, JEFFORDS and TALLON changed their votes from "nay" to "yea."

So (two-thirds not having voted in favor thereof) the House refused to consider House Resolution 350.

The result of the vote was announced as above recorded.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1538. An act to amend title 38, United States Code, to provide a 3.4 percent increase in the rates of compensation and of dependency and indemnity compensation (DIC) paid by the Veterans' Administration, and for other purposes.

□ 2145

REQUEST FOR CONSIDERATION OF SENATE AMENDMENT TO H.R. 2466, MAKING MISCELLANEOUS CHANGES IN LAWS AFFECTING U.S. COAST GUARD

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2466) to make miscellaneous changes in laws affecting the U.S. Coast Guard, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That subtitle II of title 46, United States Code, is amended as follows:

(1) In section 2101(14)(C), strike "Material" and substitute "Materials".

(2) Section 2101(21) is amended as follows:

(A) In subclause (A)(ii), strike "crewmember." and substitute "crewmember or other individual engaged in the business of the vessel who has not contributed consideration for carriage on board the vessel.".

(B) Strike subclause (B)(v)-(vii) and substitute the following:

"(v) a guest on board a vessel being operated only for pleasure who has not contributed consideration for carriage on board; or

"(vi) an individual on board a towing vessel of at least 50 gross tons who has not contributed consideration for carriage on board.".

(C) At the end, add the following new subclause:

"(F) on a sailing school vessel, means an individual carried on the vessel except—

"(i) the owner or representatives of the owner;

"(ii) the master or a crewmember engaged in the business of the vessel who has not contributed consideration for carriage and who is paid for services;

"(iii) an employee of the owner of the vessel engaged in the business of the owner, except when the vessel is operating under a demise charter;

"(iv) an employee of the demise charterer of the vessel engaged in the business of the demise charterer;

"(v) a guest on board the vessel who has not contributed consideration for carriage on board; or

"(vi) a sailing school instructor or sailing school student.".

(D) Strike "or a sailing school vessel," in clause (B).

(3) In section 3302(i)(5), strike "charter" and substitute "charterer".

(4) At the end of section 3302, add the following new subsection:

"(k) Only the boiler, engine, and other operating machinery of a steam vessel that is a recreational vessel of not more than 65 feet overall in length are subject to inspection under section 3301(9) of this title.".

(5)(A) Section 3304 is amended as follows:

(i) In the section catchline, strike "Carrying" and substitute "Transporting".

(ii) In subsection (a), strike "carrying cargo that carries" and "vessel." and substitute "transporting cargo that transports" and "vessel if the vessel is otherwise subject to inspection under this chapter.", respectively.

(iii) In subsection (b), strike "Before an individual in addition to the crew is carried" and substitute "Except when subsection (e) of this section applies, before an individual in addition to the crew is transported".

(iv) In subsection (c), strike "The privilege" and substitute "A privilege".

(v) Add at the end the following new subsection:

"(e) The Secretary may by regulation allow individuals in addition to the crew to be transported in an emergency or under section 2304 of this title.".

(B) In item 3304 in the analysis of chapter 33, strike "Carrying" and substitute "Transporting".

(6) In section 3318(f), before clause (1), strike "then" wherever it appears and substitute "than".

(7)(A) Section 3503 is amended as follows:

(i) Insert "(a)" at the beginning of the section.

(ii) Strike the last sentence and substitute "Before November 1, 1993, this section does not apply to a vessel in operation before January 1, 1968, and operating only on the inland rivers.".

(iii) Add at the end the following:

"(b)(1) When a vessel is exempted from the fire-retardant standards of this section—

"(A) the owner or managing operator of the vessel shall notify prospective passengers that the vessel does not comply with applicable fire safety standards due primarily to the wooden construction of passenger berthing areas;

"(B) the owner or managing operator of the vessel may not disclaim liability to a passenger for death, injury, or any other loss caused by fire due to the negligence of the owner or managing operator; and

"(C) the penalties provided in section 3504(c) of this title apply to a violation of this subsection.

"(2) The Secretary shall prescribe regulations under this subsection on the manner in which prospective passengers are to be notified.".

(B) Until the regulations required by clause (7) of this section become effective, the owner or managing operator shall notify prospective passengers in all promotional literature and on each ticket that the vessel does not comply with those standards due primarily to the wooden construction of passenger berthing areas.

(8) In section 3714(a)(4), strike "charter" and substitute "charterer".

(9) Section 4308 is amended by striking "operator" wherever it appears and substituting "individual in charge".

(10) In section 7111, strike "Part" and substitute "part".

(11) In section 7312(e), strike "able seaman-limited" and substitute "able seamen-limited".

(12) Section 8104(k) is amended by striking "watchers" and substituting "watches".

(13) In section 8502(a)(4)(A), strike "Part" and substitute "part".

(14) Chapter 89 is amended as follows:

(A) In item 8903 in the chapter analysis, strike "Uninspected" and substitute "Self-propelled, uninspected".

(B) In the catchline of section 8903, strike "Uninspected" and substitute "Self-propelled, uninspected".

(C) In the text of section 8903, strike "An" and substitute "A self-propelled,".

(15) In section 10709(a)(1), before clause (A)—

(A) strike "then $1,500 in value, and" and substitute "than $1,500 in value, the court,"; and

(B) strike "wages, the court" and substitute "wages,".

(16) Section 12122(a) is amended by adding at the end the following sentence: "Each day of a continuing violation is a separate violation.".

(17) In section 13102(a)(4), strike "coordinate carrying the State" and substitute "coordinate carrying out the State".

(18) Section 13104(b) is amended by inserting after "Secretary" the words "for State recreational boating safety programs".

(19) Chapter 111 is amended as follows:

(A) At the end of the chapter analysis, add the following new item:

"11112. Master's lien for wages.".

(B) At the end of the chapter, add the following new section:

"§ 11112. Master's lien for wages

"The master of a documented vessel has the same lien against the vessel for the master's wages and the same priority as any other seaman serving on the vessel.".

SEC. 2. (a) The Coast Guard may enter into a lease in excess of one fiscal year to acquire a site on the State pier in New Bedford, Massachusetts, for constrcution of maintenance assistance team and vessel support facilities on that pier.

(b) Any lease under this section is effective only to the extent that amounts are provided for in appropriations laws.

(c) Notwithstanding section 322 of the Act of June 30, 1932 (40 U.S.C. 278a), and beginning in fiscal year 1986, the Coast Guard may spend appropriated amounts for the construction of fixed facilities and improvements on that portion of the State pier leased from Massachusetts for the use of a maintenance assistance team and Coast Guard vessels.

SEC. 3. Notwithstanding any other law, the Coast Guard Yard, Curtis Bay, Maryland, and the Coast Guard Aircraft Repair and Supply Center, Elizabeth City, North Carolina, are exempt from statutory and administrative personnel ceilings through September 30, 1988.

SEC. 4. The body of water known as Lawyer's Ditch located at block 5000 in the city of Newark, County of Essex, New Jersey, is declared to be a nonnavigable waterway of the United States within the meaning of the General Bridge Act of 1946 (33 U.S.C. 525 et seq.).

SEC. 5. Notwithstanding the last sentence of section 81 of title 14 of the United States Code, the Coast Guard may not, except for the installation of fixed aids to navigation, carry out by contract the determination of the location, or the placement, of aids to maritime navigation in the Introcoastal Waterway in New Jersey.

SEC. 6. The Coast Guard may enter into any agreement or letter of intent with a municipal utility within the Seventeenth Coast Guard District electricity to a Coast Guard facility without complying with the provisions of section 14 of Public Law 98-557.

SEC. 7. (a) There is established a National Offshore Vessel Operators Safety Advisory Committee (hereinafter in this section referred to as the "Committee"). The Committee shall advise, consult with, and make recommendations to the Secretary of the department in which the Coast Guard is operating (hereinafter in this section referred to as the "Secretary") on matters relating to the safety aspects of offshore oil, gas, and other mineral operations subject to regulation by the Secretary. The Secretary shall, whenever practicable, consult the Committee concerning proposed or desirable actions affecting the safety of such offshore operations. Any advice or recommendation made by the Committee to the Secretary shall reflect the independent judgment of the Committee on the matter concerned. The Committee is authorized to make available to Congress any information, advice, and recommendations which the Committee is authorized to give to the Secretary. The Committee shall meet at the call of the Secretary, but in any event not less than once during each calendar year. All proceedings of the Committee shall comply with the Federal Advisory Committee Act (5 U.S.C. App. 1 et seq.).

(b)(1) The Committee shall consist of fifteen members, who have particular expertise, knowledge, and experience regarding the transportation and other technology, equipment, and techniques that are used, or are being developed for use, in the exploration for, or the recovery of, offshore oil, gas, or other mineral resources, as follows:

(A) Two members representing enterprises engaged in the production of oil, gas, or other mineral resources, except that not more than one member may represent companies included on the list of restricted joint bidders prepared by the Department of the Interior;

(B) Two members representing enterprises specializing in offshore drilling;

(C) Two members representing enterprises specializing in the supply of offshore oil, gas, or other mineral exploration or recovery operations by water;

(D) Three members representing general support services for offshore oil and gas activities, including construction, diving, geophysical, and helicopter services;

(E) Two members representing individuals employed in offshore operations;

(F) Two members representing environmental interests; and

(G) Two members representing the general public.

(2) The Secretary shall appoint the members of the Committee after first soliciting nominations by notice published in the Federal Register. The Secretary may request the head of any other Federal agency or department to designate a representative to advise the Committee on matters within the jurisdiction of that agency or department.

(3) The Committee shall elect, by majority vote at its first meeting, one of the members of the Committee as the Chairman and one of the members as the Vice Chairman. The Vice Chairman shall act as Chairman in the absence or incapacity of, or in the event of a vacancy in, the Office of the Chairman.

(4) Terms of members appointed to the Committee shall be for three years, except that the terms of those members first appointed under subsection (c)(1) (A), (B), and (C) shall be for two years. The Secretary shall, not less often than once a year, publish notice in the Federal Register for solicitation of nominations for membership on the Committee.

(c)(1) Members of the Committee who are not officers or employees of the United States shall serve without pay and members of the Committee who are officers or employees of the United States shall receive no additional pay on account of their service on the Committee. While away from their homes or regular places of business, members of the Committee may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code. The Secretary shall furnish to the Committee an executive secretary and such secretarial, clerical, and other services as are considered necessary for the conduct of its business. There are authorized to be appropriated such sums as may be necessary to implement the provisions of this section.

(2) Unless extended by subsequent Act of Congress, the Committee shall terminate five years from the date of enactment of this section.

SEC. 8. Bayou Lafourche, in the State of Louisiana, between Canal Boulevard, city of Thibodaux, Parish of Lafourche and the Southern Pacific Railroad bridge crossing the bayou, city of Thibodaux, Parish of Lafourche, is hereby declared to be a nonnavigable waterway of the United States within the meaning of the General Bridge Act of 1946 (33 U.S.C. 525 et seq.).

SEC. 9. Notwithstanding sections 12105, 12106, 12107 and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 U.S.C. App. 883), as applicable on the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for the following vessels: *Marilyn*, Maryland registration number MD 3533 AA; *Royal Star*, Michigan registration number MC 9797 J; *Alaskan Shores*, United States official number 603879; *Shearwater*, United States official number 260827; *Gypsy Rose*, California registration number CF 4291 HF; *Eliminator*, United States official number 507572; *Puka Kai*, United States official number 677462; *Lobster House*, Panama registration number 494-Pext; *Jane E.*, Bahamian official number 315924; and *Diane M.*, Bahamian official number 315925, except that such vessels *Jane E.*, and *Diane M.*, may be operated under such documentation only in the waters of the Atlantic Ocean and the Gulf of Mexico.

SEC. 10. Any use or expenditure of funds by the Coast Guard related to the alteration of the Burlington-Northern Railroad Bridge at mile 6.9 on the Willamette River in Portland, Oregon shall be subject to the first six sections of the Act of March 3, 1931 (40 U.S.C. 276a through 276a-5).

SEC. 11. Section 2(a) of the Act entitled "An Act to facilitate increased enforcement by the Coast Guard of laws relating to the importation of controlled substances, and for other purposes", approved September 15, 1980 (21 U.S.C. 955b(a)), is amended by inserting immediately before the period the following: ", except that an event otherwise qualifying as an arrangement under such section does not lose that qualification by the fact that consent to, or the terms of, such arrangement are communicated by radio, telephone, or other similar means, or by how specific such arrangement is as to the vessel to which such arrangement applies".

SEC. 12. The Coast Guard may enter into a cost-sharing arrangement with the City of Cape May, New Jersey under which the City of Cape May will provide necessary roadway improvement on and along Pennsylvania Avenue between Pittsburg and Buffalo Avenues, as abutted by housing owned by the Coast Guard. For purposes of entering into such an arrangement, the Coast Guard may expend from previously-appropriated funds an amount not to exceed $200,000 on a nonrecurring basis.

SEC. 13. Section 2103 of title 46, United States Code, is amended by striking all after "subtitle" the third time it appears and substituting. "The Secretary may prescribe regulations to carry out the provisions of this subtitle.".

SEC. 14. Section 4370(a) of the Revised Statutes of the United States (46 U.S.C. App. 316(a)) is amended—

(1) by striking all from "a certificate of registry," through "the Act of June 7, 1918, as amended (U.S.C., 1934 edition, Supp. IV, title 46, sec. 288)," and substituting "a certificate of documentation issued under sec-

tions 12106 or 12107 of title 46, United States Code,"; and

(2) by striking "a vessel of foreign registry, or a vessel in distress," and substituting "a vessel in distress".

SEC. 15. Section 3 of the Shipping Act of 1984 (46 U.S.C. App. 1702) is amended—

(1) in paragraph 6, (A) by striking the period at the end of subparagraph (B) and substituting a comma, and (B) by adding at the end thereof the following: "except that the term does not include a common carrier engaged in ocean transportation by ferry boat, ocean tramp, or chemical parcel-tanker. As used in this paragraph, 'chemical parcel-tanker' means a vessel whose cargo-carrying capability consists of individual cargo tanks for bulk chemicals that are a permanent part of the vessel, that have segregation capability with piping systems to permit simultaneous carriage of several bulk chemical cargoes with minimum risk of cross-contamination, and that has a valid certificate of fitness under the International Maritime Organization Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk."; and

(2) in paragraph (18), by striking all from the semi-colon and substituting a period.

SEC. 16. (a) As used in this section, the term—

(1) "commercial fishing industry vessel" means a fishing vessel, fish processing vessel, or fish tender vessel, as those terms are defined in section 2101 of title 46, United States Code;

(2) "Committee" means the Commercial Fishing Industry Vessel Safety Advisory Committee established in subsection (b) of this section; and

(3) "Secretary" means the Secretary of the department in which the Coast Guard is operating.

(b) There is established a Commercial Fishing Industry Vessel Safety Advisory Committee as an advisiory committee of the United States Government reporting to the Secretary.

(c)(1) The Committee shall advise, consult with, and make recommendations to the Secretary on matters relating to commercial fishing industry vessels, including—

(A) navigation safety;

(B) safety equipment and procedures;

(B) marine insurance;

(D) vessel design, construction, maintenance, and operation; and

(E) personnel qualifications and training.

(2) The Secretary, and the Secretary of Commerce, shall use the information, advice, and recommendations of the Committee in consulting with other agencies and the public or in formulating policy regarding commercial fishing industry vessels.

(3) The Committee shall meet at the call of the Secretary, but not less often than once during each calendar year.

(4) Any advice or recommendation made by the Committee shall reflect the independent judgment of the Committee on the matter concerned.

(5) The Committee may make available to Congress any information, advice, and recommendations which the Committee is authorized to give to the Secretary.

(d)(1) The Committee shall consist of seventeen members with particular expertise, knowledge, and experience regarding the commercial fishing industry, as follows:

(A) ten members from the commercial fishing industry who reflect a regional and representational balance, and have experience in the operation of commercial fishing industry vessels, or have experience as a crew member or processing line worker on a commercial fishing industry vessel;

(B) two members from each of the following:

(i) underwriters engaged in insuring commercial fishing industry vessels; and

(ii) the general public, including, whenever possible, a member of a national organization composed of commercial fishing industry vessel and marine insurance interests; and

(C) one member from each of the following—

(i) naval architects or marine surveyors;

(ii) manufacturers of fishing industry vessel equipment; and

(iii) education or training professionals related to commercial fishing industry vessel safety or personnel qualifications.

(2) At least once each year, the Secretary shall publish a notice in the Federal Register and in newspapers of general circulation in coastal areas soliciting nominations for membership on the Committee. After timely notice is published, the Secretary shall appoint the members of the Committee. A member may be reappointed to any number of terms.

(3) The term of a member is three years, except that—

(A) initially, one-third of the members shall serve a term of one year and one-third of the members shall serve a term of two years, to be determined by lot at the first meeting of the Committee;

(B) initially, terms may be adjusted to coincide with the Government's fiscal year; and

(C) if a vacancy occurs, the Secretary shall appoint a member to fill the remainder of the vacated term.

(4) The Committee shall elect one of its members as the Chairman and one of its members as the Vice Chairman. The Vice Chairman shall act as Chairman in the absence or incapacity of, or in the event of a vacancy in the office of, the Chairman.

(5) The Secretary and the Secretary of Commerce shall, and any other interested agency may, designate a representative to participate as an observer with the Committee. These representatives shall, as appropriate, report to and advise the Committee on matters relating to commercial fishing industry vessels under the jurisdiction of their respective departments. The Secretary's jurisdiction of their respective departments. The Secretary's designated representative shall act as executive secretary for the Committee and perform the duties specified in section 10(c) of the Federal Advisory Committee Act (5 U.S.C. App. 10(c)).

(e)(1) The Secretary shall, whenever practicable, except regarding issues which could compromise national security, consult with the Committee concerning the following actions affecting commercial fishing industry vessels—

(A) proposing legislation;

(B) proposing or publishing a regulation;

(C) authorizing or conducting research or a study; or

(D) taking any other major action of the United States Government relating to the Committee's purpose and duties as set forth in subsection (c)(1) of this section.

(2) Consultation with the Committee shall be deemed to satisfy all requirements of title 46, United States Code, for consulting with representatives of the private sector having experience in the operation of commercial fishing industry vessels.

(f)(1) Except as otherwise provided in paragraph (3) of this subsection, a member of the Committee, when attending meetings of the Committee or when otherwise engaged in the business of the Committee, shall serve without pay. While away from their homes or regular places of business, members of the Committee may be allowed travel or transportation expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code.

(2) Any payment made under this subsection shall not render a member of the Committee a member of the uniformed services (as defined in section 101(3) of title 37, United States Code), or an officer or employee of the United States for any purpose.

(3) A member of the Committee who is a member of the uniformed services or an officer or employee of the United States may not receive additional pay on account of such member's service on the Committee, but a member of the Committee who is a member of the uniformed services shall be allowed travel or transportation expenses under section 5703 of title 5, United States Code, unless such member is otherwise entitled to such expenses under any other provision of law.

(4) The Secretary shall furnish the Committee an executive secretary and such secretarial, clerical and other services as are necessary for the conduct of the Committee's business.

(g)(1) The Committee shall terminate on September 30, 1991.

(2) Two years prior to the date of its termination, the Committee shall submit to the Congress its recommendation as to whether the Committee should be renewed and continued beyond such termination date.

(h) There are authorized to be appropriated such amounts as may be necessary to carry out the provisions of this section.

SEC. 17. Notwithstanding the provisions of the Act entitled "An Act to authorize the Secretary of Commerce to sell two obsolete vessels to Coast Line Company and for other purposes", approved June 3, 1980 (Public Law 96-260; 94 Stat. 435), the Secretary of Transportation shall permit the vessels *Pictor*, United States official number 243529, *Procyon*, United States official number 244022, and *Zelima*, United States official number 248207, to be scrapped in the foreign market if—

(1) the purchaser of such vessels and the country in which such vessels are to be scrapped are acceptable to the Secretary of Transportation; and

(2) the seller of any such vessel agrees in writing to reimburse the United States a reasonable amount, acceptable to the Secretary of Transportation, of not less than one-half of the profits realized from such sale.

SEC. 18. Notwithstanding any other provision of law or any agreement with the United States Government, the vessels *Paul Bunyan*, United States official number 602272, and *John Henry*, United States official number 599294, may be sold to a foreign purchaser or purchasers if—

(1) the person desiring to sell the vessel submits to the Secretary of Transportation and the Secretary of the Navy a written offer under which the Secretary of Transportation may elect to acquire either or both vessels for the National Defense Reserve Fleet or the Secretary of the Navy may elect to acquire either or both vessels for the Ready Reserve Fleet, under the same terms and conditions as those offered by the foreign purchaser or purchasers; and

(2) neither Secretary elects to acquire the vessel within 60 days after the date on which a written offer is submitted to the Secretaries under paragraph (1) of this subsection.

SEC. 19. The Port of Houston Authority bridge over Greens Bayou approximately two and eight-tenths miles upstream of the confluence of Greens Bayou, Texas and the Houston Ship Channel is declared to be a lawful bridge for all purposes of the Act entitled "An Act to provide for the alternation of certain bridges over navigable waters of the United States, for the apportionment of the cost of such alterations between the United States and the owners of such a bridge, and for other purposes", approved June 21, 1940 (33 U.S.C. 511 et seq.). The Secretary of the department in which the Coast Guard is operating is authorized to reimburse the owner of the bridge for work done prior to the date of enactment of this section that would be the responsibility of the United States under the Act of June 21, 1940 (33 U.S.C. 511 et seq.) if performed after the date of enactment of this section, except that such reimbursement shall not exceed $450,000.

SEC. 20. Notwithstanding any other provision of law or of prior contract with the United States, the United States flag tug *MOIR*, offical Coast Guard number 60018, shall not be subject to the requirements of section 506 of the Merchant Marine Act, 1936 (46 U.S.C. App. 1156).

Mr. JONES of North Carolina (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment to be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. LENT. Mr. Speaker, reserving the right to object, I will not object, but I would like to have the gentleman from North Carolina [Mr. JONES] the distinguished chairman of the Committee on Merchant Marine and Fisheries, to give a short explanation of this bill, which essentially passed the House back on July 29 of this year, has come back from the other body, with what appear to be a few very technical amendments, but I think in view of the tenor of the House that it might be advantageous if the gentleman would just explain away some of these technical amendments.

Mr. JONES of North Carolina. Mr. Speaker, this bill, as passed by the House, contained miscellaneous provisions of law affecting Coast Guard operations. The bill returned from the Senate retains nearly all of these provisions in essentially the same form.

New section 9 waives the restrictions in coastwise laws for certain vessels. The House has previously approved most of these in a private bill, H.R. 739.

New section 10 makes expenditures of funds for the alteration of a bridge in Oregon subject to certain restrictions to ensure use of local labor.

New section 11 clarifies statutory provisions to facilitate drug enforcement activities of the Coast Guard.

New section 12 provides authority for the Coast Guard to share costs with Cape May, NJ, for improvement of roads.

New section 13 gives the Secretary of Transportation explicit authority to prescribe regulations relating to marine safety and seamen's welfare.

New section 14 amends the towing vessel statutes to close a loophole that allows foreign tugs to be used to tow foreign registry vessels in U.S. ports.

New section 15 resolves an ambiguity in the Shipping Act of 1984 relating to chemical parcel tankers. It clarifies that those vessels are not subject to FMC regulation as common carriers and are, therefore, not exempt from the antitrust laws.

New section 16 establishes a Commercial Fishing Industry Safety Advisory Committee. It is similar to the provisions of H.R. 3025 introduced by Mr. LENT and which I cosponsored.

New section 17 provides authority for three vessels, currently tied up and rusting, to be scrapped in foreign yards if the purchaser and country in which they will be scrapped are acceptable to the Secretary of Transportation and the Secretary is given at least one-half of the profits realized from the scrapping.

New section 18 allows two vessels to be sold to a foreign purchaser if neither the Secretary of Transportation nor the Secretary of the Navy elect to buy them at world market prices.

New section 19 is the same as in section 10 of the House bill with a minor change. It allows the Port of Houston Authority to seek up to $450,000 in reimbursement from the Coast Guard for alteration of a bridge.

New section 20 allows the sale of a tugboat free of the requirements resulting from previous CDS payments.

Mr. Speaker, I know of no controversies regarding these Senate amendments and believe that both majority and minority leaders of the Merchant Marine and Fisheries Committee are prepared to recommend that the House accept them.

Mr. LENT. Mr. Speaker, further reserving the right to object, we have had an opportunity to go over this, at least I have, on behalf of the minority on the House Merchant Marine Committee. This is essentially the bill that passed the House in July. It helps the Coast Guard, it helps the maritime industry. Essentially, we are talking about some technical amendments that were added to a bill that passed by an overwhelming majority back in July.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

Mr. BADHAM. Mr. Speaker, reserving the right to object, I do so because I am concerned about the Coast Guard. It has come to this Member's attention that there are items of legislation working around the House that are denying the Coast Guard some appropriation and some authority, and I would like to ask the chairman of the committee if this has anything to do with that, because I would certainly object, and I would like to ask the chairman of the committee what the gentleman's unanimous-consent request alludes to, as far as the powers, duties, and authorities of the Coast Guard.

Mr. JONES of North Carolina. If the gentleman will yield, as one of the real strong supporters of the Coast Guard, having served as chairman of the Coast Guard Subcommittee a year or so ago, I can assure the gentleman there is nothing in this bill that adversely affects the U.S. Coast Guard.

Mr. BADHAM. Further reserving the right of object, why, may I ask, on December 19, at almost 10 o'clock at night, is the gentleman bringing this unanimous consent up, expressing the urgency of the House to act at this late hour?

Mr. JONES of North Carolina. The Senate just passed it a couple hours ago. I was ready last week, the week before last, and the week before that.

Mr. BADHAM. Mr. Speaker, maintaining my reservation of objection, the gentleman referred to the other body. I do not see that as any particular reason at all for this body to do anything. I would suggest, maintaining my reservation of objection, that the gentleman ought to have a better reason than that.

Mr. JONES of North Carolina. That is the only reason I have.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. BADHAM. Further reserving the right to object, I yield to the gentleman from Pennsylvania.

Mr. WALKER. I want to clarify for a moment, if I can, for the record that it is my understanding that there is no money authorized by this bill, nor is there any money appropriated by the bill, that at one point in the bill, it allows someone to seek authorizations but does not specifically make authorization. Is that a correct characterization?

Mr. BADHAM. Under my reservation of objection, I yield to the chairman for a response to that query.

Mr. LENT. Mr. Speaker, will the gentleman yield to me on that point?

Mr. BADHAM. Under my reservation of objection, Mr. Speaker, I yield to the gentleman from New York.

Mr. LENT. Mr. Speaker, one of the provisions in this bill authorizes a commercial fishing industry vessel safety advisory committee. It is possible, under the terms of that legislation, at some future time an authorization might be requested, but there are

no funds in this bill, which is what I think the gentleman is most concerned about.

Mr. WALKER. Mr. Speaker, will the gentleman yield further?

Mr. BADHAM. Under my reservation of objection, Mr. Speaker, I yield to the gentleman from Pennsylvania.

Mr. WALKER. Just let me clarify. There is no language with regard to the commission of such sums as may be necessary, or any of that kind of language?

Mr. LENT. If the gentleman will yield further, the only thing of that nature that would be provided in this bill is that it provides that 2 years prior to the date of the termination of the advisory council, that council should submit to the Congress recommendations as to whether the committee should be renewed and whether any funds need be authorized.

Mr. BADHAM. Mr. Speaker, under my reservation, I would ask either the chairman or the ranking minority member, is there anything in this unanimous-consent request in this bill that is going to expire if we do not act on it right now, tonight, at the 10th hour of the 12th month?

Mr. JONES of North Carolina. If the gentleman will yield, nothing that I know of.

Mr. BADHAM. Mr. Speaker, then I object.

The SPEAKER pro tempore. Objection is heard.

REVISING AUTHORITY RELATING TO PAYMENT OF SUBSISTENCE AND TRAVEL ALLOWANCE TO GOVERNMENT EMPLOYEES

Mrs. COLLINS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1840) to amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts; and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Illinois?

Mr. McCANDLESS. Mr. Speaker, reserving the right to object, I do so for the purpose of yielding to the gentlewoman from Illinois [Mrs. COLLINS], the chairman of the Subcommittee on Government Activities and Transportation of the Committee on Government Operations, for an explanation of the legislation.

Mrs. COLLINS. I thank the gentleman from California for yielding.

Mr. Speaker, the new travel reimbursement system under S. 1840 would allow the Administrator of General Services to establish these allowances by locality and in accordance with currently prevailing average costs, as determined by expert surveys by locality. Proposed changes in the allowances and procedures would nevertheless have to be laid before Congress for 30 days before they could become effective.

The language of H.R. 1840 and the virtually identical language of H.R. 3291 as amended and ordered reported by the Committee on Government Operations, would provide a basis for GSA's requiring a locality-based reimbursement system under which lodgings cost would have to be validated by a motel or motel receipt. There would be a specific flat allowance for meals for each locality, but without receipt requirement. In no event could total daily reimbursement exceed the established daily maximum set by regulation for the locality in question. This so-called lodgings-plus system would provide the optimum balance with administrative efficiency and economy employee accountability.

The Administrator would also have authority to allow for some increase over the daily local maximums in certain extraordinary and temporary situations, such as would occur, in a given city, if a political convention and some other major event should coincide. In that sort of situation, the Administrator would require that each and every expense claimed by the employee would have to be validated by receipt.

The bill contains additional provisions to relieve certain inequities. For instance, some reimbursement may be allowed to an employee on travel who experiences a serious emergency like a death in the immediate family. Relief would also be available to an employee in law enforcement or investigation capacity where threats to life necessitate temporary relocation of the employee and the employee's family.

Furthermore GSA would be required to collect data from major Federal agencies to permit analysis of travel and transportation expenditures.

The language also includes a provision that would supplement the provisions relating to Federal employees and assure that Government contractors who charge their employees' travel against the Government contract are not able to claim more for that travel than what a Federal employee performing the same travel could claim.

During the September 1985 hearings by the Government Activities and Transportation Subcommittee, all witnesses testified in general support of the principle this bill represents and the system it would authorize. They included Members of Congress, the new Administrator of General Services and representatives of the GAO and employee organizations.

GSA testified that agencies would be required to absorb the additional first year cost of the increased rates, and in subsequent years to monitor travel to keep it to the minimum amount necessary.

The language of the bill represents a very carefully crafted legislative product worked out in close cooperation with the Government Operations Committee's minority and GSA. I particularly appreciate the high interest and fine cooperation of the gentleman from California, the ranking minority member of the Government Activities and Transportation Subcommittee. I am confident that the measure before us will meet well the purposes and needs which prompted its introduction. I am pleased that the other body, through its adoption of the language of the Government Operations Committee's amendment to H.R. 3291, has also reached this conclusion.

It is for these reasons that I strongly urge Members of the House to approve S. 1840. Early enactment would expedite arrival of the time when GSA's implementing regulations become effective—which would be no later than 180 days from the date of the act—and Federal employees consequently could begin receiving fair and adequate reimbursement for the expenses of official travel.

Mr. McCANDLESS. Mr. Speaker, further reserving the right to object, I shall not object, I yield to the gentleman from Virginia [Mr. WOLF].

Mr. WOLF. Mr. Speaker, today I rise in support of this legislation the Civilian Travel Expenses Act of 1985. As one of the early cosponsors of this legislation, I feel its expeditious passage would benefit Federal employees, the Government and the American taxpayers.

As a Member who has worked for several years to reform the reimbursement system for Federal workers who are relocated through Government jobs, I feel it is not only an ethical issue that we cover the costs of our employees who we direct to relocate, but it also is a family issue. It becomes a family issue when financial hardships arise from inadequate compensation for required moves because that money has to come out of the pockets of Federal workers and their families.

I am also concerned about providing adequate reimbursement for travel expenses that Federal employees incur through their civil service positions. I have talked with employees who conveyed how frequently they must subsidize business trips because current government rates will not authorize payment for certain unavoidable expenses.

Employees have been concerned because of lengthy delays in getting re-

imbursed for travel vouchers long after they had to pay for the business expense. If a credit card is used to pay the expense, the interest on delayed repayments also goes unreimbursed.

Employees have also mentioned that traveling for the Government is no small expense, and accounting for that travel, keeping adequate records, and administration of the travel activities may account for up to 15 to 20 percent of all travel expenses the Government pays. Clearly, any effort to reduce this costly overhead, encourage accountability and provide adequate reimbursement in a timely manner should be actively pursued.

Mr. Speaker, travel per diem bill demonstrates that constructive Government reforms also can be positive changes for Federal workers. I feel this is a fair approach and urge my colleagues to support this measure.

Mr. McCANDLESS. Mr. Speaker, further reserving the right to object, I would simply like to add the minority's view of S. 1840.

The language contained in S. 1840 is virtually identical to that of H.R. 3291, which has been approved unanimously by voice vote in both subcommittee and in our full Government Operations Committee. We have worked very closely with the other body on this needed legislation, and we have something here that's being supported by both sides of the aisle in both Houses of Congress.

S. 1840 is strongly supported by the administration. Additionally, various Federal employee organizations are endorsing the legislation.

H.R. 3291 as amended and reported unanimously by the Committee on Government Operations.

The purpose of the legislation is to give the Administrator of General Services more flexibility in establishing the system of reimbursing Federal employees for the subsistence expenses of official travel. These subsistence expenses consist of lodgings, meals, and incidentals.

S. 1840 would permit the GSA Administrator to establish locality-based allowances for these expenses. These allowances would be based upon cost surveys conducted by locality. S. 1840 maintains strict congressional scrutiny of implementing regulations by providing that such regulations are not effective until 30 days after transmittal to the appropriate congressional committees.

Current law, which sets reimbursement caps on a nationwide basis, has proven inadequate to meet the needs of the Government. As a result, Federal employees must many times subsidize official Government travel.

At our hearing on H.R. 3291—which, as I say, is embodied in S. 1840—all the Federal employee organizations that testified supported the changes. H.R. 3291 was originally proposed by the administration, and or committee's amendments have their support.

What we have is legislation that's fair to the Government and fair to those traveling on official Government business. S. 1840 is responsible legislation, and it has my support.

I want to thank Chairwoman COLLINS, Chairman BROOKS, and my ranking member, FRANK HORTON, for their assistance in making this legislation a reality.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 19, 1985.

Hon. JACK BROOKS,
Chairman, Committee on Government Operations, U.S. House of Representatives, Rayburn House Office Building, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has reviewed H.R. 3291, the Federal Civilian Employee and Contractor Travel Expense Act of 1985, as ordered reported by the House Committee on Government Operations, December 10, 1985.

The bill would authorize the Administrator of the General Services Administration (GSA) to establish new rates for payment of federal employees' travel expenses. Based on the Administrator's testimony before the Subcommittee on Government Activities and Administration, we expect that GSA would replace the current $50 and $75 statutory limitations on per diem and actual expense reimbursements with a "lodgings-plus" system. Under that system, the per diem allowance would cover the actual cost of lodgings plus a flat rate (which would vary by location) for meals and miscellaneous expenses. Because the expected costs of lodgings and rate amounts would be greater than the $75 cap that is currently in effect for 137 cities, total travel costs would increase by an estimated $200 million annually. However, these increased costs would be partially offset by a reduction in the administrative expenses associated with reimbursing federal employees. Because the locality-based flat-rate system for meals and miscellaneous expenses would eliminate the need for processing vouchers for those expenses, annual administrative costs may decrease by $20 million to $30 million. The full effect of these increases in travel costs and decreases in administrative costs would probably not occur until fiscal year 1987 because the new travel regulations would not become effective until six months after enactment of the bill.

The bill would also require that government contractors be reimbursed for travel expenses at the same rate as federal employees. This is likely to reduce somewhat government contracting costs, but we cannot presently estimate the magnitude of such savings. In addition, the bill would require the Administrator to prepare a biennal analysis of federal travel costs for the Office of Management and Budget. Because GSA already collects most of the information required by the report, we do not expect the report to result in significant additional costs to the federal government.

Enactment of this bill would not affect the budgets of state or local governments.

If you wish further details on this estimate, we will be pleased to provide them.

With best wishes,

Sincerely,

JAMES BLUM
(For Rudolph G. Penner, *Director*).

Mr. BROOKS. Mr. Speaker, will the gentleman yield?

Mr. McCANDLESS. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Speaker, this bill is identical to H.R. 3291, which I introduced at the request of the administration on September 12, 1985. The bill's main purpose, very simply, is to make sure that Federal employees who are traveling on agency business are treated more fairly than under current conditions. It authorizes the Administrator of General Services to establish a per diem allowance system that more accurately reflects the true cost of away-from-home duty than the current system does. GSA intends to establish a "lodgings plus" reimbursement system that will both reimburse the employee adequately and reduce the paperwork involved in travel accounting by the agencies.

In addition, the bill contains language proposed by Mr. McCANDLESS, which provides that allowable costs for the travel expenses of Government contractors would be required to conform to the payment for regular Government employees.

S. 1840 is a good bill that promises a fair deal both for Federal employees and for the agencies administering their travel expenses.

Mr. PARRIS. Mr. Speaker, will the gentleman yield?

Mr. McCANDLESS. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from Virginia.

Mr. PARRIS. Mr. Speaker, I rise in support of the legislation.

Mr. HORTON. Mr. Speaker, will the gentleman yield?

Mr. McCANDLESS. Further reserving the right to object, Mr. Speaker, I yield to the gentleman from New York.

Mr. HORTON. Mr. Speaker, I rise in support of this legislation.

As the gentleman from California [Mr. McCANDLESS] stated, this legislation was unanimously adopted in the subcommittee and the full Committee on Government Operations. It is a good bill, and I urge its adoption.

Mrs. BENTLEY. Mr. Speaker, I rise in support of this legislation to ease the burden of Federal employees who are required to travel in order to accomplish their assigned work. It would be shameful to allow a state of affairs to continue in which our own Federal workers are forced to underwrite the expenses which they incur on Government business.

It seems that, in my brief time in this body, we have the unfortunate tendency to look to our own work force to find ways to cut spending. At least we should make sure, as this bill does, that they do not have to operate out of their own pockets when away from home on business.

I urge the passage of this bill to relieve these workers who are already bearing

more of the Government's rush to economize, than is, in my view, equitable. I will vote for it and ask my colleagues to do the same.

Mr. PARRIS. Mr. Speaker, I rise in support of H.R. 1840, the reported committee version of H.R. 3291. This legislation, which I have cosponsored and testified on behalf of before the House Government Operations Committee, offers much needed improvements in the travel reimbursement system for Federal employees.

As has been pointed out by the General Services Administration, the $50 and $75 statutory ceilings for domestic travel expenses have become inadequate for travel to most cities. Designated high rate areas have increased from 6 in 1975 to 379 in 1985. Food and lodging in my district surrounding the Washington, DC, area, for example, can cost up to $148 a day, according to a 1984 GSA survey. H.R. 1840 would remove these outdated ceilings on reimbursement and eliminate financial losses currently being incurred by Federal employees when they travel to many cities.

The second significant change proposed by this legislation deals with reimbursement methods. For 5 years, the General Accounting Office, Office of Management and Budget, and the General Services Administration have supported replacing the current methods of reimbursement with a system less costly, time consuming, and burdensome for the traveler as well as the agency. To accomplish this, H.R. 1840 proposes a per diem based on the cost of lodging actually incurred by the traveler plus a flat rate, which may vary by location, for meals and miscellaneous expenses. Proper implementation of this system should help reduce employee travel costs and increase administrative accountability, resulting in cost savings to the Government.

Mr. Speaker, this legislation is not the final answer to every problem in the Federal travel system. It does, however, offer major improvements in many areas, particularly in ensuring accurate travel costs to many cities.

I urge prompt and favorable House consideration of H.R. 1840.

Mr. McCANDLESS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION. 1. This Act may be cited as the "Federal Civilian Employee and Contractor Travel Expenses Act of 1985".

TITLE I—TRAVEL EXPENSES OF FEDERAL CIVILIAN EMPLOYEES

SEC. 101. Section 5701(4) of title 5, United States Code, is amended to read as follows:

"(4) 'per diem allowance' means a daily payment instead of actual expenses for subsistence and fees or tips to porters and stewards;".

SEC. 102. (a) Section 5702 of title 5, United States Code, is amended by striking out subsections (a), (b), (c), and (d) and inserting in lieu thereof the following:

"(a)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee, when traveling on official business away from the employee's designated post of duty, or away from the employee's home or regular place of business (if the employee is described in section 5703 of this title), is entitled to any one of the following:

"(A) a per diem allowance at a rate not to exceed that established by the Administrator of General Services for travel within the continential United States, and by the President or his designee for travel outside the continental United States;

"(B) reimbursement for the actual and necessary expenses of official travel not to exceed an amount established by the Administrator for travel within the continential United States or an amount established by the President or his designee for travel outside the continential United States; or

"(C) a combination of payments described in subparagraphs (A) and (B) of this paragraph.

"(2) Any per diem allowance or maximum amount of reimbursement shall be established, to the extent feasible, by locality.

"(3) For travel consuming less than a full day, the payment prescribed by regulation shall be allocated in such manner as the Administrator may prescribe.

"(b)(1) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who abandons the travel assignment prior to its completion—

"(A) because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and to payments pursuant to subsection (a) of this section until that location is reached; or

"(B) because of a personal emergency situation (such as serious illness, injury, or death of a member of the employee's family, or an emergency situation such as fire, flood, or act of God), may be allowed, with the approval of an appropriate official of the agency concerned, reimbursement for expenses of transportation to the employee's designated post of duty, or home or regular place of business, as the case may be, and payments pursuant to subsection (a) of this section until that location is reached.

"(2)(A) Under regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who, with the approval of an appropriate officials of the agency concerned, interrupts the travel assignment prior to its completion for a reason specified in subparagraph (A) or (B) of paragraph (1) of this subsection, may be allowed (subject to the limitation provided in subparagraph (B) of this paragraph)—

"(i) reimbursement for expenses of transportation to the location where necessary medical services are provided or the emergency situation exists,

"(ii) payments pursuant to subsection (a) of this section until that location is reached, and

"(iii) such reimbursement and payments for return to such assignment.

"(B) The reimbursement which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be the employee's actual costs of transportation to the location where necessary medical services are provided or the emergency exists, and return to assignment from such location, less the costs of transportation which the employee would have incurred has such travel begun and ended at the employee's designated post of duty, or home or regular place of business, as the case may be. The payments which an employee may be allowed pursuant to subparagraph (A) of this paragraph shall be based on the additional time (if any) which was required for the employee's transportation as a consequence of the transportation's having begun and ended at a location on the travel assignment (rather than at the employee's designated post of duty, or home or regular place of business, as the case may be).

"(3) Subject to the limitations contained in regulations prescribed pursuant to section 5707 of this title, an employee who is described in subsection (a) of this section and who interrupts the travel assignment prior to its completion because of an incapacitating illness or injury which is not due to the employee's own misconduct is entitled to payments pursuant to subsection (a) of this section at the location where the interruption occurred.".

(b) Section 5702 of such title is further amended by redesignating subsection (e) as subsection (c).

SEC. 103. (a) Subchapter I of chapter 57 of title 5, United States Code, is amended by inserting after section 5706 the following new section:

"§ 5706a. Subsistence and travell expenses for threatened law enforcement personnel

"(a) Under regulations prescribed pursuant to section 5707 of this title, when the life of an employee who serves in a law enforcement, investigative, or similar capacity, or members of such employee's immediate family, is threatened as a result of the employee's assigned duties, the head of the agency concerned may approve appropriate subsistence payments for the employee or members of the employee's family (or both) while occupying temporary living accommodations at or away from the employee's designated post of duty.

"(b) When a situation described in subsection (a) of this section requires the employee or members of the employee's family (or both) to be temporarily relocated away from the employee's designated post of duty, the head of the agency concerned may approve transportation expresses to and from such alternate location.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item pertaining to section 5706 the following new item:

"5706a. Subsistence and travel expenses for threatened law enforcement personnel."

SEC. 104. Section 5707 of title 5, United States Code, is amended—

(1) by inserting "(1)" immediately after "(a)";

(2) by inserting the following at the end of subsection (a):

"(2) Regulations promulgated to implement secton 5702 or 5706a of this title shall be transmitted to the appropriate committees of the Congress an shall not take effect until 30 days after such transmittal."; and

(3) by inserting at the end thereof the following new subsection:

"(c)(1) The Administrator of General Services shall periodically, but at least every 2 years, submit to the Director of the Office

of Management and Budget an analysis of estimated total agency payments for such items as travel and transportation of people, average costs and duration of trips, and purposes of official travel; and of estimated total agency payments for employee relocation. This analysis shall be based on a sampling survey of agencies each of which spent more than $5,000,000 during the previous fiscal year on travel and transportation payments, including payments for employee relocation. Agencies shall provide to the Administrator the necessary information in a format prescribed by the Administrator and approved by the Director.

"(2) the requirements of paragraph (1) of this subsection shall exprie upon the Administrator's submission of the analysis that includes the fiscal year that ends September 30, 1991.".

SEC. 105. Section 5724a title 5, United States Code, is amended—

(1) by striking out "instead of" each place it appears in subsections (a)(1) and (a)(2) and inserting in lieu thereof "or";

(2) by striking out "maximum per diem rates prescribed by or under section 5702 of this title" each place it appears and inserting in lieu thereof "maximum payment premitted under regulations which implement section 5702 of this title"; and

(3) by striking out "average daily rates" in subsection (a)(3) and inserting in lieu thereof "daily rates and amounts".

SEC. 106. (a) Subchapter II of chapter 57 of title 5, United States Code, is amended by adding at the end thereof the following new section:

"§ 5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service

"Notwithstanding the provisions of any other law, officers and employees of the United States Postal Service promoted or transferred under section 1006 of title 39, United States Code, from the Postal Service to an agency (as defined in section 5721 of this title), for permanent duty may be authorized travel, transportation, and relocation expenses and allowances under the same conditions and to the same extent authorized by this subchapter for other transferred employes within the meaning of this chapter.".

(b) The analysis for chapter 57 of title 5, United States Code, is amended by inserting after the item relating to section 5733 the following new item:

"5734. Travel, transportation, and relocation expenses of employees transferred from the Postal Service.".

SEC. 107. (a) Section 7(e) of the Technology Assessment Act of 1972 (2 U.S.C. 476(e)) is amended by striking out "a per diem in lieu of subsistence at not to exceed the rate prescribed in sections 5702 and" and inserting in lieu thereof "payments when traveling on official business at not to exceed the payment prescribed in regulations implementing section 5702 and in".

(b) Section 636(g)(2) of the Foreign Assistance Act of 1961 (22 U.S.C. 2396(g)) is amended by striking out "5702(c)" and inserting in lieu thereof "5702".

(c) Section 4941(2)(2)(G)(vii) of the Internal Revenue Code of 1954 (26 U.S.C. 4941(d)(2)(G)(vii)) is amended by striking out "5702(a)" and inserting in lieu thereof "5702".

(d) Section 456(a) of title 28, United States Code, is amended by striking out "a per diem allowance for travel at the rate which the Director establishes not to exceed the maximum per diem allowance fixed by section 5702(a) of title 5, or in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States, reimbursement for his actual and necessary expenses of subsistence not in excess of the maximum amount fixed by section 5702 of title 5" and inserting in lieu thereof the following: "payments for subsistence expenses at rates or in amounts which the Director establishes, in accordance with regulations which the Director shall prescribe with the approval of the Judicial Conference of the United States and after considering the rates or amounts set by the Administrator of General Services and the President pursuant to section 5702 of title 5".

(e) Section 326(b) of title 31, United States Code, is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

(f) Section 6 of Public Law 90-67 (42 U.S.C. 2477) is amended by striking out "rates" and inserting in lieu thereof "rates and amounts".

TITLE II—TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

SEC. 201. The Office of Federal Procurement Policy Act (41 U.S.C. 401 et seq.) is amended by adding at the end thereof the following new section:

"TRAVEL EXPENSES OF GOVERNMENT CONTRACTORS

"SEC. 24. Under any contract with any executive agency, costs incurred by contractor personnel for travel, including costs of lodging, other subsistence, and incidental expenses, shall be considered to be reasonable and allowable only to the extent that they do not exceed the rates and amounts set by subchapter I of chapter 57 of title 5, United States Code, or by the Administrator of General Services or the President (or his designee) pursuant to any provision of such subchapter. This section shall be implemented in regulations prescribed as a part of the single system of Government-wide procurement regulations as defined in section 4 of this Act.".

SEC. 202. The Administrator for Federal Procurement Policy, in consultation with the Secretary of Defense and the Administrator of General Services, shall undertake a study to determine whether limitations should be placed on payments by executive agencies to Government contractors for costs incurred by contractor employees for transportation and relocation. The Administrator for Federal Procurement Policy shall submit within 180 days after the enactment of this Act a report thereon to the appropriate committees of the Congress.

TITLE III—EFFECTIVE DATE

SEC. 301. (a) The Administrator of General Services shall promulgate regulations implementing the amendments made by sections 101, 102, 103, 104, and 106 of this Act not later than 150 days after the date of enactment of this Act. The amendments made by title I of this Act shall take effect on the effective date of such regulations, or 180 days after the date of enactment of this Act, whichever occurs first.

(b) The amendments made by section 201 of this Act shall take effect 30 days after the effective date of the amendments made by title I.

Amend the title so as to read as follows: "To amend title 5, United States Code, to revise the authority relating to the payment of subsistence and travel allowances to Government employees for official travel; to prescribe standards for the allowability of the cost of subsistence and travel of contractor personnel under Government contracts; and for other purposes.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ 2200

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time in an effort to share with my colleagues where we are and where we expect to be. We still very earnestly expect to adjourn sine die this evening. With the cooperation of the Members, this can be done.

At this moment we are standing by while staff are drafting a mutually satisfactory agreement relating to the extensions that were discussed earlier. We will have those back again.

There will be some resolutions concerning the adjournment sine die, and those must be agreed to. We will have those rather shortly.

But I want to ask if all Members will stand by and await the action of the other body with regard to our reconciliation bill. This is the largest reconciliation bill ever passed in Congress with or without the Superfund provisions. Including the Superfund provisions, it would have been an $81 billion deficit-reduction package, the biggest we have ever had. Even without the Superfund provisions, it still amounts to approximately a $72 billion deficit-reduction package. It is surely worth waiting a little while for. What a Christmas present for the American people.

So let us stick around. We have asked the Rules Committee to stand by just in the event it were necessary for them to meet again, but we hope that will not be necessary. We trust things will go well and we will be able to adjourn sine die this evening. Then the distinguished minority leader and someone from the majority can go and make a phone call and tell our President that we are ready to leave and wish him and all of his a happy Christmas and a happy Yuletide season.

Mr. MICHEL. Mr. Speaker, will the distinguished majority leader yield?

Mr. WRIGHT. I surely will yield to the minority leader.

Mr. MICHEL. Mr. Speaker, according to my understanding, our Ways and Means Committee members are in consultation now on a general accord on all those tax provisions that would expire on December 31 to extend, gen-

erally speaking, most all of them until about March 15, and if it takes them yet a while to work out a couple of those intricacies, what do we plan to do in the interval here?

Mr. WRIGHT. Well, I should think we might try to pass some resolutions concerning the sine die adjournment.

Mr. MICHEL. Well, let us do that, then. That would be very productive.

Mr. WRIGHT. If the gentleman from Illinois wanted to ask unanimous consent at that point that we might allow the House to stand in recess subject to the call of the Chair, it may be that he would have better luck than the gentleman from Texas had on an earlier occasion today.

Mr. MICHEL. I understand. I understand that.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I am happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, I appreciate the gentleman's yielding.

I think the one thing we want to be careful of on recesses, as I understand it, is that we have to get the bill passed with the tax provisions, past the Senate and down to the President, so he can sign it before midnight or it kicks in all of the problems that accrued because of States and their cigarette taxes, and so on. So I think we would want to be very careful with recesses to make certain we allow plenty of time to get the work done that we have to do on those provisions and get the bill down to the White House well before midnight.

Mr. WRIGHT. Mr. Speaker, we have no expectation of recessing prior to the passage of that particular piece of legislation. I understand the Ways and Means Committee will only require about 15 minutes to be ready here on the floor with that legislation. So we can busy ourselves with one thing and another prior to that time. And I do plead earnestly with our colleagues not to go home just yet. Let us stick around.

Mr. MICHEL. Mr. Speaker, I have no objection to that, other than we would like to have sufficient notice on this side of those matters that will be brought up from the majority side so that we will have the competent Members here from the respective committees to respond. I have no objection to that.

Mr. WRIGHT. We will try not to surprise you. We may be ourselves surprised because nobody knows what may happen, but we will try to share whatever knowledge we have with the minority just as soon as we have it.

REQUEST FOR CONSIDERATION OF S. 1574, HEALTH CONSEQUENCES OF USING SMOKELESS TOBACCO PRODUCTS

Mr. WAXMAN. Mr. Speaker, I ask unanimous consent, and this has been cleared with the minority, to take from the Speaker's table the Senate bill (S. 1574) to provide for public education concerning the health consequences of using smokeless tobacco products, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore (Mr. KILDEE). Is there objection to the request of the gentleman from California?

Mr. BLILEY. Reserving the right to object, Mr. Speaker, earlier this week the Senate passed S. 1574 without dissent. I have told the gentleman from Oklahoma and the gentleman from California, the distinguished chairman of the Health Subcommittee, that I would be willing to accept the Senate bill as is. I have even told the gentleman that I would be willing to accept the Senate bill with an amendment that had an electronic-advertising ban, which the Senate bill does not contain and which I feel is unnecessary and wrong. But I would be willing to accept it in the spirit of accommodation.

Will the gentleman accept this offer?

Mr. WAXMAN. Mr. Speaker, will the gentleman yield to me?

Mr. BLILEY. I am happy to yield to the gentleman from California.

Mr. WAXMAN. Mr. Speaker, if I get unanimous consent to take this bill from the Speaker's table, I have an amendment at the desk which I will offer. That amendment embodies an agreement which has been signed off by all the industry groups affected. So I would propose to amend the bill and send it back to the Senate with the expectation that they would take the bill as amended.

Mr. BLILEY. Further reserving the right to object, Mr. Speaker, does the gentleman's proposal include arrows, a bull's eye, and color?

Mr. WAXMAN. Mr. Speaker, if the gentleman will yield to me further, our proposal does try to develop a very visible way of displaying the warning label on the advertising, and it would have in its display a circle and an arrow to draw people's attention to that label. We want people to see the warning label, and hopefully they will be discouraged voluntarily from using this substance.

Mr. BLILEY. Reclaiming my time and further reserving the right to object, Mr. Speaker, this is a more stringent provision than is required on cigarettes at the present time, and I would be forced to object.

Mr. ROSE. Mr. Speaker, will the gentleman yield to me?

Mr. BLILEY. I am happy to yield to the gentleman from North Carolina.

Mr. ROSE. Mr. Speaker, My information is that the smokeless-tobacco industry has signed off on what the gentleman from California is attempting to do. Is that not correct?

Mr. BLILEY. That is correct, but the smokeless-tobacco industry is a small part of the industry, as the gentleman knows.

Mr. ROSE. But this bill only affects the smokeless-tobacco industry.

Mr. BLILEY. At the present time, yes, but the effects will be brought back on the others.

Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

A LAST-MINUTE PROLIFERATION OF LEGISLATION

(Mr. TRAFICANT asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. TRAFICANT. Mr. Speaker, as a new Member, I would just like to say here that it seems at the last minute we are getting an awful lot of legislative items come before us. Perhaps it is just to spend some time. Nevertheless, I think I am going to establish a rule that, while I am in Congress, might be a general rule to guide me through the end of sessions. That is going to be basically this. Anything that is thicker than 4 inches or weighs more than 4 pounds that is brought up at the very last hour of the session, I am going to vote "no" on it.

□ 2210

I would just like to say that I would like to encourage the leaders to look very carefully at the process that is now being undertaken, to bring back to us those measures that are pertinent and germane, and I think the House will act on them prudently.

THERE IS NO CHRISTMAS HOLIDAY IN ROMANIA

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLF. Mr. Speaker, on December 25, 1983, in a Christmas message, Father Geza Palfy, Roman Catholic priest of Hungarian minority in Romania, made the following statement: "I believe in Romania, Christmas should be an official holiday."

For that, he was arrested by secret police, interrogated, severely beaten, and left the police station 2 days later unconscious. He died 2 months later in a hospital Tirgu-Mores. Romanian officials say he died of cancer of the liver; however, all evidence gathered

by Christian Response International indicated Father Palfy died of internal injuries sustained during police beatings.

This is the same country to which we give preferential trade status—most favored nation. Can we support such religious repression and violation of human rights? As we reflect during this Christmas season on our own liberties, won't you join me and 60 of our colleagues in supporting a 6-month suspension of the MFN trade status to Romania to make a moral statement that Americans will have no part in the economy or support of such a repressive regime?

Please cosponsor H.R. 3599 to suspend MFN for 6 months in Romania.

APPOINTMENT OF COMMITTEE OF TWO MEMBERS TO INFORM THE PRESIDENT THAT THE TWO HOUSES HAVE COMPLETED THEIR BUSINESS OF THE SESSION

Mr. FOLEY. Mr. Speaker, I offer a privileged resolution (H. Res. 351) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 351

Resolved, That a committee of two Members be appointed by the House to join a similar committee appointed by the Senate, to wait upon the President of the United States and inform him that the two Houses have completed their business of the session and are ready to adjourn, unless the President has some other communication to make to them.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING DATE FOR BEGINNING OF SECOND SESSION OF 99TH CONGRESS

Mr. FOLEY. Mr. Speaker, I send to the desk a joint resolution (H.J. Res. 496) and ask unanimous consent for its immediate consideration.

The Clerk read the title of the joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the joint resolution, as follows:

H.J. RES. 496

Resolved by the Senate and House of Representatives of the United States of America in Congress Assembled, That the second regular session of the Ninety-ninth Congress shall begin at 12 o'clock meridian on Tuesday, January 21, 1986.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND TO APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING ADJOURNMENT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that notwithstanding the sine die adjournment of the 1st session of the 99th Congress, the Speaker be authorized to accept resignations, and to appoint Commissions, Boards, and committees authorized by law or by the House.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PERMISSION FOR ALL MEMBERS TO REVISE AND EXTEND THEIR REMARKS AND TO INCLUDE SHORT QUOTATIONS UNTIL LAST EDITION OF CONGRESSIONAL RECORD

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that all Members of the House shall have the privilege, until the last edition authorized by the Joint Committee on Printing is published, to extend and revise their own remarks in the CONGRESSIONAL RECORD on more than one subject, if they so desire, and may also include therein such short quotations as may be necessary to explain or complete such extensions of remarks, but this order shall not apply to any subject matter which may have occurred, or to any speech delivered subsequent to the adjournment of Congress.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

PERMISSION FOR CHAIRMAN AND RANKING MINORITY MEMBER OF EACH STANDING COMMITTEE AND EACH SUBCOMMITTEE TO EXTEND REMARKS UP TO AND INCLUDING LAST PUBLICATION OF CONGRESSIONAL RECORD

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the chairman and ranking minority member of each standing committee and each subcommittee thereof be permitted to extend their remarks in the RECORD, up to and including the last publication thereof, and to include therewith a summary of the work of that committee or subcommittee.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

Mr. WALKER. Mr. Speaker, reserving the right to object, I think that is a standard item. Why is that one different than the resolution we just passed that gives broad authority for revision and extensions?

I yield to the gentleman from Washington.

Mr. FOLEY. I think it is largely traditional to specify the subcommittee chairmen and the ranking minority members, the full committee members and the ranking minority members to indicate that they may make extended remarks on the work of the subcommittees. This is sometimes a longer authority then would be given normally to Members to include extraneous material.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington [Mr. FOLEY]?

There was no objection.

VETERANS' COMPENSATION RATE AMENDMENTS OF 1985

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 1538) to amend title 38, United States Code, to provide a 3.4-percent increase in the rates of compensation and of dependency and indemnity compensation [DIC] paid by the Veterans' Administration, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert:

SECTION 1. SHORT TITLE.

This Act may be cited as the "Veterans' Compensation Rate Increase and Job Training Amendments of 1985".

TITLE I—DISABILITY COMPENSATION AND DEPENDENCY AND INDEMNITY COMPENSATION RATE INCREASES

SEC. 101. DISABILITY COMPENSATION.

(a) IN GENERAL.—Section 314 of title 38, United States Code, is amended—

(1) by striking out "$66" in subsection (a) and inserting in lieu thereof "$68";

(2) by striking out "$122" in subsection (b) and inserting in lieu thereof "$126";

(3) by striking out "$185" in subsection (c) and inserting in lieu thereof "$191";

(4) by striking out "$266" in subsection (d) and inserting in lieu thereof "$274";

(5) by striking out "$376" in subsection (e) and inserting in lieu thereof "$388";

(6) by striking out "$474" in subsection (f) and inserting in lieu thereof "$489";

(7) by striking out "$598" in subsection (g) and inserting in lieu thereof "$617";

(8) by striking out "$692" in subsection (h) and inserting in lieu thereof "$713";

(9) by striking out "$779" in subsection (i) and inserting in lieu thereof "$803";

(10) by striking out "$1,295" in subsection (j) and inserting in lieu thereof "$1,335";

(11) by striking out "$1,609" and "$2,255" in subsection (k) and inserting in lieu thereof "$1,659" and "$2,325", respectively;

(12) by striking out "$1,609" in subsection (l) and inserting in lieu thereof "$1,659",

(13) by striking out "$1,774" in subsection (m) and inserting in lieu thereof "$1,829";

(14) by striking out "$2,017" in subsection (n) and inserting in lieu thereof "$2,080";

(15) by striking out "$2,255" each place it appears in subsections (o) and (p) and inserting in lieu thereof "$2,325";

(16) by striking out "$968" and "$1,442" in subsection (r) and inserting in lieu thereof "$998" and "$1,487", respectively;

(17) by striking out "$1,449" in subsection (s) and inserting in lieu thereof "$1,494"; and

(18) by striking out "$280" in subsection (t) and inserting in lieu thereof "$289".

(b) SPECIAL RULE.—The Administrator of Veterans' Affairs may adjust administratively, consistent with the increases authorized by this section, the rates of disability compensation payable to persons within the purview of section 10 of Public Law 85-857 who are not in receipt of compensation payable pursuant to chapter 11 of title 38, United States Code.

SEC. 102. ADDITIONAL COMPENSATION FOR DEPENDENTS.

Section 315(1) of title 38, United States Code, is amended—

(1) by striking out "$79" in clause (A) and inserting in lieu thereof "$81";

(2) by striking out "$132" and "$42" in clause (B) and inserting in lieu thereof "$136" and "$43", respectively;

(3) by striking out "$54" and "$42" in clause (C) and inserting in lieu thereof "$56" and "$43", respectively;

(4) by striking out "$64" in clause (D) and inserting in lieu thereof "$66";

(5) by striking out "$143" in clause (E) and inserting in lieu thereof "$147"; and

(6) by striking out "$120" in clause (F) and inserting in lieu thereof "$124".

SEC. 103. CLOTHING ALLOWANCE FOR CERTAIN DISABLED VETERANS.

Section 362 of title 38, United States Code, is amended by striking out "$349" and inserting in lieu thereof "$360".

SEC. 104. DEPENDENCY AND INDEMNITY COMPENSATION FOR SURVIVING SPOUSES.

Section 411 of title 38, United States Code, is amended—

(1) by striking out the table in subsection (a) and inserting in lieu thereof the following:

"Pay grade:	*Monthly rate*
E-1	$491
E-2	505
E-3	518
E-4	552
E-5	566
E-6	578
E-7	607
E-8	640
E-9[1]	669
W-1	621
W-2	645
W-3	664
W-4	703
O-1	621
O-2	640
O-3	686
O-4	725
O-5	799
O-6	900
O-7	973
O-8	1,067
O-9	1,145
O-10[2]	1,255

"[1] If the veteran served as sergeant major of the Army, senior enlisted advisor of the Navy, chief master sergeant of the Air Force, sergeant major of the Marine Corps, or master chief petty officer of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $722.

"[2] If the veteran served as Chairman of the Joint Chiefs of Staff, Chief of Staff of the Army, Chief of Naval Operations, Chief of Staff of the Air Force, Commandant of the Marine Corps, or Commandant of the Coast Guard, at the applicable time designated by section 402 of this title, the surviving spouse's rate shall be $1,345."

(2) by striking out "$55" in subsection (b) and inserting in lieu thereof "$57";

(3) by striking out "$143" in subsection (c) and inserting in lieu thereof "$147"; and

(4) by striking out "$70" in subsection (d) and inserting in lieu thereof "$72".

SEC. 105. DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

Section 413 of title 38, United States Code, is amended—

(1) by striking out "$240" in clause (1) and inserting in lieu thereof "$247";

(2) by striking out "$345" in clause (2) and inserting in lieu thereof "$356";

(3) by striking out "$446" in clause (3) and inserting in lieu thereof "$460";

(4) by striking out "$446" and "$90" in clause (4) and inserting in lieu thereof "$460" and "$93", respectively.

SEC. 106. SUPPLEMENTAL DEPENDENCY AND INDEMNITY COMPENSATION FOR CHILDREN.

Section 414 of title 38, United States Code, is amended—

(1) by striking out "$143" in subsection (a) and inserting in lieu thereof "$147";

(2) by striking out "$240" in subsection (b) and inserting in lieu thereof "$247"; and

(3) by striking out "$122" in subsection (c) and inserting in lieu thereof "$126".

SEC. 107. EFFECTIVE DATE.

The amendments made by this title shall take effect as of December 1, 1985.

TITLE II—VETERANS' JOB TRAINING AMENDMENTS

SEC. 201. EMERGENCY VETERANS' JOB TRAINING ACT AMENDMENTS.

(a) SHORT TITLE.—(1) The first sentence of section 1 of Public Law 98-77 (29 U.S.C. 1721 note) is amended to read as follows: "This Act may be cited as the 'Veterans' Job Training Act'.".

(2) Any reference in any Federal law to the Emergency Veterans' Job Training Act of 1983 shall be deemed to refer to the Veterans' Job Training Act.

(b) ELIGIBILITY.—Section 5(a)(1)(B) of the Veterans' Job Training Act, as redesignated by subsection (a), is amended by striking out "fifteen of the twenty" and inserting in lieu thereof "10 of the 15".

(c) COUNSELING.—Section 14 of such Act is amended—

(1) by inserting "(a)" before "The"; and

(2) by adding at the end the following new subsection.

"(b) The Secretary—

"(1) shall provide for a program under which periodic (not less than monthly) contact is maintained with each veteran participating in a program of job training under this Act for the purposes of avoiding unnecessary termination of employment, referring the veteran to appropriate counseling if necessary, and facilitating the veteran's successful completion of such program; and

"(2) after consultation with the Administrator, shall provide for a program of counseling services designed to resolve difficulties that may be encountered by veterans during their training under this Act and shall advise all veterans and employers participating under this Act of the avilability of such services and other related counseling services and assistance and encourage them to request such services and assistance whenever appropriate.".

(d) AUTHORIZATION OF APPROPRIATIONS.—Section 16 of such Act is amended—

(1) by inserting "and $65,000,000 for fiscal year 1986" after "1985"; and

(2) by striking out "1987" and inserting in lieu thereof "1988".

(e) TOLLING OF CERTAIN PERIOD.—Section 17 of such Act is amended—

(1) by striking out "Assistance" and inserting in lieu thereof "(a) Except as provided in subsection (b), assistance";

(2) in clause (1), by striking out "February 28, 1985" and inserting in lieu therof "January 31, 1987";

(3) in clause (2), by striking out "July 1, 1986" and inserting in lieu thereof "July 31, 1987"; and

(4) by adding at the end the following new subsection:

"(b) If funds for fiscal year 1986 are appropriated for the purpose of making payments to employers under this Act but are not both so appropriated and made available by the Director of the Office of Management and Budget to the Veterans' Administration on or before February 1, 1986, for such purpose, assistance may be paid to an employer under this Act on behalf of a veteran if the veteran—

"(1) applies for a program of job training under this Act within 1 year after the date on which funds so appropriated are made available to the Veterans' Administration by the Director; and

"(2) begins participation in such program within 18 months after such date.".

(f) EFFECTIVE DATE.—(1) Except as provided in paragraph (2), the amendments made by this section shall take effect on the date of the enactment of this Act.

(2) The amendment made by subsection (e)(2) shall take effect on February 1, 1986.

SEC. 202. COORDINATION.

(a) IN GENERAL.—In carrying out section 1516(b) of title 38, United States Code, the Administrator of Veterans' Affairs shall take all feasible steps to establish and encourage, for veterans who are eligible to have payments made on their behalf under such section, the development of training opportunities through programs of job training consistent with the provisions of the Veterans' Job Training Act (as redesignated by section 201(a)(1) of this Act) so as to utilize programs of job training established by employers pursuant to such Act.

(b) DIRECTIVE.—In carrying out such Act, the Administrator shall take all feasible steps to ensure that, in the cases of veterans who are eligible to have payments made on their behalf under both such Act and section 1516(b) of title 38, United States Code, the authority under such section is utilized, to the maximum extent feasible and consistent with the veteran's best interests, to make payments to employers on behalf of such veterans.

Amend the title so as to read: "An Act to amend title 38, United States Code, to provide a 3.1-percent increase in the rates of disability compensation and of dependency and indemnity compensation paid by the Veterans' Administration; to make improvements in veterans' job training programs; and for other purposes.".

Mr. MONTGOMERY (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Mississippi?

Mr. HAMMERSCHMIDT. Reserving the right to object, Mr. Speaker, and I do not plan to object, but I would ask my distinguished friend, the chairman of the Veterans' Committee, to give us an explanation of his request.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, on December 9, 1985, the House passed by a voice vote and sent to the Senate H.R. 1538, to provide service-connected veterans and their eligible dependents with a 3.4-percent cost-of-living increase effective December 1, 1985.

The Senate amended the bill to reduce the COLA to 3.1 percent, and since that amount is the same as Social Security and pension beneficiaries will receive, we will accept this reduction from 3.4 percent to 3.1 percent. That is the cost-of-living increase for service-connected veterans.

Also in the bill is an extension of the Emergency Veterans Job Training Act. The Senate amendments contain these provisions as well, the 3.1-percent COLA increase for service-connected veterans and also the Emergency Veterans Job Training Act is extended.

Mr. HAMMERSCHMIDT. Mr. Speaker, further reserving the right to object, and having heard the explanation of the chairman with respect to H.R. 1538, as amended by the other body, I urge its passage.

Many of us have stated on many occasions that compensation for service-connected disabled veterans, their survivors and dependents is the No. 1 priority of our Government. By the passage of this bill and upon its signature by the President, we will again have observed that priority.

The job training amendment to this bill was the subject of previous legislation passed by the House and Senate in different forms. It contains limited extensions of current authority. The chairman and I are in agreement with them.

Mr. Speaker, this body originally passed a compensation increase of 3.7 percent based on the then estimate of the Consumer Price Index. That index is now 3.1 percent and that is why that figure is in this legislation.

We had hoped and do hope that this legislation would have been taken care of in reconciliation. Apparently, that may not be and that is why this bill is before us in its current form. I join the distinguished chairman in urging its passage.

Mr. EDGAR. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the distinguished gentleman from Pennsylvania.

Mr. EDGAR. Mr. Speaker, I would like to associate myself with the gentleman's remarks and commend the gentleman for bringing up this legislation at this time.

Mr. HAMMERSCHMIDT. Mr Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAMMERSCHMIDT. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks, and that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the legislation just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ROMANIA'S HUMAN RIGHTS RECORD CONTINUES TO BE POOR

(Mr. SMITH of New Jersey asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of New Jersey. Mr. Speaker, on Sunday December 15, Secretary of State George Shultz and Counselor Ed Derwinski held high level talks with Romanian authorities in Bucharest. High on the agenda was a frank discussion of human rights. It is my understanding that the Romanians were advised that MFN may be in jeopardy next year unless Romania substantially improves its observance of basic human rights.

The President's seminannual report to the Commission on Security and Cooperation in Europe, on which I serve as a commissioner, makes it abundantly clear in its report released just a few weeks ago to that Romania's human rights record continues to be poor.

Mr. Speaker. There is a growing sensitivity on the part of many Members of Congress and the American people that religious repression and violation of human rights have not improved in Romania. If the conference of MFN is to have any meaning at all, only performance serves as a useful barometer. Paper guarantees, personal assurances, and public pronouncements by Romanian officials are indeed useful, but the record must correspond with to words they say. If that is not the case, I would suggest we are only kidding ourselves and doing an injustice to those Romanians who suffer beatings, imprisonment, interrogation, job loss, and other forms of harassment.

Mr. Speaker, several weeks ago, the gentleman from Virginia [Mr. WOLF], the gentleman from Ohio [Mr. HALL] and myself introduced H.R. 3599, which will suspend temporarily for 6 months MFN for Romania. I urge Members to cosponsor this. We currently have 65 cosponsors. It is a good bill and I hope that Members will cosponsor it.

REMEMBERING OUR HOSTAGES IN BEIRUT

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, in the spirit of the season, I think it would be wise to remind the House that Terry Waite is back in Beirut. He is back there to seek once more the release of our hostages.

I would remind the House that perhaps a new consideration is necessary to be brought into the equation. Heretofore hostages have been equated with prisoners. No way can they be equated with prisoners. You cannot take an innocent hostage on one side and balance against someone who has bombed two embassies, injured 85 people, killed 6 and stolen an aircraft.

It seems to me that it would be timely, and I urge the Members of the House to go back to their temples and their churches at this particular season to storm the gates of heaven and indeed to disturb the stars to shake those hostages loose. What an indescribably beautiful Christmas gift it would be to all.

HUMAN RIGHTS IN ROMANIA

(Mr. BADHAM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BADHAM. Mr. Speaker, I would like to join the two previous colleagues on the floor, the gentleman from New Jersey [Mr. SMITH] and the gentleman from Virginia [Mr. WOLF] who have alluded to the fact that Secretary Shultz is going to Romania to discuss, among other things, with the Romanians, human rights.

I would like to support their legislation that could cause a 6-month lapse in the most-favored-nation treatment to the nation of Romania.

The Romanian people are friends of the United States. The American

people are friends of the Romanian people, but the suppression of human rights, their denial of exit visas, and various other things, would cause them to be in violation of those things which we hold dear.

Mr. Speaker, I would support their legislation and ask for its passage and I commend them for offering that legislation.

□ 2225

EXTENDING TEMPORARILY CERTAIN TAX PROVISIONS

Mr. ROSTENKOWSKI. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means and the Committee on Energy and Commerce be discharged from further consideration of the bill (H.R. 4006) to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985, and ask for its immediate consideration in the House.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, I do so in order to yield to the distinguished chairman, the gentleman from Illinois [Mr. ROSTENKOWSKI] so that he can explain this new bill, which I believe is going to be satisfactory to all Members.

Mr. ROSTENKOWSKI. Mr. Speaker, if the gentleman will yield, this bill extends certain tax, Medicare, and other provisions some of which expire at midnight tonight and others the end of the year. These provisions are addressed on a permanent basis in the tax reform bill or the reconciliation conference report just adopted by the House. All of these provisions are extended as under current law until March 15, 1986, under this bill. This extension bill is necessary for several reasons:

First, the President may be unable to sign the reconciliation conference report for certain provisions which expire tonight, including the 16-cent tobacco tax, Medicare hospital and physician reimbursement provisions, and the Trade Adjustment Assistance Program. The extension is necessary for other provisions because of the time it will take the Senate to consider the tax reform bill.

The provisions extended by the bill include the following:

First, the 16-cents-per-pack cigarette excise tax;

Second, the research and development tax credit;

Third, the targeted jobs tax credit;

Fourth, research expense allocation rules;

Fifth, solar and geothermal tax credits;

Sixth, tax-free employer-provided educational assistance;

Seventh, qualified employer-provided group legal services;

Eighth, expensing of up to $35,000 annually of the cost of removing architectural barriers for the handicapped;

Ninth, the current moratorium in the 1976 act net operating loss carryover rules;

Tenth, the present law provisions for awards of attorney's fees in tax litigation;

Eleventh, tax relief provisions for Vietnam-MIA's and their spouses;

Twelfth, moratorium on faculty housing regulations;

Thirteenth, the 4-cent-per-gallon exemption from the motor vehicle fuel excise tax for taxicabs;

Fourteenth, the Medicare hospital and physician reimbursement provisions;

Fifteenth, borrowing authority for the railroad unemployment fund; and

Sixteenth, the Trade Adjustment Assistance Program.

Several points should be clearly understood by the Members of the House.

First, the extensions of current law contained in this bill are substantially more expensive than the extension bill just defeated, approximately $500 million more expensive.

Second, any further extension of these provisions must include the modifications contained in either the tax reform bill the House passed earlier this week or the reconciliation conference report just adopted by the House.

Mr. FRENZEL. Further reserving the right to object, Mr. Speaker, I yield to the distinguished gentleman from South Carolina [Mr. CAMPBELL].

Mr. CAMPBELL. I thank the gentleman for yielding.

Mr. Speaker, if I might inquire, this, if I understand it, is strictly an extension of current law on all of the items that are listed, and all of the extensions apply until March 15, 1986.

Mr. ROSTENKOWSKI. If the gentleman will yield further, the gentleman is correct.

Mr. CAMPBELL. I thank the gentleman, and I support the extension.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the distinguished gentleman from Ohio [Mr. GRADISON].

Mr. GRADISON. I thank my colleague from Illinois for yielding and would address a question to my chairman.

It is my understanding, Mr. Speaker, that the objective of this package is to extend the provisions of current law. I would inquire specifically what this provision does with regard to the reimbursement of participating physicians; that is, those physicians who have agreed to accept assignment in all cases.

Current law has provided for some time that if they became participating physicians, their payments would be increased as of October 1, 1985. I just want to make sure that we provide the increase in the package before us.

Mr. ROSTENKOWSKI. If the gentleman will yield further, what the gentleman just explained is what we had intended and had hoped to do previously. However, the provisions of this bill continue the freeze.

Mr. GRADISON. I thank the chairman for this explanation and would like to explain to my colleagues of the House, then, that this is not an extension of the present law. It may be an extension of the freeze, but present law does not provide for a continuation of the freeze. Let me elaborate further.

What we have been trying to do in the Medicare Program is encourage physicians, instead of increasing their billings on the beneficiaries, to accept the payments made by Medicare as the payments in full for services provided to Medicare beneficiaries under the program. One of the inducements which we offered more than a year ago was that if they became participating physicians, if they agreed to accept assignment in all cases of Medicare beneficiaries who came to them, they would get a modest increase in reimbursement as of October 1, 1985.

I appreciate that the package before us is not amendable, but I would say to my chairman that I think this is clearly turning our backs on an agreement which has been made in good faith with the physicians and I think it runs the serious risk of increasing the billings which will be made directly to Medicare beneficiaries because of the likelihood that it will discourage physicians who are not required to be participating physicians from dropping out of that program.

I just want to make it clear, and I am not going to object, but if we do this it runs the serious risk, indeed I think it has the definite assurance, that between now and March 15, it is going to increase the out-of-pocket costs to the elderly for physician services provided under the Medicare Program.

I want to make one other point. I do not think it is exactly truth in advertising to bring this package forward and say that it continues present law. I have not studied all the provisions, but with regard to the one that this

gentleman is inquiring about, it does not.

Mr. ROSTENKOWSKI. If the gentleman will yield further, I am sure my colleague, the gentleman from Ohio, will have to agree that if asked the question, "Is there a freeze currently?" the gentleman would have to agree that there is a freeze currently.

Mr. GRADISON. There is a freeze which is about to expire.

Mr. ROSTENKOWSKI. If the gentleman will yield further, we tried to correct that and we tried to avoid the very situation that the gentleman explained. However, we were not successful.

Mr. GRADISON. If the gentleman from Minnesota will yield further, I certainly accept the explanation of my chairman. I understand what he is saying and I understand what I am saying, and what I am saying is that this is not cost free and that if there are costs, they are going to be paid by the elderly. That is the only point I want to make so that my colleagues know what we are getting into if we go ahead with this change.

Mr. ROSTENKOWSKI. I agree with the gentleman. The gentleman makes a very good point.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the distinguished gentleman from Indiana [Mr. MYERS].

Mr. MYERS of Indiana. I thank the gentleman for yielding.

I have a brief question. Was there any consideration given to an extension of the present utility stock dividend reinvestment program?

Mr. FRENZEL. There was none given in the recent meeting that we had. We worked off of the three bills that were presented by the committee tonight. We took all of the items that were in the three bills. We extended them through the period of March 15. Those are the only items we took.

We were trying to prepare a bill that would be generally acceptable in a minimal amount of time, so we did not extend things that were not in the three bills.

Mr. MYERS of Indiana. I thank the gentleman.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the distinguished gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. I thank the gentleman from yielding.

Mr. Speaker, I think the gentleman from Indiana has made a very good point, that the question of dividend reinvestment is not in any of the three proposals. It has been swallowed up. It has been lost. It is one of the most effective programs we have. Yet, in the rush of trying to take advantage of one side or the other, we are letting one of the best programs that Congress has expire.

□ 2235

It has been proven that if you allow an individual to get credit on stock options that they will take that rather than dividends. It provided capital for our utilities. I wish it could be broader, but nowhere has anybody made any attempt to do anything about dividend reinvestment, and it is a great omission, and we must correct it.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. I ask the gentleman to yield for the purpose of directing a question to the chairman of the committee. I would like to ask our distinguished chairman what the situation would be with respect to the Medicare provisions, particularly those discussed by the gentleman from Ohio [Mr. GRADISON] should reconciliation, as we passed it, be accepted by the other body.

Mr. ROSTENKOWSKI. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. ROSTENKOWSKI. Mr. Speaker, it is my understanding that certainly reconciliation, if agreed to in the other body, and then is signed by the President, will supersede what we have done here.

Mr. DAUB. I thank the gentleman.

Mr. ROSTENKOWSKI. Of course, it also would meet the concerns of our good friend from Ohio.

Mr. DAUB. I thank the chairman of the committee.

Mr. FRENZEL. Mr. Speaker, further reserving the right to object, I think these discussions have been very helpful. The committee did the best that it could to resolve the difficulties that resulted in the failure of the last rule.

I hope the gentleman's request will be swiftly granted.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The Clerk read the bill, as follows:

H.R. 4006

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—FIFTH EMERGENCY EXTENSION ACT OF 1985-86

SEC. 101. SHORT TITLE OF TITLE; EXPIRATION DATE OF EXTENSION PERIOD.

SHORT TITLE.—This title may be cited as the "Fifth Emergency Extension Act of 1985-86".

(b) EXPIRATION DATE OF EXTENSION PERIOD.—For purposes of extending the provisions of certain Acts, the "expiration date of the extension period" is March 15, 1986.

SEC. 102. EXTENSION OF TRADE ADJUSTMENT ASSISTANCE PROGRAM.

Section 285 of the Trade Act of 1974 (19 U.S.C. note preceding section 2271) is amended by striking out "December 19, 1985" and inserting in lieu thereof "the expiration date of the extension period (as specified in section 1(b) of the Fifth Emergency Extension Act of 1985-86)".

SEC. 103. EXTENSION OF BORROWING AUTHORITY UNDER THE RAILROAD UNEMPLOYMENT INSURANCE ACT.

Section 10(d) of the Railroad Unemployment Insurance Act is amended by striking out "December 19, 1985" each place it appears and inserting in lieu thereof "the expiration date of the extension period (as specified in section 1(b) of the Fifth Emergency Extension Act of 1985-86)".

SEC. 104. EXTENSION OF MEDICARE HOSPITAL AND PHYSICIAN PAYMENT PROVISIONS.

Section 5(c) of the Emergency Extension Act of 1985 (Public Law 99-107) is amended by striking out "December 19, 1985" and inserting in lieu thereof "the expiration date of the extended period (as specified in section 1(b) of the Fifth Emergency Extension Act of 1985-86)".

TITLE II—MISCELLANEOUS TAX PROVISIONS EXTENSION ACT OF 1985

SEC. 201. SHORT TITLE OF TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This title may be cited as the "Miscellaneous Tax Provisions Extension Act of 1985".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

SEC. 202. TEMPORARY EXTENSION OF CREDIT FOR INCREASE IN RESEARCH ACTIVITIES.

(a) 2½ MONTH EXTENSION.—

(1) IN GENERAL.—Section 30 (relating to credit for increasing research activities) is amended by adding at the end thereof the following new subsection:

"(h) TERMINATION.—

"(1) IN GENERAL.—This section shall not apply to any amount paid or incurred after March 15, 1986.

"(2) COMPUTATION OF BASE PERIOD EXPENSES.—In the case of any taxable year which begins before March 16, 1986, and ends after March 15, 1986, any amount for any base period with respect to such taxable year shall be the amount which bears the same ratio to such amount for such base period as the number of days in such taxable year before March 16, 1986, bears to the total number of days in such taxable year."

(2) CONFORMING AMENDMENT.—Subsection (d) of section 221 of the Economic Recovery Tax Act of 1981 is amended—

(A) by striking out ", and before January 1, 1986" in paragraph (1), and

(B) by striking out the last sentence of paragraph (2)(A).

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to taxable years ending after December 31, 1985.

SEC. 203. TEMPORARY EXTENSION OF TARGETED JOBS CREDIT.

(a) 2½ MONTH EXTENSION.—Paragraph (3) of section 51(c) (relating to termination) is amended by striking out "December 31, 1985" and inserting in lieu thereof "March 15, 1986".

(b) EXTENSION OF AUTHORIZATION.—Paragraph (2) of section 261(f) of the Economic Recovery Tax Act of 1981 is amended by striking out "fiscal years 1983, 1984, and 1985" and inserting in lieu thereof "fiscal years 1983, 1984, 1985, and 1986".

SEC. 204 2½ MONTH EXTENSION OF EXCLUSIONS FOR EDUCATIONAL ASSISTANCE PROGRAMS AND GROUP LEGAL PLANS.

(a) EDUCATIONAL ASSISTANCE PROGRAMS.—Subsection (d) of section 127 (relating to termination) is amended by adding at the end thereof the following new sentence: "Notwithstanding the preceding sentence, this section shall apply to periods before March 16, 1986, in taxable years beginning after December 31, 1985."

(b) GROUP LEGAL PLANS.—Subsection (e) of section 120 (relating to termination) is amended by adding at the end thereof the following new sentence: "Notwithstanding the preceding sentence, this section and section 501(c)(20) shall apply to periods before March 16, 1986, in taxable years ending after December 31, 1985."

SEC. 205 2½ MONTH EXTENSION OF PROVISION AWARDING COURT COSTS AND CERTAIN FEES.

(a) GENERAL RULE.—Subsection (f) of section 7430 (relating to termination) is amended by striking out "December 31, 1985" and inserting in lieu thereof "March 15, 1986".

(b) TECHNICAL AMENDMENT.—Subsection (a) of section 7430 is amended by inserting "(payable in the case of the Tax Court in same manner as such an award by a district court)" after "a judgment".

(c) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall apply to proceedings commenced after December 31, 1985.

(2) SUBSECTION (b).—The amendment made by subsection (b) shall take effect as if included in the amendments made by section 292 of the Tax Equity and Fiscal Responsibility Act of 1982.

SEC. 206. EXTENSION OF INCREASE IN CIGARETTE TAX.

In no event shall the amendments made by section 283(a) of the Tax Equity and Fiscal Responsibility Act of 1982 be treated as having ceased to apply before March 16, 1986.

SEC. 207. 2½ MONTH DELAY IN APPLICATION OF THE NET OPERATING LOSS RULES ADDED BY THE TAX REFORM ACT OF 1976.

Subsection (g) of section 806 of the Tax Reform Act of 1976 (relating to effective dates for the amendments to sections 382 and 383) is amended—

(1) by striking out "December 31, 1985" in paragraph (2) and inserting in lieu thereof "March 15, 1986", and

(2) by striking out "January 1, 1986" in paragraphs (2)(B) and (3) and inserting in lieu thereof "March 16, 1986".

SEC. 208. 2½ MONTH EXTENSION OF ALLOCATION UNDER SECTION 861 OF RESEARCH AND EXPERIMENTAL EXPENDITURES.

Paragraph (1) of section 126(c) of the Tax Reform Act of 1984 is amended by adding at the end thereof the following: "Notwithstanding the preceding sentence, this section shall also apply to periods before March 16, 1986, in taxable years beginning after August 1, 1985."

SEC. 209. EXTENSION OF RULES FOR SPOUSES OF INDIVIDUALS MISSING IN ACTION.

(a) EXTENSION.—Sections 2(a)(3)(B)(i), 692(b)(1), 6013(f)(1), and 7508(b)(1) are each amended by striking out "December 31, 1982" and inserting in lieu thereof "March 15, 1986".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply to taxable years beginning after December 31, 1982.

SEC. 210. MORATORIUM ON ISSUANCE OF REGULATIONS RELATING TO FACULTY HOUSING.

Paragraphs (1) and (3) of section 531(g) of the Tax Reform Act of 1984 are each amended by striking out "January 1, 1986" and inserting in lieu thereof "March 16, 1986".

SEC. 211. 2½ MONTH EXTENSION OF EXPENSE TREATMENT FOR REMOVAL OF ARCHITECTURAL BARRIERS TO THE HANDICAPPED AND ELDERLY.

Subsection (d) of section 190 (relating to application of section) is amended by striking out "and" at the end of paragraph (1), by striking out the period at the end of paragraph (2) and inserting in lieu thereof ", and", and by adding at the end thereof the following new paragraph:

"(3) expenses paid or incurred before March 16, 1986, in taxable years beginning after December 31, 1985."

SEC. 212. EXTENSION OF RESIDENTIAL ENERGY CREDITS FOR SOLAR RENEWABLE ENERGY SOURCE EXPENDITURES.

(a) IN GENERAL.—Subsection (f) of section 23 (relating to termination) is amended to read as follows:

"(f) TERMINATION.—

"(1) IN GENERAL.—Except as provided in paragraph (2), this section shall not apply to expenditures made after December 31, 1985.

"(2) SOLAR PROPERTY.—In the case of solar property (as defined in subsection (b)(6)(B)), this section shall not apply to expenditures made after March 15, 1986."

(b) SOLAR PROPERTY.—Subsection (b) of section 23 (relating to qualified expenditures) is amended by adding at the end thereof the following new paragraph:

"(6) SPECIAL RULES FOR SOLAR PROPERTY.—

"(A) IN GENERAL.—In the case of renewable energy source expenditures for solar property made after December 31, 1985, and before March 16, 1986, paragraph (5)(B) shall be applied by substituting "1988" for "1987".

"(B) SOLAR PROPERTY.—For purposes of subparagraph (A), the term 'solar property' means renewable energy source property which, when installed in connection with a dwelling, transmits or uses solar energy for the purpose of heating or cooling such dwelling or providing hot water or electricity for use within such dwelling."

(c) EFFECTIVE DATE.—The amendments made by this section shall apply to expenditures made after December 31, 1985, in taxable years ending after such date.

SEC. 213. EXTENSION OF ENERGY INVESTMENT CREDIT FOR SOLAR AND GEOTHERMAL PROPERTY.

(a) IN GENERAL.—The table contained in subparagraph (A) of section 46(b)(2) (relating to energy percentage) is amended by adding at the end thereof the following new items:

"(viii) Solar energy property.—Property described in section 48(l)(4) (other than wind energy property).	15 percent.	Jan. 1, 1986.... Mar. 15, 1986.
"(ix) Geothermal property.—Property described in section 48(l)(3)(A)(viii).	15 percent.	Jan. 1, 1986.... Mar. 15, 1986."

(b) EFFECTIVE DATE.—The amendment made by this section shall apply to periods beginning after December 31, 1985, under rules similar to the rules under section 48(m) of the Internal Revenue Code of 1954.

SEC. 214. EXTENSION OF REDUCTION IN TAX FOR FUEL USED BY TAXICABS.

Paragraph (3) of section 6427(e) (relating to termination for use in certain taxicabs) is amended by striking out "September 30, 1985" and inserting in lieu thereof "March 15, 1986".

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

PARLIAMENTARY INQUIRY

Mr. FRENZEL. Mr. Speaker, I was not in the room when the Committee on Ways and Means was meeting. I would ask the Chair if we have passed an adjournment resolution.

The SPEAKER pro tempore. The House has not passed the adjournment resolution. The House is waiting on the Senate at this point.

Mr. FRENZEL. Mr. Speaker, does the Senate have the adjournment resolution?

The SPEAKER pro tempore. We are waiting to receive that resolution from the Senate.

Mr. FRENZEL. Mr. Speaker, insofar as the Chair is aware, is there any further pending business before the House other than the adjournment resolution?

The SPEAKER pro tempore. The Chair is not aware of any business at this time other than the adjournment resolution, but cannot speak with absolute certitude. A case may arise, but I am not aware of any business at this time.

Mr. FRENZEL. I thank the Chair for the information.

The SPEAKER pro tempore. The Chair will announce that in conjunction with its previous statement and in line with that previous statement, we cannot anticipate what the other body may do or send to us.

REQUEST TO REMOVE SECTION 6403 FROM H.R. 3500, BUDGET RECONCILIATION ACT OF 1985

Mr. MOORE. Mr. Speaker, I ask unanimous consent to take section 6403, distribution of 8(g) account from H.R. 3500, the Budget Reconciliation Act of 1985, as passed by the House October 24, 1985, and ask for its immediate consideration.

Mr. AUCOIN. Mr. Speaker, I reserve the right to object.

Mr. DINGELL. Mr. Speaker, I object.

The SPEAKER pro tempore. First of all, the Chair would state to the gentleman that the Chair cannot entertain that request under the Speaker's guidelines, and furthermore, the Speaker hears an objection.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland [Mr. BARNES] is recognized for 5 minutes.

Mr. BARNES. Mr. Speaker, I wish to indicate my positions on two votes which occurred today when I was unavoidably absent.

On rollcall No. 479, the rule (H. Res. 349) providing for the passage of the budget reconciliation conference report (H.R. 3128) while dropping the "value-added tax" provisions, I would have voted "aye."

On rollcall No. 480, on the question of taking up a rule (H. Res. 350) providing for the consideration of legislation extending a variety of tax provisions, I would have voted "aye."

GENERAL LEAVE

Mr. PENNY. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include extraneous material on House Resolution 349, the rule on budget reconciliation.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

LET US CONDEMN THE BRUTAL OCCUPATION OF AFGHANISTAN

(Mr. BRYANT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRYANT. Mr. Speaker, this month, as Americans across the Nation are celebrating the holiday season, we should also take note of the fact that this is the sixth anniversary of the Soviet Union's murderous invasion and brutal occupation of Afghanistan.

While we are enjoying this special family time of the year, millions of Afghans will be trekking across the rugged lands to flee the brutal armed aggression perpetrated by the Soviets and their Afghan puppet proxies against "everything Afghan."

The plight of the nation of Afghanistan is tragic. Millions have been forced from their homes and villages, while hundreds of thousands of Afghans—mostly innocent civilians—have been brutally murdered by Soviet and Afghan Army Forces.

The Soviets' vicious and immoral war against the Afghan nation, people, culture, food supply system, and religion is unconscionable. Virtually every form of human decency is being violated daily by the Soviets in their relentless drive to eliminate opposition to their puppet government.

Despite the oppression and use of force, Afghanistan's freedom fighters struggle to remove the Soviet occupation and restore peace and democracy to their troubled land.

As a result of the Soviet invasion, over one-fourth of the prewar population has fled the country, constituting the largest refugee population in the world.

Even though the Soviets and their puppet government have stepped up their military campaign against the civilian population, the freedom fighters have frustrated all Soviet attempts to suppress them and withstood with unmatched courage and sacrifice the unrelenting attacks by Soviet forces.

The Soviet invasion and repression of the Afghan people has earned the condemnation of the Non-Aligned Movement, the United Nations, the European Parliament, the Islamic Conference Organization, the Association of Southeast Asian Nations, and most of the countries of the world.

I have joined with many of my colleagues this holiday season in sponsoring a resolution condemning these 6 horrible years of aggression waged against the independent country and people of Afghanistan. It expresses our support for continued aid for the Afghan population both inside and outside Afghanistan and urges the prompt conclusion of a negotiated settlement based upon the complete withdrawal of Russian troops, restoration of the independent and nonaligned status of Afghanistan, self-determination for the Afghan people, and the return of the Afghan refugees to their country with safety, dignity, and honor.

It has been accurately observed that, "No one can be perfectly free until all are free." So in our hopes and prayers this special season, let us seek freedom, democratic self-government, and justice for the people of Afghanistan.

□ 2250

PARLIAMENTARY INQUIRIES

Mr. CAMPBELL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his inquiry.

Mr. CAMPBELL. Under the provisions that we are operating for expiration of existing tax, do they expire at a time certain or at the end of the legislative day on a day like this?

The SPEAKER pro tempore. The Chair cannot interpret that. That is a matter of substantive law.

Mr. CAMPBELL. In a law on the extensions that were expiring in law today, would the hour be a time certain, or would it be the end of the legislative day?

The SPEAKER pro tempore. The Chair cannot interpret the law. That is a question of substantive law, and the Chair is not in a position to interpret the law.

The gentleman is not really stating a parliamentary inquiry.

Mr. CAMPBELL. The legislative day that we are now operating in would not come to an end until we have officially adjourned, no matter what the time on clock is. Is that correct?

The SPEAKER pro tempore. The Chair states that he can respond to that; that is correct.

THE TIME TO GO HOME IS NOW

(Mrs. MARTIN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MARTIN of Illinois. Mr. Speaker, it is almost 11 o'clock. It is indeed nap time at the nursery school. This is ludicrous. We know there is going to be no real business transacted; we know what is underneath this delay, which is destructive to the House as a whole, and destructive to the image and the perception of this House to the Americans who have trusted us to have accomplished what we needed to accomplish in a more efficacious and efficient way earlier this year.

Now for those who would, for their own special interests, continue to keep this House in, I beg them to remember why we should be here and why and when we should go home, and that is now.

PARLIAMENTARY INQUIRY

Mr. LOTT. Mr. Speaker, who is in charge? What are we doing here?

The SPEAKER pro tempore. The House is waiting on what business the Senate may send us, among other things. We are not sure what the Senate may send us.

Mr. LOTT. Well, do we know what they are going to send us? I mean, I understand that they are punting back the reconciliation package, insisting on the original language with the idea that they are not going to take up the unanimous consent cigarette tax and other things we just agreed to, and I do not see that as much of a bluff. So why are we here?

The SPEAKER pro tempore. The Chair is not privy to what the Senate is doing at this time.

OBSERVING THE ACTIONS OF THE OTHER BODY

(Mr. STARK asked and was given permission to address the House for 1 minute.)

Mr. STARK. Mr. Speaker, I had the joyous experience of sitting on the floor of the other body, as several of us were observing just a moment or two ago, and the other body took the original reconciliation bill and as I understand their procedures, returned it to us, period.

No; just returned it, period. No changes, no—just what was reported out of the conference before it went to Rules.

A question was raised on the floor of the other body about, might there be

extenders and that was diffused; it was not answered directly as to whether they would consider it. It was mentioned on the floor of the other body that we had passed the extender bill, and that was diffused, too.

So as I understand it now, we will get that back, the original bill which we amended once before; and whether the extender which I gather we have sent to them remains in doubt. That is all I can report to the distinguished minority whip.

Mr. LOTT. Mr. Speaker, I think the burden is on them. I mean, we have done our work here; we have passed reconciliation, sent it over there; we got an unanimous-consent agreement, sent it over there. It is their problem, and I would hope that the House would move expeditiously to adjourn sine die.

PARLIAMENTARY INQUIRY

Mr. CAMPBELL. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. CAMPBELL. Is the Chair now in possession of the documents from the Senate on the reconciliation package?

The SPEAKER pro tempore. The message has not arrived.

Mr. CAMPBELL. No message has yet arrived?

FURTHER LEGISLATIVE PROGRAM

(Mr. MURTHA asked and was given permission to address the House for 1 minute.)

Mr. MURTHA. Let me explain the problem. I just went in the room where the leadership is meeting. They are trying to figure out what to do about the other body's action. They expect to be out here momentarily; hopefully they will have a solution to what action they are going to recommend to the House.

It is such an important piece of legislation they have asked me to convey to the House, to try to be patient, just a few minutes longer, and they are not eating and they are not drinking and they are not carrying on; they are trying to figure out a method to solve this delemma that we are in.

It is, I have to say, a very important issue and hopefully they will be back in a few minutes and we will be able to solve this thing.

Mr. WALKER. Will the gentleman yield?

Mr. MURTHA. I yield to the gentleman.

Mr. WALKER. We just had a conversation with a Member of the other body, who has considerable weight in these matters, who said just a few minutes ago on this floor that there is no way we are going to resolve this impasse; that we are at a complete deadlock, and that there is no way that the impasse is going to be resolved.

It seems to me that we do not need to wait a few more minutes; that we can simply adjourn now.

Mr. MURTHA. Let me say this. I know everybody is tired after 4 or 5 days of 18-hour days, and I do not blame you a bit. I mean, everybody is exhausted and frustrated and I am certainly not trying to add to that frustration.

What I am saying is, the information they have is a little bit different than what the gentleman says, and they are just trying to come up with a plan of action here, and I suggested that they come out and address the problem, but they felt they needed a few more minutes.

Mr. LOTT. Will the gentleman yield?

Mr. MURTHA. I will be glad to yield to the gentleman.

Mr. LOTT. Once again trying to find a way out of this box, I know what really is involved; some Members are still trying to find a way to pass the VAT or the MET tax, whatever you want to call it; the House has already voted on that twice; and I voted, personally, for the Downey amendment, but the House has spoken twice.

To expect at this late hour that the House is now going to turn itself around, I cannot understand that. The way to handle this issue now; we have acted responsibly, we sent it back to them; I think we ought to move to adjourn sine die.

They have our reconciliation, and they have the bobtail resolution we just passed to March 15. So if we allow this to drag out, go back to the Rules Committee so we can punt this ball back over to the other body, I do not understand why we go through this madness at this point.

Mr. MURTHA. Well, as I understand the parlimentary situation, I had understood the other body was going to take action and send it back as it was in the original conference report.

We could not amend it; we could only defeat it and go to conference. Now, they are discussing with the Parliamentarians if anything else could be done, and obviously arguing about what action should be taken in the House.

I think essentially what you are saying is true; but, when you talk to the Parliamentarian, there may be something else that can be done.

I agree with the situation as you have—you have stated it very clearly, and I am on the other side of the issue. I am just as anxious to go home, but they hope, in the spirit of Christmas, that we will be able to wait a few more days—minutes.

□ 2300

Mr. THOMAS of California. It is 11 o'clock, and for those of us or others who are looking for planes to catch, they are gone, and we have discussed the issues and made decisions and have almost brought the process to a successful culmination, not necessarily winning but wrapping up all of the loose ends so that we can leave in an organized fashion. It seems to me it would be very precipitous when we are 15, 20 minutes, half an hour away from knowing that we have concluded all of the loose ends, I think it is a little premature at this time.

Mr. Speaker, I agree totally with the gentleman that the patience of just a few more minutes will be well rewarded in making sure that we have tied up all the loose ends.

Mr. MURTHA. Mr. Speaker, I yield to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. Mr. Speaker, we have to have permission of the other body to adjourn sine die under the Constitution. You cannot just take it on yourself that we are going to quit.

LET US STAY AND FINISH OUR WORK

(Mr. GROTBERG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GROTBERG. Mr. Speaker, I rise in support of the last speaker, the gentleman from California. Everyone here is having a good time talking, and I thought I would save mine until the end. The only thing I would say, as we urge ourselves to get out of here, is that I join in the urgency to get out but I also remember the day I filed for the office. You know why I got it, and so does everybody else here. Now one thing referred to in some earlier remarks, Mr. Speaker, was that people out there want us to go home. I think they want us to finish our job. They are a little disappointed. I have not heard any disappointed people in my district that I am down here working; it is when I am not working that they get disappointed.

So I have a kind of rebel attitude about feeling sorry for ourselves because we want to finish the day's work. If a few minutes would finish it, I would like to stay and then go home with a clear conscience.

PROVIDING FOR THE SINE DIE ADJOURNMENT OF THE CONGRESS

Mr. ROWLAND of Connecticut. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 266) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 266

Resolved by the House of Representatives (the Senate concurring), That the two Houses of the Congress shall adjourn on the legislative day of Thursday, December 19th 1985, that they stand adjourned sine die, or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution.

SEC. 2. The Speaker of the House, after consultation with the minority leader of the House and the majority leader of the Senate, after consultation with the minority leader of the Senate, acting jointly, shall notify the Members of the House and Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

MOTION TO TABLE OFFERED BY MR. AU COIN

Mr. AUCOIN. Mr. Speaker, I move to lay the resolution on the table.

Mr. WALKER. Mr. Speaker, is the motion in writing?

Mr. AUCOIN. It is in writing, Mr. Speaker, and I send it to the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. AUCOIN moves to lay the resolution on the table.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Oregon [Mr. AUCOIN].

The question was taken, and on a division (demanded by Mr. WALKER) there was—yeas 110, nays 61.

Mr. ROWLAND of Connecticut, Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 229, nays 107, not voting 98, as follows:

□ 2315

Mr. DUNCAN and Mr. VANDER JAGT changed their votes from "yeas" to "no."

Mr. ARCHER, Mrs. BENTLEY, Mr. REID, and Mr. COMBEST changed their votes from "nay" to "yea."

So the motion to table was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to the amendments of the Senate to the bill (H.R. 3128) entitled "An act to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process," with an amendment.

The message also announced that the Senate had passed a joint resolution of the following title, in which concurrence of the House is requested:

S.J. Res. 255. Joint resolution relative to the convening of the 2d session of the 99th Congress.

CONSOLIDATED OMNIBUS RECONCILIATION ACT OF 1985

Mr. GRAY of Pennsylvania. Mr. Speaker, I move to take from the Speaker's table the bill (H.R. 3128) to make changes in spending and revenue provisions for purposes of deficit reduction and program improvement, consistent with the budget process, with the Senate amendment to the House amendment to the Senate amendment, and concur in the Senate amendment to the House amendment to the Senate amendment.

The SPEAKER pro tempore. The Clerk will report the title of the bill and the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment to the House amendment to the Senate amendment as follows:

(See Senate Proceedings in today's RECORD, page 38503, Part II.)

MOTION OFFERED BY MR. DAUB

Mr. DAUB. Mr. Speaker, I move to table the motion.

My motion is in writing, and it is on its way to the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. DAUB moves to table the motion.

The SPEAKER pro tempore. The question is on the motion to lay on the table offered by the gentleman from Nebraska [Mr. DAUB].

The motion to table was rejected.

Mr. GRAY of Pennsylvania. Mr. Speaker, I move to limit debate to 15 minutes per side.

The SPEAKER pro tempore. The gentleman requests that debate be limited. Is there objection to the request of the gentleman from Pennsylvania?

Mr. DAUB. Mr. Speaker, I object.

The SPEAKER pro tempore. Objectin is heard.

The gentleman from Pennsylvania [Mr. GRAY] will be recognized for 30 minutes and the gentleman from Ohio [Mr. LATTA] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Pennsylvania [Mr. GRAY].

□ 2330

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from South Carolina [Mr. DERRICK].

Mr. DERRICK. Mr. Speaker, I thank the gentleman for yielding time.

Well, it is down to the last minute now.

We spent a good bit of time on Gramm-Rudman this year. Gramm-Rudman does not have anything to do with dollars and cents or reducing the deficit. We spent a lot of time around here on balance-the-budget amendments, and that really does not have a lot to do with balancing the budget. But we are here tonight in this last hour to talk about reconciliation, and when we are talking about reconciliation, we are talking about doing something about the budget deficit. We are talking about doing something about the budget deficit to the tune of some $81 billion.

Now, I am not going to stand up here tonight and talk to you about VAT, whether I like it or I do not like it. It is more important to some than it is to me. But I think we have to put it in perspective and remember that it is just a part of an $81 billion reconciliation bill, a reconciliation bill, a reconciliation that is the only enforcement procedure that we have in the Budget Act that we passed back in August of this year.

If we are not willing to deal with reconciliation tonight and we are not willing to concur in the Senate amendment, in my opinion what we will say to the American people is that we did not mean what we voted on in August when we passed the budget resolution, that we did not mean that we meant to enforce the budget resolution.

There is an awful lot of time and work that has gone into this. There were, I believe, some 243 conferees, not to mention the time that the Budget Committee, the Rules Committee, the Ways and Means Committee, and every other committee in this House has put into it. It is truly a consensus of this House that we come down to vote on tonight.

Mr. Speaker, let me say to the Members, if you really believe in fiscal responsibility and you really believe that we meant what we said when we passed the budget resolution in August of this year, I ask you to vote to concur in the Senate amendments.

Mr. LATTA. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, what we are about to vote on is not a question of whether we are for Gramm-Rudman or whether we are for reductions. This question is whether or not we meant what we voted on just a few hours ago and sent to the U.S. Senate. By a vote of 205 to 151 the House loudly and clearly told the other body that we did not want another tax, namely, VAT, put in the Tax Code.

That is what we voted on. How many times do we have to tell the other body that we do not want a VAT? I am ready and willing to stay here all night and all next week to get that message across to the other body. This is a matter of a battle of the wills with the other body. Are we stronger than they, or are they going to beat us down?

Well, you have spoken loud and clear. I know what this House will do. We mean what we say. They are not about to ram this down our throats. The American people do not want another tax.

So, Mr. Speaker, what are we going to do? We are going to vote it down again.

Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, the issue is as described by the distinguished gentleman from Ohio [Mr. LATTA]. What we have before us is the same issue that we have voted on twice before, once only a very short time ago when the House rejected the idea of the VAT, the manufacturers' excise tax, or the sales tax or whatever you might call it.

Reconciliation does not have to die. We can reconstitute the conference committee. They can excise the excise tax, and we can have it done after we come back. If we send the VAT down, we have not saved reconciliation because we have sent it forward to a certain veto.

But I think the worst of it is that we should not allow that risk to go forward. We have some responsibilities to our constituents, and one is that we will not lay an extra tax on them, which extra tax can be raised very subtly before those who are taxed know it, and those are the consumers who live in each of our districts. It can be raised before they know what has happened to them on this particular tax.

I do not think we ought to concede. If we reject this motion offered by the distinguished chairman of the Budget Committee, the gentleman from Pennsylvania, the Senate will then undoubtedly take up our tax-extension bills and we will not have to worry about a veto. We can simply, when we come back, go into conference and bring out a reconciliation bill that we can all be proud of.

It is a fundamental question, I think, of how this House wants to operate. Is it going to be driven by the Senate?

I remind the body that we had no provision for financing in the House bill. The Senate had a $5.4 billion tax. The final conference version has a $5.7 billion tax, way above the House, which had no position, and in fact above the Senate's position that they took into conference. Clearly, this goes against the will of the House, which voted by about 200 to 150 to reject the sales tax.

Mr. Speaker, I ask the House to maintain its position, to reject this motion, and, in so doing, to reject the sales tax for the people of the United States.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 4 minutes to the gentleman from California [Mr. WAXMAN].

Mr. WAXMAN. Mr. Speaker, we have come to the end of the road. I think we have the decision before us whether we are going to have a reconciliation bill at all, and I think we ought to vote for a reconciliation bill.

Now, all of the things that I would like to see are not in the bill. I voted for the Downey amendment to fund the work under the Superfund Program. I would prefer that way of financing the work under Superfund. But let us face the fact that we have this provision coming from the conference, and we either agree to it or we dump the whole reconciliation proposal. This VAT proposal raises the highest figure anyone has asked for for the cleanup program under Superfund.

Now, if we reject this game and play a macho number with the Senate, we will have rejected a number of very important items in reconciliation. We have heard about the savings, and the

net savings from this legislation is very important as we try to reduce the deficit—$81 billion. But we also have other important provisions in here that are very much needed.

There is an extension of prenatal care for low-income women under Medicaid. There is an extension of the hospice care program. There is a provision extending aid for dependent children in families where there is an unemployed parent, and in those States where they do not extend AFDC benefits, the father is usually forced to leave and break up the family in order for them to qualify for welfare and qualify for Medicaid.

□ 2340

I speak particularly with reference to the health programs, because that is the area in which I have been most involved. If we look at the reality of hospitals that deal with a high proportion of low-income patients and we give them a break under Medicare reimbursement.

We have many reforms in this legislation. The only time we can deal with health programs these days is in the context of a budget bill. Do not dump all the work that has gone into this bill because you prefer on balance a different way to fund the Superfund Program. I would have preferred it as well, but it is better now at the end of the road to pass reconciliation than to turn our backs and walk away on this whole legislation.

Mr. Speaker, I urge an "aye" vote.

Mr. LATTA. Mr. Speaker, I yield myself 30 seconds.

Let me just tell my good friend, the gentleman from California, who just left the well, that we just voted on all these things. We accepted them, all but one—all but one. That is the only issue here. We voted on that. We sent it back over there and let them take what we want for a change.

Mr. WAXMAN. Mr. Speaker, will the gentleman yield?

Mr. LATTA. I am happy to yield.

Mr. WAXMAN. You do not pass a law by one House saying what the House wants alone. You must have two Houses to concur. Let it be law. The law is what we need, not rhetoric.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. Mr. Speaker, I thank the Speaker for his marvelous behavior in the chair, which I think has helped us through these difficult times.

Mr. Speaker, the tragedy is that we are here doing this and to place blame in this fashion seems unfortunate. Reconciliation should have been passed months ago. To argue that now we must do something that is inherently wrong and use as an excuse the old, the needy, Americans who want the savings of reconciliation, is, I think, both ludicrous and hypocritical.

We have here two Houses playing chicken and someone will indeed get hurt.

Sitting next to me earlier this evening was the charming and very bright chairman from the other body, who jokingly asked, "Could I speak?"

I am sure he would speak for what he believes is the right position, but I tell him with respect and liking that one does not bring in a whole new school, a type, a class, a genus of taxes, at a quarter to twelve in this part of the House deliberations, but to move to a Value-Added Tax which some people feel may well be a tax of the future, a needed and necessary tax, deserves the full discussion of both Houses, of a conference committee that has time to go and act and come back and describe to both Houses that need, and to move into that entire new era of taxation would be a dreadful mistake on a road of speeding cars like teenagers at night.

Stay with the House, not because we are necessarily more right in our conclusion, because we are right in the manner that we are trying to reach that end and we should recognize that and pass reconciliation and pause for the deep and clear examination of a new kind of tax that it deserves, not at this particular moment at this particular place and at this particular time.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia [Mr. JENKINS].

Mr. JENKINS. Mr, Speaker, I know that we are probably playing some brinksmanship with the other body. I do believe that we owe it to ourselves to take a look at what is in reconciliation as far as budget savings are concerned. I believe that we would be making a terrible mistake down the road, and I say to my friends on this side of the aisle that there is a lot of savings in this package. If Gramm-Rudman does go into effect, it will impact defense tremendously. It will make severe reductions in the defense budget.

We have saved a great deal in this package. I know we have a lot in dispute about the manner in which we finance Superfund and that will be debated for a long time.

I would hope that this body, even though it is late at night, would consider those things as we vote upon this issue.

In addition, as my friend, the gentleman from California pointed out, there are many programs that ought to be saved. There are many extensions, targeted job credits, and others that are worth saving. We can never be happy with all of the provisions in the tax bill. It is not perfect, but it saves a great deal of money. I would hope that my colleagues would vote to concur with the Senate action.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana [Mr. COATS].

Mr. COATS. Well, Mr. Speaker, we have been over this and over this. I do not know how many times we have to send a message to the other body that the House is not in a position and not of a will to enact a new tax at the last hour on a situation that has not been fully conferenced. We all know this was attached to a very good reconciliation bill at the last minute in a attempt to squeeze it through so that it could not go to a full conference for a full airing of the positions of the two bodies that are involved.

It is a controversial tax. It passes the Ways and Means Committee by one vote and the chairman of that committee came before this body and said even he was not going to support his own committee provision.

It was taken up before the House and defeated. It was defeated again this evening and now it appears that we are faced one more time with having to demonstrate the will of the House in this matter.

It is not a good tax, but we can argue the merits of that later, and it ought to be argued later.

What we are being asked to do is reconcile the provision where we sent over zero. The Senate put up $5.4 billion and the compromise comes back at $5.7 billion of a new tax, enacted at 10 minutes of 12 on the last day of the session of this Congress. It is just not the right thing to do and we should not do it.

Finally, I want to add one thing, because as we drag on here, I think I need to say this. To my wife, to my kids, to my mother, to my father, merry Christmas. I do not think I am going to be home to see you.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. FROST].

Mr. FROST. Mr. Speaker, I want to direct the Members' attention to some aspects of Gramm-Rudman and to some numbers and what this means.

There is a target for fiscal year 1987 in Gramm-Rudman, enthusiastically suppported by many Members on this side of the aisle, some Members on that side of the aisle, of $144 billion that we will have to come to grips with starting in February. The President is having to come to grips with it right now.

If we do not enact these $81 billion in reconciliation savings, our job in meeting that Gramm-Rudman target early next year, because it will be done early, will be that much harder, and as the gentleman from Georgia [Mr. JENKINS] pointed out, the ax will fall that much more deeply on defense, that much more deeply on domestic programs, and inevitably will lead to that much more in tax revenues.

The choice is very, very simple on this question. Do we want reconciliation or do we not? Are we prepared today to start implementing Gramm-Rudman that we passed just recently? If the answer to that is no, then you do not want to concur. Gramm-Rudman was a nice theory, but we are really not willing to start putting up money when it counts and we are willing and are going to require ourselves to do that much more of a difficult job come early next year.

I urge you to vote to concur, to put our first down papyment on the deficit reduction that has been embraced so enthusiastically by this House.

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Speaker, something purgative has to take place here tonight. In the spirit of reconciliation and trying to accomplish something, and every time I look at our great Speaker at this time of the year I picture him with a white beard and it warms the cockles of my heart; so I would like to get something off my chest.

TOM DOWNEY, Merry Christmas.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from the great State of New York [Mr. DOWNEY], a member of the Ways and Means Committee, and a senior member of the Budget Committee.

□ 2355

Mr. DOWNEY of New York. Is it straight? Happy Near Year to you, Bob. In the spirit of the holiday season, I wish you a Happy New Year.

Mr. Speaker, there are two issues at stake here. First of all, we have an opportunity to say to the Senate that we stand for something; that we have spoken on the question of the value added tax and we have rejected their position. This is not about reconciliation. All of us are for reconciliation. We want it to go forward. It needs to go forward.

The value added tax, people have said here before, will grow and grow and grow, and change and change and change if we do. It already has. The value added tax that this House wisely turned down in the Committee on Ways and Means raised $4.3 billion. In the Senate it raised the same amount. But in the House provision we exempted food processing and fertilizer. The Senate did not.

In an attempt to raise the value added tax to pick up more money, the Senate decided to accept the exemptions for food and fertilizer and the tax grew before it was even enacted from $4.3 billion to $5.7 billion. So before our eyes, the most important lesson that we need to learn about a value added tax, that it will grow and grow, that it will be amended, excepted and changed ad infinitum and ad nauseam is already before us.

We have a chance today to vote against the value added tax, to stand on principal, to make sure that the other body understands that when they want us to blink and turn tail and run, we will not.

Please, please, on the motion to concur vote "no" and tell the other body that we will not have a supertax. We would like reconciliation without it.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. THOMAS].

Mr. THOMAS of California. I thank the gentleman for yielding this time to me.

Frankly, my colleagues, it is too late and I am too tired to be macho. I do not think we need to try to determine who is eyeballing whom on this. I think it is time to try to pass legislation.

We have a decision that we have to make and we hopefully can make it in the most enlightened manner. We have had some discussions about the fact that the Presient is going to veto this. We know it because it has an excise tax in it and there is no question he has made a statement on that.

Let us take a look at what the President has to decide; not on how you view what the President is going to decide but where he is going to be. He is looking at a January 15 snapshot of the laws that are in place at that time to determine Gramm-Rudman. We have in this reconciliation an opportunity to take your side of the aisle's $10 billion. I do not like the dollar amount. That was the figure that the Democrats, basically, chose for Superfund. The Senate has agreed on your figures. You have your money. You have the polluters paying more than under current law.

But the President is not going to focus on that. He is going to focus on the decision he has to make on January 15th in terms of where is going to get the money to fund your $10 billion that you are going to put in the bill after January 15, and he has very few choices in front of him. Frankly, the area where he is going to have to get the money from that you want is going to come from your side of the ledger in terms of defense. That is what he is looking at. That is what his advisers are going to be looking at, the big picture of where we are in that first segment of Gramm-Rudman.

The question of this tax as a funding device will not be the preeminent decision that the President of the United States makes. It will be a question of whether or not he can veto this, realizing that defense is going to take an even bigger slug than he thought it was going to take when they get their $10 billion.

So vote "yes" now and your defense positions are protected.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Illinois [Mr. ROSTENKOWSKI], the chairman of the Committee on Ways and Means.

Mr. ROSTENKOWSKI. I thank the gentleman for yielding this time to me.

Mr. Speaker, I think my colleagues in this body deserve an explanation of just how controversial this matter really is. I do not know of any piece of legislation that we voted on in Ways and Means more frequently in a short period than the proposition of the value-added tax.

The problem here is not the money. It is how do we raise it? How do we pay for the problems of hazardous waste sites. If my memory serves me correctly, on 6 occasions in the Committee on Ways and Means during our markup on Superfund, the proposition that the House ultimately adopted was rejected. On the seventh occasion, that was reversed and the Committee on Ways and Means then reported out the funding mechanism—the VAT—in the reconciliation conference report.

The House then reversed the position of the Committee on Ways and Means, not on one occasion, but on two occasions. Most recently we did that about 25 or 35 minutes ago.

Maybe the description of playing chicken is apt. Maybe it is brinksmanship. But I will tell my colleagues one thing, we do not win them by turning and running. We win by standing up and facing up to it. If there is any area in which I despise legislating it is in crisis situations and we are doing to much of this.

This bill does not die if we do not pass it tonight. This bill does not go away if we refuse to concur. All we have to do is to disagree and send the message back to the Senate that we disagree with their position. We will come back here next January and reinstate a conference and go back and deliberate just how we want to pay for cleaning up the toxic waste sites in this country.

So the crisis is here but it is not the end. All we have to do is refuse to concur, indicate to the Senate that we disagree and wait for a conference to take place next year.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from New York [Mr. GREEN].

Mr. GREEN. I thank the gentleman for yielding this time to me.

Mr. Speaker, we are not deciding this evening whether ultimately this country will or will not have a national value-added tax. We may have to face that next year when Gramm-Rudman and the tax bill comes back to us.

We are deciding how we should deal with pollution, and I think a very

basic principle in that has always been that the polluters should pay. The effort of the Senate to sneak into our tax code this value-added tax, whatever they want to call it, manufacturers' tax via the environmental route, I think is fundamentally wrong.

We will have our debate on the value-added tax or manufacturers' tax and other excise or sales taxes in the future, but I think it is very important that this House stand by the position it has stood by in the past that the polluter pays.

I am very sad that the gentleman from California [Mr. WAXMAN] would walk away from that position tonight. I think it was unfortunate earlier that he walked away from that when we were dealing with acid rain and came up with a different scheme for dealing with that. I think that is the wrong way to go, and I think the fact that over the years we have been trying to push that and we have not been able to come up with an acid rain solution shows that that is not a valid way to deal with environmental problems.

I think we ought to stick with the position we have had. Let us hold firm. Let us vote against this value added tax tonight.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. FAZIO].

Mr. FAZIO. I thank the gentleman for yielding this time to me.

Mr. Speaker, I concur with the chairman of the Committee on Ways and Means. We all regret very much the fact that we are here legislating under crisis at midnight, but I was told earlier that at midnight the cigarette tax will be imposed by the States across the country that have already moved to pick up that revenue source.

So we are not entirely free of having to face up to our responsibilities, even though we do not like the time or the place that we have to do it in. If we are interested in sending a message to our constituents, and I know we all are regardless of how we voted on Gramm-Rudman, that we are sincere about deficit reduction and that we are capable of doing something about deficit reduction on our own, I think we have to take the opportunity tonight to recede and concur with the Senate position.

This is the first opportunity we are going to have to make sizable, in fact historic, reductions in the deficit that is spread out before us on the landscape in 1987 and 1988. We can pick up $81 billion if we will simply relent from our macho position here tonight and go along with what I think on balance is best for the American people.

The gentleman from California [Mr. WAXMAN] spoke earlier about some of the provisions that are in here that we value. I know the people from the Northeast and the Midwest are concerned and support the "Buy American" provisions for the offshore drilling rigs, and others have a sincere concern about jobs. There are many provisions that we cannot afford to lose and we could just lose the opportunity to enact the legislation if we fool around much longer.

I think we have to show the American people that we can do something on our own, that we will not fail at the last minute to make the tough cuts that we have to make. If we do this, we deserve Gramm-Rudman, and we not only deserve the law, we deserve the kind of Draconian cuts that will occur across the spectrum making irrational decisions because we once again fail to be rational when we have the opportunity.

Mr. Speaker, I urge that we recede and concur.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana [Mr. HILER].

Mr. HILER. I thank the gentleman for yielding this time to me.

My colleagues, I guess I am one of the confused people here this evening. I do not think this is a vote on Gramm-Rudman. I do not think this is supposed to be a vote on Superfund this evening.

My understanding of the procedure today was that we would have a vote on budget reconciliation. We have about 75 Members who are not here this evening who I am sure, had we told them earlier in the day that we would be taking up the value added tax and Superfund, would probably be here this evening. But unfortunately, they went home thinking this would be a simple vote on budget reconciliation which would probably pass 350 to 5.

I am one of the people who voted for Downey-Frenzel. I did not vote for Downey-Frenzel because I was overly enamored with the Downey-Frenzel approach, but I thought the Downey-Frenzel approach was far superior to a new value added tax.

□ 0005

But it was my hope that in a conference that would take place after the first of the year that the conferees from the House and the other body would sit down and have an intelligent discussion about the best way to raise this money, not to try to attach $5.7 billion of new tax at the 12th hour of the last day of this session of Congress.

So it would seem to me that the proper thing for this body to do this evening is to defeat the motion of the gentleman and to send this measure back to the other body and to adjourn sine die.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from Mississippi [Mr. MONTGOMERY].

Mr. MONTGOMERY. Mr. Speaker, resolving the differences between the House and Senate on veterans provisions in this bill was a difficult task. All Members of this body have had to make hard choices about all Federal programs during this Congress, but I doubt that any choices have been tougher than those we have made with regard to health care for our Nation's veterans. Therefore, I would be remiss if I did not at the outset of my remarks recognize the diligence of the House and Senate conferees.

Mr. Speaker, I want to acknowledge the outstanding leadership of the ranking minority member of our committee, Mr. HAMMERSCHMIDT, who joined me in introducing the proposal to carry out the mandate of the Congress in the budget resolution. Every year that I work with the gentleman from Arkansas, I am more impressed with his legislative skills, his political judgment and his commitment to our Nation's veterans. What a pleasure it is to work with him.

I especially wish to acknowledge the forbearance and cooperation of Chairman FRANK MURKOWSKI, and the ranking minority member, Senator ALAN CRANSTON, of the Senate Veterans' Affairs Committee. Without their exceptional understanding of the issues and a conscious air of complete cooperation, we could not have completed this challenging task.

On August 1, 1985, the House and Senate reached agreement on the first concurrent budget resolution for fiscal year 1986. The agreement required the Committees on Veterans' Affairs to report legislation on matters within their jurisdiction that would reduce budget authority and outlays by $300 million in fiscal year 1986, and by a total of $1.5 billion during fiscal years 1986 through 1988. I am pleased to report to my colleagues that the Committees on Veterans' Affairs have exceeded by a substantial margin our targeted savings as mandated by the House and Senate over the 3-year period. We have met the targets in a way that I believe will help veterans as they seek health care, in a way that will help the Veterans' Administration in planning and delivering medical services, and in a way that will help us as Members of Congress in our budget decisions.

Mr. Speaker, the conference agreement generally follows the House bill. The policy adopted by the House for hospital care will be maintained should the conference agreement be adopted. Under the agreement the Administrator of Veterans' Affairs would be required to furnish hospital care to: First, veterans for service-connected conditions; second, veterans discharged for disability incurred or aggravated in line of duty; third, veterans disabled as a result of VA treat-

ment or vocational rehabilitation; fourth, service-connected veterans rated at 50 percent or greater; fifth, any other veterans who have service-connected disabilities; sixth, Vietnam veterans exposed to certain toxic substances and veterans exposed to ionizing radiation from nuclear explosions; seventh, former prisoners of war; and eighth, veterans of the Spanish American War, Mexican border period, or World War I.

In adddition, the Administrator would also be required to provide hospital care to a ninth category of veterans. This group of veterans would receive such care because of their inability to defray expenses of necessary hospital care—income less than $15,000 for veterans with no dependents and $18,000 for veterans with one dependent, with an increase of $1,000 (approximately equal to the amount of the VA pension allowance—$999 as of December 1, 1985) for each additional dependent.

In addition, the conference agreement would provide that hospital care may be provided to a second group of veterans, to the extent that resources and facilities are available. The Administrator would have discretionary authority to provide care to nonservice-connected veterans whose income exceeds $15,000 with no dependents and $ 18,000 for veterans with one dependent, plus $1,000 for each additional dependent. The VA would have discretionary authority to furnish hospital care to this second group of veterans through VA facilities and through non-VA facilities as authorized. For those veterans who may receive care and whose income exceeds $20,000 with no dependents and $25,000 with one dependent, plus $1,000 for each addtional dependent, the veteran would be required to agree to make certain payments to the VA in connection with his or her hospital, nursing home, and outpatient care. The income thresholds would be automatically adjusted beginning January 1, 1987, by the same percentage as the VA pension rates would be adjusted.

The Senate bill would have required that the Administrator provide care to only two categories of veterans—those seeking care for their service-connected disabilities and those rated 50 percent or more for any disability. The care would have been provided through VA facilities or, to the extent authorized, through non-VA facilities. For all other eligible veterans hospital care would have been furnished as it is today under current law. The Administrator would have had discretionary authority to furnish care to the extent facilities and resources are available. Some would have gotten care—some would not. Under the Senate bill the overwhelming majority of veterans would have received care according to certain priorities established by the Veterans' Administration.

The conferees rejected this policy. There will be no priorities for hospital care under the conference agreement. The Administrator would be required to provide care to all eligible veterans under section 610(a)(1) of title 38 (as revised by the agreement). In other words, Mr. Speaker, all veterans under section 610(a)(1) would be treated alike. Under current law the VA has been providing hospital care on a priority basis set out in VA regulations. Since we have now entitled certain categories of veterans to hospital care, current VA regulations (section 17.49, Code of Federal Regulations) must now be revised to reflect the major change in policy to which we have agreed.

Under the conference agreement, outpatient treatment will continue to be provided on a priority basis. The conferees rejected the changes proposed by the House and Senate. Under the House bill, the Administrator would have been required to furnish outpatient treatment to those veterans with outpatient treatment eligibility under current law. It also specified that there would be no requirement to furnish services to non-service-connected disabled veterans with incomes above a certain amount. The Senate bill would have required the Administrator to furnish—directly or by contract—outpatient treatment determined to be reasonably necessary to any veteran for a service-connected disability and for any disability of a veteran with a service-connected disability rated at 50 percent or more, with certain exceptions. Otherwise, the Senate bill would not have modified current eligibilities for outpatient treatment.

The conference agreement would make no change in current law eligibilities relating to outpatient treatment, except to provide that non-service-connected veterans with incomes above the upper income threshold contained in the bill would be eligible only upon agreeing to make payment in connection with such treatment or services and to the extent that resources and facilities are otherwise available.

The provision under current law allowing a non-service-connected veteran over the age of 65 to receive his or her hospital care without regard to income would be repealed under the conference agreement.

The conference agreement would authorize the Administrator to collect from third party insurers for the care and treatment of non-service-connected veterans who have insurance.

Finally, Mr. Speaker, the conference agreement includes a COLA increase of 3.1 percent for VA compensation and DIC payments. This provision is identical to the COLA increase passed earlier this evening.

Mr. Speaker, heretofore all eligible veterans seeking hospital care at a particular VA medical center on a given day, and who are determined by the examining physician to be in need of inpatient care, are generally admitted to the medical center. If the facility is unable to provide necessary care, the veterans may be referred to a nearby VA facility which can provide the needed care. Yet, in too many similar cases, certain non-service-connected veterans may simply be told that the facility cannot provide needed care and he or she is turned away. In addition, some veterans who present themselves at a VA medical center and do not require immediate care are requested to return at a scheduled time in order that more urgently needed care can be provided to other veterans.

The House, when it passed the provision requiring the Administrator to furnish hospital care to specified categories of eligibility, and the conferees, when they agreed to it, have established a new policy that is long overdue. We have defined a limited group of veterans who will now be assured of receiving hospital care when the admitting physician determines it to be necessary. Clearly, there is capacity for more hospital services at existing VA facilities and I refer to the committee report accompanying H.R. 1538 for details about this. (Report 99-337, page 31.) In addition to assuring that each medical center has the capacity to care for eligible veterans who require immediate care, the VA may have to improve its ability to locate bed services at other VA medical centers which can accommodate demand when it exceeds the capacity of a particular VA medical center. An expanded referral capability should not be limited to existing medical districts or even regional boundaries, since the proposed bill requires the Veterans' Administration to provide care in VA facilities. The VA will be required to treat the veteran, seek a bed in another VA facility within reasonable distance, locate a bed in a DOD hospital nearby or, where applicable, contract for such care.

Mr. Speaker, the conference agreement makes no change in VA nursing home care eligibilities in current law except to provide that nonservice-connected veterans with incomes above the upper income threshold would be eligible only upon agreeing to make certain payments in connection with their care.

Similarly, the conference agreement makes no change in VA domiciliary care eligibilities in current law. The conference agreement would make no general change in current law eligibilities relating to outpatient treatment or home health services except to provide that non-service-connected veter-

ans with incomes above a threshold would be eligible only upon agreeing to make payment in connection with such treatment or services and to the extent that resources and facilities are otherwise available.

Mr. Speaker, the payments described in the conference agreement are modest ones and are payable only by nonservice-connected veterans with incomes above $20,000 for a single veteran and $25,000 or more for married veterans with dependents. Incomes and assets of veterans are to be determined by considering the same items as the Administrator currently considers for purposes of the VA Pension Program.

These are only the major provisions of this bill relating to veterans' benefits and services. All provisions are explained in detail in the statement of the managers.

I urge the adoption of the conference agreement.

Mr. HAMMERSCHMIDT. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Speaker, as the ranking member of the House Veterans Affairs Committee, I rise in strong support of H.R. 3128's provisions on veterans' programs. This bill would be of great benefit to service-connected disabled veterans and to needy veterans. It has been a year of difficult decisions in the face of the imperative for deficit reduction.

The Committee on Veterans Affairs at the outset adopted a bipartisan approach to the budget for the VA, and when the joint budget resolution instructed a savings of $300 million for the VA, the committee again acted on a bipartisan basis to achieve the savings.

The principal vehicles for meeting the budgetary goals for the VA are reform of veterans' health care eligibility and third-party reimbursement from health care insurance.

It was necessary to work out differences with the other body on much of the reform of veterans' health care eligibility. Both bodies began with their own means tests and strengthened commitments to provide health care. The third-party reimbursement proposals had only technical differences, which were easily resolved.

There is no need to report the details of the health care eligibility reform and the means test which the chairman, SONNY MONTGOMERY, has outlined. Suffice it to say, for the first time ever, the Government is formally committed to providing hospital care for service-connected and truly needy veterans. For the first time ever, the universe of veterans for whom the VA is going to provide hospital care is clearly defined.

I would have preferred the income line of the means test be drawn somewhat higher than allowed by the compromise with the other body. However, the $15,000 limitation for single veterans and the $18,000 limitation for married veterans provide a starting point and could possibly be adjusted in the future, if experience bears out my belief that they may be too low.

Mr. Speaker, I hope the reform of health care eligibility with its strengthened commitment to provide hospital care is as pleasing to our Nation's veterans as it is to me. This legislation adopts the framework of the original House bill. It is a truly historic step which confirms that the Congress intends for the Veterans' Administration hospital system to keep essentially its present form for many years to come.

The cost-of-living allowance for disabled veterans and veterans is set at 3.1 percent, the same as the Social Security and veterans' survivors pension COLA's. Rather than hold up the COLA any longer—it should have been passed prior to December 1, 1985—I believe we should accept the 3.1 percent figure upon which the other body insisted.

This important legislation in large part owes its existence to the leadership and personal dedication of my friend and colleague, SONNY MONTGOMERY, chairman of our committee. Further, the chairman of the Subcommittee on Hospitals and Health Care, BOB EDGAR; the chairman of the Subcommittee on Compensation, Pension and Insurance, DOUG APPLEGATE, and its ranking member, GERALD SOLOMON, have each been instrumental in bringing this veterans' legislation to the floor.

Also, a special note of appreciation should go to the chairman of the House Budget Committee, BILL GRAY, to its ranking member, DEL LATTA, and to MARVIN LEATH, a member of the Veterans' Affairs Committee on temporary leave of absence to the Budget Committee.

Mr. Speaker, I urge my fellow Members to support this measure, which will achieve both the desired savings in the VA budget and a significant reform of veterans' health care eligibility.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentlewoman from Rhode Island [Mrs. SCHNEIDER].

Mrs. SCHNEIDER. Mr. Speaker, I am very distressed that we are attempting to bring forward some smoke and mirrors this evening to discuss the whole prospect of reconciliation.

We have voted on reconciliation. We made it very clear that this body has already acted in support of helping the poor and needy.

Unfortunately, we are back here again because the other body has not chosen to take our message. We are here for one reason and one reason only, and that is to discuss once again the value-added tax.

This House is on record. This House has been on record each time with an increasingly larger margin of support in opposition to the value-added tax.

I believe that this is a very deceptive way of us to give with one hand through reconciliation and to take away with the other hand through a value-added tax.

My question is: Procedurally, are we here tonight to bow to the other body? Are we here this evening to react in the form of crisis management? Or are we here once again, a third time, to stand up and to be counted?

Tonight we are experiencing an endurance test of time. Sure, we are all very tired. Sure, we would like to go home. But I think that we have to make it very clear that this vote is an attempt to separate the men from the boys.

Now I do not know about the rest of you, but I happen to have taken my vitamin pills this evening. I hope all of you have also. But I think that this evening is beyond the endurance test, and it is a question as to whether or not those Members who have stood up and been counted in the past will continue to stand up and be counted and make it very clear to their constituents that we stand in strong opposition to a deceptive way to bring about a value-added tax.

We will have plenty of opportunities to increase taxes next year. And when it comes to environmental protection, there is only one approach that is appropriate, and that is the approach of having the polluter pay.

This is an opportunity for us to yet a third time make it very clear as to where we stand.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, if the cloud of Gramm/Rudman were not over us, I would not support the resolution, but it is over us. And we had better face reality.

I am telling you, there is a reality out there that we have to get some reductions in order, and at the same time, we have to speak about our priorities.

There is a lot in this bill, and I concur with the gentleman from California, HENRY WAXMAN, and frankly I did not think it was fair of my friend from New York to criticize him that much, because HENRY WAXMAN pointed out some priority areas such as Medicare, Medicaid, black lung is in here, some training programs, and other things that we care about. And we are sending a signal that we do not want those kinds of programs reduced by Gramm/Rudman, we can save it in another way.

So I reluctantly concur with this resolution. At the same time, I want to take the opportunity to commend the Speaker pro tempore who has met the test of fairness and endureness. He has been in the chair for 12 hours, and I think we ought to commend my friend from Michigan [Mr. KILDEE].

Mr. LATTA. Mr. Speaker, I yield 1 minute to the gentleman from New York [Mr. MOLINARI].

Mr. MOLINARI. Mr. Speaker, I thank the gentleman for yielding me this time. I will not need a minute.

If you strip the veneer and all the rhetoric away, there is just one simply issue: Are we going to fold to the big oil interests?

I hope not.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentleman from California [Mr. STARK].

Mr. STARK. Mr. Speaker, the issue is simple. We have in this reconciliation bill done a lot for Medicare, we have done a lot on a bipartisan basis and we have helped the average American.

You can defeat this motion, you can do away with the sales tax, you can make the oil industry, as was previously stated, pay their fair share. The bill will be considered next year with a new conference, and the majority of it, all of the good parts that we voted for three and four times will be preserved and Americans will benefit, will get better Medicare, better help, and we will not have this onerous sales tax begin at the hands of the House of Representatives.

I urge a no vote on this motion.

Mr. LATTA. Mr. Speaker, I yield such time as he may consume to the gentleman from South Carolina [Mr. HARTNETT] in order to make a unanimous consent request.

Mr. HARTNETT. Mr. Speaker, I thank the distinguished gentleman for yielding.

Mr. Speaker, I would like to make a unanimous consent request that all speeches be considered as if heard, and that the majority and the minority managers yield back the balance of their time.

Mr. GRAY of Pennsylvania. Mr. Speaker, I will be glad to support the gentleman's request.

The SPEAKER pro tempore. The two managers hold the fate of the House in their hands on that question.

Mr. LATTA. Mr. Speaker, I yield myself 15 seconds.

I would like to accede to that request, but I promised some of my colleagues here some time.

Mr. Speaker, I yield 2 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. Mr. Speaker, I yield back the balance of my time.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan [Mr. WOLPE].

Mr. WOLPE. Mr. Speaker, I also will not use my 2 minutes. I just hope that the House will hold firm to its position and vote in opposition.

The issue is not whether we support reconciliation. Of course we do. The issue is not whether we support budget savings. Of course we do.

The issue is whether or not we are going to have a new tax that makes no sense from the standpoint of tax policy or environmental policy, and I might suggest from the standpoint of the principles of my own party, from the standpoint of those principles as well.

I urge a no vote.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. TRAFICANT].

Mr. TRAFICANT. Mr. Speaker, it is not often that I agree with the other gentleman from Ohio [Mr. LATTA] but on this particular matter I do.

As I have stated earlier, any piece of legislation shotgunned through at the last minute of the end of the session that is thicker than 4 inches and weighs more than 4 pounds, then I am going to vote no. This thing here would cause a hernia in the average American.

Mr. LATTA. Mr. Speaker, I yield 2 minutes to the gentleman from Nebraska [Mr. DAUB].

Mr. DAUB. Mr. Speaker, almost 200 years ago, Alexander Hamilton said to a foreign visitor, "Here, sir, the people rule." I pray tonight that we will not change that statement to "Here, sir, the Senate rules."

I would like very much for my colleagues to take into account two things. This is not a discussion about Gramm-Rudman.

Reconciliation a year ago came to this body for the previous year in April, in April, so what we may do is not without precedent. We can take the matter up, as the chairman of the Ways and Means Committee said, early next year.

We have not abandoned our duties to the poor, our duties to those issues that affect health and limb and life. We have not abandoned our duties to the veterans.

We voted for reconciliation and we sent it to the other body. We have done our duty.

They have not, for their penchant with the nongermaneness of the operations of their body allows them the kind of thinking that has beset us with our difficulties tonight and that is to add something in conference that we did not send them. We should not accept it.

I urge us, I urge us with all my heart as a matter of procedure and as a matter of process to reject this motion and vote it down.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentleman from Ohio [Mr. ECKART].

Mr. ECKART of Ohio. Mr. Speaker, somebody said come back next year. Next year to what? Next year to Gramm-Rudman? Next year to business as usual, with Superfund cleanups being delayed all across the United States? Next year to an undone Black Lung Medical Program on the brink of bankruptcy? Next year to expanded physician charges to our senior citizens instead of a freeze?

Yes, we bowed, we got the other body to accept 33 percent more for Superfund than they originally agreed to.

The bottom line is when we come back it is not going to be business as usual, it is a whole new ballgame, and it is not going to be very pleasant.

I urge adoption of the conference committee report.

□ 2420

Mr. LATTA. Mr. Speaker, may I inquire about the time?

The SPEAKER pro tempore. The gentleman from Ohio [Mr. LATTA] has 6 minutes remaining and the gentleman from Pennsylvania [Mr. GRAY] has 7 minutes remaining.

Mr. LATTA. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, this has been a good debate. Let me say that I have been in this House now for 27 years, and I have been proud to be a Member of this House.

This House over those years has been a House that voted its convictions and stayed by those convictions; and I think tonight we have an opportunity to show that we are a proud body; that we are not going to let the other body tell us what to do when we have voted 205 to 151 on an issue so important to the American people, are we going to have a whole new tax system imposed on them?

What a fine Christmas present we could give them by backing down to the other body and putting a whole new taxing system on them? Come on, we do not want to do that. We do not want to do that.

Certainly, on reflection, the other body would not want to do that. What did we do when we voted just an hour or so ago? We voted for all of these reductions that we have heard so much about here; we voted for those—yes, we voted for a Superfund. The only thing we said to the other body was in that vote, was that we wanted to wait for another day to come up with the funding, and not to swallow a whole new taxing system; the value added tax.

So I ask my colleagues tonight to stay by their convictions and to vote down this motion.

Mr. Speaker, I yield back the balance of my time.

Mr. GRAY of Pennsylvania. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker and colleagues, someone has said tonight that we are involved in a game of political "chicken," and that is probably very accurate in the description.

Let us talk about how we got to the game. We got to the game because we went to conference on reconciliation; the conferees worked, the conferees on the subgroup number 22 voted, came out with a position. They went there knowing what the House had done on

the Downey amendment earlier, but yet they acted in good faith; and now the other body, knowing that their President has said that he will veto a value added tax, does have us involved in a game of political chicken.

Before we talk about who should blink and who should run, let us talk about what the price is. The price, the price is $80 billion of deficit reduction. The only deficit reduction that we know for sure we are going to get, because we have heard it so many times from other persons.

Reconciliation. The price? Those programs: Medicaid, pension benefits, veterans programs, and others that have been reformed that are now going to be left dormant and left over to next year, when we come back.

Next year when we come back what will we have? I will tell you what we are going to have: We are going to have to learn a whole new budget process with a whole new set of dates and targets, and how to do it very quickly; and if anybody thinks we can come back to this next year for all of those spending reductions, I have news for you, I do not think it is going to happen.

We can also have Superfund coming up through the regular process. So I just simply say to the Members, we are involved in a game of political chicken. The Senate does not, does not want to resolve the problem. What they have said in essence is, "Let's challenge the President."

This House earlier said, "We don't want to do that bipartisanly." So I stand here tonight, asking you to vote to concur. Vote so that we can make the savings, vote so that we can go home and say that we have reduced the deficit. Vote so that we can come back next year, and we can come back and be on with the rest of the business; including, there will be business of reauthorization on Superfund and that issue will not be closed.

So next year for me is deficit reduction as well as reauthorization of Superfund; and that battle is not over. I say let us get the deficit reduction we can tonight. We cannot wait until next year; America cannot wait until next year. The red ink is drowning this country.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the motion.

The previous question was ordered.

The question is on the motion offered by the gentleman from Pennsylvania [Mr. GRAY] to concur in the Senate amendment to the House amendment to the Senate amendment.

The question was taken; and the Speaker pro tempore announced that the noes appeared to have it.

Mr. GRAY of Pennsylvannia. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device and there were—yeas 137, nays 211, not voting 86, as follows:

[Roll No. 482]

□ 0030

So the motion was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBERS OF THE COMMITTEE TO INFORM THE PRESIDENT THAT THE TWO HOUSES HAVE COMPLETED THEIR BUSINESS OF THE SESSION AND ARE READY TO ADJOURN

The SPEAKER pro tempore. The Chair appoints as members on the part of the House to notify the President the gentleman from Washington [Mr. FOLEY] and the gentleman from Illinois [Mr. MICHEL].

MOTION TO DISAGREE TO THE SENATE AMENDMENT TO H.R. 3128, CONSOLIDATED OMNIBUS RECONCILIATION ACT OF 1985

Mr. GRAY of Pennsylvania. Mr. Speaker, I move that the House disagree to the Senate amendment to the House amendment to the Senate amendment to H.R. 3128.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania [Mr. GRAY].

The motion was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR ADJOURNMENT SINE DIE OF THE CONGRESS ON FRIDAY, DECEMBER 20, 1985

Mr. FOLEY. Mr. Speaker, I send to the desk a privileged concurrent resolution (H. Con. Res. 267) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 267

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Friday, December 20, 1985, pursuant to a motion made by the majority leader or his designee, it stand adjourned sine die and that when the Senate adjourns on Friday, December 20, 1985, pursuant to a motion made by the majority leader or his designee, it stand adjourned sine die or until 12 o'clock meridian on the second day after Members are notified to reassemble pursuant to section 2 of this concurrent resolution.

SEC. 2. The Speaker of the House, after consultation with the minority leader of the House, and the majority leader of the Senate, after consultation with the minority leader of the Senate, acting jointly, shall notify the Members of the House and Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 4006. An act to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbursement provisions, and borrowing authority under the railroad unemployment insurance program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985.

□ 0045

PARLIAMENTARY INQUIRIES

Mr. PICKLE. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman from Texas will state his parliamentary inquiry.

Mr. PICKLE. Mr. Speaker, I understand the message from the Senate has gone to the desk. Has not the House already adjourned.

The SPEAKER pro tempore. The House has not adjourned. The House has passed a resolution stipulating that when it adjourns today, it will adjourn sine die, to meet on January 21, or subject to the call of the Chair under certain circumstances.

The Senate would also have to concur in that resolution, the Chair would advise the gentleman from Texas.

Mr. CAMPBELL. Mr. Speaker, I have a parliamentary inquiry.

On the message that came from the Senate, parliamentarily, would it take a unanimous-consent request to take that matter up?

The SPEAKER pro tempore. At this point, that is correct; it would require a unanimous-consent request.

Mr. CAMPBELL. Mr. Speaker, I ask unanimous consent that the matter be taken up.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

Mr. FRENZEL. Mr. Speaker, reserving the right to object, under my reservation, I just want to let the House know that it is my understanding that the chairman of the Committee on Ways and Means will have a motion to offer on this, and for that reason, I am anticipating to go forward with an objection to the unanimous-consent request of the gentleman from South Carolina.

Further reserving the right to object, I yield to the gentleman from South Carolina [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Speaker, if the chairman of the Committee on Ways and Means is preparing to make a motion on the matter, I would certainly withdraw my unanimous-consent request to defer to any motion by the chairman.

Mr. ROSTENKOWSKI. Mr. Speaker, the chairman of the Committee on Ways and Means had no intention of making any motion.

Mr. FRENZEL. In that case, Mr. Speaker, I object.

The SPEAKER pro tempore. Objecton is heard.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair would like to take this occasion to advise Members that the business of this session of the 99th Congress has been completed. All that remains is for us to await the formal report of the committee to notify the President and the adjournment of the Senate, as well.

Let the Chair take this occasion to express his thanks and the thanks of the leadership for the cooperation throughout this year of the Members on both sides of the aisle and to wish to all of you and all of your families a very joyous Christmas season, and may the new year bring happiness and peace to all of you.

PARLIAMENTARY INQUIRY

Mr. CARNEY. Mr. Speaker, may I make a parliamentary inquiry?

The SPEAKER pro tempore. The gentleman from New York may state his parliamentary inquiry.

Mr. CARNEY. Mr. Speaker, the resolution that we just passed, we used the date December 20. May we assume that this day, the 19th, carried into the 20th, and at the end of this business immediately we will be out sine die?

The SPEAKER pro tempore. This is calendar December 20, and when the House adjourns today, it will adjourn sine die, assuming the agreement of the Senate to the resolution.

Mr. CARNEY. I thank the Chair.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. CHAPMAN (at the request of Mr. WRIGHT), for today, on account of illness in the family.

Mr. MCKINNEY (at the request of Mr. MICHEL), for today, on account of illness.

Mr. FAZIO.
Mr. PEPPER.
Mr. MANTON.
Mr. LOWRY of Washington.
Mr. YATRON.

SENATE BILL AND JOINT RESOLUTION REFERRED

A bill and joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1831. An act to amend the Arms Export Control Act to require that congressional vetoes of certain arms export proposals be enacted into law; to the Committee on Foreign Affairs.

S.J. Res. 231. Joint resolution to designate the period commencing January 1, 1986, and ending December 31, 1986, as the "Centennial Year of the Gasoline Powered Automobile"; to the Committee on Post Office and Civil Service.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker pro tempore.

H.R. 1603. An act to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934;

H.R. 1784. An act to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes;

H.R. 2100. An act to extend and revise agricultural price support and related programs, to provide for agricultural export, resource conservation, farm credit, and agricultural research and related programs, to continue food assistance to low-income persons, to ensure consumers an abundance of food and fiber at reasonable prices, and for other purposes;

H.R. 2391. An act to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center;

H.R. 2542. An act designating the building located at 125 South State Street, Salt Lake City, UT, as the "Wallace F. Bennett Federal Building";

H.R. 2698. An act to designate the U.S. Courthouse in Tucson, AZ, as the "James A. Walsh United States Courthouse";

H.R. 2903. An act to designate the Federal Building and U.S. Post Office in Philadelphia, PA, as the "Robert C. Nix, Sr., Federal Buiding and United States Post Office";

H.R. 2962. An act to remove certain restrictions on the availability of office space for former Speakers of the House;

H.R. 3608. An act to amend the Small Business Investment Act of 1958;

H.R. 3837. An act to extend the deadline for the submission of the initial set of sentencing guidelines by the U.S. Sentencing Commission, and for other purposes; and

H.J. Res. 465. Joint resolution making further continuing appropriations for the fiscal year 1986, and for other purposes.

SENATE ENROLLED BILL AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled bill and joint resolution of the Senate of the following title:

S. 1918. An act to change the date for transmittal of a report; and

S.J. Res. 235. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week."

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER pro tempore announced his signature to enrolled bill and joint resolutions of the Senate of the following title:

S. 1884. An act to amend the Farm Credit Act of 1971, to restructure and reform the Farm Credit System, and for other purposes;

S.J. Res. 189. Joint resolution designating the week beginning January 12, 1986, as "National Fetal Alcohol Syndrome Awareness Week"; and

S.J. Res. 198. Joint resolution to designate the year of 1986 as the "Sesquicentennial Year of the National Library of Medicine."

BILLS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that the committee did on the following day present to the President, for his approval, bills of the House of the following title:

On December 18, 1985:

H.R. 3981. An act to extend until December 19, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain medicare reimbusement provisions, and borrowing authority under the railroad unemployment insurance program; and

H.R. 3914. An act to preserve the authority of the Supreme Court Police to provide protective services for Justices and Court personnel.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

On December 19, 1985:

H.J. Res. 465. Joint resolution making further continuing appropriations for the fiscal year 1986, and for other purposes;

H.R. 603. An act to amend the Securities Exchange Act of 1934 to authorize the Securities and Exchange Commission to subject banks, associations, and other entities that exercise fiduciary powers, to the same regulations as broker-dealers, pursuant to section 14(b) of the Securities Exchange Act of 1934;

H.R. 1784. An act to authorize appropriations for fiscal year 1986 for the operation and maintenance of the Panama Canal, and for other purposes;

H.R. 2391. An act to authorize the Administrator of General Services to collect additional contributions of money provided to him by private individuals or organizations for the Nancy Hanks Center;

H.R. 2542. An act designating the building located at 125 South State Street, Salt Lake City, UT, as the "Wallace F. Bennett Federal Building";

H.R. 2698. An act to designate the U.S. Courthouse in Tucson, AZ, as the "James A. Walsh United States Courthouse";

H.R. 2903. An act to designate the Federal Building and U.S. Post Office in Philadelphia, PA, as the "Robert C. Nix, Sr., Federal Building and United States Post Office";

H.R. 2962. An act to remove certain restrictions on the availability of office space for former Speakers of the House;

H.R. 3608. An act to amend the Small Business Investment Act of 1958; and

H.R. 3837. An act to extend the deadline for the submission of the initial set of sentencing guidelines by the United States sentencing Commission, and for other purposes.

RECESS

The SPEAKER pro tempore. The Chair wants to propound an inquiry.

In view of the fact that all of our business has been transacted, would there be objection to the Chair's declaring a recess pending the report of the committee to notify the President?

Without objection, the Chair declares a recess subject to the call of the Chair.

There was no objection.

Accordingly (at 12 o'clock and 56 minutes a.m.), the House stood in recess subject to the call of the Chair.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2416. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 6-114, "The George Washington University Revenue Bond Act of 1985", and report, pursuant to Public Law 93-198, section 602(c); to the Committee on the District of Columbia.

2417. A letter from the Secretary of Health and Human Services, transmitting the Surgeon General's report on the health consequences of smoking, pursuant to 15 U.S.C. 1337(a); to the Committee on Energy and Commerce.

2418. A letter from the Deputy Associate Director for Royalty Management Operations, Department of the Interior, transmitting a report on proposed refunds of excess royalty payments in OCS areas, pursuant to 43 U.S.C. 1339(b); to the Committee on Interior and Insular Affairs.

2419. A letter from the General Council, Department of the Treasury, transmitting a draft of proposed legislation to amend certain provisions of title 18, United States Code, relating to firearms and explosives; to the Committee on the Judiciary.

2420. A communication from the President of the United States, transmitting notice of his intent to add Aruba to the list of beneficiary developing countries under the Generalized System of Preferences [GSP] Program, effective January 1, 1986, pursuant to 19 U.S.C. 2462(a) (H. Doc. No. 99-139); to the Committee on Ways and Means and ordered to be printed.

2421. A letter from the Secretary of Defense, transmitting a recommendation that legislation be enacted to reinstate the death penalty for persons convicted of espionage in civilian courts, pursuant to Public Law 99-145, section 1439; jointly, to the Committees on Armed Services and the Judiciary.

2422. A letter from the Under Secretary of State for Management, transmitting a draft of proposed legislation to provide for the security of U.S. diplomatic personnel, facilities and operations, and for other purposes; jointly, to the Committees on Foreign Affairs and Post Office and Civil Service.

2423. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to resolve issues related to state use of the worldwide unitary method of taxation jointly, to the Committee on the Judiciary and Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WHITTEN: Committee of conference. Conference report on House Joint Resolution 465 (Rept. 99-450). Ordered to be printed.

Mr. BROOKS: Committee on Government Operations. H.R. 3614. A bill to restrict the use of Government vehicles for transportation of officers and employees of the Federal Government between their residences and places of employment, and for other purposes (Rept. 99-451). Referred to the Committee of the Whole House on the State of the Union.

Mr. BROOKS: Committee on Government Operations. H.R. 3168. A bill to require the Director of the Office of Management and Budget to prepare an annual report consolidating the available data on the geographic distribution of Federal funds, and for other purposes; with an amendment (Rept. 99-452). Referred to the Committee of the Whole House on the State of the Union.

Mr. GRAY of Pennsylvania: Committee of conference. Conference report on H.R. 3128 (Rept. 99-453). Ordered to be printed.

Mr. DERRICK: Committee on Rules. House Resolution 349. Resolution providing for the House to reject the conference report on the bill (H.R. 3128), to recede from its amendment to the Senate amendment, and to concur in the Senate amendment with an amendment (Rept. 99-454). Referred to the House Calendar.

Mr. BEILENSON: Committee on Rules. House Resolution 350. Resolution providing for the consideration of H.R. 3992, a bill to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions which would otherwise expire at the end of 1985, and for other purposes (Rept. 99-455). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ROSTENKOWSKI:

H.R. 3992. A bill to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions which would otherwise expire at the end of 1985, and for other purposes; to the Committee on Ways and Means.

By Mrs. KENNELLY:

H.R. 3993. A bill to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, and borrowing authority under the Railroad Unemployment Insurance Program, and to extend until March 15, 1986, and December 31, 1986, the application of certain Medicare hospital and physician provisions, respectively; jointly, to the Committees on Ways and Means and Energy and Commerce.

H.R. 3994. A bill to extend until December 31, 1985, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. MADIGAN (for himself, Mr. SCHEUER, Mr. BROYHILL, Mr. SHARP, Mr. LENT, Mr. LUKEN, Mr. NIELSON of Utah, Mr. TAUKE, Mr. SHELBY, Mr. RITTER, Mr. BLILEY, Mr. TAUZIN, Mr. WHITTAKER, Mr. DOWDY of Mississippi, Mr. DANNEMEYER, Mr. BILIRAKIS, Mr. GALLO, Mr. DWYER of New Jersey, Mr. RALPH M. HALL, Mr. OXLEY, and Mr. ECKART of Ohio):

H.R. 3995. A bill to amend the Federal Food, Drug and Cosmetic Act to establish conditions for the export of drugs; to the Committee on Energy and Commerce.

By Mr. ROSTENKOWSKI:

H.R. 3996. A bill to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. BROWN of California (for himself, Mr. BEILENSON, Mr. BERMAN, Mr. BONIOR of Michigan, Mr. CONYERS, Mr. CROCKETT, Mr. DIXON, Mr. DYMALLY, Mr. EDGAR, Mr. FAZIO, Mr.

FORD of Michigan, Mr. GUARINI, Mr. HAWKINS, Mr. HERTEL of Michigan, Mr. LEVINE of California, Mr. LUNDINE, Mr. MACKAY MCKINNEY, Mr. MITCHELL, Mr. NELSON of Florida, Mr. RANGEL, Mr. TORRES, Mr. UDALL, Mr. WAXMAN, and Mr. WEISS):

By Mr. CONYERS:

H.R. 3998. A bill to amend the Federal Rules of Civil Procedure with respect to offers of judgment; to the Committee on the Judiciary.

By Mr. DARDEN:

H.R. 3999. A bill to amend the Internal Revenue Code of 1954 to repeal the requirement that certain food or beverage establishments allocate a portion of its gross receipts to its employees as tips and report such allocation to the Internal Revenue Service; to the Committee on Ways and Means.

By Mr. HERTEL of Michigan:

H.R. 4000. A bill to assist in the admission into the United States of certain aliens who have fled from Poland; to the Committee on the Judiciary.

By Mr. KASTENMEIER:

H.R. 4001. A bill to amend chapters 37 and 123 of title 28, United States Code, and chapter 301 of title 18, United States Code; to the Committee on the Judiciary.

By Mr. LATTA:

H.R. 4002. A bill to amend the Tariff Schedules of the United States in order to establish equitable duty rates for sodium bicarbonate; to the Committee on Ways and Means.

By Mr. MOLINARI:

H.R. 4003. A bill to permit the reappointment of certain former air traffic controllers, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. SLATTERY:

H.R. 4004. A bill to establish a corporation to be known as Haskell Indian College and for other purposes; to the Committee on Education and Labor.

By Mr. WOLF:

H.R. 4005. A bill to amend section 8332 of title 5, United States Code, to allow periods of certain service performed as an employee of a State or an instrumentality of a State to be creditable for civil service retirement; to the Committee on Post Office and Civil Service.

By Mr. ROSTENKOWSKI:

H.R. 4006. A bill to extend until March 15, 1986, the application of certain tobacco excise taxes, trade adjustment assistance, certain Medicare reimbursement provisions, and borrowing authority under the Railroad Unemployment Insurance Program, and to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions of current law which would otherwise expire at the end of 1985; jointly, to the Committees on Ways and Means and Energy and Commerce.

By Mr. ST GERMAIN:

H.J. Res. 495. Joint resolution to provide for the temporary extension of certain programs relating to housing and community development, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. FOLEY:

H.J. Res. 496. Joint resolution providing for the convening of the second session of the 99th Congress; considered and passed.

By Mr. SEIBERLING:

H. Con. Res. 263. Concurrent resolution to rescind the approval of House Concurrent Resolution 262, correcting the enrollment of House Joint Resolution 187, and directing the Clerk of the House of Representatives to make a correction in the enrollment of the joint resolution (H.J. Res. 187); considered and agreed to.

By Mr. DE LA GARZA:

H. Con. Res. 264. Concurrent resolution to correct the enrollment of H.R. 2100; considered and agreed to.

By Mrs. LLOYD (by request):

H. Con. Res. 265. Concurrent resolution expressing the sense of the Congress that all executive agencies should preferentially appoint veterans of the Armed Forces of the United States to positions in the Federal Government as provided in title 5, United States Code; to the Committee on Post Office and Civil Service.

By Mr. ROWLAND of Connecticut:

H. Con. Res. 266. Concurrent resolution providing for the sine die adjournment of the Congress; laid on the table.

By Mr. FOLEY:

H. Con. Res. 267. Concurrent resolution providing for the sine die adjournment of the 1st session of the 99th Congress; considered and agreed to.

By Mr. DERRICK:

H. Res. 349. Resolution providing for the House to reject the conference report on the bill (H.R. 3128) to provide for reconciliation pursuant to section 2 of the first concurrent resolution on the budget for fiscal year 1986 (S. Con. Res. 32, 99th Congress), to recede from its amendment to the Senate amendment, and to concur to the Senate amendment with an amendment; House Calendar No. 114. H. Rept. 99-454.

By Mr. BEILENSON:

H. Res. 350. Resolution providing for the consideration of the bill (H.R. 3992) to amend the Internal Revenue Code of 1954 to extend for a temporary period certain tax provisions which would otherwise expire at the end of 1985, and for other purposes; House Calendar No. 115. H. Rept. 99-455.

By Mr. FOLEY:

H. Res. 351. Resolution appointing a committee to notify the President concerning the proposed adjournment of the session; considered and agreed to.

By Mr. SMITH of New Jersey (for himself, Mr. BROOMFIELD, Mr. SOLOMON, Mr. PORTER, Mr. SOLARZ, Mr. KEMP, Mr. HYDE, Mr. HALL of Ohio, Mr. BARNES, Mr. GILMAN, Mr. FEIGHAN, Mr. GEJDENSON, Mr. WOLF, Mr. HOYER, Mr. COUGHLIN, Mr. BOULTER, Mr. BIAGGI, Mrs. BENTLEY, Mr. BADHAM, Mr. MOAKLEY, Mr. MILLER of Washington, Mr. MCCOLLUM, Mr. KOLTER, Mr. VALENTINE, Mr. VENTO, Mr. GEKAS, Mr. FISH, Mr. DELAY, Mr. SCHAEFER, Mr. MCDADE, Ms. FIEDLER, Mrs. MARTIN of Illinois, Mrs. BURTON of California, Mr. MCCAIN, Mr. NELSON of Florida, Mr. DENNY SMITH, Mr. LAGOMARSINO, Mr. LANTOS, Mr. ZSCHAU, Mr. SILJANDER, Mr. GARCIA, Mr. LOWERY of California, Mr. LENT, Mr. WHITEHURST, Mr. BORSKI, Mr. LEVIN of Michigan, Mr. MOORE, Ms. MIKULSKI, Mr. ROE, Mr. FRENZEL, Mr. SCHUMER, Mr. FRANK, Mr. DWYER of New Jersey, Mr. LEVINE of California, Mr. BUSTAMANTE, Ms. KAPTUR, Mr. ANDREWS, Mr. DORNAN of California, Mr. LIGHTFOOT, Mr. MCGRATH, Mr. WEBER, Mr. SAXTON, Mr. MITCHELL, Mr. WILSON, Mr. STOKES, Mr. YOUNG of Missouri, Mr. BEDELL, Mr. MARTINEZ, Mr. SCHEUER, Mr. LELAND, Mr. MORRISON of Connecticut, Mr. LAFALCE, Mrs. BOXER, Mr. GLICKMAN, Mr. BILIRAKIS, Mr. DEWINE, Mr. BERMAN, Mr. BLILEY, Mr. WORTLEY, Mr. GALLO, Mr. COBEY, Mr. REID, Mr. DASCHLE, Mr. DIOGUARDI, Mr. DURBIN, Mr. EVANS of Iowa, Mr. BOEHLERT, Mr. GREEN, Mr. HEFTEL of Hawaii, Mr. Weiss, Mr. OBERSTAR, Mr. ECKART of Ohio, Mr. MINETA, Mr. BATEMAN, Mr. KRAMER, Mr. CARNEY, Mr. MANTON, Mr. BURTON of Indiana, Mr. MRAZEK, Mr. BOUCHER, Mr. FROST, Mr. MATSUI, Mr. ACKERMAN, Mr. ERDREICH, Mr. CONTE, Mr. EDWARDS of Oklahoma, Mrs. COLLINS, Mr. WAXMAN, Mr. SWEENEY, Mr. KOLBE, Mr. ADDABBO, Mr. BROWN of Colorado, Mr. GRAY of Pennsylvania, Mr. BARTLETT, Mr. SISISKY, Mr. HERTEL of Michigan, Mrs. LLOYD, Mr. CARPER, Mr. BRYANT, Mr. DONNELLY, Mr. LUNGREN, Mr. FOGLIETTA, Mr. COOPER, Mr. KOSTMAYER, Mr. HORTON, Mr. SEIBERLING, Mr. GRADISON, Mr. SYNAR, Mr. ROBINSON, Mr. ATKINS, Mr. GUNDERSON, Mr. ECKERT of New York, Mr. STRANG, Mr. SWINDALL, Mrs. ROUKEMA, Mr. BROWN of California, Mr. CHANDLER, Mr. SMITH of Florida, Mr. DAUB, Mr. RICHARDSON, Mr. GINGRICH, and Mr. LEACH of Iowa):

H. Res. 352. Resolution calling upon the Union of Soviet Socialist Republics to cease its concentrated and systematic persecution of Hebrew teachers and cultural activists, and for other purposes; to the Committee on Foreign Affairs.

H.R. 3378: Mr. WEISS and Mr. NOWAK.

H.R. 3388: Mr. HORTON, Mr. ROE, Mr. STARK, Mr. WHITEHURST, Mr. KINDNESS, Mr. LIGHTFOOT, Mr. GALLO, Mr. WOLF, Mr. LAGOMARSINO, Mr. GINGRICH, Mr. CAMPBELL, Mr. LOWERY of California, Mr. WORTLEY, Mr. DORNAN of California, Mr. BLILEY, Mr. DANIEL, Mr. DAUB, Mr. DYSON, Mrs. MARTIN of Illinois, Mr. VALENTINE, Mr. RUDD, Mr. PORTER, Mr. ROSE, Mr. CARNEY, Mr. CHAPMAN, Mr. SWINDALL, Ms. KAPTUR, Mr. PARRIS, Mr. FRANK, Mr. NIELSON of Utah, Mr. LOEFFLER, Mr. GUNDERSON, Mr. WILSON, Mr. BARTON of Texas, Mr. DEWINE, Mr. PACKARD, Mr. ARCHER, Mr. SOLOMON, Mr. BATEMAN, Mr. MCGRATH, Mr. BURTON of Indiana, Mr. CLINGER, Mr. EDWARDS of Oklahoma, Mr. LAFALCE, Mr. YOUNG of Florida, Mr. SMITH of New Hampshire, Mr. SAXTON, Mr. MOORHEAD, Mr. TAUKE, Mr. LUKEN, Mr. BEREUTER, Mr. BLAZ, Mr. PURSELL, and Mr. SILJANDER.

H.R. 3408: Mr. SEIBERLING, Mr. GEJDENSON, Mr. CONTE, Mr. SHAW, Mr. DURBIN, Mr. DELLUMS, Mr. OWENS, Mr. MILLER of California, Mr. SCHEUER, Mr. GARCIA, Mr. DONNELLY, Mr. PURSELL, and Mr. PANETTA.

H.R. 3427: Mr. RAHALL, Mr. CALLAHAN, Mr. TORRICELLI, Mr. BONER of Tennessee, Mr. OBERSTAR, Mr. QUILLEN, Mr. PERKINS, Ms. MIKULSKI, Mr. ROE, Mr. COELHO, Mr. MCEWEN, Mr. YOUNG of Missouri, Mr. BEVILL, Mr. NICHOLS, Mr. TAUZIN, and Mr. CARNEY.

H.R. 3465: Mr. ST GERMAIN, Mr. MCDADE, Mr. GOODLING, Mr. VENTO, Mr. MARTIN of New York, Mr. BONER of Tennessee, Ms. OAKAR, Mr. STRATTON, Mr. FEIGHAN, Mr. WYDEN, Mr. TRAXLER, Mr. OWENS, and Mr. SMITH of Florida.

H.R. 3469: Mr. MORRISON of Connecticut, Mr. BOSCO, Mr. DYMALLY, Mr. COELHO, Mr. MATSUI, Mr. BROYHILL, Mr. MILLER of California, Mr. LEVINE of California, Ms. OAKAR, Mr. MARTINEZ, Mr. PANETTA, Mr. LEHMAN of Florida, Mr. THOMAS of Georgia, and Mr. LANTOS.

H.R. 3470: Mr. MCDADE, Mr. MCCOLLUM, Mr. FOGLIETTA, Mr. SIKORSKI, and Mr. SPRATT.

H.R. 3472: Mr. GEKAS.

H.R. 3521: Mr. LUKEN.

H.R. 3562: Mr. EDWARDS of Oklahoma.

H.R. 3593: Mr. COBEY.

H.R. 3599: Mr. ARMEY, Mr. BADHAM, Mr. BRYANT, Mr. DEWINE, Mr. DOWDY of Mississippi, Mr. DWYER of New Jersey, Mr. EDGAR, Mr. GALLO, Mr. GARCIA, Mr. GINGRICH, Mr. LEHMAN of Florida, Mr. MCCAIN, Ms. MIKULSKI, Mr. MOLINARI, Mr. PARRIS, Mr. ROBINSON, and Mrs. VUCANOVICH.

H.R. 3626: Mrs. JOHNSON.

H.R. 3660: Mr. DORGAN of North Dakota and Mr. PENNY.

H.R. 3723: Mr. LUKEN.

H.R. 3733: Mr. KOLTER and Mr. LEVINE of California.

H.R. 3739: Mr. DASCHLE.

H.R. 3760: Mr. TRAFICANT and Mr. GINGRICH.

H.R. 3767: Mr. GUNDERSON and Mr. SHARP.

H.R. 3785: Mr. WEBER, Mrs. BENTLEY, and Mr. ROE.

H.R. 3802: Mr. WEBER, Mrs. BENTLEY, and Mr. ROE.

H.R. 3814: Mr. HEFTEL of Hawaii, Mr. LUNDINE, Mr. GREEN, and Mr. GILMAN.

H.R. 3842: Mr. RODINO, Mr. RINALDO, Mr. SHUMWAY, Mrs. BURTON of California, Mr. YATRON, and Mrs. HOLT.

H.R. 3894: Mr. TORRES, Mr. FRANK, Mr. FAUNTROY, Mr. DELLUMS, Mr. LAGOMARSINO, Mr. LEACH of Iowa, Mr. RODINO, Mr. BEREUTER, and Mr. STARK.

H.R. 3906: Mr. MRAZEK.

H.R. 3950: Mr. MORRISON of Connecticut.

H.R. 3952: Mr. DE LA GARZA and Mr. WILSON.

H.R. 3958: Mr. BATES, Mr. HUNTER, and Mr. LOWERY of California.

H.J. Res. 88: Mr. LAFALCE.

H.J. Res. 315: Mr. MCKERNAN, Mrs. BOXER, Mr. RUDD, Mr. FRENZEL, Mr. BIAGGI, Mr. MONTGOMERY, Mr. ANDERSON, Mr. DIXON, Mr. HORTON, Mr. DONNELLY, Mr. ERDREICH, Mrs. BENTLEY, Mr. DYSON, Mr. GONZALEZ, Mr. SUNIA, and Mr. GUARINI.

H.J. Res. 332: Mr. MOORHEAD, Mr. MOORE, Mr. MRAZEK, Mr. MURPHY, Mr. MURTHA, Mr. ORTIZ, Mr. NICHOLS, Mr. MANTON, Mr. SCHUMER, Mr. WYLIE, Mr. MORRISON of Connecticut, Mr. DE LA GARZA, Mr. TORRICELLI, Mr. VANDER JAGT, Mr. WOLPE, Mr. AKAKA, Mr. VENTO, Mr. LIVINGSTON, and Mr. GONZALEZ.

H.J. Res. 336: Mr. STRATTON.

H.J. Res. 341: Mr. BOSCO, Mr. BATES, Mr. COELHO, Mr. SHUMWAY, Mrs. BOXER, Mr. MARTINEZ, Mr. PANETTA, Mr. FAZIO, and Mr. ANDERSON.

H.J. Res. 345: Mr. WALGREN, Mr. PANETTA, Mr. WHITLEY, Mr. GEPHARDT, Mr. DURBIN, Mr. HALL of Ohio, Mr. SMITH of Florida, Mr. LOWRY of Washington, Mr. BUSTAMANTE, Mr. GILMAN, Mr. ORTIZ, Mr. STAGGERS, Mr. DELLUMS, Mr. HAMMERSCHMIDT, Mr. TAYLOR, Ms. OAKAR, Mrs. BOGGS, Mr. DE LA GARZA, Mr. LIPINSKI, Mrs. LLOYD, Mr. SIKORSKI, Mr. FOLEY, Mr. NEAL, Mr. BONIOR of Michigan, Mr. CHAPPELL, Mr. YATRON, and Mr. SAVAGE.

H.J. Res. 364: Mr. PURSELL.

H.J. Res. 421: Mr. FISH, Mr. PACKARD, and Mr. BADHAM.

H.J. Res. 439: Mr. PEPPER, Mr. HUBBARD, Mr. MURPHY, Mr. BRUCE, Mr. FASCELL, Mr. SHUMWAY, Mr. ROSE, Mr. BREAUX, and Mr. HAYES.

H.J. Res. 462: Mr. SOLARZ, Mr. MANTON, Mr. SAVAGE, Mr. MRAZEK, Mr. ORTIZ, Mr. ADDABBO, Mr. MOORHEAD, Mr. MOAKLEY, Mr. SCHUMER, Mr. ROSE, Mr. LUNDINE, Mr. MORRISON of Connecticut, Mr. BONIOR of Michigan, Mrs. KENNELLY, and Mrs. COLLINS.

H.J. Res. 468: Mr. KLECZKA, Mr. THOMAS of Georgia, Mr. FOWLER, Mr. GINGRICH, Mr. BARNARD, Mr. JENKINS, Mr. BROYHILL, and Mr. DUNCAN.

H.J. Res. 470: Mr. DWYER of New Jersey, Mr. ROE, Mr. MORRISON of Connecticut, Mr. FUSTER, Mr. BEVILL, Mr. BARNES, Mr. VENTO, Mr. YOUNG of Missouri, Mr. BERMAN, and Mr. BROWN of California.

H. Con. Res. 15: Mr. BERMAN.

H. Con. Res. 24: Mr. EDGAR.

H. Con. Res. 156: Mr. WEISS, Mr. LUNGREN, Mr. EMERSON, Mr. LEVIN of Michigan, Mr. DIOGUARDI, Mr. BEREUTER, Mr. REID, Mr. LEVINE of California, Mr. HUGHES, and Mr. GINGRICH.

H. Res. 165: Mr. BUSTAMANTE, Mrs. LLOYD, and Mr. PURSELL.

H. Res. 346: Mrs. BURTON of California, Mr. ANNUNZIO, Mr. RINALDO, Mr. SMITH of Florida, Mr. BLILEY, Mr. FORD of Michigan, Mr. WILSON, Mr. SABO, Mr. ERDREICH, Mr. DIOGUARDI, Mr. SCHUMER, Mr. LAGOMARSINO, Mr. DE LUGO, Mr. MATSUI, Mr. PARRIS, Mr. FAUNTROY, and Mr. GILMAN.

H. Res. 347: Mrs. BENTLEY, Mr. SENSENBRENNER, Mr. LAGOMARSINO, Mr. JEFFORDS, and Mr. PARRIS.

DELETIONS OF SPONSORS FROM PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, sponsors were deleted from public bills and resolutions as follows:

H.R. 2451: Mr. SHAW.

SENATE—*Thursday, December 19, 1985*

(Legislative day of Monday, December 9, 1985)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Father in Heaven, we rejoice with Alan Frumin, our assistant parliamentarian, and his wife, Jill, on the birth of their little daughter last night.

Eternal Father, we have been here too long. There is a limit to what mind and body and emotion can bear—a point beyond which issues become unclear, thinking ambivalent, decision equivocal. You know, Lord, how the leadership has been tested, Members pressed and the conferees exhausted. Renew them for this day's business that what is necessary may be done and they may go home to their families.

Gracious God, family holiday plans have been hostage to tentative and uncertain agendas. Spouses and children have a right to the time and attention of the Senators. Mitigate the disappointments suffered and crown with extraordinary pleasure family togetherness in this holiday period. Protect those who travel that they may go and come in safety that these next weeks will be filled with reconciliation and love and the realization of some family dreams. In Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished majority leader is recognized.

SCHEDULE

Mr. DOLE. Mr. President, I share the views expressed by the Chaplain. We have been here too long but we may be here a while longer, hopefully not beyond today. We still have the continuing resolution and reconciliation. Then there will be some extensions on some of the expiring provisions that we will have to act upon. I do not think we will act on the big list that the House shipped over last night. Most of those can be done next year without any impact on anyone.

Mr. President, I suggest that at 11:30 we could either agree or not agree on what we might take up today by unanimous consent. I would like to take up the Angola resolution, but I understand it will be objected to. In any event, I am going to make the unanimous-consent request at 11:30.

There are nominations on the Executive Calendar. The Senator from Georgia, Senator MATTINGLY, would like to discuss that. On Mr. Scanlon, I would hope we could confirm his nomination today.

There are some of these matters that I thought we might as well bring up early. If they are not going to happen, they are not going to happen, so we can forget about that the remainder of the day and devote our time to matters such as the continuing resolution and reconciliation.

Senator DANFORTH would like to move ahead on the telecommunications.

(Mr. SYMMS assumed the chair.)

Mr. HOLLINGS. Mr. President, will the majority leader yield at this point?

Mr. DOLE. I know you are going to object to that, but we will do that at 11:30.

Mr. HOLLINGS. I am not going to object, but I have another little amendment on textiles.

Mr. DOLE. We have already done that once.

On low-level nuclear waste, as I understand, the principals are in agreement but Senator BOREN has now changed his mind on what he previously agreed to as far as campaign financing is concerned. He may want to object to the consideration of those matters.

Mr. President, I think it should be noted that yesterday I received a letter from Kansas Gov. John Carlin, the immediate past chairman of the National Governors' Association, asking, on behalf of all the States, that the Low-Level Waste Policy Act amendments and the regional compacts be adopted this session. I ask unanimous consent that the letter be printed in the CONGRESSIONAL RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL GOVERNORS' ASSOCIATION,
December 18, 1985.

Hon. ROBERT J. DOLE,
Senate Majority Leader,
U.S. Senate, Washington, DC.

DEAR SENATOR DOLE: I am writing to you as the Governor of Kansas and the immediate past chairman of the National Governors' Association to urge Congress to pass the Low Level Waste Policy Amendments Act and the regional compacts before the close of business this session. I cannot overemphasize the importance which states attach to this measure. Positive action by Congress will avoid a potential low level waste disposal crisis in January and will permit the states to continue to develop new low level waste disposal facilities.

In 1980, with the support of the states, Congress passed the Low Level Waste Policy Act. Since then, forty states have adopted compact legislation, and seven compacts are pending before Congress. Anticipating the need for a transition period to allow for the construction of new facilities, states have for the past three years negotiated with generators, federal agencies, environmentalists and congressional staff to create legislation which balances the interests of sited and unsited regions and which contains a series of tough but achievable milestones designed to provide regional disposal self-sufficiency by 1993.

These goals are embodied in the legislation reported out by the Senate Environment Committee, S. 1578, as well as in H.R. 1083, the legislation adopted on December 9 by the House of Representatives by a vote of 378–0.

States are uniformly supportive of the major elements of these bills. This is evidenced by the policy adopted unanimously by NGA last summer and the numerous letters signed subsequently by individual Governors representing states of various regions and political affiliations. We anticipate that if a Senate vote can be scheduled, a margin of approval similar to that in the House will result. States are proud of their achievements to date. Five years ago, they voluntarily shouldered a difficult national environmental problem and established an institutional framework for resolving it. The legislation currently before Congress will allow us to complete this task.

On behalf of all states, I ask that the Low Level Waste Policy Act Amendments be adopted this session.

Sincerely,

GOV. JOHN CARLIN.

Mr. DOLE. Mr. President, I thought it best to do it all at 11:30 because Members have other things to do. We can sort of settle that then.

Mr. MOYNIHAN. Will the majority leader yield for a question in the way of a statement?

Mr. DOLE. Yes.

Mr. MOYNIHAN. I was talking to our eminent President pro tempore yesterday and asked him to speak to our friend the distinguished Senator from Idaho, who happens to be in the chair at the moment, about his willingness to let certain legislation come forward. The Senator explained that he could not do it. Could the distinguished majority leader give us some hope that we might get to this matter early in the coming year?

Mr. DOLE. Mr. President, I support the legislation the Senator is referring to. My own view is that it should have

been done by unanimous consent. The tax amendment obviously would be blue-slipped. But, yes, we will take it up early next year.

Mr. MOYNIHAN. I thank the Senator.

Mr. DOLE. Mr. President, I want to yield 5 minutes of my leader time to the Senator from Wyoming, Senator WALLOP.

Mr. METZENBAUM. Mr. President, before the Senator does that, if he will yield for another question, it is my understanding he has mentioned several measures that he might bring up. I wonder whether the leader, in view of past commitments and the record made by this Congress last year, would make an effort to move the Genocide Treaty which we have been talking about but have never agreed to bring up.

Mr. DOLE. I support the convention. I want to bring it up. We went through an exercise about 10 days ago with a number of items, including Conrail which the Senator from Ohio objected to taking up, as did others.

Mr. METZENBAUM. I never had a chance to get to it, there were so many objections.

Mr. DOLE. There was a small crowd—four.

In any event, I would not be opposed to that, but I know what will happen.

I hope this is our last day. I do not really believe we are going to get into anything that is going to take a lot of time.

Mr. METZENBAUM. Let me ask one other question. This body and the House have made it unequivocally clear that we are in favor of terminating the actions of the Synthetic Fuels Corporation.

In the continuing resolution, we provided that the Synthetic Fuels Corporation could take no action until 12 o'clock meridian time. I do not know whether that is 12 o'clock noon or 12 o'clock midnight.

I have just been informed that the White House has indicated that there will be a press conference at noon at which they will indicate that they are prepared to direct the Synthetic Fuels Corporation to expend $684 million which, in turn, picks up another $300 million, which will be almost $1 billion, notwithstanding the overwhelming indication by Congress that we do not believe any further expenditures should be made.

I know $1 billion is not much money around here. It gets to be that way, as Everett Dirsken said. But the fact is, would the leader be willing to consider our passing a resolution before 12 o'clock noon extending the bar on that expenditure of funds which we did in the continuing resolution until such time as the full continuing resolution is enacted into law?

As the Senator well knows, the full continuing resolution does have that bar in it. The short continuing resolution does have that bar in it. What the White House is doing is being a party to finding a window for two projects on the basis that the parties have invested so much of their own funds. In one of them, they invested less than $20 million, in the other they have invested a substantial amount. I think congressional will should not be thwarted and I believe that Congress should keep this from occurring during this so-called window.

Mr. DOLE. I shall be happy to consult with the chairman of the Committee on Apprpriations. Again, I doubt that if we had one drafted, it could be passed by noon. I assume there would be people on the other side who would like to be heard on this resolution.

Mr. METZENBAUM. Mr. President, we will——

Mr. DOLE. I am opposed to synthetic fuels, voted against it. I know several have some genuine concern about a couple of projects. I was not a party to those negotiations.

Mr. METZENBAUM. I appreciate that, Mr. President. If there were a resolution passed here, I think the House would pass it immediately thereafter. The House has indicated by tremendous votes, like 312 to 30, their strong feeling on the subject. I would consult with them. I just learned about it but I want at least to advise the leader that I might try to bring something of that kind to the floor.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. Under the previous order, the Democratic leader is recognized.

THANKS TO THOSE WHO MAKE THE SENATE RUN

Mr. BYRD. Mr. President, as the first session of the 99th Congress comes to a close, I take this moment to express my appreciation, and I think the appreciation of all Members on our side of the aisle, to the many able and dedicated staff members who make such an important contribution to the work of the Senate.

I begin by expressing my appreciation to the Senate Democratic floor staff—Abby Saffold, Charles Kinney, and Marty Paone—who are well known to every Member of this body. Theirs are among the most demanding and difficult jobs in the Senate. Yet, they discharge their responsibilities with unfailing courtesy, patience, and good humor.

I also thank Elizabeth Baldwin, who directs scheduling for the majority party. She is as dedicated and careful with respect to detail as is the Democratic floor staff. She, likewise, is extremely competent and understands the needs of the Members on her side of the aisle. She treats the Members on our side with equal courtesy.

I compliment David Pratt, the secretary to the minority, and his fine assistants—Dianne Davies, Sue Spatz, and Betty Lou Sisson. David performs his many duties with distinction and ability. I am sure that all of my colleagues join me in expressing our thanks to him for the many services he has rendered to the Democratic conference and to the Senate.

I also express appreciation for the fine work of Patrick Hynes, deputy secretary to the minority, and the young men in the Democratic cloakroom—Robert Bean, William Norton, and Joseph Hart. The Senate is a better place for their unstinting and capable efforts in our behalf.

The pages are fine young people and they do everything they can do to assist Members in the operation and actions of the Senate. We appreciate their services.

I compliment and thank Ms. Jo-Anne Coe, the Secretary of the Senate, and her staff. Hers is a demanding job, but she carries it out ably.

I commend the work of Howard Greene, secretary to the majority; John Tuck, assistant secretary; and Rod Dearment, chief of staff, and Sheila Burke, deputy chief of staff, for the majority leader, all of whom perform their duties so capably.

I thank my good friend Dr. Halverson, the Senate Chaplain, for his unfailing support, kindness, and good spirit.

I am grateful to Ernest Garcia, Sergeant At Arms, whose office so ably assists us all, and to Jeanine Drysdale-Lowe, executive assistant to the Sergeant At Arms, who represents the minority in that office. The Sergeant's Office provides for the security which is, regrettably, continually a greater necessity in this dangerous world. I want to especially thank Jeanine who looks out for the interests of the Members on this side of the aisle so ably and so loyally.

I reserve a special word of commendation and appreciation for the excellent work of my executive director in the Democratic leader's office, Mrs. Barbara Videnieks. She works closely with me, with the policy staff, and with my State office staff every day, and has demonstrated outstanding ability and dedication. She is ably assisted by Patty Kirschner, Gigi Deslongchamps, and Becki Roberts.

I express my appreciation for the work of Scott Bunton, staff director of the Democratic policy committee in the Senate. I thank, also, his capable assistants, Jerri Davis and Alice Aughtry. Through their competence and dedication, they make a major

contribution to the smooth running of the Democratic policy committee.

I thank Dick D'Amato, deputy director of the policy committee for defense and foreign policy, and Tom Sliter, deputy director for domestic policy, as well as the outstanding issues staff in their offices who have given unstintingly of themselves to the work of this body.

Linda Peek is the very capable director of communications on the policy staff. Linda's daily assistance to me and other Democratic Senators in conducting our relations with the news media is deeply appreciated, as are the efforts of her fine staff.

One of the most important tasks of the policy committee is to keep the Members on our side of the aisle supplied with information on the Senate's work through our legislative bulletins, special reports, vote compilations, and other committee publications. The staff members who perform this vital and demanding task, which they do excellently and diligently, are ably led by the committee's chief clerk, Elizabeth Shotwell.

My representative on the Judiciary Committee staff, Mike Epstein, works closely with me and with the policy committee staff. I value his able counsel.

I would be remiss if I did not thank the Senate Parliamentarian Bob Dove, and his assistants, Alan Frumin and Gail Cowper. Bob's knowledge and expertise—and that of his staff—and the assistance they offer to Senators and their staffs in dealing with the complex rules and precedents of the Senate are much appreciated.

I compliment the work of the official reporters of debates—Mr. Russell Walker, the editor in chief, and Mrs. Jeanie Bowles, the assistant editor, and their fine staff. Their highly specialized work helps keep the Senate running. They often work late into the night, long after the Senate has gone home, preparing the CONGRESSIONAL RECORD for printing. I thank all the official reporters of debates for their dedication and patience: William Mohr, Charles Reynolds, Frances Garro, Frank Smonskey, Ronald Kavulick, Jerald Linnell, and Raleigh Milton. I also thank the assistants to the official reporters, Mark Lacovara and Scott Sanborn.

I commend all the members of the Secretary of the Senate's staff and office and those who work at the desk—William Farmer, legislative clerk; Scott Bates, assistant legislative clerk; Vincent Del Balzo, bill clerk; Jim Thorndike, journal clerk; and William Lackey, assistant journal clerk. They are all extremely helpful and cooperative.

There are many hundreds of other people who help make the Senate run. I thank the many others whose efforts all too often go unsung: There is our Capitol physician, Dr. Cary, and his staff; the many members of the staffs of the Secretary of the Senate and the Sergeant At Arms; the doormen; the Capitol Police; the restaurant workers; the maintenance staff; the staff of the Senate reception room, and all the many, many others who contribute to the work of the Senate.

I also thank those in the Senate press galleries who follow our efforts and help to keep us accountable to our constituents.

I thank all of these fine people for their tireless efforts in our behalf and in behalf of the Nation.

Mr. President, I know that I cannot mention every person by name. But in closing, I express the hope that all who have a part in this great forum and its operation will have a restful and enjoyable holiday, and can enjoy the opportunity to prepare and be ready for the coming year, which undoubtedly will be as strenuous for Members and staff alike as this one has been.

THE ANGOLA RESOLUTION

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. WALLOP. Mr. President, apparently, we will not even see an expression of support for Jonas Savimbi's brave fight, even through a sense of the Senate resolution.

Mr. President, the sense of the Senate resolution on Angola provided aid only to those who put real aid for Jonas Savimbi further down their list of priorities than the convenience of the Senate. While I welcomed Senate consideration of the resolution, no resolution can be used to excuse Senate failure to take concrete steps to assist the democratic freedom fighters of Angola. Their needs are arms, not words.

Those here who have been unwilling to face the truth of what has been happening in Angola and to take meaningful steps to defend United States interests there cannot and should not leave these Chambers with a clear conscience. I hope it is clear to the American people that a resolution is only words, not action, and what Savimbi and his men face are actions—brutal actions, not words. And we cannot even have that.

Mr. President, the urgency of the crisis in Angola is of such seriousness and proportions that no resolution, no matter how strong, can substitute for action. The stark truth is that the Soviet Union and its Marxist allies—Cuba, Mozambique, and North Korea—are assisting pro-Soviet groups in Angola, Zimbabwe, Ethiopia, Madagascar, Namibia, and Tanzania to try to turn Africa into a continent totally dominated by and controlled through Soviet power. This is absolutely consistent with Gorbachev's published ideology that there can be only one winner in the struggle between the West and the Marxist systems and that the Marxists will prevail.

In the case of Africa today, however, he seems also to subscribe to the theory that might makes right and that power will win because the West totally lacks the courage, the will, the foresight or the determination to draw the line or to take any action whatsoever in this Angolan crisis and the Senate epitomizes that.

Here, while we debate even whether or not to have resolutions that are not promises, the Soviets are on the march in southern Africa to advance their foreign policy goal of taking charge of Africa militarily as well as politically and psychologically. The Soviet Union wants military bases on the African continent to use as platforms for its armies, navies, and intelligence services for deployment in Africa, Central America, and the international sealanes of the South Atlantic and the Indian Ocean.

The U.S.S.R. will then use these bases, not only against Africans, but also against the strategic and political interests of the entire free world. World domination is the name of this incredible and dangerous game—but we dawdle with parliamentary feats of conscience-salving.

Mark my words that the purpose of the Soviet Union in Angola today is one thing and one thing alone. That is to moot the issue in advance of the coming summit next year. We were unable to get Gorbachev's attention on this matter during the summit, he having successfully focused our and the world's eyes on arms control.

How can we and our allies in the West be fooled into thinking otherwise? Our inaction, inattention and short-sightedness is counted upon by the Soviet policy planners. They think that all we care about is racial problems in Africa and that we cannot think of that continent in the global-strategic terms they do. And, unfortunately, they may have assessed many democratic nations correctly.

The Soviet Union has been preparing its Africa offensive carefully and deliberately for some time. These efforts have intensified since last fall at the very time when the U.S.S.R. was lulling the west into a false and foolhardy sense of security by concentrating our attention on the Geneva summit. At that meeting, as well as during the elaborate preparations for it, the Kremlin skillfully manipulated the agenda to focus on arms control, something they know the West wants. They artfully dodged the tough regional questions at the summit, which remained, as they wished, on the margins of that meeting. They know the old truism that American governments can focus on only a few front-page

issues at a time. And now mark my words, by the time of the next summit, they intend to have the point moot by full control over Angola.

Mr. President, I must ask why the vast foreign and national security policy establishments of the United States and its allies can be so blind to the advancement of Soviet military power in Africa? Why have our policy planners not thought through the strategic consequences for Africans and for the interests of the West of Soviet domination of that part of the world? Why have Mr. Crocker and the African specialists in the White House, National Security Council, State Department, Pentagon, and at NATO not looked at where Africa is headed and made plans to protect our interests there? Have we learned nothing at all from our experiences in confronting Soviet power from Berlin to Afghanistan?

We know that the Soviet Union has systematically wooed, trained, or indoctrinated the military leaders of numbers of African states. These military leaders are traveling to Moscow on a virtual commuter basis. But worse, the Soviets have now sent hundreds of highly trained specialists to command the military units fighting in Angola against Dr. Jonas Savimbi and his UNITA forces. The level of sophistication of the current Soviet-Cuban offensive in Angola testifies to the statement made on November 8, 1985, in the Soviet military publication, Krasnya Zvezda as follows:

> The Soviet Union, Cuba, and other socialist countries, loyal to their international duty, are rendering Angola assistance in strengthening its national army and defending the sovereignty and territorial integrity of the country.

By the destruction of UNITA in Angola, the Soviets plan to gain access to naval and air bases in expected theaters of military operations. They are building up air defense weapons systems there and advanced C31 capabilities. Their radars and SAMS are better there than anything the Republic of South Africa has. There has been a massive Soviet airlift from the U.S.S.R. to Angola to support the Marxist MPLA. Soviet AN-22 transports, usually employed only within the U.S.S.R., have been sent to Angola.

This buildup suggests that the Soviet Union and Cuba fully intend to wipe out UNITA, the only democratic resistance force in Angola, as a prelude to enhancing their ability to conduct strategic military operations in the South Atlantic and the Indian Ocean. Meanwhile, back at the ranch, the Senate shrinks from resolve and the State Department negotiates without tools and, worse yet, without goals.

The Soviets have used Cubans in the Angola situation to divert the West from seeing through the heart of Soviet intentions there. The Cubans are Soviet proxies and are fighting their proxy war in southern Africa. From a global-strategic standpoint, this presents a serious challenge to United States and Western interests in the world and to our ability to defend those interests on the African continent and in important international sea lanes. I must note, Mr. President, my extreme disappointment at United States inaction in the Angola crisis. When we all seem to agree, as we have by Senate consideration of this Angola resolution, that the situation demands our support of UNITA, why are we unable to supply anything but words to Dr. Savimbi and his brave UNITA forces?

Mr. President, we should not go home for the Christmas holidays with any sense of comfort that we have done our best to prevent the advancement of Soviet power in southern Africa. We must know from past history that the Soviets and their proxies often mount offensives to advance their power at Christmastime, when they know we will be distracted by other things. Remember, they marched into Afghanistan right at Christmas 6 years ago, counting upon the inability of the West to react. They murdered our Ambassador while we caroled.

If the Senate of the United States continues its inaction in the Angola crisis into January and February, we will have betrayed Jonas Savimbi, UNITA, and the interests of the free world in Africa. I understand that at this very moment, the fighting in Angola is intensifying and many are dying. News from the 30 military region says that MPLA units have killed 17 UNITA forces and captured their ammunition. In light of this, it is the ultimate sophistry for us to go home to our Christmas dinners without even having considered the Angola resolution and feel comfortable for having done something. May we at least have the decency to view this as a commitment to action and not just a trip to the confessional.

I ask unanimous consent that an article for the forthcoming policy review by Jonas Savimbi, entitled "The War Against Soviet Colonialism—The Strategy and Tactics of Anti-Communist Resistance," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WAR AGAINST SOVIET COLONIALISM—THE STRATEGY AND TACTICS OF ANTI-COMMUNIST RESISTANCE

(By Jonas Savimbi)

The age of European imperialism ended in 1975, when a military coup in Portugal led to independence for Angola, Mozambique, and Guinea-Bissau. Portugal had been the last European power to maintain sizeable colonies overseas. Now that it was relinquishing its empire, the struggles for national liberation that swept Africa and Asia during the 1950s and 1960s finally appeared to be over. The former British, French, Dutch, Belgian, Italian, and Portuguese colonies could now develop themselves free of imperial exploitation. The people of Asia, Africa, and Latin America could live at peace, for the anit-colonial guerrilla wars had at long last been won.

But this dream of peace and national self-determination could not yet be achieved. In country after country, struggles for national liberation were betrayed and hijacked, and new nations found themselves once again the victims of colonialism. The time they were assaulted by a new imperial power: the Soviet Union, acting directly or through its first overseas colony, Cuba. And so the nationalist struggles had to begin anew. People tired of years of war and sacrifice were once again turned into soldiers; their nations became battlefields once more.

For eight years, the independence movement that I founded and lead, UNITA (the National Union for the Total Independence of Angola), fought against Portuguese colonial rule. We expected to win the free elections that had been promised by the Portuguese in 1975, for we had strength in all Angola's tribes as well as overwhelming support among the Ovimbundu tribe, which accounts for 40 percent of the nation's population. By contrast, the other non-Communist independence group, the F.N.L.A. (Angolan National Liberations Front), was supported exclusively by the Bakongo people of northern Angola. And the Moscow-controlled M.P.L.A. (Popular Liberation Movement of Angola) was supported only by urban leftists and portion of the Mbundu people living near the capital city of Luanda.

But suddenly in 1975, Luanda was seized by the Soviet-controlled M.P.L.A. and hundreds and then thousands of Cuban troops. Elections were called off, and Angola was recolonized. Today our land is occupied by 45,000 Cuban troops and colonial bureaucrats (at least 17,000 of whom have taken Angolan citizenship), as well as by thousands of East Germans, Poles, Czechs, and North Koreans. The Soviets have sent $2.5 billion in arms to maintain their imperialist rule.

And so for 10 years more, UNITA has had to continue its guerrilla war—this time against the Cubans and Soviets who have replaced the Portuguese as the foreign rulers and exploiters of our people and land. Today the peoples of Afghanistan, Cambodia, Laos, Nicaragua, Ethiopia, and Mozambique are also waging wars of liberation against foreign troops and foreign secret police and the imposition of a foreign ideology on their nation. They are resisting tyrannical regimes that are kept in power only by the imperialist military force of the Soviet bloc.

This is a historic reversal of roles. For many decades, Communism was identified with nationalism in the Third World, and many Communist parties came to power playing on the nationalist sentiments of the people. But the experience of countries ranging from Afghanistan to Laos to Angola to Nicaragua shows clearly that Marxist-Leninist regimes have no respect for the traditions of a people or for the tribal customs and languages that strengthen a sense of community and of continuity with the past. True nationalists around the world are therefore rejecting the Marxist-Leninist path and taking up arms against regimes that impose this failed ideology.

The spread of anti-Communist revolutions is a historic reversal in yet another sense. Until recently, the language of revolution was written entirely by Communists. From Mao to Che Guevara to General Giap, the greatest theoreticians, practitioners, martyrs, and heroes of revolution were Communists. They wrote the texts and histories; they produced the weapons of guerrilla war. It was to the Soviet Union, China, and Cuba that would-be guerrillas turned for money, arms, training, and political support.

I know, because I received my revolutionary education in China. In 1965, as I was preparing to found UNITA, I met Hua Hua, the Chinese ambassador to Nasser's Egypt. He invited me to Peking, where I met Mao Tse-tung and the other military and political leaders of the Chinese revolution. They advised me to return with 12 recruits, and late in 1965 we began a nine-month course in guerrilla warfare.

From Mao and the Communists, I learned how to fight and win a guerrilla war. I also learned how not to run an economy or a nation. Collectivist agriculture does not work. Peasants must be able to own their own land, their own houses, and their own cattle. People must be free to practice their religions, and observe their tribal traditions.

LESSONS FROM CHAIRMAN MAO

Today we who fight for these freedoms are using the strategy and tactics of guerrilla warfare developed by the Communists. But we are using Communist military and propaganda principles in order to defeat the Soviets and their political ideology. UNITA is now in the third phase of Mao Tse-tung's classic description of a successful guerrilla war: we are waging widespread guerrilla conflict throughout our country. Our forces control one-third of the territory of Angola, and protect under our political influence some 60 percent of the 7 million Angolan people. Soon we shall liberate all Angola and bring peace, freedom, and true independence to all the Angolan people. We are achieving victory by following the five central principles of guerrilla warfare.

The first principle comes from Mao: a guerrilla must be one with the people. It is more important to win the support of the people in the countryside than to take and hold cities. In Angola, as in China, the great mass of the people are peasants living in small villages. Our first goal had to be to win their allegiance and confidence. Without the support of the people, our roads would be mined with informers. With it, we have an intelligence network alerting us to enemy troop movements out of the cities, and we do not need to carry all our food and supplies with us—critical to a guerrilla movement that has to travel thousands of kilometers by foot and possesses neither trucks nor access to rail travel.

When the people come to trust and support a guerrilla movement, they willingly share what they can. The guerrilla must therefore have strict discipline. To take food from villagers, to steal their land, to mistreat the people is to poison the waters in which the guerrilla army must swim. It is treason to the movement and is punished as such.

To gain the trust and support of the people, it is also important to establish schools and hospitals throughout liberated territory—if possible, even in areas where guerrillas operate but do not control. Today UNITA administers 6,951 primary schools with 7,127 teachers and 224,811 students. We run nine secondary schools with 80 teachers and 1,860 students. Though the main hospital in Jamba, our provisional capital, has only three doctors, the French medical group Medecins sans Frontieres has sent doctors and nurses to Angola to train our people and help administer inoculation programs. Every battalion has men assigned to treat and evacuate our wounded.

The second key to the success of a revolutionary movement is a clear political program. Soldiers cannot fight and the civilian population cannot endure the hardships of war unless the political program meets their daily concerns and is understood. We have political officers in every guerrilla unit and every village. The political program of UNITA is simple and clear. We fight for an independent Angola, free of all foreign troops. We believe that peasants, not the state, should own farm land. We favor democratic elections, freedom of religion, and respect for tribal customs and languages. We broadcast daily from a mobile radio station in Portuguese and local languages so that all Angolans know why we fight and what our goals are. The United States lost its war in Vietnam when the American people no longer understood why their sons were dying. No revolution or war can succeed unless the soldiers and their families know why they are fighting.

Unity is a third vital point in the success of any guerrilla movement. Guerrillas can only win if their military and political and propaganda efforts are all working in the same direction. Fidel Castro makes unity of command a precondition for Cuban support of guerrilla movements. We saw this in his insistence on a popular front in the struggle against Somoza in Nicaragua. Castro also insisted on unity among the guerrillas in El Salvador, withholding arms and even engineering a "suicide" or two to force the guerrillas to come together under a common command. Some anti-Communist freedom fighters have unfortunately hurt their effectiveness by a lack of coordination between guerrilla forces.

Fourth, it is essential that the guerrilla base of operations be within the territory of your own nation. This is to ensure self-reliance, as well as closeness to your own people. Another Angolan guerrilla group, the F.N.L.A., was based in Zaire, and lost its base of operations when Zaire established relations with the M.P.L.A. UNITA had bases briefly in Zambia, but we were expelled after we sabotaged the Benguela railroad through occupied Angola, over which Zambian copper is exported. Never again will we rely on bases on foreign soil.

The Afghan freedom fighters are constantly threatened with losing their bases in Pakistan should Soviet pressure on President Zia increase. The Nicaraguan resistance will face similar problems, should Costa Rica or Honduras be pressured sufficiently by the Sandinistas or the Cubans or the Soviets. By contrast, a base within Angola—we now control a third of the land—allows our guerrillas a safe haven to rest. It gives us a place to train new recruits and it provides safety for the families of our fighters. UNITA was able to survive and grow, even during years without international support, because we were self-reliant. We could grow our own food, repair weapons we captured, and strengthen our ties with the people.

The fifth challenge is to establish international political ties—to find allies who will give military, political, and propaganda support. Too often the West thinks only in terms of military support. But political support and international propaganda are just as important, as I learned from General Giap of North Vietnam when I met him in China. He said that the world must know why a guerrilla movement is fighting. A revolutionary movement's supporters around the world must know its successes.

The world must not be fooled into thinking that the M.P.L.A. truly represents the Angolan people or that it has control of the nation. That is why UNITA has representatives in Washington, London, Paris, Munich, Geneva, Portugal, Morocco, and Senegal. It is why we regularly invite members of the international press to come to our capital to see our successes, and to interview our prisoners so they may know about the demoralization of the Cubans and the M.P.L.A. Some reporters have travelled with our guerrilla forces and can report to the world the truth of our claims to travel freely throughout Angola, enjoying popular support and winning victories against the supposedly invincible Cuban forces.

At first it was difficult to get the world's attention. Anti-Soviet resistance movement were supposed to be doomed. The West has not yet learned that truly nationalistic movements can use the guerrilla tactics of Mao and Fidel Castro successfully against the Soviets. Some of our first propaganda victories came when we captured Western technicians who worked in the diamond mines on behalf of the Cubans and the M.P.L.A. Finally the West was forced to realize that UNITA was not limited, as is so often said, to the southeast corner of Angola. Governments that refused to recognize us had to come and negotiate for the release of their nationals. And prisoners who were treated well and safely transported thousands of kilometers to our base camps could report to the world that we were not bandits and that we moved freely through most of Angola. Now it is unnecessary to prove these points and we do not take Westerners when we overrun mines and power stations. But we try to warn Westerners that the Cubans and M.P.L.A. cannot guarantee their safety, and we ask them to stay out of all Angola, for it is a war zone.

GUERRILLA STRATEGY

The goals of UNITA are clear and open for the world to see. We will drive the Cubans and Soviets and Eastern-bloc personnel from Angola. We will work with all patriotic Angolans to establish an independent, democratic, and free Angola. We reject foreign ideologies that presuppose masses of industrial workers and men without souls.

Our strategy is to raise the costs of the foreign occupation of Angola until the Cubans and Soviets can no longer bear the burden. A combination of rising military, financial, and political costs will finally drive the imperialist forces from our shores. The French gave independence to Haiti, the first black republic, when Napoleon could no longer afford the financial costs of keeping the country enslaved. He had other uses for those resources. The United States won its revolution when the cost in lives and materiel led to divisions among the British about whether to continue the war. Similarly, America left Vietnam as the result of rising political costs at home. America was never defeated on the battlefield in Vietnam; in fact, the North Vietnamese strategist, General Giap, told me he never expected to defeat the American in battle. The guerrilla does not have to win decisively to drive out the foreign occupiers of his land. He simply has to raise the price of colonialism.

A central element of this strategy is to deny the colonial forces the revenues that finance their occupation. Today the Soviets and Cubans exploit Angola with a rapacity unrivalled by the Portuguese. Soviet fishing fleets have swept our coastlines, and fish has disappeared from the Angolan diet. Our diamonds, minerals, and oil from the Cabinda province are taken in Committee "payment" for arms and for support of the Cuban troops. The M.P.L.A. government pays Castro $1,000 per month for each Cuban soldier in Angola, for a total of $480 million per year. These mercenaries can afford to stay in our nation only as long as they are paid. So UNITA attacks the diamond mines, sabotages the bridges, and destroys the industries that support the Cuban occupation. This policy does not harm our brothers in occupied Angola, for the wealth produced there does not go to them. It is taken by the Cubans and Soviets to pay for their repression here and to finance Cuban expeditions in other nations.

When enough Cuban officers are returned to Cuba in coffins, then Castro must face the wrath of his own people. Already we learn from Cuban prisoners of war that the war in Angola is unpopular in Cuba. The United States can help our cause by bringing the truth to the Cuban people on Radio Marti and Voice of America, and thus weakening Castro's already endangered rule.

Our military strategy is designed to inflict casualties on Castro's troops and not, when possible, on the M.P.L.A. Some true Angolan nationalists have been forced by the Cubans to fight with the M.P.L.A. Not all German officers in World War II were crazed Nazis, so too in the M.P.L.A. there are Rommels and Von Stauffenbergs, nationalists who oppose the Cuban occupation. These kidnapped warriors are our brothers, and our goal is to treat them well when we capture them. Many M.P.L.A. prisoners now fight with UNITA. Every UNITA victory strengthens the hand of the nationalists with the M.P.L.A., and hastens the day when they will join with us in driving out the Cubans and Soviets.

COMMUNIST STRENGTHS

UNITA's guerrilla war against the Portuguese colonialists was much easier than our struggle against the Soviets and Cubans. The Portuguese were perhaps better infantrymen than the Cubans, but by comparison with Angola's new colonialists, they suffered in both the quality and quantity of arms. The Portuguese used little armor and had no more than five helicopters, whereas the Cubans and Soviets will send 15 helicopters to a single battle. The Soviet Union may not be able to feed its people or build advanced computers, but it knows how to build weapons (in fact, UNITA fighters rely on the AK-47 Kalashnikov, a low-cost automatic rifle that withstands dust and water better than anything the United States offers at comparable prices). The Soviets also deliver arms in large quantities; in Angola during the last 18 months, they have unloaded $2 billion worth of MIG 23 and MIG 21 jets, MI-25 helicopter gunships (the weapon used so effectively against the Afghan people), and T-62 and T-55 tanks, as well as trucks and armored personnel carriers.

Relative to the Soviets and Cubans, the Portuguese were as weak politically as they were militarily. They put almost no emphasis on the political side of waging war, and they had no international support. By contrast, the M.P.L.A. was winning endorsements and awards from Soviet-front groups long before it was a factor in the war against Portugal. Communist guerrillas and occupation forces benefit from an established worldwide propaganda network. And when the Cubans and Soviets seized power in Angola, sympathetic propaganda outlets immediately sprang into action in the Organization for African Unity, the United Nations, and front organizations around the world.

A third strength of the Communists in combatting nationalist resistance movements is their ability to black out news coverage with surprisingly little complaint from the West. Little television footage gets out of Cambodia or Afghanistan. And although UNITA works hard to bring Western journalists to Free Angola, the Cubans do not permit newspaper or television coverage of their atrocities in areas they control.

DEMOCRATIC V. MARXIST GUERRILLAS

In countering these important advantages of Soviet and Cuban colonialists, the anti-Communist freedom fighter has some distinctive advantages of his own. The first is the religious faith and institutions of his country's people.

Marxism-Leninism is atheistic and materialistic. By definition it attempts to crush religious belief, and Communist governments demand a monopoly on the people's loyalty. But in deeply religious countries such as Afghanistan and Nicaragua and Angola, the suppression of religion has backfired and intensified the opposition to colonial regimes. The Constitution of the M.P.L.A. forbids membership to anyone holding "any religious belief"; this is one reason why it is such a small political party, consisting of only 0.3 percent of the Angolan people. The majority of Angolans are animists, 27 percent are Catholics, and 12 percent are Protestants; all have suffered from persecution. Church property has been expropriated by the Cubans, atheism is constantly preached in hospitals, schools, and political meetings. The Cubans and Soviets taunt animists by flying to the sky with their helicopters and jets, and then telling the local population that they looked and found no God in the heavens. All this has resulted in strong opposition to the regime of occupied Angola. In August 1985, the Catholic Church of Angola endorsed UNITA's call for an end to the war and for a negotiated settlement.

The second weakness of the Communists is economic. The Soviets may provide enormous quantities of arms but they refuse economic aid. And while it is UNITA's goal to damage the export economy that finances the Cuban war against our people, the Soviets and Cubans are doing much of our work for us by nationalizing all industry and collectivizing agriculture. Around the world, Communist governments lower the standard of living, destroy chances to work, and impoverish the people in a way that guerrilla wars never do.

Once a food exporter, Angola now must import some 90 percent of its food. Diamond and gold mines that once made Angola a wealthy Portuguese colony are now actually losing money. Only the Communists could turn gold mining into a losing proposition. The economy is sustained, and the Cuban occupation is financed, only by the offshore oil produced by Gulf Oil, owned by Chevron, an American multinational corporation. Lenin said the capitalists would sell the rope with which to hang themselves. Today they are hanging the Angolan people. But tomorrow they come for you.

ON THE BATTLEFRONT

Between 1976 and the summer of 1985, UNITA was able to maintain its base securely, in spite of 10 major offensives launched against its territory by Cuban and M.P.L.A. troops. Usually we stopped these offensives within little more than a month—by going behind the lines and cutting off supplies of food, fuel, and ammunition to the advancing enemy.

The offensive of 1985, lasting from June until October, saw a change in tactics, weapons, and intensity. Prior to the offensive, the Soviet Union greatly increased both the quantity and the sophistication of weapons it was sending to Angola. And this time, the offensive was directly coordinated by Soviet officers, 15 to a brigade.

The first prong of the offensive was aimed at Cazombo, a town near the Angola-Zambia border. It appeared at first that the goal was political: to cut off UNITA's border with Zaire and Zambia, to increase the pressure on these two nations and prevent them from aiding UNITA. UNITA moved men and resources up to meet this advance and to defend Cazombo as we had successfully defended it before.

But the Soviet-Cuban strategy was a radical departure from past offensives. The Soviet, Cuban, and M.P.L.A. troops brought a much larger number of trucks and armored cars with them, and so they were able to carry much larger supplies of food, fuel, and ammunition. They were able to move faster and farther without leaving vulnerable supply lines in their wake.

For the first time, UNITA was forced to fight a conventional war, denied the ability to follow the guerrilla strategy of intercepting and cutting off supply lines. The occupation forces surrounded their "soft trucks" with armored trucks, so that we could not destroy their supplies, and then moved forward with armor in flanking moves attempting to surround our defensive positions.

Under Soviet commanders, MIG 21s and 23s and MI-25 helicopter gunships would arrive within 15 minutes of each engagement to provide air cover. Artillery shelling was also better coordinated and more accurate. It was a completely different war than we had fought in the offensives of 1982 through 1984. The Soviet troops always remained in armored cars and tanks, and their commanders stood behind three lines of M.P.L.A. and Cuban troops.

Throughout the offensive, the Soviets proved experts at using speed, maneuverability, and deception. On August 15, while the greater part of our commanders, resources, and troops were in Cazombo, 750 kilometers from Jamba, the Soviets unleashed what turned out to be the real thrust of their offensive—an assault on Mavinga, a town captured by UNITA in 1982 and located only 200 kilometers northwest of our capital. This was to be the final offensive of the war, with Jamba as its goal. For should the airport at Mavinga have been captured, the Soviets would have had a strong base from which to attack our capital.

The Soviets drove toward Mavinga with four M.P.L.A. brigades, each 1,300 men strong and fully equipped with armored personnel carriers, tanks, artillery, and air cover. Defending Mavinga, UNITA had only one regular battalion of 1,100 men and two semi-regular battalions of 600 men each. Fighting to slow the Soviet offensive, we had to call our troops back from Cazombo,

and we threw up deep defensive lines and dug in in front of the Soviet advance.

Forced to bring in units from throughout southern Angola, we surrounded the Soviet-Cuban M.P.L.A. offensive. We outnumbered their four battalions by four to one, and with mortar and infantry fire we destroyed many of their trucks, tanks, and armored cars. We halted the advance 17 kilometers northwest of Mavinga.

By October 3, the Soviet officers were airlifted out by helicopter. If we had enough anti-aircraft missiles, we could have destroyed the entire Soviet high command. But they escaped by air, and the M.P.L.A. retreated, after leaving behind many tanks, Stalin Organ rocket launchers, and armored personnel carriers.

The offensive of 1985 was to have been the Soviets' final drive against UNITA. They will not give up after their defeat. It is now the rainy season in Angola, but the Soviets will come again next March or April when the ground hardens and the skies clear for their MIGs and helicopters. The next offensive, like this one, will rely on heavy armor, tanks, concentrated artillery, and airpower. We look to the West for the anti-tank and anti-aircraft weapons that will allow us to stop the next attack, to continue to build our base among the people of Angola and move northward, to drive the Cubans and Soviets from Angola, and to win the true independence that was stolen from us 11 years ago.

SUPPORT FROM ABROAD

The Soviets and Cubans and their friends around the world can be expected to continue their political and propaganda war against UNITA. Our success in defeating the offensive of 1985 will force them to redirect some of their propaganda. No longer can they claim that UNITA is weak, that we do not represent the popular will of the Angolan people. Too many journalists have travelled with our guerrillas and can testify to our support in the countryside. We have engaged the Cubans in virtually every province, and our support comes from every region and tribe in Angola.

A new tactic is to claim that UNITA is tied to the South African government. The Cuban troops, say the Communist propagandists, are in Angola to protect Angola from the South Africans. This claim may fool some in the West, but the nations of black Africa know the truth. They know that Nigeria offered to replace the Cuban and Soviet bloc troops with Nigerian troops. But the M.P.L.A. leadership refused, showing the whole world that their real fear is not the South Africans but UNITA, the Angolan people, and the nationalists within the M.P.L.A.

Yes, UNITA receives aid from the Republic of South Africa. We have also received support from China, Arab nations, and other black African countries, and much of that support has been shipped across the Namibian border. But it is hypocritical of the Soviets to claim that this means we somehow endorse the Pretoria government. We oppose apartheid. Fortunately, it is a dead ideology. It cannot be exported. Even everyone in South Africa talks about how to move away from the apartheid system.

The Lord did not ask our permission when he put Angola on the southwest coast of Africa. We need outside help, even if it has to come across the Namibian border. I would remind the Communists that Stalin's acceptance of war material from America and Britain during World War II did not constitute an endorsement of liberal democracy on Stalin's part. Nor did my acceptance of Chinese military training and aid—when no other nation would help me—make me a Maoist in economics or politics.

AMERICAN OBLIGATIONS

Angola was the first nation to begin its guerrilla war against Soviet colonialism. But we are not alone. Today the brave peoples of Afghanistan, Cambodia, Laos, Nicaragua, and Ethiopia are fighting their own wars of national liberation. We fought and carried on while the West went through a crisis of faith, wondering if its traditions, values, and civilization were worth fighting and dying for. I think that the Third World, through these struggles, has helped to give the West the courage to oppose the Soviet Union—to provide a cure for what Solzhenitsyn calls the Western disease. Our struggle in Angola, the battle of other freedom fighters, is the battle for the West and its values.

We who fight these wars of national liberation see the unity of our cause and the common enemy we face—Soviet imperialism. As a result, representatives of the freedom fighters of Angola, Laos, Afghanistan, and Nicaragua met in Jamba on June 12, 1985 to sign the Jamba Accord and announce the formation of the Democratic International. We who fight the battle for Western values of democracy, freedom of religion, freedom of speech, the right to own one's home and some land, have joined together. Now we ask the West to join us.

We in UNITA call upon the West, and the United States as the leader of the free world, to give us military and political support. The moral case is clear. UNITA is fighting for a free, independent, and democratic Angola. We are fighting the Cubans and Soviets who would deny us our nation.

The strategic case, the self-interest of the West and America, is equally compelling. Should massive Soviet air and armor attacks succeed in defeating UNITA when the dry season begins in March 1986, then 45,000 Cuban troops and advisers, thousands of Eastern-bloc "technicians," and an untold quantity of tanks, figther planes, helicopters, and artillery will stand uncontested along the borders of Zaire, Zambia, Namibia, and Botswana. Not UNITA alone, but all of central and southern Africa awaits the decision by the United States.

We were all encouraged by the decision of the United States Congress to repeal the Clark Amendment, which forbade U.S. assistance to the forces of freedom in Angola and left us for 10 years alone against the Cubans. Now the United States must take the next step and commit the military aid that will allow us to defeat the Cubans and Soviets in Angola—anti-aircraft weapons, the Red-eye missile and Stinger missile, and anti-tank weapons. With those arms we can protect our people from air and armor attacks and drive back the Cubans and Soviets through the continuation of the guerrilla war that we have waged for 11 years.

We ask also for your political and diplomatic support. We need you to insist at the United Nations and other international forums that the Cubans and Soviets leave Angola and that the promised elections be held. With your military and political support, other nations will follow your lead and give us aid. Do not underestimate the importance of your decision. For Angola is the Munich of Africa. Hesitation, the refusal to aid UNITA in its fight against the Cubans and Soviets, will be taken as a signal by all the countries in the region that the United States has abandoned them to the Soviets as the West abandoned Czechoslovakia and Eastern Europe to Hitler in 1938. Do not suppose that Zaire, Zambia, Botswana, and Namibia will remain of the West when faced with an unopposed base in Angola. They will be forced to make their political accommodations with the Soviets just as most of Eastern Europe fell under Nazi political domination without a shot being fired. The loss of the sea route around the Cape and the loss of the strategic minerals found in central and southern Africa would be a crippling blow to the economy and defense of the West. That is why I say that UNITA is the key to Angola, Angola is the key to Africa, and Africa is the key to the West.

I am not alone in this assessment. The Soviets agree.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, do Senators on my side wish some time?

Mr. HOLLINGS. Yes, Mr. President.

Mr. BYRD. Mr. President, I yield such time as he may require out of my order to the distinguished Senator from South Carolina [Mr. HOLLINGS].

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I thank my distinguished leader and the distinguished Presiding Officer.

THE TEXTILE BILL

Mr. HOLLINGS. Mr. President, I want to respond to some claims. I want to respond to the distinguished majority leader's comments a few moments ago when he referred to textiles in expressing his hopes for unanimous consent. He said, "We have already done that one. That is enough to kill that one." On the contrary, we have just begun to fight. In essence, this entire trade matter is an educational process. It is also a parliamentary obstacle course when one is in the minority.

We presented a textile bill in an orderly fashion and that bill is not only still in the Finance Committee, but this distinguished Senator was told by the chairman of the Trade Subcommittee of the Finance Committee that it would not see the light of day. And he is right. It is still there and I have not seen the light of day on that bill.

We had to use every maneuver in the book, going from bill to bill, and every time the amendment was adopted on a particular bill, the leadership then removed the bill from further consideration. We got into a terrible snarl where we had to agree to a time agreement for a vote on textiles, with some 23 amendments to be considered. Now, of course, that has been done and been done in an orderly process.

The bill went over to the House side, which adopted the Senate amendment, our bill, and in turn it went to the White House and at the 11th hour, exactly at 11 o'clock the evening before last, the President of the United States vetoed the bill.

Now, in the minds of some, that would end it. As the majority leader stated, "That is enough to kill that one," assuming, of course, that this was a momentary initiative and a one-shot deal with respect to textiles and then we would move on to something else.

In fact, it was brought into sharp focus when my distinguished colleague from Missouri [Mr. DANFORTH], and I were speaking yesterday. He said that telecommunications had reached a crisis stage. I harkened back 30 years ago when we in textiles had reached that stage—30 years ago. I testified before the U.S. Tariff Commission. They were telling us to use the orderly procedures under the law.

In fact, the summary advice of our distinguished colleague from Florida [Mr. GIBBONS] on the House side was, that what we really should do in addition to modernizing—showing he had no knowledge whatever of the industry's modernization to the tune of some $8 billion in the last 5 years—in addition to modernizing and computerizing and getting competitive, what we should do is bring injury cases.

Our injury cases were brought back in the fifties over a 10-year period, promised by both administrations.

The fact is at the hearings the Government of Japan, where our distinguished colleague from Missouri will visit during the Christmas break, was represented by none other than the great Thomas Dewey from New York, the Republican nominee for President back in 1948. Tom Dewey ran me around the hearing room there for 2 days. We tried the injury cases. We went to the White House. Jerry Persons escorted us in to see the Chief, namely President Eisenhower, who said in March of 1960, "You will win your case; you have done the right thing." We lost the case to Dewey, and thereupon I went to my friend John F. Kennedy, then Senator Kennedy. We exchanged correspondence. We got the Seven Point Kennedy Program, and in 1962, Mr. President, we adopted the Trade Expansion Act. That was the basis for the Multi-Fiber Arrangement, the MFA, in pursuance of trade expansion, not protectionism.

I highly resent the idea expressed in the President's veto message that this is another protectionist bill. This Senator is going to stand here on this Senate floor for trade, not trying to hold up the orderly process of the Finance Committee and the duties of the Government. If they want to take up H.R. 3722 and pass on different measures that are in their particular jurisdiction, fine. But whenever we come to trade we must realize that this has been a long, hard road and greeted with a methodical message of so-called protectionism, when, in reality, it is in conformance with the objectives of the MFA and our agreements that I have now in my hand. I would not ask the CONGRESSIONAL RECORD to print all of these agreements, but I hold a deck of agreements here from 34 countries. These are bilateral agreements and that is what they said you should have, the orderly process, the orderly process of these particular agreements and enter into them, and so we did.

Now, let me follow that thought because they have not been enforced by the U.S. Government. Japan enforces their agreements. We know now of the transshipments from the Republic of Korea through Japan of textile goods, and who is this complaint referred to? To MITI, the Ministry of International Trade and Industry. That is an entity of the business leadership within the Government which controls trade, and they are studying it and we do not hear anything further.

The President's veto message talks about protectionism. What they do is go around and enforce it for their market but our Government not only does not enforce it, they do not give us the ear of the Government's representatives.

Last week it was very interesting because it was touch and go. I happen to have been one who believed that President Reagan would sign this particular measure. I get the feel now why he did not, when I looked last Saturday and I saw the headline in the business section in the Washington Post, "White House Backs Off Baldrige Plan." Well, I was not particularly interested in that one plan or Secretary Baldrige. I was interested in President Reagan. I saw where the White House had backed down temporarily from any kind of penalties against Japan for selling computer chips well below their market value. But the text of the story about dumping and penalties is really what got my attention:

> The White House reacted after aides were subjected to heavy lobbying all week by lawyers for the Japanese industry who wanted to narrow the scope of the possible penalties. We made all kinds of representation on behalf of the Japanese, said William Walker, an attorney for the New York and Washington law firm of Mudge Rose Guthrie and Alexander. He added that the Japanese felt Baldrige was being excessively aggressive.

Can you imagine such nonsense? Here seven Republican Senators were imploring their President to be heard over at the White House on the textile bill and were refused; the President was too busy, but the entire staff over there was listening to Japanese representatives, same story, same act, same situation that we had years and years ago. We think we can go to Japan and implore and persuade and cajole and say we are going to get real mad and nasty now, we are going to start enforcing the law unless you equalize this semiconductor trade, this telecommunications trade. Nakasone, Tojo, every Premier, Prime Minister of Japan has been through the act down in the Fish room. They have been down in the Fish room perhaps more than maybe our Presidents. They know when they go to the Fish room it is the same act for every American delegation that goes over.

So it is my intent to educate Congress and get a vote on this bill. It is a twofold purpose, not only of educating but being blocked in the Finance Committee and not having a chance to take up our textile bill and get it back over to the House so we can bring it up again in an amended form.

As you will remember the House was helpful in taking the amendment of Senator THURMOND and myself on textiles to send over to the President. When we start on trade at the end of this year and all during the beginning of next year, whether it is the bipartisan trade bill, the Democratic trade bill, the particular trade bill here with respect to telecommunications, or otherwise, it is this Senator's intent to get a vote on something that has been blocked by the majority on the other side at every particular turn. We are not asking for time. We are not objecting to bringing up the telecommunications bill. Rather, we would implore the leadership to give us just 5 minutes to a side and let us have a vote on this particular measure so that we can get it over to the other side because under the Constitution of course all trade measures should originate on the House side. So we have to use a House title on this basis and make clear our intent.

I had to take this position. They have taken their positions in trade throughout, and have yet to report our textile bill out of committee even though it has passed overwhelming hurdles, trials and obstacles on both the House and Senate side. And we have not just killed that bill and gotten through with textiles this session. On the contrary, let us not say we are going to have a tariff in some of these bills, we are going to have this, we are going to have the next thing and subsidies, or whatever. All we are asking is a licensing system in our particular measure to enforce in an orderly way the objectives of the MFA and our 34 bilateral agreements. When they talk about rollbacks, we talk about the amounts that they agreed to. We only rollback the three largest exporters. We are talking about amounts agreed to under the MFA and our agreements, not rollbacks.

If we cannot get enforcement of trade measures, then why should the Japanese pay any attention? The automobile industry went through that. They got temporary quotas and now the temporary quotas are going off and they are going to devastate once again the automobile industry. So what we have is a bunch of corporations who went over under the inducement of the Marshall plan to spread the seeds of capitalism and found

what? They found that they could produce more economically in these offshore countries and be protected by those offshore countries. And they get protection and come back into the Trilateral Commission and the big banks in New York and jump up and down and holler "protectionism, protectionism free trade, free trade," an absolute shibboleth. There is no such thing as their yearning for competitive trade. The only way we can be competitive on this score is not cajole and implore, but take a page from F.D.R. when in order to save the farms he plowed under the crops, in order to save the banks he closed their doors.

Now, in order to remove a barrier, we will have to raise these barriers, of at least enforcement on our part. If we enforce the laws in an orderly fashion, there will be no need for a textile bill. We are not enforcing our law.

So we have another message about protectionism, and the Secretary is asked to investigate. Why should the Secretary investigate? Call up the Japanese lawyers and let them investigate for you and save time. The Secretary has plenty of duties. There is no reason for him to run around, because the White House is going to back off as soon as the Japanese lawyers hit the staff over there, and they will arrange one of these silly messages about protectionism.

That is why I will not object to Senator DANFORTH's bill on telecommunications. I support it. When we move along, either move mine along with it or tell me I can get an up-and-down vote by itself. That is what I had to spend all last year on, and we are willing to spend all next year on the same point.

I yield the floor.

Mr. DANFORTH addressed the Chair.

The PRESIDING OFFICER. Will the Senator withhold?

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 11:30 a.m., with statements therein limited to 5 minutes each.

The Senator from Missouri.

INTERNATIONAL TRADE IN TELECOMMUNICATIONS EQUIPMENT

Mr. DANFORTH. Mr. President, I apologize to the Senator from South Carolina, because I came in in the middle of his remarks, and I was distracted during part of his remarks.

I was pleasantly surprised when I thought I heard, at the end of the Senator's comments, that he would not object to the unanimous-consent request to be propounded by the majority leader. I hope that is correct, because I have succeeded in getting 99 Senators to sign off on the unanimous-consent request. We had a lengthy discussion on the telephone yesterday.

My hope is that the Senator from South Carolina will become the 100th Senator to allow this telecommunications bill to go forward.

Mr. HOLLINGS. It depends on the form in which the unanimous-consent request is made.

I had an exchange with the majority leader earlier this morning with respect to the fact that he wants to bring up those measures. But if he wants to bring it up and use it as a vehicle for a telecommunications bill or any other trade bill, I will ask that mine be included in the unanimous-consent request. Otherwise, I will have to object.

Mr. DANFORTH. As the Senator knows, we have been working for some days to clear the telecommunications bill. We have done so. The unanimous-consent request will be to bring up the old cigarette tax bill, strip everything after the enacting clause, and insert in lieu of the bill the telecommunications trade bill. That is the only thing we have succeeded in having cleared.

As I believe the Senator realizes, the textile bill is significantly more controversial than the telecommunications bill, and there is no possibility of clearing a unanimous-consent request to bring up the textile bill. The Senator has had several votes on the textile bill. In fact, he prevailed, and it was vetoed. The Senator did get action on the floor of the Senate. I did not support the textile bill, but I certainly supported the Senator's efforts to get a vote on the textile bill, as the Senator from South Carolina knows.

My hope is that the Senator would be equally cooperative with other Senators who are trying to get some work done.

MOSS TALKS ON LUMBER

Mr. BAUCUS. Mr. President, Thomas Mann once said:

> Time has no divisions to mark its passage, there is never a thunderstorm or blare of trumpets to announce the beginning of a new month or year.

Mr. President, Thomas Mann's observation reminds us that it is up to us to review our progress each year—or time will simply slip by.

Therefore, it is appropriate at the end of this year to examine the administation's track record on trade this year.

I would like to focus on the ongoing MOSS talks with Japan, particularly the negotiations relating to forest products.

Mr. President, this year was heralded with what seemed like a dramatic announcement by President Reagan and Prime Minister Nakasone.

On January 3, 1985, these two leaders announced that Japan had agreed to undertake further market opening measures in several product areas, including forest products.

Now we are approaching the anniversary of that announcement, and virtually no progress has been made in the forest products area.

The Japanese simply have agreed to positively consider unspecified tariff reductions, but not until 1987.

In other words, in the forest products area all we get from Japan is words, not action.

The hopeful announcement of a year ago is now a bitter disappointment.

Mr. President, the result of this inaction has been disaster for the American forest products industry.

Japan imports logs duty-free, but continues to impose a web of tariff and nontariff barriers against imports of processed forest products, like lumber, plywood, and draft linerboard.

As a result, many jobs that might exist in Missoula, Montana or Bend, Oregon are carefully protected in Sapporo or Osaka, Japan. U.S. companies lose about $1 billion a year in sales.

Mr. President, today, I call on the President to explain to this Congress why these talks have failed.

I call on the President—on or before the first anniversary of the Reagan-Nakasone announcement—to report to Congress on the progress of the forest product negotiations.

I call on the President to say what he has accomplished, what he has not accomplished, why he has failed to accomplish it and what he intends to do about it.

We cannot simply let months and years slip by without making progress in these negotiations.

The history of our trade negotiations with the Japanese are replete with examples of negotiated inaction.

We cannot let that happen again.

We must ensure that the announcement made almost a year ago does not get thrown on the ash heap of empty promises.

Mr. HOLLINGS. As we stated during the textile debate, this is just the beginning. I passed a textile bill with Senator Cotton. I passed it in the Carter-Mondale administration. Now we have passed it again, noting, of course, the veto message about protectionism; and, thinking that we can pick up more support to override a veto on the House side, we want another bill. We need another bill, and I hope in turn to educate Members of Congress and the President on this particular score. I cannot get my bill up on this floor and voted on unless it is on trade matters, and it is still in the committee of the Senator from Missouri.

Mr. DANFORTH. Mr. President, the telecommunications bill has been cosponsored by a number of Senators.

51-059 O-87-28 (Pt. 27)

Action on it is supported by the AFL-CIO, the Communications Workers of America, the International Brotherhood of Electrical Workers, the Electronic Industries Association, the American Electronics Association, the Computer and Business Equipment Manufacturers Association, and the U.S. Telecommunications Suppliers Association—all of whom have worked to put together this bill.

It is opposed by the administration. I have been curious as to whether or not the administration has asked the Senator to take this position on the bill, because the effect of the Senator's position, of course, is that the telecommunications bill cannot be passed, which is doing the bidding of the administration.

I am sure that the Senator's position would also be greeted with great huzzahs by the Japanese and by other countries that are only too ready to come into this market. It will cost Americans jobs. So be it.

UNANIMOUS-CONSENT REQUEST

Mr. President, I have discussed this with the majority leader. I ask unanimous consent that the Finance Committee be discharged from further consideration of H.R. 3722, dealing with an extension of the tobacco excise taxes, and I ask for its immediate consideration. I further ask unanimous consent that on consideration of H.R. 3722, only one amendment be in order, that the amendment be in the nature of a substitute, and that that amendment consist of the text of S. 942, which is the telecommunications bill.

The PRESIDING OFFICER. Is there objection?

Mr. HOLLINGS. I object.

Mr. JOHNSTON. Mr. President, reserving the right to object——

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. Mr. President, I think the purpose of this exercise is to see whether or not some of these matters are objected to.

I agree with the distinguished Senator from Missouri that the bill should pass unanimously. We have already dealt with the textile matter. Many of us cooperated in getting that bill before the Senate. I hope we can have the same cooperation now, for the consideration of other bills. But apparently that is not going to happen today. At least, that effort has been made, and that will take care of that matter for the remainder of the year.

U.S. SUPPORT FOR THE NATIONAL UNION FOR THE TOTAL INDEPENDENCE OF ANGOLA

Mr. DOLE. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

Mr. METZENBAUM. Mr. President, will the Senator yield for a question, just to tell us what the resolution is?

Mr. DOLE. It is the Angola resolution, and there will be an objection.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. Mr. President, if I may, let me indicate that I have discussed this resolution with Senator PELL. He would object, and I think that objection will be made by the distinguished minority leader on his behalf.

I commend the distinguished Senator from Wyoming, who made a statement on this matter earlier.

I do not agree with Senator PELL that the matter should go through the committee in the normal process. We have an emergency on our hands, and the longer we wait, in my view, we make it more difficult.

The PRESIDING OFFICER. Is there objection to the consideration of the resolution?

Mr. BYRD. Mr. President, on behalf of Mr. PELL, I object.

The PRESIDING OFFICER. Objection is heard.

The resolution will go over under the rule.

Mr. DOLE. Mr. President, I regret the decision of the Senator from Rhode Island to object to the Senate's consideration of my resolution on freedom fighters in Angola.

I am generally sympathetic to pursuing the normal processes of the Senate and having the appropriate committee review legislation prior to floor consideration, but there are times when expedited consideration is justified. This is one of those times.

CUBAN AND SOVIET INTERVENTION CLEAR

The substantive issue is clear and clearly drawn. In 1975, the Marxist MPLA regime in Angola seized power in violation of an agreement to which it was a party—the Alvor accord—which stipulated that all the major political forces in Angola would be offered the opportunity to contest free and fair elections to set up a permanent government. Having seized power illegally, the MPLA has invited in more than 35,000 Cuban troops and thousands of additional Soviet and East German advisers, undermining the sovereignty of the Angolan nation and representing both the most blatant foreign intervention in Africa's internal affairs and the most brutal suppression of black Africans by nonblack foreigners in the postcolonial period.

Utilizing more than $1.5 billion in military aid provided by the Soviet Union—including some of the most modern and deadly weapons and armament—the Cubans, Russians, and East Germans are spearheading an effort to wipe out the large and popular insurgency called UNITA, under the leadership of the charismatic Dr. Jonas Savimbi. That effort culminated this year in a brutal new offensive, blunted only because the badly outgunned UNITA enjoys the support of so many Angolans.

UNITA'S STRENGTH IS ITS POPULAR SUPPORT

UNITA is strong, and growing stronger, because it is struggling for the basic freedoms of the Angolan people—freedom from foreign domination, freedom from the suffering of war and its privation, freedom to determine their own political future. UNITA is also struggling to prevent the spread of Soviet imperialism, within Angola, and later throughout southern Africa.

UNITA, in short, is struggling for the same goals that we espouse, in Africa and throughout the globe: That people everywhere should be free from the yoke of foreign domination and that they should be able to determine their own future.

UNITA NEEDS OUR SUPPORT

Yet, however worthy the cause, UNITA standing alone will be hard-pressed to continue its effective struggle—a struggle serving the interests of the Angolan people and, simultaneously, the interests of all of us who oppose Soviet imperialism—if the Soviets and Cubans continue to throw in thousands of their troops and provide new weapons and enhanced firepower to the MPLA. Even now, preparations are underway in Luanda for a new offensive, at the onset of the next dry season, aimed at wiping out UNITA once and for all.

Because the issue is so clear and because the threat of a new Soviet/Cuban/MPLA offensive is so imminent, it is important that we respond and respond quickly. That is why I hoped the Senate would act today on this resolution. It represents one way we make clear our determination to meet the direct challenge to freedom, and to our own national interests, which the Soviets and their allies are mounting in Angola.

AMERICAN INTERESTS AND GOALS

The resolution lays out clearly our own interests and goals in Angola—an end to the massive foreign intervention in Angola; a withdrawal of the Cuban and Soviet forces, which threaten not only Angola but all of southern Africa; and good faith negotiations, including with UNITA, which could forge an acceptable political solution within Angola.

The resolution makes clear that we are fed up with the intrasigence of the MPLA and its Soviet and Cuban sponsors, who have refused to engage in good faith negotiations despite our efforts over several years to bring all the relevant parties to the bargaining table.

And it would serve notice that, unless the MPLA changes its course and initiates good faith talks—with us and with UNITA—the Senate is pre-

pared to provide needed, critical material assistance to UNITA early in 1986.

These are goals, attitudes and intentions which, in my view, are shared by a large majority of the Senate. The list of cosponsors who have joined me in support of this resolution—Senators LUGAR, DURENBERGER, HATCH, DENTON, ROTH, COCHRAN, WALLOP, ARMSTRONG, MCCONNELL and DECONCINI—indicates the breadth of support the resolution would enjoy in this body, if it could be brought to a vote.

I regret that it could not. But I assure you that this is not the end of the Senate's consideration of this issue, any more than it is the end of the struggle for freedom and justice in Angola. In a few weeks, we will be back to revisit this issue, in light of developments in the interim. And I, for one, will be as determined as ever that the Senate support the freedom fighters in Angola and, through that support, further our own national interest in that critical part of the globe.

Mr. President, I ask unanimous consent that the resolution be appropriately referred.

The PRESIDING OFFICER. Is there objection? Without objection, the resolution will be appropriately referred.

Mr. DOLE. Mr. President, I ask unanimous consent that the resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. RES. 280

Whereas the National Union for the Total Independence of Angola (hereafter in this resolution referred to as "UNITA") led by Dr. Jonas Malheiro Savimbi, represents the views and wishes of a large number of Angolans;

Whereas UNITA was denied the legitimate role in the political life of Angola envisioned for it in the Alvor Accord of 1975, an agreement among all political elements in Angola which called for free and fair elections in Angola, when the Marxist Popular Movement for the Liberation of Angola (hereafter in this resolution referred to as the "MPLA") faction, backed by Soviet and Cuban troops, illegally seized power in Angola;

Whereas since that time UNITA has waged a courageous and effective guerrila war, with the support of a large part of the Angolan population, aimed at pressuring the MPLA to live up to its commitments under the Alvor Accord, permit free and fair elections in Angola, and remove Soviet and Cuban forces from Angola;

Whereas that struggle has achieved such success that many independent observers have concluded that, in free and fair elections, UNITA and Savimbi would likely enjoy the support of a large portion of the Angolan population;

Whereas the MPLA, faced with the possibility that the popularly supported forces of UNITA could militarily defeat the forces of the MPLA, has introduced even larger numbers of Soviet and Cuban forces, so that more than 35,000 such troops and advisers are now in Angola;

Whereas this Cuban and Soviet intervention represents the most blatant foreign intervention in the post-colonial history of Africa;

Whereas the Civil war in Angola, caused primarily by the illegal acts of the MPLA and waged increasingly by Cuban and Soviet troops, has led to widespread suffering for the people of Angola;

Whereas the MPLA, at the urging and with the extensive involvement of Soviet and Cuban troops and advisers, has recently undertaken a major offensive utilizing massive new shipments of modern arms from the Soviet Union and Cuba, aimed at wiping out UNITA;

Whereas UNITA has temporarily blunted that offensive, reestablishing a practical stalemate in the military situation;

Whereas the MPLA nonetheless may seek and obtain even more modern and extensive armaments and perhaps even more combat troops from its Communist suppliers and will launch further attacks on UNITA, leading to more suffering among, and greater suppression of, the Angolan people;

Whereas the MPLA, despite being offered the opportunity to seek a solution to these problems through negotiations in which the United States Government has sought to play a facilitating role, has refused to take any meaningful steps to lessen its dependency on Soviet and Cuban forces, to end the civil war, or to grant UNITA and its followers their legitimate place in the political life of Angola;

Whereas the only practical way in the foreseeable future to achieve a viable solution to the problems within Angola would be for the MPLA to effect the removal of Soviet and Cuban forces and to enter into direct and meaningful negotiations with UNITA concerning the political future of Angola; and

Whereas the main barrier to such a solution has been and is the refusal of the MPLA and its Communist allies to agree to meaningful negotiations aimed at brining it into effect: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the legitimate aspirations of the people of Angola for democracy, justice, peace, and freedom from foreign interference deserve the support of the United States;

(2) UNITA and its leader, Dr. Jonas Malheiro Savimbi, which represent the political aspirations of a large number of the Angolan people, have the right to play a commensurate role in the political life of Angola;

(3) UNITA and Savimbi deserve the political and moral support of the people of the United States and freedom-loving people everywhere, in demanding and struggling for that right;

(4) the MPLA has violated the rights of the Angolan people through its illegal seizure of power and suppression of the population;

(5) the MPLA, further, has compromised the sovereignty of the Angolan nation by introducting large numbers of Cuban and Soviet forces into Angola;

(6) the growing intensity of the civil war, suffering of the Angolan people, presence of foreign forces in Angola, and failure of the MPLA to respond to diplomatic initiatives calling for the elimination of foreign forces and free and fair elections in Angola have given new urgency to efforts to deal effectively with the Angolan situation;

(7) the MPLA should agree promptly to a process of meaningful negotiations, to include direct and good-faith negotiations with UNITA, aimed at ending the presence of Soviet and Cuban forces in Angola, terminating the civil war, and setting up an administration which respects the rights and reflects the wishes of the Angolan people, with a mandate to organize free and fair elections for a new government; and

(8) if the MPLA, during the current rainy season in Angola, continues to be intransigent, by—

(A) refusing to engage in good faith negotiations, including negotiations with UNITA, aimed at eliminating the presence of foreign forces and reaching a just political settlement in Angola, or

(B) continuing its preparations for a new military offensive,

then the Senate would support the provision early in 1986 of material assistance to UNITA and would impose economic sanctions against those sectors of the Angolan economy which provide resources to support the Cuban troop presence.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the President.

UNANIMOUS-CONSENT REQUEST FOR THE NOMINATION OF RALPH E. KENNICKELL

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nomination of Ralph E. Kennickell, Jr., to be Public Printer.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. MATTINGLY. Mr. President, I ask the majority leader, since there is now objection from the minority side, what would be the status now of this nomination on the Government Printing Office of Mr. Kennickell, since he has been serving, I believe, as acting administrator of the GPO for some 1 year, I think, and at least has gone through several investigations by both the Rules Committee and the FBI, which all of those investigations proved him innocent of any allegations put forth by some members of that committee, both staff and Senators? What would be the status of this now and what would be the objection, which the majority leader might ask the other side, of bringing it up for an up or down vote?

Mr. DOLE. Mr. President, if I could respond to the Senator from Georgia, I am not certain what would happen to the nomination. It could go back and require resubmission next year. There still may be time today to move to the consideration of the nomination. If we have a little slack period this afternoon, I would attempt to do that with reference to this nomination and the nomination of Terrence M. Scanlon, to be Chairman of the Consumer Product Safety Commission.

Mr. MATTINGLY. I would appreciate if the majority leader would do that. Any help I can give along that line, I would certainly give.

Mr. DOLE. I regret we could not clear the nomination. As far as I know, there is no reason it should not be cleared. There must be some reason someone has, but they are not required to state their reasons. They are only required to object.

Mr. MATTINGLY. I thank the majority leader.

Mr. DOLE. I am not certain we will have any success if we move to the nomination, but at least we could find out why there is an objection.

Mr. MATTINGLY. Then there is a possibility the majority leader may move to that nomination and the Scanlon nomination both this afternoon; is that correct?

Mr. DOLE. That is correct.

We may have some time this afternoon or evening waiting on House action on the continuing resolution and also the reconciliation matter.

Mr. MATTINGLY. I thank the majority leader. I may have further to say later with reference to this subject matter.

RESOLUTION TO IMPROVE SENATE PROCEDURES

Mr. BYRD. Mr. President, Senator DOLE and I have been discussing Senate Resolution 28, star print, the resolution to improve Senate procedures. I would hope that early next year the majority leader would be in a position to move to take up that resolution. It is a resolution which has been amended in the Senate Committee on Rules and Administration. I had, in offering the resolution, proposed several rules changes, some of which would be, I think, very important whether or not the Senate eventually votes to allow TV and radio coverage of Senate debate. In any event, those proposed rules changes, in my judgment, should be made. And I would hope that we could have a time early next year that we might proceed at least to begin the debate on Senate Resolution 28, as amended.

As amended, S. Res. 28 would provide for a trial period during which preparations would be made and equipment put into place to allow TV and radio coverage of the Senate. The Rules Committee chose to amend my resolution, Senate Resolution 28, star print, by knocking out the rules changes and just providing essentially for the trial period anent TV and radio coverage.

I have been discussing this with the distinguished majority leader. Would he at this time be prepared to give the minority leader and other interested Senators on both sides of the aisle assurance of an opportunity to debate the TV resolution early next year? I do not want to do anything at this point to attempt to go to that resolution. I could offer an amendment to the adjournment resolution setting a date or time for debate on this resolution next year, and such an amendment to the adjournment resolution would not be debatable. Of course, there could be other things happen that would be debatable. For example, a motion to refer that resolution or commit it to the Appropriations Committee would be debatable.

But I do not plan to make any such move. I only hope that I can get the assurance from the distinguished majority leader that very early in the next session the Senate will have an opportunity to debate that resolution.

Mr. DOLE. Let me respond by indicating that, as the Senator knows, we have a group, headed by Senator ARMSTRONG, of four Members on this side who have been meeting with Members on the Democratic side to work out some of the problems with TV and radio coverage, including whether or not there should be rules changes. There is some disagreement on that. There was some hope we could do it before adjournment this year. We were notified by the distinguished Senator from Louisiana, Senator LONG, that he would have to object to that for reasons that he holds very strongly. We also looked at the possibilities of amending the adjournment resolution, Senator ARMSTRONG did, and I do not believe a final judgment has been made on that.

But it would be my hope that, in any event, we could bring it up early next year, maybe as the second or third order of business, and dispose of it before or immediately after the so-called Lincoln day recess period.

Mr. BYRD. Is the distinguished majority leader indicating that he will make that effort early next year?

Mr. DOLE. I will; in fact, I am willing to make an effort this year, but that is not, I do not think, feasible at this point. The answer is yes.

I would indicate, though, for the record that there is a difference of opinion on whether or not there should be rules changes. I know Senator ARMSTRONG feels we just ought to proceed with TV and radio coverage and worry about the rules changes in the normal course of events.

My own view is that there might be some way to package some rules changes with radio and TV coverage. I know the Senator from Tennessee [Mr. GORE] has been attending those meetings.

I am not certain where that group finally came down. But the answer is yes. We will give early consideration.

Mr. BYRD. I thank the distinguished majority leader. I hope that the ad hoc groups that have been appointed on both sides of the aisle by the distinguished Senator from Kansas [Mr. DOLE] and this Senator, respectively, will be able to do some work during the break in preparation for the time when hopefully the Senate will be able to debate this measure early in the second session.

I have assured Senator LONG that I would not make an effort to amend the adjournment resolution, and he has indicated to me that he would like to discuss the matter with me during the break perhaps, and I look forward to that discussion.

I appreciate the distinguished majority leader's assurance that this resolution will be called up early during the next session.

Mr. President, is the distinguished majority leader in a position to assure Senators who are interested in debating TV in the Senate that there will be some effort made before the Lincoln day recess begins?

Mr. DOLE. That would be my hope. It depends on what may happen ahead of that time. We hope to have Conrail up when we come back. That may take 2 or 3 days, or 2 or 3 weeks. There is no way to judge. We are trying to. I think we have TV in the Senate as the No. 2 post right now.

Mr. BYRD. Then will the distinguished majority leader assure this Senator that the majority leader will call up, at least try to call up, Senate Resolution 28 immediately following whatever disposition is made on Conrail, if Conrail is to be the first item?

Mr. DOLE. Mr. President, I would like to keep some flexibility. I am not certain how Gramm-Rudman is going to fit into the activities next year. That is the same problem we are having with other matters.

If we get locked into bringing something up, as the distinguished minority leader knows, we may be in a real bind.

But let me say this: I want to get it before the Senate at the earliest possible time. There are not many objections left on our side of the aisle. Senator ARMSTRONG has done an outstanding job visiting with each Senator.

I hope we can move to it immediately after the disposition of Conrail.

Mr. BYRD. I can understand the practical problems that may prevent the majority leader from giving me a flat assurance at this moment that this will be the No. 2 item next year. But does he assure me that he will make every effort to make it the No. 2 or the No. 3, or something that comes along that will come before the Senate very early next year?

Mr. DOLE. Yes. For a couple of reasons: first of all, we want to do that; second, if we do not do it early, there are going to be some who do not want to do it at all next year. If we get into May, June, or July, there will be arguments on both sides that the year is over, we are near the election, and we

may give somebody an advantage. If we do not do it early, as I have indicated to Senator ARMSTRONG, I am not certain we would do it at all next year.

So I think there is that driving force also.

Mr. BYRD. Mr. President, I know the distinguished majority leader is speaking in good faith. He has to have some flexibility because there are other items of great importance. And as of this particular point in time, he cannot foresee all the problems. I do not want to call up this as an amendment to any measure. I do not want to attempt to pull any fast end run at this time because in the event that were done, then we might incur the opposition not only of the majority leader but also of other Senators as well who might otherwise be supportive of TV in the Senate.

I am happy to take the assurance of the distinguished majority leader, in good faith, that Senate Resolution 28, TV in the Senate, will be brought before the Senate very early next year. I know he is trying to do it as early as February.

I thank the majority leader.

LOW-LEVEL NUCLEAR WASTE

Mr. DOLE. Mr. President, one of the matters that we need to discuss before we move on is low-level nuclear waste. Senator GLENN just indicated he had an amendment. He will not offer it. That is fine because without his concurrence, we would not have the unanimous-consent agreement. That is why I was indicating it.

But the other matter is how we dispose of or at least consider the request of the distinguished Senator from Oklahoma, Senator BOREN, with reference to campaign reform. When that matter was last before the Senate, on December 3, 1985, there was a vote of 84 to 7 not to table the amendment.

So the amendment is still pending under the unanimous-consent agreement. The question was when it would come back before the Senate. As I indicated at that time, January-something. We have February partially committed to. We just had another example of that with TV in the Senate.

I was trying to provide some flexibility because I also believe that we should have reform of the campaign financing system, but I must say I am not prepared to advocate public financing. That is what we are going to get out of the Rules Committee if anything comes out there. I think that is a bad idea.

So there may be merit to what the Senator from Oklahoma proposes with some modifications because there, I think, you have discrimination among PAC's. The early PAC's could contribute to your campaign. Those who did not would not be permitted under the cap. It is my hope that we might be able to resolve some of the differences on campaign financing.

Now the Senator tells me that as opposed to December 3 he wants a date certain. I indicated also on December 3, and we explored it on our side of the aisle—that we might want to go beyond the committee, and have four Senators on each side or whatever try to work out some satisfactory compromise if possible on campaign finance reform.

I am still prepared to do that. But I wanted the distinguished Senator from Pennsylvania, Senator HEINZ, to be here because he has a particular sensitive role in campaign finance, and see if we can work out some agreement with the Senator from Oklahoma. Otherwise, there would not be any low-level nuclear waste compact come up today. That is a matter of great importance. So I hope we can resolve the matter now.

(Mr. MCCONNELL assumed the chair.)

Mr. BOREN. Mr. President, will the distinguished majority leader yield?

I thank the leader.

Of course, on the 3d of December we had a conversation about when we might return to the campaign reform amendment which was not tabled. At that time I asked if the distinguished majority leader could indicate on what date we could return. He told me at that time he could not. He would endeavor to try to get back to it as soon as possible. He intended to get back to the subject. But as reflected in our conversation at that time, he was unable to give me a date certain.

The problem the Senator suggests, when we were talking about which vehicle on which we would attach this particular amendment, we first intended to attach it to the compact of free association, the Micronesia compact. We were informed by the leadership and others that could have delayed that piece of legislation. It was very important to get it done at that time. So we were told that this was also a very live vehicle. There were serious problems. There was also a piece of authorizing legislation, or transition legislation, these would be married together at some point in time, and a total package to deal with the subject had to be enacted. It was on the must list. Therefore, we were on a very live vehicle.

I want to be completely reasonable with the majority leader. I am sure he can understand having been given this vehicle and having not had the amendment tabled, the campaign reform amendment is still alive, that this Senator would feel constrained to object to any kind of a movement of the package of bills relating to this subject unless he could be assured that we would return to the campaign reform amendment at a time certain or not later than a time certain.

I have a lot of sympathy for the problems of the majority leader. I happen to be one of those in this body who believes in the leadership being able to control the schedule of the Senate. It is not fair for Members to make unreasonable demands that would impinge upon that role. But I cannot totally give away the thought of the legislation to which the campaign finance amendment would be attached.

I have always been willing to accept the amendment of the distinguished majority leader. As far as I am concerned, it would not require any unanimous-consent request. The majority leader could simply indicate to me that he would call up that bill, the campaign reform amendment, S. 365, no later than a certain date, with the full range of flexibility to the majority leader for when he would call it up. We come back from a recess on April 8 and he could call it up on April 15. He could say that we would stay on it a reasonable length of time. If we were not able to complete action, the amendment of the Senator from Oklahoma would be subject to a tabling motion because 3 days would have passed.

If it were passed, it would be subject to unlimited amendment. The Senator from Pennsylvania has indicated he would offer amendments. I am sure there would be many others who would offer amendments.

I understand the majority leader cannot commit to me to stay on that matter until it was completed. If he were in a situation that might take 2 or 3 weeks, I certainly would not want to tie the hands of the majority leader. But if he could assure me that he would call that measure back up before us, it would automatically mean that my amendment would be the pending business, say, no later than April 15, or if the majority leader wants to suggest any other date, it would be satisfactory.

I hope we can reach an agreement before then. We may end up with a campaign reform package that would have broad, bipartisan support that we could pass and hopefully this issue would be moved by whatever date is set. This Senator would just want to set a date on which it would be called up. Certainly, a personal commitment on that would satisfy me. Then I would want us to stay on it a reasonable period of time, either until it is disposed of or 2 calendar days.

This Senator would understand that the Senator from Kansas would also have to consider other Senate business. This Senator, however, does not want to give away the vehicle. There are 10 cosponsors of this amendment.

I do hope the majority leader could give us the assurance that he would call it up at a certain date and give us

a reasonable period of time on it in attempting to finish it.

Mr. DOLE. Mr. President, going back to December 3, maybe right after the vote was not a good time to try to work out an agreement. The Senator asked me if I would be willing to bring it back in the next session. I said yes. But now he is suggesting that we do it by mid-April, with the session probably going to last until October.

Again, I do want comments from the Senator from Pennsylvania, but it is my hope that we can work out a bipartisan package within or without the Rules Committee, maybe with just the Rules Committee giving its blessing. If not, maybe there would be enough on either side to have a substitute or somehow agree with all parties or a majority that we need to do certain things. We do.

I am not certain the Rules Committee would have time to fashion a compromise which would indicate what they might have in mind by mid-April.

I have asked the distinguished Senator from Pennsylvania if he would object if I would say that by not later than June 1, we would return to this matter and set aside a couple of legislative days for consideration in the hope that we might have an agreement by that time by which it would be disposed of. I would like to hear from the Senator from Pennsylvania.

Mr. HEINZ. Mr. President, I have listened to the discussion with somewhat mixed emotions because when we were considering the Boren amendment earlier I heard our leader make a commitment to do his best to return to this and other campaign reform issues in the coming session. That was apparently acceptable to the Senate. That was my impression. The record leaves no impression to the contrary, but that that was acceptable to the Senator from Oklahoma.

I am somewhat constrained to say this has the appearance of changing the rules in the middle of the game or taking a second bite at the apple. I do not like to see a commitment by our leader in a sense questioned by somebody coming back—I will say this of anybody coming back—saying that they want different treatment of what in the judgment of many of us was clearly understood and by implication agreed to.

It is this Senator's view that the Senate should consider campaign reform in the coming session. I think it is important for us to do so. I know the Senator from Oklahoma feels it is important to do so.

It seems to me that there is an obvious problem, that we need to give the Senate Committee on Rules and Administration the appropriate amount of time to do their job.

I am at something of a disadvantage because as I look around the floor, the chairman of the Rules Committee is not here. The Rules Committee is decidedly underrepresented. I do not feel comfortable agreeing to any kind of date certain without the Rules Committee being consulted.

If I find that there is a sentiment to agree to a date certain, I would, for those reasons, feel at this point constrained to object to any unanimous-consent request for such a date certain.

It may be that we could agree on a date certain, but I do not see how we could do it at this moment.

Mr. BOREN. Mr. President, I have listened very closely. The Senator from Oklahoma certainly thought we would come back to this matter at a time certain on December 3. The Senator from Oklahoma also knows that there was a vehicle. We were promised that we would have an opportunity to put our amendment on a very live vehicle as opposed to a dead horse. Every Senator on this floor understands the difference. There was not a Senator on this floor that, if he or she had an amendment that was important to that Senator and they were able to attach it to a given vehicle, would then give away the vehicle. This Senator was perfectly content when the majority leader could not, on December 3, promise a date on which we would return to it, but this Senator rested with the knowledge that his amendment was on a package of bills that were important to be moved.

So it was the assumption of the Senator from Oklahoma that, ultimately, we would return to the matter because, ultimately, the Senate would need to return to the question of low-level radioactive waste. So, of course, the Senator from Oklahoma, knowing his rights, that would be the situation, that the Senator would have another opportunity to determine, if we could get back to this matter at a date certain, that the Senate would move to that legislation.

I have great respect for the Senator from Kansas [Mr. DOLE]. I have great respect for his legislative ability. I have served on the committee which he chaired. I have learned a great deal from him.

I see the distinguished Senator from South Carolina on the floor, the distinguished Senator pro tempore [Mr. THURMOND]. I have learned a great deal from him. I respect them. We have utilized the rules to try to make sure that the things in which we believe are fairly treated.

This Senator is being asked to do something else now, to give away a vehicle, a package of bills on which we deliberately put our amendment. We deliberately put our amendment on this particular measure because we knew there was going to be a series, a whole package of these, in legislation that would have to be married together. This Senator would certainly not be willing to give away the vehicle. This Senator would have to object. I understand it will cause problems. The Senator from Oklahoma would have to object to the unanimous-consent request that would give away his vehicle.

I do not think there is a single Member of 100 Members of the Senate who would not object to giving away a vehicle to which he had succeeded in attaching an amendment without any promise whatsoever that we would now return to the vehicle which would, by the way, lose its importance as a vehicle other than for the amendment itself. There would be nothing pushing us to return to it. We have disposed of these other problems. This Senator would have to object on that basis.

The distinguished chairman of the Rules Committee has said he plans to move very, very early, after we return from recess, to additional hearings. He is talking about this matter. This Senator has said that as far as he is concerned, he will accept the personal commitment of the majority leader without our having to ask for a unanimous-consent request. But if the distinguished majority leader would just tell me that no later than a certain date, which does not set a date certain, just says no later than an outside date, we would return to this matter and make it the pending business, that we would stay on it either until we finish it or a reasonable period of time—I am not asking the majority leader to commit to until we finish it, say a couple of calendar days.

I understand the majority leader has to push on to other things. Of course, if the Senate started attaching it, we have some subjects around here. A former Member of the Senate, Mr. Magnuson, once cataloged how many times we have discussed abortion and busing and we could face the issue of campaign financing every time we move. This Senator does not want to do that.

I ask the distinguished majority leader again. I hope he understands what I am trying to say. The Senator from Oklahoma is trying to be reasonable. He did not push for a date certain on the third of December because he still had this vehicle. The vehicle is this amendment on a package of vehicles that is important and needs to be dealt with. If we are going to give the vehicle away, I am willing to move.

The Senator from South Carolina [Mr. THURMOND] and the Senator from Washington [Mr. EVANS] are on the floor. I am willing to accommodate those Senators and their needs. I would be very happy to give flexibility. But I also want to see us act on this in enough time next year that the House would have time to act. I think it is very important. If we wait then until the next election cycle, it is going to be too late again. This bill I have introduced does not apply until the 1988 election cycle anyway. If we wait until after the 1986 elections until we act, they will say you cannot apply it to the next election cycle and we will

have to wait until the 1990 election cycle. So I do not want to get into that.

I hope if the distinguished leader—we come back on the 8th of April, we go back out on recess again until the 25th of May, this would really stretch it.

I have indicated if we are not making progress—and I am going to watch to see if progress is made in the Rules Committee and elsewhere and if we are not making progress—I will begin to move as early as March. If we are not making progress—this Senator is interested in progress, a bipartisan, reasonable approach as the majority leader has said. I am optimistic. The majority leader himself has said we can work something out on this. We may end up getting something the Senator from Pennsylvania and the Senator from Oklahoma can both be for. I shall be very happy if that can be done.

If the Senator from Kansas can just indicate to this Senator that he would like to see it done no later than—I have said the 15th of April. Certainly no later than the end of April. I would be willing to say no later than the period that we are talking about here between those two recesses, the April recess and the May recess, during that period of time.

I would not consider waiting until the last day to do it. That would not be appropriate because we would not have time then. If the distinguished majority leader, during that period of time at the latest, would call that matter up before the Senate, make it the pending business and give us at least 2 calendar days to work on it or until we can complete it—it might not take 2 full calendar days—this Senator would be satisfied and not make an objection to consideration of the authorizing legislation or any of the compact legislation or to the folding-in of the provisions relating to low-level radioactive waste. Even those provisions in 655 can be put in some other bill, so far as this Senator is concerned, and considered.

If the distinguished majority leader could simply make that commitment to me, this Senator would be satisfied with it and not press for a unanimous-consent request.

Mr. DOLE. Mr. President, we have a time problem. I would rather not debate the bill today because we are going to have low-level nuclear waste compacts agreed to by the House. They are now considering the continuing resolution. I am not sure how long they will stay around after that, hopefully long enough to pass the reconciliation conference report. I am prepared, if we cannot get an agreement, to just forget it or pull out the Oklahoma-Kansas compact and go ahead and pass the others. There is no need to punish the other States because the Senator from Oklahoma feels that the campaign finance reform is more important than dealing with low-level nuclear waste. That is a judgment he has made.

There are plenty of opportunities to bring up campaign finance reform. There is more than one Senator concerned about campaign finance reform in this body. We are prepared to try to work something out, but I have to get agreement on both sides. If we cannot get agreement, let us just say we are not going to get the agreement so we can go on with something else.

Mr. BOREN. The distinguished Senator from Kansas said a while ago he is prepared to talk about the 1st of June. The Senator from Oklahoma just noted that we are in recess until then. If we could bring it up prior to the May recess. The Senator from Oklahoma has moved from the 1st of March to the 15th of April.

Mr. DOLE. He has moved from the next session, which he agreed to on December 3, to now the first few weeks we are back. He has not moved the other way.

Mr. BOREN. The Senator from Kansas knows that is not the fact.

Mr. DOLE. That is what the RECORD says.

Mr. BOREN. The Senator from Oklahoma is not willing to give away a vehicle on which the distinguished Senator from Kansas said we could attach this.

Mr. SIMPSON. Mr. President, would the Senator yield for a question?

Mr. BOREN. In just a moment.

The Senator from Oklahoma is very happy to allow this to proceed. The Senator from Oklahoma is not holding up anything. But if the vehicle on which we were promised we would have an opportunity to attach this—we were told this was a live vehicle, it was on the "must" list. The Senator from Kansas has said he would try to return to this next year.

That is perfectly fine if we know we have a vehicle that is alive. But once we allow these other things to move, we have that vehicle no more. The Senator from Oklahoma is very happy to give the Senator from Kansas full flexibility about this matter. But I think the Senator from Oklahoma is making the very minimal requirement that any Senator would make under the circumstances in saying that we would like to have assurance that the majority leader will call this matter back up. I am not requiring we stay until we finish. Every Senator can offer every amendment they want to offer to it. If the Senator from Kansas cannot complete action on it; he has other responsibilities—this Senator respects those—he can simply pull the matter down after a reasonable period of time. The Senator is willing to do that. But the Senator will be constrained to object to taking up any of the measures, the authorizing measure or any of the compacts, the Senator will object to this full range of bill numbers if he is not given some assurance that his vehicle will not have been disposed of. I think that is a very reasonable request.

I would be happy to yield to the Senator from Wyoming for a question.

Mr SIMPSON. Mr. President, I have entered into this discussion in days past. It seems extraordinary to me that the Senator from Oklahoma is not hearing what the majority leader is saying, and that is that we will have this issue on the floor of the Senate. I do not know what could be more direct or more honest. If the Senator from Oklahoma does not believe that, then it strains my knowledge of who he is and what he does. That is what the majority leader has promised. Is that not the case? It is the case in the RECORD on December 3. It is in the RECORD today. What more is it that the majority leader can tell the Senator from Oklahoma?

Mr. BOREN. Well, he can tell the Senator from Oklahoma an ending date; that he will bring it up before a certain period of time. The reason for that is the Senator from Oklahoma is perfectly willing to have a statement of feeling by the majority leader that he hopes to return to this next year, which is what he said on December 3. I certainly believe that. I accept the word of the Senator from Kansas. But now the Senator from Oklahoma is being asked to give away the vehicle. As long as the vehicle is there, pushing us to bring back this particular measure, the Senator from Oklahoma does not express much concern. But this Senator will say again—and I do not want to be quarrelsome about it. I am not quarreling with my good friend from Wyoming. I am certainly not quarreling with the distinguished majority leader——

Mr. SIMPSON. Will the Senator yield?

Mr. BOREN [continuing]. For whom this Senator has great affection and regard. All I am saying is I know the Senator from Wyoming. He is a person who fights for his convictions. I do not believe that the Senator from Wyoming would give up the vehicle on which he was told to attach his amendment because there were a whole bundle of bills that had to be married together and that that was a live bill number, because all these were going to move together, they were going to be married together and move. I do not believe he would give up that vehicle. This Senator is sorry, but I simply believe that we cannot afford to put this off.

The Senator from Kansas has said the 1st of June. We are going to be in recess another 2 weeks prior to that. The Senator from Oklahoma simply said I accept what the Senator from Kansas has said. If he would just say we will deal with it before we go out for that May recess, which is virtually

the same thing he was talking about, that would give us time when we come back from the May recess to take some action. The House would then have time to work on this matter.

I understand the problems. I had wanted to bring it up before we went out in April. The Senator from Kansas has said to me—he was talking about all the pressures he is under. I respect that. We have heard about TV in the Senate. We have heard about Conrail in the Senate. The Senator from Oklahoma wants to be reasonable about it.

Mr. SIMPSON. Will the Senator yield for another question?

Mr. BOREN. I will be happy to yield for a question.

Mr. SIMPSON. The Senator is well aware that 37 States are critically affected by this transitional legislation.

The Senator asked the Senator from Wyoming what he would do if he were involved in the same situation. I could tell the Senator what I have done in the past, which is more than rhetoric. When our good colleague from West Virginia was majority leader and told me that we would hear something of mine or bring it to the floor, he kept every single commitment to do that. That is what this majority leader——

Mr. BOREN. That is what——

Mr. SIMPSON. May I just finish the question, please. I have just a critical one for the Senator. I am saying that I would then have believed the majority leader, and I would under any circumstances in this place. But I say to the Senator, we can leave the Senator with a vehicle. Indeed, we can. It will be the Senator's vehicle. He will have the fate of it in his hands. It is S. 655, which is the compact that applies to Arkansas, Iowa, Kansas, Louisiana, Minnesota, Missouri, Nebraska, North Dakota, and Oklahoma to enter into the central interstate low-level radioactive waste compact. That is the Senator's vehicle.

He will have many allies in that cause, and we will go forward with our business today while the House awaits the work product and soon will go out. If the Senator from Oklahoma wishes to have that responsibility, I say he will. If he wants to allow us to go ahead and take care of the other States in the United States who have a critical problem as of January 1, I would hope that he might defer on that basis. If not, then the Senator has his vehicle. It is here. It is S. 655. In fact, that is all the Senator's vehicle ever was. And he would still have that option in its purest form. I think it is critical to remember where exactly we are.

Mr. BOREN. The Senator from Oklahoma understands that. The Senator from Oklahoma is willing to accept that responsibility. I am perfectly willing to accept that responsibility. I think the Senator has made a very open and aboveboard offer, and I have shown great flexibility in what I am willing to accept. I am absolutely willing to accept the word of the Senator from Kansas. The Senator does not need a unanimous-consent agreement. If the Senator from Kansas tells me that he will call that bill back up sometime prior to our going out for the May recess, which is in essence what he said just a minute ago, and let us be on it for a reasonable period of time, this Senator accepts that. I understood it was the Senator from Pennsylvania who was going to object perhaps. I hope that he would not because that gives us plenty of time. I am very optimistic that the Senator from Pennsylvania and the Senator from Oklahoma and a lot of others who are interested in the subject could get together in the meantime and work out something we can all be perhaps very enthusiastic about. The Senator from Oklahoma and the Senator from Pennsylvania have done that on a number of occasions in the Finance Committee where we found ourselves allies on a number of matters. I realize that we are here at the end of the session. It has been a very hard and stressful session and tempers tend to flare and we tend to get into rather short-fuse situations in terms of our moods. The Senator from Oklahoma does not desire to contribute to that in the least.

The Senator is perfectly willing to accept the word of the Senator from Kansas if he will just simply say to the Senator—it does not require unanimous consent. I have know the Senator from Kansas long before I came to the U.S. Senate. I have the greatest regard for him and respect for him and warm personal friendship. I certainly will be glad to accept the word of the majority leader that he will return to this matter, call it back up, bring it before the Senate. I do not want to put him in any box about having to stay on it until it is disposed of, if that becomes a time problem.

So the Senator from Oklahoma feels that he has made a very reasonable, about a third counterproposal, I will say, in response to the legitimate concerns of the Senator from Kansas about scheduling. The Senator is perfectly willing to accept his personal commitment if he chooses to give it. Otherwise, I see no point in discussing it further, if the Senator from Kansas does not wish to give that commitment.

The Senator from Oklahoma will object to the consideration of any of these numbers. There it is.

Mr. SIMPSON. Will the Senator yield for another question? The only vehicle the Senator ever had in this whole situation was S. 655. Is that not correct?

Mr. BOREN. That is not correct.

Mr. SIMPSON. It is correct in the RECORD.

Mr. BOREN. It is not correct. It may be correct in the RECORD, but we have a lot of conversations——

Mr. SIMPSON. That is the best thing we can use—the RECORD.

Mr. BOREN. Mr. President, if I might respond to the Senator——

Mr. SIMPSON. Yes.

Mr. BOREN [continuing]. Of course we have what is in the RECORD, but we also have conversations that occur around here. And I think if we call the distinguished Senator from Mississippi [Mr. STENNIS] and the distinguished Senator from Arizona (Mr. GOLDWATER) to the floor, they would be happy to report conversations that we had, as the Senator from Oklahoma will. This Senator believes in operating in good faith.

This Senator accepts the word of other Senators and the understandings of other Senators.

I see that the Senator from Idaho is on the floor. I know that at some particular period of time, he was in at least a very small portion of those discussions, as the chairman of the committee.

It was explained to the Senator from Oklahoma that there were a whole series of issues dealing with low-level radioactive waste; that there was an authorizing bill; that there was a House bill number; that there were a series of Senate bill numbers; that there was a series of regional compacts, and that it was the intent of the leadership to bring all those back together at a certain point; that before the whole matter was disposed of effectively, a whole package, a whole bundle, would be put together and enacted into law; that, therefore, we would have the ability to prevent that bundle from going forward, to deal with this whole problem as we would on that piece of legislation.

I hope we can work it out. I do not know that we need to discuss it any further. I am perfectly willing to rely upon the word of the distinguished Senator from Kansas.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. BOREN. I yield.

Mr. McCLURE. I thank the Senator for yielding. Perhaps when I am finished, he will not be glad he yielded, and I apologize for that in advance.

I remember the portions of the discussions in which I was involved with respect to what the Senator from Oklahoma would do rather than attach it to the compact. I happen to be the chairman of the committee that had both the compact and the initial jurisdiction over this low-level nuclear waste matter.

I was trying to get it off the compact. In the discussions that I recall, it was suggested that the Senator from South Carolina was vitally interested in this subject matter and was willing

that it be attached to one of the compact measures. In no part of the discussion in which I took part was it mentioned that it would attach to the whole package. If there was a different understanding or a different conversation, it is not an understanding the Senator from Idaho had, nor was it in a conversation of which I was part.

Mr. BOREN. I appreciate what the distinguished chairman has said, and I am not sorry I yielded to him.

I understand that this amendment would not be attached to each part of it. My understanding was that for us to have an effective, comprehensive solution to this problem, all these measures would have to be enacted and pulled together, and therefore, by attaching it to any one of them, we would be in a position to prevent movement on a solution of this problem.

A moment ago, the distinguished majority leader mentioned the 1st of June. He mentioned that he would be willing to say that he would call this matter back up prior to the 1st of June. I suppose the Senator from Oklahoma is arguing about semantics, because we will be in recess for a week prior to that, and obviously the Senator from Kansas is not going to call it up when we are in recess. The Senator from Oklahoma will be happy to accept what the distinguished majority leader just said.

Mr. HEINZ. Mr. President, will the Senator yield for a question?

Mr. BOREN. I yield.

Mr. HEINZ. There are a number of issues that I think we should get on the table if we are going to talk about anything like a date certain for the Senator's amendment. I said earlier that I was not necessarily opposed to it but that we had to have a number of uncertainties addressed.

Let me ask the Senator this: Were there to be an agreement, whether it is informal or a unanimous consent request, would the Senator also be willing to agree that if we take up the Boren amendment in some other context between now and then, or if the Rules Committee reports campaign reform legislation and the Senator has his opportunity to debate the Boren amendment, as an amendment or as part of such campaign reform, whatever agreement would have been reached would, in effect, have been overtaken by events and would have been discharged? Would he agree to that principle, in principle?

Mr. BOREN. Yes. In response to the Senator from Pennsylvania, let me say this.

As the Senator knows, when this bill number is called back up and the campaign reform amendment becomes the pending business, under the prior unanimous consent agreement it will be subject again to tabling because 3 days have passed. It would not be subject to amendment. It would be subject to amendment after it is disposed of.

For example, let us suppose it is adopted or is not. The Senator from Pennsylvania could offer his amendment, or any other amendment could be offered.

The Senator from Oklahoma would be perfectly ready, let us say, in the meantime, if the whole matter becomes moot, because a group of Senators would get together and agree on a different package, or perhaps a broadening of the Senator from Oklahoma's proposal, and there is a desire to move on, that we can move on that earlier. Of course, the Senator from Oklahoma then would be willing to release the majority leader, if he should make that commitment, from a commitment. It would be foolish to return to something that was moot.

The Senator from Oklahoma would not want to give away, if the Senator felt we had not really dealt with the matter—the Senator from Oklahoma would want to keep it at his own option to release the majority leader from a commitment. Obviously, the parliamentary situation in which we now find ourselves is that when this matter becomes pending again, it will not be subject to amendment. That gives some leverage to the Senator that he would like to keep, and I am sure that my colleagues who are cosponsors of this measure would like to keep it.

If we were going to return to that prior to the 1st of June, with that parliamentary situation, I hope it would give all of us an incentive in the meantime to work out something that is good, genuine campaign reform on which we could move forward. If we were able to get that done in the meantime, certainly I think we all recognize that we would not expect the majority leader then to do that.

This Senator does not want to say, in any petty sense, that I personally have to be satisfied; but I hope the Senator will understand that I would want to be the one to release the majority leader from that commitment.

Mr. HEINZ. I do not know of any commitment the majority leader has made, other than to consider the Senator's legislation in the next session. There was discussion of various dates, but I do not know that any commitments have been made. The majority leader is here. I have not heard any commitments made as yet.

If the Senator will yield further, I have a question for him. I urge the Senator to think through his answer very carefully because it may make a difference as to whether or not he succeeds or fails in his objective, which is to pass meaningful legislation.

Were the Boren amendment in S. 655 to be brought up at any time, the Senator knows that his amendment would not be amendable.

Mr. BOREN. That is correct.

Mr. HEINZ. And it would not be debatable. It would be voted up or down.

Mr. BOREN. I did not understand that it was not debatable. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BOREN. It is not subject to any further debate?

Mr. HEINZ. That is correct.

As a result, the parliamentary situation is not very favorable to careful consideration of that amendment as it stands. There could be a 2-day quorum call. There could be all kinds of methods whereby somebody might force the Senator's amendment to be voted on.

Mr. BOREN Mr. President——

Mr. HEINZ. Let me ask the question. I want to make sure that we are dealing with the same set of facts.

The question is this: Would the Senator not think, as a second principle, that it would be advantageous to him, and perhaps to the rest of the Senate, if we are going to revisit this issue, to make his amendment amendable? I think the Senator knows that there was some controversy about his amendment on his side of the aisle immediately prior to the vote on the Boren amendment.

How does the Senator feel about that?

Mr. BOREN. Mr. President, let me say I appreciate the question that the Senator from Pennsylvania is asking. I hope we can resolve this matter. I think I detected a tone just now of a possibility that we will.

The Senator from Oklahoma would not want at this point to waive what he has already gained in terms of it not being amendable. It would be amendable after it was acted upon. If it fails, the amendment of the Senator from Pennsylvania would be offered. If it passes, the amendment of the Senator from Pennsylvania or amendment of any other Member of this body could be offered to it. It would totally change its nature after it was adopted.

I have said in previous discussions over the last 2 weeks when this matter first began to surface—we are suffering from the surfacing of it—that the Senator from Oklahoma would be perfectly willing to reopen the matter to debate. In other words, I do think the Senator from Pennsylvania has raised a good point.

Mr. HEINZ. I raised a question.

Mr. BOREN. It is an important matter.

The Senator from Oklahoma would be very willing to change the present parliamentary situation which if indeed it would preclude debate, and I believe that the Senator is correct. It is not the intent of the Senator from Oklahoma to preclude debate. The

Senator from Oklahoma would be very happy if the Senator from Kansas will make a commitment that we return to that matter. The Senator from Oklahoma would be very pleased to include in it unanimous consent to modify the previous consent we entered into several weeks ago on the floor to make the amendment subject to further debate, and the Senator from Oklahoma would not necessarily require any limitation on time.

Mr. HEINZ. Do I understand the Senator is willing to let the Senate work its will as to amendment? Is that right?

Mr. BOREN. The Senator would prefer, because the Senator negotiated for many, many days, weeks, and months—I am sure the Senator from Pennsylvania will understand this—with his cosponsors of this proposal the exact provisions of it.

That is the reason that the Senator entered into it, because it is a broad coalition. It stretches from the Senator from Colorado, Senator HART, Senator LEVIN from Michigan, Senator GOLDWATER from Arizona, Senator STENNIS—that it would not be amendable. It would be amendable after it is acted upon.

I think that would give the Senate an opportunity to completely work its will.

If there were no time limitation on it and if it were subject to debate, the Senator from Pennsylvania would have every opportunity to say if this amendment passes here is the next amendment I am going to offer to it, or whatever.

Let us say it passed in this form after debate, and the Senator from Pennsylvania, let us say, did not succeed on some amendment he felt was very important to make it acceptable before he was going to finally vote for passage of that bill, the Senator from Pennsylvania would have every right, without time limitation, to stop the bill from then passing.

I think all of the rights the Senator from Pennsylvania would be protected, and I think the Senator from Pennsylvania has raised a good point about allowing additional time for debate. I think that is very reasonable.

Mr. HEINZ. The Senator from Pennsylvania may think it is reasonable, if there is an opportunity to offer amendments.

Let me, if the Senator will yield further, state this. The Senator knows from the viewpoint of most of us, the Senator from Oklahoma cut a very smart sharp deal that allowed the Senate to debate for 2 days and vote up or down or on a tabling motion on his amendment. That was the deal that the Senator from Oklahoma cut. It was the deal that was followed thereon.

The Senate said what it had to say, voted the way it decided to vote, and I do not believe the majority leader having discharged his obligations, the Senate having lived up to its unanimous-consent request, the Senate being under no obligation to return to S. 655, that is, it is reasonable for any Member of the Senate to say we have to do it all over again as if we never did it.

Now, it seems to me reasonable that if we are going to visit the issue of campaign reform of which the Boren amendment is clearly an important part, we should allow the Senate to focus not just on the one provision that everyone talks about, which is limiting PAC's to less money per election than they now are able to contribute, but to all the other aspects of the Boren amendment which, frankly, were rather ill-considered, and if you review the debate on the floor and if you look at the questions that were asked of the sponsors of the legislation one would find very few answers responsive directly or indirectly to the questions posed by myself and others to the sponsors of the legislation on all those other issues.

Now, I would hope that the Senator from Oklahoma would have been persuaded by now that it would be advantageous to him to allow the Senate to do some fine tuning of his amendment because, as far as I can tell, it really needs it.

And is the Senator from Oklahoma saying, and I urge him to consider his answer very carefully, if the Senate were to return to his amendment he would simply under no circumstances permit any amendments to it? Is that his position?

Mr. BOREN. The Senator from Oklahoma would be willing if the Senate wants to return to the amendment now to vote on it; that is fine. If we want to call up S. 655 and vote on the pending amendment that was not tabled, we could do that. The Senator would be very willing to do that. We could vote on it. We could vote on the PAC amendment and everything else that would be brought up as far as the Senator is concerned. We could vote on that now and vote on the campaign reform amendment.

The Senate did not table the Senator's amendment. Therefore, it is alive. We were told that was meaningful action. I assume people knew what they were doing when they voted not to table it. It was still alive in a nonamendable form. When the matter is brought back to the Senate it would be under those conditions.

The Senator from Oklahoma would like to be in position to take credit for negotiating a time agreement. The Senator from Oklahoma would have to say that he received very substantial assistance from the distinguished Senator from Arizona, Senator GOLDWATER, and the distinguished Senator from Mississippi, Senator STENNIS, who were principal negotiators of that time agreement, and this Senator wants to give them credit for their very important role in those negotiations.

The Senator from Oklahoma has never suggested, and I want to state on the record again, that anyone has not kept their word on this matter. The Senator from Kansas did exactly what he said he would do. The measure was called up. We had that vote on the tabling motion at 2 p.m., just as he said we would.

The original unanimous-consent agreement did not then require us to stay on that legislation. The Senator from Kansas chose to pull it down. That is his prerogative. It is no breach of his word. It was exactly what we agreed to.

He then said he hoped we would return to it the next year, which the Senator was glad to hear. The Senator accepts that he hopes we can return to it next year.

Now, this Senator is being asked to allow these other vehicles to move, rather, the other parts of this bundle of provisions under separate bill numbers dealing with this subject. The Senator is willing to let it move. The Senator is willing to allow the Senator from Pennsylvania or anyone else time to debate. This Senator is willing to ask himself if the Senator from Pennsylvania would desire to make the campaign reform amendment debatable when we return to it.

Mr. SIMPSON. Mr. President, will the Senator yield for a question?

Mr. BOREN. In just a moment.

This Senator is also willing to allow us to have no time limitation on it at all, either before or after it is voted on, so that we have full opportunity for anyone to offer amendments and to allow the majority leader control over taking the bill back down after a couple of days if we are not able to complete it. He would, of course, have control over when it would be brought back.

In the meantime I hope it would become moot before that time. The Senator from Kansas is very interested in this subject. We have all been able to get together. We are all working out something in the meantime about this subject about which we can all be very enthusiastic. I think we could.

I would just say again I would be willing to move to vote on the campaign reform amendment right now if we want to. That would dispose of it. I would be willing to accept what the Senator from Kansas discussed—did not promise—he simply discussed the possibility of his simply saying he would return to that matter and call it back up for a reasonably period of time before June 1. This Senator is prepared to accept that. That was in

the thinking-out-loud stage, as I understand it, from the Senator from Kansas a while ago. The Senator will accept that. If the Senator from Pennsylvania requests it, wants me to, this Senator would be very happy to move to change the unanimous-consent request entered into earlier to the extent that the amendment would be debatable if and when it returns.

(Mr. PRESSLER assumed the chair.)

Mr. SIMPSON. Will the Senator yield for a question?

Mr. BOREN. The Senator is happy to yield to the Senator from Wyoming.

Mr. SIMPSON. Mr. President, I ask this of the Senator from Oklahoma at least so that I have the record complete, because I am not obsessed with this legislation. My State will function quite well. The rest of the United States will not function quite as well as of January 1 because three of the receiving States, the only receiving States, will begin to reject the low-level waste material, which will affect my State, the hospitals in my State, and it will affect the oil and gas industry in my State as they use nuclear materials. It will affect the oil and gas industry in the State of the Senator from Oklahoma in their use of nuclear facilities and materials. It will affect every hospital, with the universities at Norman and Stillwater and Oklahoma City, because they will not be able to dispose of low-level nuclear waste. It will affect Kerr-McGee; it will affect those things that are very real. If we are going to get to this level, this is where we have to get.

Let me ask the Senator a question: Is the Senator suggesting—and I heard him say this in earlier debate—that if we were to remove the central compact, the interstate low-level radioactive compact, from this package, which is the compact that grievously affects the State of Oklahoma, is the Senator saying that then we would be left with an insignificant, an unimportant, a sterile vehicle, when that is the vehicle that has been negotiated by his Governor and others within the compact who are now asking this Congress to approve this so that the Senator's State and the other affected States can get on with low-level waste disposal? That is my question.

Mr. BOREN. The Senator from Wyoming is, as always, very adroit in selecting examples and pointing out the importance of legislation. He said exactly what was pointed out to this Senator at the time that we decided to agree not to put the amendment on the Micronesia Compact of Free Association, but to put it on a very live horse. That is exactly what was said.

The reason this Senator, and I presume the Senator from Arizona, the Senator from Mississippi, and others involved, agreed to put this on this vehicle was that it was an important vehicle, one on which we would have to act. This Senator understands that hospitals have at least a 30-day holding capacity for radioactive waste; utilities have up to 6 months. The Senator would hope we would not have to run them up to their full 30 days or 6 months. But it is certainly a matter that is not going to bring everything to a halt.

This Senator is absolutely willing—perhaps if we can put in a quorum call, I have discovered that—usually we are all people of good will—we can work something out very quickly, and I think we can.

But this Senator is not trying to score rhetorical points or anything else. This Senator simply wants to move on this and is willing to move to a vote on the campaign reform amendment now. We can vote on it now and get it over with. Then we can go on to everything else. As far as I am concerned, this Senator is willing to not even have to operate under the unanimous consent and accept the commitment of the Senator from Kansas not only for a date certain, but no later than a certain date, which means the Senator from Kansas would have a whole range of flexibility on when to call it up, flexibility on when to take it down after he called it up, as long as we had a minimum of a couple of days if we were not able to dispose of it. This Senator wants the Senator from Kansas to be able to, in essence, set the schedule of the Senator, and supports that.

This Senator is willing to modify the previous unanimous-consent agreement to make the amendment debatable and to impose no time limitations before or after the vote on the amendment so that it will be subject to further amendment after it is acted upon. So that is where we are.

Perhaps if we could put in a quorum call for a minute, or whatever the majority leader would like to do, maybe we can reach a conclusion.

Mr. DOLE. Mr. President, because I need the consent of both Senators or we are not going to do anything, this discussion has been going on for 67 minutes on a matter that could have been disposed of in 2 minutes after we had reached this agreement. This matter is very vital to this Nation and time is of the essence as it is necessary that we get this measure to the House today. The House is going to be in for some time because they are going to go to the Rules Committee later on today on reconciliation. So we still have some time.

I hope that, while we are working out some reasonable agreement, we could take up some other unanimous-consent items that have been cleared on each side.

I would note for the record, so I have some defense at home, that I have already missed my wife's party which was from 12 to 1. I hope Senators will help me out on that one. [Laughter.]

But, in any event, there are some other matters that we could do by unanimous consent. Senators D'AMATO and DODD are very interested in effective dates. They have been the principal sponsors, along with Senators WILSON, HAWKINS, and others. I became involved in that to see if we could not get it done yet this session.

I first wish to thank both Senators for permitting me not to take it over but at least to become involved. I think that matter has been cleared.

PROSPECTIVE EFFECTIVE DATE FOR TAX REFORM

Mr. DOLE. Mr. President, I send a resolution to the desk on behalf of myself, Senator D'AMATO, Senator DODD, and about 55 others, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 281) relating to prospective effective date for tax reform.

Mr. BYRD. Mr. President, I ask that the resolution be read.

The PRESIDING OFFICER. The clerk will read the resolution.

The legislative clerk read as follows:

S. RES. 281

Whereas the Senate will require adequate time to consider tax reform legislation proposed by the President and the House of Representatives, and to prepare legislation which will maximize fairness and long-term economic growth and minimize short-term economic disruption; and

Whereas, it is likely that such action will not be completed before August 1986; and

Whereas, the tax legislation as prepared in the House of Representatives by the Committee on Ways and Means contains effective dates of January 1, 1986 and earlier; and

Whereas, it is unreasonable to expect taxpayers to comply with fundamental changes in the tax laws before they are enacted and they can be certain what those changes will be; and

Whereas, uncertainty as to the future of particular tax provisions is causing taxpayers either to delay decisions that they otherwise would make or to rush into transactions that, absent tax considerations, they would enter into at a more appropriate time;

Therefore, be it *Resolved*, That it is the sense of the Senate that the effective date of any fundamental tax reform legislation should generally be January 1, 1987 while recognizing that appropriate transition rules may be necessary to avoid unintended adverse effects both on taxpayers and the United States Treasury and recognizing, further that retroacitve effective dates may be necessary to extend certain provisions which expire before January 1, 1987.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Kansas?

There being no objection, the Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, today I am introducing, along with a strong bipartisan group of my colleagues, a resolution expressing the sense of the Senate that the effective date of any major tax reform legislation enacted in this Congress should generally be January 1, 1987. The reason this resolution has such widespread support is simple—it is the right thing to do.

At the outset, I should acknowledge the leadership on this issue by my distinguished cosponsor from New York [Mr. D'AMATO]. The Senator from New York, along with the Senator from Florida [Mrs. HAWKINS] and the Senator from Connecticut [Mr. DODD] earlier introduced a resolution expressing that the effective date of tax reform legislation should be no earlier than July 1, 1986. That date was a reasonable one when the resolution was introduced, but the legislative process has taken longer than originally anticipated. The Senator from New York has continued in forcefully expressing his concern that any basic changes in tax legislation be enacted prospectively and I applaud his leadership on this issue.

SENATE SCHEDULE

Congress will not be able to complete action on tax reform before mid-1986. This is not a statement of sentiment in favor or against tax reform. It is merely a realistic estimation of how long it will take the Finance Committee and the full Senate to give fundamental tax reform the consideration it deserves.

We will not accept either the House Ways and Means Committee bill or the President's original proposal without making our independent judgment on the merits of each provision. The American people expect us to take tax reform seriously and not to treat it merely as a political issue. We will do our best to deserve their trust and meet their expectations.

But adequate consideration will take time. The Finance Committee has historically taken over a month, and sometimes substantially longer, to report major tax legislation. It will then undoubtedly require some time for drafting. Once drafting is completed, a bill of this magnitude will probably occupy the Senate floor for 4 to 6 weeks. After taking into account the need to schedule other important legislation, as well as nonlegislative periods, and the time necessary to work out differences in conference, it is highly unlikely that we will be able to get a bill to the President before next summer.

With that reality, we need to let taxpayers know what we will try to do so that they can plan their business and personal matters while we do our job.

TAXPAYERS MUST BE ABLE TO PLAN

Mr. President, this Senator certainly does not oppose tax reform. I am happy to stand on my record on tax reform during the years I was chairman of the Finance Committee. However, I am also realistic. I know that it is impossible for taxpayers to plan their economic affairs when they cannot be sure what tax rules will apply.

This is not to say that everything in our economy is tax motivated. However, we must be honest with ourselves that tax implications affect nearly all transactions and, in a substantial number of situations, may make the difference on whether a transaction will go forward or not.

Unfortunately, the bill reported by the Ways and Means Committee contains effective dates of January 1, 1986 and, in the case of some provisions, even earlier. If we in the Senate who deal with tax legislation as part of our jobs don't know at this point whether we will agree with the House on certain provisions, it should be very clear that taxpayers will have no better ability to forecast what changes will be enacted. We should not put taxpayers in the position of second-guessing Congress.

THE EFFECT ON A PROSPECTIVE DATE

Mr. President, I am sensitive to the argument that making legislation effective on some future date may have an impact on taxpayer behavior. Some taxpayers who want to take advantage of a tax benefit that will be repealed or reduced may rush to enter into a transaction that might otherwise be delayed. Others who think that they may be better off under the new law may delay decisions they otherwise may make.

However, any rush to take advantage of specific benefits in present law has been taking place at least since the Ways and Means Committee began to make preliminary decisions on tax reform. What concerns me more at this point is that, even if we enact legislation which is significantly better for our economy in the long run, uncertainty about what law will apply while we complete our deliberations could cause severe short-run economic distruption.

It seems unfair and unreasonable to me to cause prudent business people using their best judgment to decide that they should delay business investment decisions, for example, because they do not know what will happen to capital cost recovery deductions, investment tax credits, or even tax rates. It is much more reasonable to let taxpayers go about their business with some sense of certainty while we go on about ours.

A GOAL, NOT A GUARANTY

Therefore, the resolution we are now introducing today states that it is the sense of the Senate that any tax reform enacted in this Congress should generally be effective January 1, 1987. It also notes that transition from one tax system to another may necessitate special rules to protect taxpayers and the Treasury from unintended adverse impact. It also suggests that, if Congress decides to extend any provisions which will expire before January 1, 1987, those extensions should have a retroactive effective date to assure that the provisions will continue in effect without interruption.

I should emphasize that this sense of the Senate resolution provides a goal, not a guaranty. It says that we intend to work for these results but, since we cannot bind the Members of the House or the administration, it may be that the final version of the legislation will have effective dates that differ from January 1, 1987. All we can do is say that we will do our best to pass legislation with a truly prospective effective date.

This Senator, for one, is gratified that the House has adopted a resolution proposed by their distinguished Republican leader, Mr. MICHEL, instructing the chairman and ranking member of the Ways and Means Committee and Finance Committee, working with the Secretary of Treasury, to prepare a list of tax reform items which would not become effective until January 1987. However, that resolution does not obviate the need for us to express our intent. The House bill still contains effective dates that are now, or soon will be, retroactive. I hope the parties specified in the House resolution will be able to agree on what most appropriately should become effective in 1987. However, the American taxpayer deserves to know where the Senate as a whole stands on this issue.

Mr. President, I hope that this expression of our intent will be helpful to people who have to live with the Tax Code while we deliberate its future. In the final analysis, I cannot believe that Congress will decide to make fundamental changes in the tax law on a retroactive basis. We cannot promise Americans that everything in any new legislation will be prospective, but there has to be consensus that the responsible position is to make major policy changes prospective in effect.

Again, it is knowledge that this effort was initially the initiative of Senators D'AMATO, DODD, HAWKINS, and later Senator WILSON. In an effort to help expedite, I join in the effort.

I do not want to take anything away from their effort. They have been most helpful, and cooperative. We now have 56 sponsors.

Our view was if we could not pass it, at least we would have more than half the Senate on record.

Mr. D'AMATO. Mr. President, I am pleased to join the distinguished majority leader in this effort to move the effective date of tax reform to January 1, 1987.

On Tuesday, the House passed a major overhaul of the Tax Code and a resolution addressing in an inadequate manner the problem of retroactivity.

The House tax bill is generally effective on January 1, 1986, except for the rate reductions which would be effective on July 1, 1986. First of all, it is disgraceful that middle-income individuals should not enjoy the only benefit of tax reform—lower rates—until six after the repeal or alteration of many tax preferences.

The House bill now comes over to the Senate. The House took almost 12 months to pass their bill. There is no reason to think that the Senate will act faster than the House did. As a result, it is vital that Congress state unequivocally that tax reform should not be retroactive.

The House resolution dealing with retroactivity is completely inadequate. The resolution states that the chairman and ranking members of the Finance and Ways and Means Committees and the Secretary of the Treasury issue a press release stating that certain tax provisions which are crucial to the economy should be extended and not altered retroactively.

This is ridiculous. Are we going to let the Treasury Department and chairman of the Ways and Means Committee decide what is crucial to the economy and what is not? This way of dealing with retroactivity flies in the face of tax fairness and simplicity. These individuals are going to decide that certain tax preferences will be extended and that certain other preferences will not be extended. This is neither fair nor simple. The changes made by tax reform should occur at the same date and not be staggered over time.

Furthermore, Treasury and Ways and Means have a definite bias against many tax provision. For instance, Treasury proposed complete repeal of the rehabilitation tax credit. Does anyone really believe that Treasury would want to extend this credit? Another example is tax exempt bonds which the chairman of Ways and Means said last night should not be extended. This will have a serious impact on general obligation bonds. I think all Senators feel general obligation bonds should continue to be issued next year.

I believe it is imperative that the effective date of any tax reform legislation be moved to January 1, 1987, before the bill is considered any further. No one should be forced to enter the next tax year with the uncertainty of retroactive tax reform hanging over their head.

After January 1, 1986, the current Federal Tax Code will, in a sense, become irrelevant. Individuals, nonprofit entities, and corporations will not know whether to abide by current law or by proposed, but not yet enacted, tax-reform legislation. In the end, many economic transactions will be postponed until tax reform either is enacted or is laid aside.

Support for tax reform without retroactivity is support for an effective marketplace. It is not an expression of support or opposition for either tax reform, in general, or for any one specific tax-reform proposal. It is just plain common sense designed to keep America's economy moving.

To amend this inequity on October 25, I introduced with Senators HAWKINS and DODD a resolution which stated that the effective date of any tax reform legislation should be no earlier than July 1, 1986. Subsequently, my friend, the distinguished majority leader, has decided to offer an improved resolution concerning the effective date of tax reform, moving the effective date to January 1, 1987. I am an original cosponsor of this resolution and pleased to give it my complete support.

Too many times the rules have been changed in the middle of the game. I believe this is an opportunity to play fair and to set a prospective, rather than retroactive, effective date for any tax-reform legislation which may be adopted. Individuals and companies should be allowed to operate freely under current law until that time when tax reform is enacted.

I thank the majority leader for taking such a visible role in this issue and I urge my colleagues to support the proposed amendment.

Thank you, Mr. President.

Mr. President, before I begin, let me commend Senator DOLE for taking such a visible role in this matter. Senator DODD and I raised this question on effective dates of tax reform sometime last year, because we were concerned of the chilling effect that would take place in our economy. That is that the economic impact of proposed tax-reform legislation without a prospective effective date would have a devastating impact on the marketplace. No one should be forced to enter the next tax year with the uncertainty of retroactive tax reform hanging over their head.

So, Mr. President, I think it is absolutely imperative that the effective date of any tax-reform legislation be moved to January 1, 1987. We must let the economy, the Nation's marketplace, continue to operate freely. We must not impair the Nation's economy as a result of uncertainty as to when the effective date will be.

I can tell you that there are major business deals in my own State, and I dare say throughout the length and breadth of this country that will not go forward if we do not act. If we do fail to act, there will be a loss of tens of thousands of jobs.

When we talk about the economy, and what the tax bill will mean, I will tell you, that without the certainty of when effective dates will occur—that we are doing substantial damage to the economy.

I want to commend Senator DOLE; my colleague, Senator DODD; and 15 others who originally came forth and recognized the importance of this piece of legislation.

I must say that the House resolution dealing with retroactivity is completely inadequate. It is a sham. In the press release they say the ranking members of Ways and Means and the Secretary of the Treasury are going to come together, they are going to decide which provisions will be retroactive, and when the effective dates will be taking place. It seems to me, that these are the same individuals who decided on the original effective dates and what parts of the Code should be effective. This is ridiculous.

I do not think there is anything more important that we can do for the individual taxpayer, the financial community, and the working people of America, then seeing to it that the Senate is strongly on record saying that the effective date will be January 1, 1987.

I thank the majority leader and my colleagues, Senator DODD, for their strong support on this matter.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Mr. President, very briefly, let me thank the distinguished majority leader.

Mr. President, the majority leader has not detracted at all by promoting this piece of legislation. He adds substantially to it with his insistence that this matter be brought up in the form of a resolution before we adjourn, as my good friend and colleague from New York has pointed out going back almost a year ago, and I think Treasury, too, first announced it.

In that particular proposition, there were a whole host of effective dates included in that proposal, and just for the introduction of that piece of legislation by the administration had a profound effect in the marketplaces.

It was a result of that particular proposal and the effective dates that were mentioned in that piece of proposed legislation that I, along with my colleague from New York, introduced the first resolution which very much approached in similarity the matter before us here in this resolution.

I think the Senator from New York accurately points out we now have two resolutions. This resolution, of course, calls for the chairman and the ranking minority member and the Secretary of

the Treasury to decide what the effective dates ought to be. That goes far beyond what any of us here would like to see occur. That certainly is a responsibility I think for those of us in the Congress as a whole to make those decisions, and as a practical matter we all recognize as well by the time we finish consideration of this legislation in the coming year the effective date would be 1987 at any rate. So I am delighted to join today in this proposal.

My hope is that it will have the effect of the Senator from New York has suggested, and we will not find people engaging in certain behavior or desisting in certain behavior merely because someone has proposed a piece of legislation with an effective date that would predate, of course, the enactment of that legislation.

Mr. President, I rise as a cosponsor in strong support of the resolution being offered by the distinguished majority leader, Senator DOLE, concerning the effective dates of pending tax reform provisions. This resolution states the sense of the Congress that, as a general rule, pending tax changes will be effective no earlier than January 1, 1987. I believe that this is one of the most positive and necessary statements this Congress will make in the closing moments of this congressional session. Since the unveiling of Treasury II, I have advocated action similar to that being taken today. In January of this year, I introduced a Senate resolution setting out the general principle that changes in tax laws should take effect no earlier than enactment. My resolution further addressed the need for reasonable transition rules. Several months ago, I joined with Senator D'AMATO and HAWKINS in sponsoring a similar measure. As the tax reform debate got off the ground this year, a variety of initiatives were advanced with effective dates prior to enactment. In many instances, economic behavior was altered based not on what the Congress might do, but rather on what might be enacted being applied retroactively. This chilling effect resulted in a definite slowdown of economic activity in certain areas. Except in instances involving egregious abuse of the law, I believe the retroactive application of any law violates fundamental principles of fairness. Even where abuses exist, the Congress should move expeditiously to close the particular loophole or enact the appropriate correction. This issue of retroactivity is most inappropriate as part of a comprehensive attempt at tax reform. Such an effort can succeed only with a broad-based consensus and support from investors and the business community. How ironic to begin the debate, therefore, with proposals carrying dates of implementation corresponding to the mere introduction of an idea.

Mr. President, the resolution now before the Senate is pro tax reform and deserves our unanimous endorsement. There will be ample opportunity next session to debate the specifics of tax legislation. With this resolution, I believe we send an important signal that these deliberations begin on a note of fairness and equity.

Mr. METZENBAUM. Mr. President, I rise to comment on this resolution, not to oppose it, not to get overly enthusiastic about it either. I think the resolution is one of those that you have to think about a bit because it will impact upon the tax aspects of our laws during the year 1986, and will indicate the Senator does not believe anything should be effective until January 1987.

Since I think tax reform is very much called for, and I hope the Senate would move promptly to act with respect to the House-passed bill, I would have hoped we would be able to put this kind of tax reform provisions into effect as early as possible.

But as I thought about the subject a minute it occurred to me that if you do not have the January 1, 1987, effective date you very well may have much more difficulty in passing any tax reform provision; I think it would be an impediment. I think everybody would be down here crying with their handkerchiefs out, and tears rolling down their faces about how this deal or that deal was being killed, and that therefore we should not pass the bill at all.

I believe it is imperative that we face up to our responsibilities, and that we act with dispatch because I belive that there is a better chance of getting tax reform legislation through the U.S. Senate if we do make it prospective rather than retroactive to January 1, 1987. I think there is considerable merit in our doing that which is proposed by the resolution.

Mr. DOLE. Mr. President, Senator DOMENICI is one of the cosponsors of this resolution. However, he is necessarily absent today. Therefore, I would like to send to the desk his statement on this important resolution, and ask unanimous consent that it appear in the RECORD.

● Mr. DOMENICI. Mr. President, when it comes to changes in the Tax Code, uncertainty breeds contempt. In addition, decisionmaking becomes unduly complicated and tax planning becomes a nightmare. The Congress is getting ready to adjourn for the first session of the 99th Congress and we are leaving unresolved the fate of tax reform. Because the 1,379-page Ways and Means Committee bill, the President's plan, and the Republican package, touch just about every major provision in the code, I feel it is very important that the Congress give a clear indication about when any changes would take place. That is why this resolution is so important. By plainly stating that none of the general provisions of any tax bill passed in 1986 will be effective until January 1, 1987, the Congress accomplishes two very important objectives. First, if this resolution is passed, everyone would know what the rules will be for 1985 and 1986. This reestablishes continuity and unties individuals' and businessmen's hands because they know what the rules will be.

Second, this will end speculation about the fate of this radical tax reshuffle. I think it is wrong for Congress to leave taxpayers with no alternative but to second-guess us. A clear statement of intention is good public policy as well as good economic policy. Our economy does not need stalling, second-guessing and speculating.

I have received dozens of telephone calls, stacks of letters, and a healthy number of telegrams. Their message is best exemplified by this urgent plea:

> Whatever the outcome of the tax bill, it is urgent you do not, repeat, do not, leave a cloud of uncertainty over the economy in early 1986 by not clarifying possibilities of retroactive tax changes later in the year.

I have a county in New Mexico that needs to reissue adjustable rate bonds. They don't know whether they can issue tax-exempt bonds as they have in the past, or whether they have to issue taxable bonds that will be harder to market and more expensive for the county. Under current law the bonds could be tax-exempt. Under the Rostenkowski bill they would have to be taxable bonds. I don't have to tell you what their bond counsel thinks about the dangling tax bill. Furthermore, the county commissioners feel like they have no choice but to issue taxable bonds even though it is possible this provision will never become law. The practical result for this county is legislation regardless of whether we act or not. This is not the way our process is designed to work.

There are a group of developers in Santa Fe that are waiting to see what happens to the historic tax credit. If they knew they had until the end of 1987 they would move forward and complete a very worthwhile project. They have all the plans and certifications and were moving ahead until the potential effective dates stopped them cold. Until they know what the 1986 rules are going to be, they are not doing any historic renovation. This is the type of paralyzing effect the uncertainty is causing. This is the type of paralyzing effect that this resolution can eliminate.

Aside from the question of general effective dates, I think Congress should also make it clear that any transition rule periods would begin to be measured from the January 1, 1987, as well. This would mean that transition rules would start January 1, 1987,

and be judiciously drawn so that transactions began under current law would be treated under current law.

I think we all have a stake in insuring that the economy does not slow down because of tax reform. I also think that taxpayers should not be penalized because they cannot complete their projects by the time Congress completes tax reform. We sometimes forget that business is not conducted around the congressional timetable.

I have some very serious concerns about the tax reform bill that was reported out of the House Ways and Means Committee. According to the business roundtable the provisions in the bill, if enacted, would put the United States dead last in terms of competitive incentives among its major world competitors.

The administration, by its own admission states that tax reform would increase the cost of funds for investment in business equipment by more than 40 percent and increase the tax burden for corporations by $140 billion over 5 years in order to get a 1.1-percent increase in GNP by 1996. According to Martin Feldstein, former chairman of the Council of Economic Advisers, the natural process of growth would raise real GNP by 30 to 40 percent between now and 1996 if the tax law is left unchanged. I am unconvinced that we should be increasing the cost investment when the United States is restructuring to meet the international competitive challenge.

I intend to further discuss the merits of tax reform as the process moves further along. Our task today is to pass a resolution that will clearly state congressional intent regarding the potential effective date of any tax reform bill passed in 1986.

I urge all of my colleagues to vote for this resolution. Thank you, Mr. President.●

Mr. DOLE. Mr. President, I indicate there are 66 sponsors; 14 of those are members of the 20-member Finance Committee.

Mr. PRYOR. Mr. President, I'm pleased to be an original cosponsor of the pending resolution dealing with the effective dates of any tax reform measure that might ultimately be enacted.

As I stated yesterday in a letter to the chairman of the Committee on Finance, Mr. PACKWOOD, the present situation presents us with the worst of all worlds—a House-passed bill, no action by the Senate until sometime next year, and effective dates in the House bill spread over several months. This situation, unless corrected through resolutions, or a joint statement by the chairmen of both tax-writing committees, will create serious problems for both businesses and individuals in 1986. Business planning will be virtually impossible without some guidance as to the effective date of the tax changes.

For all of these reasons, I think it is preferable to move the effective dates until the end of 1986. I strongly support the pending resolution, and I hope it is unanimously adopted by the Senate.

Mr. LOCKWOOD. Mr. President, the Senate today considered and passed a resolution intended to ensure that no provision of the tax reform bill which the House has sent to the Senate will become effective before January 1, 1987.

The resolution has been offered by the majority leader and has been cosponsored by many Senators. The intent of the sponsors is to provide an economic environment of stability and certainty. Those are goals that we all applaud and support. There is no one in the Senate who will work harder to achieve those goals than I. There can be no question that we want to avoid uncertainty in the private sector over what provisions are going to be in the tax reform bill and when they are going to be effective.

At the same time, Mr. President, I feel it incumbent to warn the Senate and all those in the private sector and in the public sector who may be contemplating investments or making economic decisions that neither the majority leader nor I nor Chairman ROSTENKOWSKI nor any other Member of the House or the Senate can guarantee what the effective dates of legislation are going to be.

Also, if by chance we moved all the effective dates, which are now January 1, 1986, in the House bill, to January 1, 1987, there would be an extraordinary loss of revenue, which would mean that the President's tax reform would no longer be revenue neutral, and it would mean that it would be well neigh impossible to pass a bill

I am perfectly willing to state that I will do everything possible to ensure that transition rules and effective dates are fair, that they will not harm investment decisions, that they will help to ensure growth in the economy. But if anyone makes investment decisions based upon the passage of Senate resolutions or House resolutions suggesting different alternative dates than appear in the House bill, they do that at their own risk. I would not want them to come back to me or the majority leader or any members of the Finance Committee and say that they had been misled.

I do not know what the effective dates will be. I cannot guarantee what the effective dates will be. Everyone who is contemplating making economic decisions should understand that when they make them.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 281) was agreed to.

The preamble was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. I am asking recognition on behalf of the majority leader.

The PRESIDING OFFICER. The majority leader holds the floor.

The Senator from Pennsylvania.

FEDERAL EMPLOYEES BENEFITS IMPROVEMENT ACT

Mr. HEINZ. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 3384.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 3384) entitled "An Act to amend title 5, United States Code, to expand the class of individuals eligible for refunds or other returns of contributions from contingency reserves in the Employees Health Benefits Fund; to make miscellaneous amendments relating to the Civil Service Retirement System and the Federal Employees Health Benefits Program; and for other purposes", do pass with the following amendments:

Page 1, strike out all after line 8 over to and including line 21 on page 3, and insert:

(a) DEFINITIONS.—Section 8901 of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (9);

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof the following new paragraphs:

"(11) 'certified nurse-midwife has the same meaning given to such term in section 1905(m) of the Social Security Act; and

"(12) 'qualified clinical social worker' means an individual—

"(A) who is licensed or certified as a clinical social worker by the State in which such individual practices; or

"(B) who, if such State does not provide for the licensing or certification of clinical social workers—

"(i) is certified by a national professional organization offering certification of clinical social workers; or

"(ii) meets equivalent requirements (as prescribed by the Office).".

(b) NURSES AND NURSE-MIDWIVES.—Section 8902(k) of title 5, United States Code, is amended by striking out "or optometrist" each place it appears and inserting in lieu thereof "optometrist, nurse, or certified nurse midwife".

(c) CLINICAL SOCIAL WORKERS.—Section 8902(k) of title 5, United States Code, is further amended—

(1) by striking out "(k)" and inserting in lieu thereof "(k)(1)";

(2) by striking out the last sentence; and

(3) by inserting at the end thereof the following:

"(2) When a contract under this chapter requires payment or reimbursement for services which may be performed by a qualified clinical social worker, an employee, annuitant, family member, or former spouse covered by the contract shall be entitled under the contract to have payment or reimbursement made to him or on his behalf for the services performed. As a condition for the payment or reimbursement, the contract—

"(A) may require that the services be performed pursuant to a referral by a psychiatrist; but

"(B) may not require that the services be performed under the supervision of a psychiatrist or other health practitioner.

"(3) The provisions of this subsection shall not apply to group practice repayment plans.".

(d) EFFECTIVE DATES.—The amendments made by subsections (a), (b), and (c) shall be effective with respect to contracts entered into or renewed for calendar years beginning after December 31, 1986.

Page 10, lines 1 and 2, strike out physician or nurse; and insert: physician, nurse, or other licensed health professional with training in occupational safety and health;

Page 10, line 14, strike out fitness; and insert: fitness, including weight reduction;

Page 11, lines 5 and 6, strike out physicians and dentists; and insert: physicians, dentists, and other licensed health professionals;

Page 11, line 12, strike "production", and insert: "productivity".

Page 13, line 18, after "health," insert: "school of nursing".

Page 13, after line 21, insert the following:

(B) The authority of the Director of the Office of Personnel Management to enter into contracts or to make grants under subparagraph (A) is effective for fiscal year 1986 and subsequent fiscal years only to such extent or in such amounts as are provided in appropriation Acts.

Page 13, line 22, strike "(B)" and insert in lieu thereof "(C)".

Page 14, after line 10, insert the following:

SEC. 110. ADDITIONAL TYPE OF HEALTH BENEFITS PLAN.

Paragraph (4) of section 8903 of title 5, United States Code, is amended by adding at the end thereof the following new subparagraph:

"(C) MIXED MODEL PREPAYMENT PLANS.—Mixed model prepayment plans which are a combination of the type of plans described in subparagraph (A) and the type of plans described in subparagraph (B).".

SEC. 111. REPEAL OF 75 PERCENT MAXIMUM IN GOVERNMENT CONTRIBUTIONS.

(a) REPEAL OF 75 TO MAXIMUM.—Section 8906(b)(2) of title 5, United States Code, is amended to read as follows:

"(2) The biweekly Government contribution for an employee or annuitant enrolled in a plan under this chapter shall not exceed 100 percent of the subscription charge.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall be effective with respect to pay periods commencing on or after March 1, 1986.

SEC. 112. RESTRICTIONS RELATING TO AMOUNTS REFUNDED TO THE EMPLOYEES HEALTH BENEFITS FUND FROM CARRIERS' SPECIAL RESERVES.

(a) PROHIBITED TRANSFERS.—(1) No amount in the Employees Health Benefits Fund may be transferred to the general fund of the Treasury of the United States or the United States Postal Service as a result of a refund described in paragraph (2).

(2) This subsection applies with respect to any refund made by a carrier during fiscal year 1986 or 1987 to the Employees Health Benefits Fund to the extent that such refund represents amounts in excess of the minimum level of financial reserves necessary to be held by such carrier to ensure the stable and efficient operation of its health benefits plan.

(b) RESTRICTION RELATING TO USE OF CERTAIN AMOUNTS IN THE FUND.—(1) Any amount which is in the Employees Health Benefits Fund, and which is described in paragraph (2), may be used solely for the purpose of paying the Government contribution under chapter 89 of title 5, United States Code, for health benefits for annuitants enrolled in health benefits plans.

(2) This subsection applies with respect to any amounts—

(A) which are referred to in subsection (a)(2); and

(B) which are attributable to Government contributions (other than contributions by the government of the District of Columbia) that were made under section 8906(b) of title 5, United States Code, as determined under regulations which the Office of Personnel Management shall prescribe.

(c) DEFINITIONS.—For the purpose of this section—

(1) the term "Employees Health Benefits Fund" refers to the fund described in section 8909(a) of title 5, United States Code;

(2) the term "carrier" has the meaning given such term by section 8901(7) of such title; and

(3) the term "health benefits plan" has the meaning given such term by section 8901(6) of such title.

Page 16, line 14, after "occurring", insert "on or"

Page 17, line 6, strike out "to" and insert: "in the case of".

Page 17, strike lines 10 through 18 inclusive, and insert:

"(B)(i) The requirement described in clause (ii) shall not apply to an election made by an employee or Member under section 8339(j)(3) of title 5, United States Code (as amended by section 2(3)(A) of this Act), in order to provide a survivor annuity under section 8341(h) of such title (as amended by section 2(4)(G) of this Act) in the case of a former spouse referred to in subparagraph (A) if the election meets the requirements of clause (iii).

"(ii) The requirement referred to in clause (i) is the requirement prescribed in section 8339(j)(3) of title 5, United States Code, for an employee or Member to make an election in the case of a former spouse under such section 8339(j)(3) at the time of retirement or, if later, within 2 years after the date on which the marriage of the former spouse to the employee or Member is dissolved.

"(iii) Clause (i) applies to an election which is made by an employee or Member who retires on or after May 7, 1985, and before the date of the enactment of the Federal Employees Benefits Improvement Act of 1985, and is received by the Office of Personnel Management within the 2-year period beginning on the date of the enactment of such Act.

Page 18, line 9, strike out "May 7, 1985," and insert: "the date of the enactment of this Act".

Page 19, line 4, strike out "(6)", and insert in lieu thereof "(5)".

Page 20, line 3, strike out "(6)", and insert in lieu thereof "(5)".

Page 22, strike out all after line 16 over to and including line 11 on page 24.

Page 24, line 12, strike out "203", and insert: "202".

Page 24, line 16, strike out "204", and insert: "203".

Page 28, line 9, strike out "205", and insert: "204".

Page 28, line 20, strike out "206", and insert: "205".

Page 29, line 14, strike out "207", and insert: "206".

Page 29, line 21, strike out "208", and insert: "207".

Page 30, line 1, strike out "209", and insert: "208".

Page 32, after line 9, add the following:

SEC. 305. MINIMUM ANNUITY UNDER THE CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM.

(a) REPEAL.—Section 8345(f) of title 5, United States Code, is repealed.

(b) SAVINGS PROVISION.—An annuity payable from the Civil Service Retirement and Disability Fund as of the day before the date of enactment of this Act shall not be reduced—

(1) by reason of the repeal of section 8345(f) of title 5, United States Code; or

(2) if or to the extent that the reduction is to be made for the purpose of eliminating an overpayment resulting from the manner in which such section 8345(f) has been administered by the Office of Personnel Management.

(c) RATIFICATION OF ERRONEOUS PAYMENTS.—Any individual to whom an overpayment of an annuity has been made from the Civil Service Retirement and Disability Fund before the date of enactment of this Act shall be deemed to have been entitled to that overpayment if and to the extent that such overpayment resulted from the manner in which the Office of Personnel Management has administered section 8345(f) of title 5, United States Code.

(d) ADJUSTMENTS OF CERTAIN REDUCTIONS.—(1) Effective for any month after the date of enactment of this Act, the amount of any annuity which—

(A) is payable from the Civil Service Retirement and Disability Fund; and

(B) was reduced after June 30, 1985, and before the date of enactment of this Act, to eliminate any overpayment resulting from the manner in which the Office of Personnel Management administered section 8345(f) of title 5, United States Code,

shall not be less than the amount which would have been payable as of such date of enactment if the reduction described in clause (B) had not been made.

(2)(A) The Office shall make a lump-sum payment to each individual receiving an annuity to which paragraph (1) applies.

(B) The lump-sum payment made to any individual under this paragraph shall be equal to the excess of—

(i) the total amount of the annuity payments which would have been made to the individual for the period beginning with the first month in which the reduction described in paragraph (1)(B) was made and ending on the last day of the month in which this Act is enacted if the reduction had not been made, over

(ii) the total amount of the annuity payments which have been paid to such individual for that period.

SEC. 306. CIVIL SERVICE BENEFITS FOR FORMER EMPLOYEES OF COUNTY COMMITTEES.

(a) RETENTION.—Section 3502(a)(C) of title 5, United States Code, is amended by striking out "who is an employee in or under the Department of Agriculture".

(b) RATE OF PAY ON CHANGE OF POSITION.—Section 5334(e) of title 5, United States Code, is amended—

(1) by inserting a comma after "may"; and

(2) by striking out "under the Department of Agriculture,".

(c) ACCRUAL AND ACCUMULATION OF LEAVE.—The first sentence of section 6312 of title 5, United States Code, is amended by striking out "in the case of any officer or employee in or under the Department of Agriculture".

SEC. 307. 18-MONTH PERIOD TO ELECT A SURVIVOR ANNUITY UNDER THE CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM.

(a) IN GENERAL.—Section 8339 of title 5, United States Code, is amended by adding at the end thereof the following:

"(o)(1)(A) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who notifies the Office at such time (in accordance with subsection (j)) that a survivor annuity under section 8341(b) of this title is not desired,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a reduction under subsection (j) made in the annuity of the employee or Member (or in such portion thereof as the employee or Member may designate) in order to provide a survivor annuity for the spouse of such employee or Member.

"(B) An employee or Member—

"(i) who, at the time of retirement, is married, and

"(ii) who, at such time designates (in accordance with subsection (j)) that a limited portion of the annuity of such employee or Member is to be used as the base for a survivor annuity under section 8341(b) of this title,

may, during the 18-month period beginning on the date of the retirement of such employee or Member, elect to have a greater portion of the annuity of such employee or Member so used.

"(2)(A) An election under subparagraph (A) or (B) of paragraph (1) of this subsection shall not be considered effective unless the amount specified in subparagraph (B) of this paragraph is deposited into the Fund before the expiration of the applicable 18-month period under paragraph (1).

"(B) The amount to be deposited with respect to an election under this subsection is an amount equal to the sum of—

"(i) the additional cost to the System which is associated with providing a survivor annuity under subsection (b)(2) of this section and results from such election taking into account (I) the difference (for the period between the date on which the annuity of the participant or former participant commences and the date of the election) between the amount paid to such participant or former participant under this subchapter and the amount which would have been paid if such election had been made at the time the participant or former participant applied for the annuity, and (II) the costs associated with providing for the later election; and

"(ii) interest on the additional cost determined under clause (i) of this subparagraph computed using the interest rate specified or determined under section 8334(e) of this title for the calendar year in which the amount to be deposited is determined.

"(3) An election by an employee or Member under this subsection voids prospectively any election previously made in the case of such employee or Member under subsection (j).

"(4) An annuity which is reduced in connection with an election under this subsection shall be reduced by the same percentage reductions as were in effect at the time of the retirement of the employee or Member whose annuity is so reduced.

"(5) Rights and obligations resulting from the election of a reduced annuity under this subsection shall be the same as the rights and obligations which would have resulted had the employee or Member involved elected such annuity at the time of retiring.

"(6) The Office shall, on an annual basis, inform each employee or Member who is eligible to make an election under this subsection of the right to make such election and the procedures and deadlines applicable to such election.".

(b) EFFECTIVE DATE AND APPLICATION.—(1) The amendment made by subsection (a) shall take effect 3 months after the date of the enactment of this Act.

(2)(A) Subject to subparagraph (B), the amendment made by subsection (a) shall apply with respect to employees and Member who retire before, on, or after such amendment first takes effect.

(B) For the purpose of applying the provisions of paragraph (1) of section 8339(o) of title 5, United States Code (as added by subsection (a) of this section) to employees and Members who retire before the date on which the amendment made by subsection (a) first takes effect—

(i) the period referred to in subparagraph (A) or (B) of such paragraph (as the case may be) shall be considered to begin on the date on which such amendment first becomes effective; and

(ii) the amount referred to in paragraph (2) of such section 8339(o) shall be computed without regard to the provisions of subparagraph (B)(ii) of such paragraph (relating to interest).

(3) For purposes of this subsection, the terms "employee" and "Member" each has the meaning given that term in sections 8331(1) and 8331(2) of title 5, United States Code, respectively.

Mr. STEVENS. Mr. President, on September 30, 1985, the House passed H.R. 3384, the Federal Employees Benefits Improvement Act of 1985. That legislation was reviewed and amended, and approved unanimously by the Governmental Affairs Committee on November 19, 1985. The Senate passed H.R. 3384, as amended, on December 11, 1985. The House has made additional amendments to the legislation which I urge the Senate to adopt. As originally amended by the Senate, the legislation is organized into three titles.

The provisions of title I make certain amendments to the Federal Employees Health Benefits Program—including an authorization allowing retired enrollees to receive refunds from the employees health benefits fund. The provisions of title II amend the Civil Service Retirement Spouse Equity Act of 1984, Public Law 98-615. Finally, the provisions of title III make miscellaneous amendments to title 5 of the United States Code. This bill does not authorize any new budget authority for fiscal year 1986 for activities required by its provisions.

As mentioned, section 105 of title I would enable the retired enrollees in the Federal Employees Health Benefits Program to receive a refund which will be offered by 11 plans in the program. This change will benefit hundreds of thousands of Federal retirees who, like current employees, are entitled to the excess reserves that have accumulated. in the program. The excess reserves have accumulated, in part, because of declining utilization of health care by Federal employees and annuitants. It is my hope that after the passage of this legislation plans will expedite the distribution of the refunds to all eligible enrollees.

In addition to the provision authorizing refunds to eligible Federal retirees, I would like to mention briefly two other provisions of title I. Section 101 requires direct reimbursement for services provided by nurses and nurse-midwives under the Federal Employees Health Benefits Program. In other words, if a Federal health plan covers obstetrical care and a nurse-midwife performs the service, then he or she shall be entitled to payment or reimbursement. Finally, section 106 of title I permanently and retroactively reauthorizes a program that expired on December 31, 1984. That program provided that if a health plan contract provided for the reimbursement of the cost of a particular health service, the carrier was required to reimburse for such service, the carrier was required to reimburse for such service provided by any State licensed health care provider if the service was provided in a State—such as Alaska—where 25 percent or more of the State's population was located in primary medical care manpower shortage areas.

The provisions of title II amend Civil Service Retirement Spouse Equity Act of 1984 (Public Law 98-615) that we passed last fall. The majority of these amendments are technical in nature, however, several are substantive. The technical amendments affect the prospective provisions of last year's legislation which authorized, for the first time, State courts to award survivor annuities to former spouses of Federal employees. The substantive amendments generally broaden the quite narrow retroactive provisions of Public Law 98-615 which authorized survivor annuities for a small class of former spouses of Federal retirees.

The provisions of title III make certain miscellaneous amendments to title V of the United States Code. For example, section 304 would allow individuals authorized to receive hospitalization and dispensary services at naval

hospitals and dispensaries outside the continental United States and in Alaska to also receive dental care. Dental treatment is prohibited under current law, except as an adjunct to inpatient hospital care. However, this prohibition applies only to naval hospitals and dispensaries, no similar prohibition applies to hospitals and dispensaries operated by the other military services.

Individuals would be required to pay for any dental care received at rates prescribed by the Secretary of Defense. The care would be provided only on a space-available basis and would not require added personnel resources at any of the locations.

Permitting this dental care in the limited circumstances described will contribute to the well-being and productivity of employees in foreign areas. Alaska is also included so that employees working at the Naval Station, Adak, in the Aleutian Islands, will not be required to fly 1,000 miles or more at great personal expense to obtain routine dental care.

Mr. President, I thank the majority leader for bringing this bill to the floor, and I ask unanimous consent that a section-by-section summary of the Senate committee amendment to H.R. 3384, and a Congressional Budget Office cost estimate for the same be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

SECTION-BY-SECTION SUMMARY

(Committee amendment to H.R. 3384, Federal Employees Benefits Improvement Act of 1985)

TITLE I—FEDERAL EMPLOYEE HEALTH BENEFITS

Section 101, subsection (a), authorizes direct reimbursement for health services performed by nurses and certified nurse-midwives under the Federal Employees Health Benefits Program. For example, if a Federal health plan contract requires payment or reimbursement for obstetrical care, and a nurse-midwife performs the service, then he/she shall be entitled to payment or reimbursement. "Nurses" means, but shall not be limited to, nurse practitioners, clinical nurse specialists, and certified registered nurse anesthetists.

Subsection (b) authorizes direct reimbursement for services performed by clinical social workers under the Federal Employees Health Benefits Program. Federal health plans may require that the services be performed pursuant to a referral by a psychiatrist, but may not require that the services be performed under the supervision of a psychiatrist or other health practitioner.

The amendments made by subsections (a) and (b) shall take effect with respect to contracts entered into or renewed for calendar years beginning after December 31, 1986.

In addition, the Committee instructs the Director of the Office of Personnel Management, in consultation with the Comptroller General of the United States, to carry out a study to determine the feasibility of direct reimbursement for services provided by marriage and family counselors, dieticians, and nutritionists under the Federal Employees Health Benefits Program.

The Director shall transmit a report on the study to the Committee not later than 9 months after the date of the enactment of this Act.

Section 102 eliminates the requirement that group-practice prepayment plans include physicians representing at least three major medical specialties and provides that such plans shall include at least three physicians who represent one or more medical specialties.

Section 103 allows the Office of Personnel Management to waive the eligibility requirements which an annuitant must meet to continue his/her enrollment under the Federal Employees Health Benefits Program.

Section 104 requires the Office of Personnel Management to conduct an open season of not less than three weeks before the start of any contract term in which—an adjustment is made in any rates charged or benefits provided under a health benefits plan, a newly approved health benefits plan is offered, or an existing plan is terminated.

The amendments made by this section shall take effect with respect to contracts entered into or renewed for calendar years beginning after December 31, 1986.

Section 105 provides authority for the Office of Personnel Management (OPM) to reduce the contributions of enrollees to the Federal health plans.

Current law, according to a Department of Justice opinion, authorizes such reductions for employees, but not annuitants. This change will allow OPM to reduce contributions in the 1986 contract year for all enrollees—employees and annuitants.

In the 1986 contract year, eleven Federal health plans will offer refunds to their subscribers in order to reduce their excess reserves. The Committee believes that the proposed refunds are in accordance with OPM's authority to use excess reserves to reduce contributions, but that the refunds should be available to annuitants, as well as employees.

Section 106 permanently and retroactively reauthorizes a program that expired on December 31, 1984. That program provided that if a health plan contract provided for the reimbursement of the cost of a particular health service, the carrier was required to reimburse for such service provided by any state licensed health care provider if the service was provided in a state where twenty-five percent or more of the state's population was located in primary medical care manpower shortage areas.

The amendments made by this section shall take effect with respect to services provided after December 31, 1984.

Section 107 requires the Office of Personnel Management to encourage participating Federal health plans to provide adequate benefits for the treatment of mental illness, alcoholism and drug addiction (including inpatient and outpatient coverage and catastrophic protection).

Section 108 requires the Office of Personnel Management to study the adequacy of the Federal Employees Health Benefits Program information delivery system and submit a report on such to Congress not later than March 1, 1986.

Section 109 requires the Director of the Office of Personnel Management, in consultation with the Secretary of Health and Human Services to conduct a demonstration project to determine the most effective means of furnishing health protection, health promotion, and disease prevention services to Federal employees.

TITLE II—CIVIL SERVICE SPOUSE AND FORMER SPOUSE EQUITY IMPROVEMENTS

Section 201 revises the application and special elections provisions of the Civil Service Retirement Spouse Equity Act of 1984 (P.L. 98-615).

Subsection (a), of section 201, amends section 4(a)(1) of P.L. 98-615 providing that the amendments made by section 2 of that Act shall also apply to any individual who, on or after May 7, 1985, is married to a retired employee. Subsection (a) makes a technical amendment to section 4(a)(2) of that Act. Subsection (a) adds section 4(a)(3) to P.L. 98-615 providing that a widow's or widower's survivor annunity will not be terminated if she/he remarries on or after attaining the age of 55. This amendment shall apply to any such remarriage occurring on or after November 8, 1984. Subsection (a) adds section 4(a)(4) to P.L. 98-615 providing that the rules governing elections of survivor benefits upon marriage and remarriage after retirement and length of marriage requirements apply to individuals retiring before, on or after the effective date of that Act (May 7, 1985). The amendments referred to in subparagraph (A) of section 4(a)(4) shall not apply in the case of a marriage of an employee retiring before May 7, 1985, if the marriage occurred after May 6, 1985, and before the enactment date of the Federal Employees Benefits Improvement Act of 1985. Subsection (a) adds section 4(a)(5) to P.L. 98-615 providing that an employee may elect to have his/her annuity reduced in order to provide a survivor annuity to a former spouse whose marriage to such employee terminated before May 7, 1985, if such employee retires on or after May 7, 1985. Finally, subsection (a) adds section 4(a)(6) providing that the 9-month marriage requirement shall apply to any marriage occurring on or after the date of enactment of P.L. 98-615.

Subsection (b) makes amendments to Section 4(b) of the Civil Service Retirement Spouse Equity Act of 1984 (P.L. 98-615). The amendment made to section 4(b)(1) of that Act in subparagraphs (A) and (B) of paragraph 1 allows the former spouse of an employee who died in service before May 7, 1985, and who was eligible to retire on the date he or she died, to receive a survivor annuity if the former spouse meets the conditions set forth in Section 4(b)(1)(B) of P.L. 98-615, as amended by this Act. Without this change, section 4(b)(1) of P.L. 98-615 allows only former spouses of employees who actually retired before May 7, 1985, to receive survivor annuities if they meet the specified conditons.

The amendment made by paragraph (1)(C) eliminates the requirement that the former spouse of an employee who retired before May 7, 1985, or who died in service before May 7, 1985, and who was eligible to retire on the date he or she died, must not be entitled to any other retirement or survivor annuity in order to qualify for a Civil Service annuity under section 4(b)(1)(B) of P.L. 98-615, as amended by this Act. The amendment made by paragraph (2) of this Act is a technical, drafting change.

The amendment made by paragraph (3) of this Act adds section 4(b)(4) to P.L. 98-615 providing that a fomer spouse of an employee who retired before May 7, 1985, who satisfies the requirements of clauses (ii) through (v) of section 4(b)(1)(B) of P.L. 98-615, as amended by this Act, shall be entitled to a survivor annuity if there is no surviving spouse of the employee and no other

former spouse of such employee who is entitled to receive a survivor annuity based on the creditable service of such employee and there is no other person who has been designated to receive a survivor annuity by reason of an insurable interest in such employee.

The amendment made by paragraph (4)(A) of this Act permits individuals who retired before May 7, 1985, to voluntarily elect to provide a full survivor annuity or a portion of a survivor annuity under section 4(b)(1)(A) of P.L. 98-615.

The amendment made by paragraph (4)(B) corrects an erroneous reference to 5 U.S.C. 8341(b)(4) which relates to the maximum Civil Service survivor annuity payable to a widow or widower. Because section (4)(b)(4) of P.L. 98-615 deals with survivor annuities for certain former spouses, the appropriate reference is to 5 U.S.C. 8341(h)(2) which limits annuities payable to former spouses.

Subsection (c) amends section 4(f) of the Civil Service Retirement Spouse Equity Act of 1984 (P.L. 98-615) allowing certain former spouses to enroll in a Federal health plan if he or she is entitled to receive either a portion of a Federal retiree's annuity or is eligible for a survivor annuity.

Subsection (d) extends the time period during which a retiree, retired before May 7, 1985, may elect to have his/her annuity reduced to provide a survivor annuity for a former spouse. Any retiree who has made such an election may modify that election within this extended period.

Section 202 amends section 4(c) of the Civil Service Retirement Spouse Act of 1984 (P.L. 98-615) allowing the surviving spouse of an employee who died without making an election under such section, to make the election to receive a survivor annuity if done so within one year after the date of the enactment of this Act.

Section 203 amends section 5 U.S.C. 8332(j) allowing a former spouse to make or complete a deposit for post-1956 military service credit. Without this amendment, such a deposit would be meaningless because 5 U.S.C. 8332(j) excludes credit for post-1956 military service from annuities of only the employee or a surviving widow or child, and not a surviving former spouse.

Section 204(a) amends 5 U.S.C. 8339(j)(3) making it consistent with 8339(j)(1) and 8339(j)(5)(C)(iv) by prohibiting a survivor election at divorce if a joint waiver as made by a couple at the time of retirement.

Section 204(b) amends section 8339(j)(5)(B) providing that an annuity reduction terminated under this section will be replaced by another appropriate reduction if the retiree has another former spouse or a current spouse who is entitled to a survivor annuity.

Section 204(c) amends 5 U.S.C. 8339(j) and 5 U.S.C. 8339(k) making certain technical changes to the insurable interest election provisions.

Section 205 amends 5 U.S.C. 8340(c)(1) providing that the first cost-of-living adjustment payable to a former spouse or individual who has an insurable interest in the decedent will be prorated, just as it is for widows and widowers or deceased employees and retirees.

Section 203(a) amends 5 U.S.C. 8341(e) correcting two anomalies in the provisions governing entitlement to children's survivor benefits. Survivor annuities for children are provided at two levels, with higher benefits being paid to parentless children (double orphans) than to those who have one surviving parent (single orphans). Section 8341(e) of title 5, U.S.C., currently provides that if a deceased employee or retiree is survived by a spouse or former spouse who is the parent of a surviving child of the employee, the child will be paid at the lower rate applicable to single orphans.

However, an inequity arises because the definition of "former spouse" in 5 U.S.C. 8331(23) requires that the former spouse must have been married for at least 9 months to an employee who completed at least 18 months of service covered by the Retirement System.

Consequently, if a deceased employee is survived by a former spouse who is the parent of his/her child, but the employee was covered by the Retirement System for less than 18 months or was married to the former spouse for less than 9 months, the surviving child will be paid at the higher rate applicable to double orphans rather than at the lower rate applicable to single orphans, even though one of the child's parents is still living and can presumably contribute to the child's support. This amendment will correct this inconsistency.

Section 206(b) amends 5 U.S.C. 8341(e) which currently provides that if a deceased employee or retiree is survived by a spouse or former spouse who is the parent of a surviving child of the employee or retiree, each surviving child of the decedent will be paid at the lower rate applicable to single orphans.

Consequently, if the decedent is survived by several children and a spouse or former spouse who is the parent of only one of the children, all of the decedent's children will be treated as if they, too, were children of the surviving spouse or former spouse.

This amendment will correct this inequity so that each child will be treated as a double orphan unless there is a surviving spouse or former spouse who is that child's natural or adoptive parent.

Section 207 amends 5 U.S.C. 8341(h)(1) which currently allows the former spouse of a deceased employee, Member of Congress, or annuitant to receive a survivor annuity under the terms of a qualifying court order. However, it extends no such right to a former spouse of a deceased former Member who was entitled to a deferred annuity, even though section 8341(f) allows the surviving spouse of such a former Member to receive a survivor annuity. These former spouses were intended to be included in section 8341(h)(1). This amendment corrects this oversight.

Section 208 amends 5 U.S.C. 8341(h)(4) which currently provides that a court order awarding a survivor annuity to a former spouse cannot be amended after the employee's retirement. However, a court order could be changed following the death of an employee who has not yet retired. This amendment corrects this inconsistency by barring changes in court orders after an employee's death as well as after retirement.

Section 209 amends 5 U.S.C. 8342(j)(1)(B) which currently bars payment of a refund of retirement contributions to a former employee if the payment would deprive a former spouse of court-ordered retirement or survivor benefits. This amendment extends the same protection to a separated current spouse of the former employee who has title to benefits under the terms of a legal separation agreement.

TITLE III—MISCELLANEOUS CIVIL SERVICE AMENDMENTS

Section 301 amends 5 U.S.C. 1103(a) providing authority for the Office of Personnel Management to incur reception and representation expenses.

Section 302 amends 5 U.S.C. 1103(b) providing that the Federal Register notice and comment requirements concerning regulations issued by the Office of Personnel Management do not apply to the routing establishment of schedules of rates to pay or allowances. They do apply, however, to the establishment of the procedures, methodology, or criteria used to establish such schedules, rates, or allowances.

Section 303 amends 5 U.S.C. 5924(2)(A) providing for the payment of temporary living expenses for Federal employees transferring from a U.S. territory to a foreign area.

Section 304 amends 24 U.S.C. 35 allowing the use of naval hospital services for space available dental care in foreign areas and remote areas of Alaska.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, December 10, 1985.

Hon. WILLIAM V. ROTH, Jr.,
Chairman, Committee on Governmental Affairs, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has reviewed H.R. 3384, the Federal Employees Benefits Improvement Act of 1985, as ordered reported by the Senate Governmental Affairs Committee, December 6, 1985. Based on this review, CBO estimates that this bill would have no significant federal budgetary impact and would not directly affect the budgets of state and local governments.

This bill would enable annuitants covered under the Federal Employees Health Benefits (FEHB) program to be eligible for rebates. While this language in and of itself would not have a budget effect, it is anticipated that this legislation will enable active federal employees and annuitants to receive a share of the excess carrier reserves proposed to be refunded to the Office of Personnel Management (OPM) in 1986 and 1987. OPM estimates the refunds to be $1,067 million in fiscal year 1986, and $300 million in fiscal year 1987. Enrollees currently contribute about 40 percent to total premium costs. If enrollees were to receive 40 percent of carriers' refunded reserves, it would increase federal outlays by $427 million in fiscal year 1986, and $120 million in fiscal year 1987.

This bill also has several provisions affecting FEHB which are not expected to have a significant budget effect. Nurses and nurse-midwives would be allowed to be reimbursed without referral by another health practitioner. Non-physician health practitioners would be allowed to be reimbursed in medically underserved areas. In addition, FEHB plans could require an initial referral from a psychiatrist as a condition for reimbursement of clinical social worker services. The plans, however, could not require supervision by a psychiatrist or other health practitioner as a condition for reimbursement of such clinical social worker services. The Office of Personnel Management (OPM) would be called upon to encourage plans to provide adequate benefits for treatment of mental illness, alcoholism, and drug addiction. Requirements for group-practice prepayment plans would be made more flexible. Finally, OPM would be required to undertake studies of the adequacy of information made available to FEHB enrollees and to conduct an open season before the start of any contract year.

H.R. 3384 also amends the Civil Service Retirement Spouse Equity Act of 1984 to allow certain former spouses of civil service retirees to receive civil service survivor benefits. Specifically, this bill would expand the eligibility requirements for certain former spouses to receive survivor benefits and increase the period allowed for the election of survivor benefits. Although difficult to estimate, we assume only a small number of former spouses would be affected by this bill. Therefore, this provision is expected to have no significant budgetary impact.

In addition, this bill would require the Office of Personnel Management to conduct a demonstration project relating to health promotion for federal employees. No additional appropriation in 1986 is to be provided for this demonstration. OPM has been unable to tell us what funding, if any, would be necessary to conduct this project.

CBO prepared a cost estimate on October 1, 1985 of H.R. 3384 as ordered reported by the House Post Office and Civil Service Committee on September 26, 1985. The Senate reported bill excludes a Federal Employees Health Benefits (FEHB) provision that would eliminate the 75 percent cap on government premium contributions estimated to have a cost in the House reported bill. The other FEHB and Civil Service Retirement provisions included in the Senate version of the bill are again estimated to have no significant budgetary impact, however, some of the provision do differ.

If you have any questions, please call me or have your staff contact Anne Manley (226-2820) or Sherri Kaplan (226-2616).

With best wishes,

Sincerely,

C.J. NUCKOLS
(For Rudolph G. Penner, Director.)

Mr. HEINZ. I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING REPRESENTATION BY SENATE LEGAL COUNSEL

Mr. HEINZ. Mr. President, I send a resolution to the desk on behalf of the majority leader and Senator BYRD and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 282) to direct the Senate legal counsel to intervene in Representative MIKE SYNAR v. United States of America.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the resolution.

Mr. DOLE. Mr. President, last week the Congress enacted the Balanced Budget and Emergency Deficit Control Act of 1985 to establish, for the fiscal years 1986-91, objectives and procedures for reducing and then eliminating the annual deficit. On signing the measure last Thursday, the President questioned the constitutionality of provisions of the act which relate to the responsibilities of the Comptroller General and the Congressional Budget Office. Later that day, Representative SYNAR filed an action in the U.S. District Court for the District of Columbia to challenge the constitutionality of the act.

The Congress anticipated that there would be challenges to the constitutionality of the act and provided for expedited judicial review. The Congress also anticipated that there would be a need for a congressional defense of the statute and provided that each House of Congress shall have the right to intervene. The Senate also has authority under title VII of the Ethics in Government Act to intervene in legal actions in which the powers and responsibilities of the Congress under the Constitution are placed in issue.

The Senate has previously directed the Senate legal counsel to intervene in the defense of the responsibilities assigned by the Congress to the Comptroller General under the Competition in Contracting Act of 1984. To date, two U.S. district courts have upheld the constitutionality of that statute against a similar challenge by the executive branch.

The Attorney General is required by statute to notify the two Houses of Congress whenever he determines not to defend the constitutionality of an act of Congress. We have not yet received a formal notification from the Attorney General but we have decided to proceed with the resolution in light of the imminent adjournment of the Congress. The act requires that judicial review be expedited. Consequently, the Senate legal counsel should receive early authorization so that he may be prepared to present to the court the Senate's defense of the act during the adjournment, if that is necessary. Also, as the constitutionality of the act may be raised in other actions, section 2 of the resolution permits an appearance by the Senate legal counsel in similar cases during the adjournment with the approval of the joint leadership group.

Mr. President, I move adoption of the resolution.

Mr. HEINZ. Mr. President, if there is no further debate, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 282) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 282

Whereas, in the case of *Representative Mike Synar v. United States of America*, Civil Action No. 85-3945, pending in the United States District Court for the District of Columbia, the constitutionality of the Balanced Budget and Emergency Deficit Control Act of 1985, Public Law 99-177, has been placed in issue;

Whereas, the statement of the President, on signing the Balanced Budget and Emergency Deficit Control Act of 1985, questions the constitutionality of several of its provisions and expresses the hope of the President that these constitutional questions will be promptly resolved;

Whereas, pursuant to section 274 of the Balanced Budget and Emergency Deficit Control Act of 1985 each House of Congress shall have the right to intervene in an action to determine the constitutionality of the Act;

Whereas, pursuant to sections 703(c), 706(a), and 713(a) of the Ethics in Government Act of 1978, 2 U.S.C. §§ 288b(c), 288e(a), and 288l(a)(1982), the Senate may direct the Senate Legal Counsel to intervene in the name of the Senate in any legal action in which the powers and responsibilities of Congress under the Constitution are placed in issue: Now, therefore, be it

Resolved, That the Senate Legal Counsel is directed to intervene in the name of the Senate in the case of *Representative Mike Synar v. United States of America*.

SEC. 2. That during the adjournment of the Congress the Senate Legal Counsel is authorized to intervene or to appear as amicus curiae in the name of the Senate in other cases in which the constitutionality of the Balanced Budget and Emergency Deficit Control Act of 1985, Public Law 99-177, is placed in issue: *Provided*, That the Joint Leadership Group authorizes the Senate Legal Counsel to intervene or to appear as amicus curiae in the name of the Senate in such other cases.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRANSFER OF ROBERT F. KENNEDY MEMORIAL STADIUM TO THE DISTRICT OF COLUMBIA

Mr. WARNER. Mr. President, I would like to direct inquiries to the leadership with reference to calendar item 459, H.R. 2776. This is a bill providing for the transfer of the Robert F. Kennedy Stadium from the Federal Government to the District of Columbia government. Two committees in the Senate, the Committee on Energy and Natural Resources and the Committee on Governmental Affairs, have reviewed this bill and both have reported it favorably.

The House of Representatives has passed the bill, H.R. 2776.

Mr. President, it is my understanding that a single Senator has indicated a hold on this bill. It is my further understanding that his concerns relate to the history of this part of the Nation's Capital and how this transfer might affect the original plan of the Nation's

Capital as laid out by L'Enfant many years ago.

In spite of that, it is my hope that if the Senator is listening at this time, he will have a willingness to come to the floor and discuss with the leadership and me the possibility of bringing up this legislation today.

Mr. HEINZ. Will the Senator yield?

Mr. WARNER. I yield to the acting majority leader.

Mr. HEINZ. On behalf of the leadership and Senator DOLE specifically, I can say to the Senator from Virginia that it is the leadership's intention at an appropriate time later today to propound the unanimous-consent request that would permit consideration, and that any Senator who feels constrained to object to that unanimous-consent request, as is the right of any Senator, should be here on the floor.

It would be the majority leader's intention to specifically advise the office of any Senator who is known to be inclined to object to that unanimous-consent request.

Mr. WARNER. I thank the Senator. It is very important to the government of the District of Columbia because they are at this time competing for a baseball team. This transfer will enhance the likelihood of their having a more competitive position to obtain that team.

Mr. DOLE. Let me also indicate that it is my intention to deal with this early next year.

Mr. WARNER. It is hoped that we can deal with it today.

Mr. DOLE. That would be better yet.

Mr. HEINZ. The majority leader has indicated that it is his intention to have a unanimous-consent request at a very early hour this afternoon.

Mr. WARNER. I thank the Senator.

OBSERVERS TO ARMS REDUCTION CONTROL NEGOTIATIONS

Mr. DOLE. Mr. President, there is one other matter we can deal with, the so-called Geneva resolution.

I sent to the desk, on behalf of myself and the distinguished minority leader, a resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 283) relating to the Bipartisan Group of Senators designated pursuant to S. Res. 19 and S. Res. 86, 99th Congress, to act as Observers to Arms Reduction or Control Negotiations.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 283) was agreed to, as follows:

S. RES. 283

Resolved, That S. Res. 86, agreed to February 28, 1985, is amended as follows:

(a) Page 2, line 2 add: "The Chairman for Administrative purposes is the Senator from Alaska, Ted Stevens. The members of the Senate Observer Group shall include the Senator from Massachusetts, Edward Kennedy; the Senator from Wyoming, Malcolm Wallop; the Senator from New York, Daniel Patrick Moynihan; the Senator from Virginia, John Warner; the Senator from Oklahoma, Don Nickles; the Senator from Tennessee, Al Gore; the Majority Leader, Robert Dole, *ex officio;* and the Minority Leader, Robert C. Byrd, *ex officio.* Only Senators appointed as members of the Group may participate in official travel and activities of the Group. In the event that the Majority Leader or Minority Leader does not travel on an official trip of the Observer Group, he may designate one other Senator not a member of the Group to travel and participate in the activities of the Group in his stead. Any vacancy occurring in the Senate Arms Control Observer Group shall be filled in the same manner in which the original appointment was made."

(b) Page 2, Line 11: After the period, insert "Payments made under this section for receptions, meals and food-related expenses shall be authorized, however, only for those actual expenses incurred by the Senate Observer Group in the course of conducting its official duties and functions; provided, that notwithstanding any other provision of this Resolution, such amounts received as reimbursement for such expenses shall not exceed $6,000 in any fiscal year. Amounts received as reimbursement for such food expenses shall not be reported as income, and the expenses so reimbursed shall not be allowed as a deduction under Title 26 of the U.S. Code."

(c) The amendment made by subsection (a) is effective with respect to expenditures incurred on or after February 28, 1985.

Page 3, Line 9, add the following new section: "(d) All foreign travel of the Group shall be authorized solely by the Majority and Minority Leaders, upon the recommendation of the Administrative Chairman. Participation by staff members in authorized foreign travel by the Group, access to all official activities and functions of the Group during such travel, and access to all classified briefings and information made available to the Group during such travel, shall be limited exclusively to delegation members with appropriate clearances. No travel or other funding shall be authorized by any Committee of the Senate for the use of staff, other than delegation staff, in regard to above mentioned activities, without the written authorization of the Majority Leader and the Minority Leader to the Chairman of such Committee."

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CAMPAIGN FINANCE REFORM

Mr. DOLE. Mr. President, let me indicate I believe we can work out this matter with reference to campaign finance reform and I hope we can do it very quickly so we can dispose of the low-level compact matter.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, earlier this afternoon we were discussing the parliamentary situation in the next session with respect to the Boren amendment which was pending on S. 655. I am going to propound a unanimous-consent request that has three significant components to it if it is agreed to.

The first is that it would set a date certain by which the Senate would consider the Boren amendment as an amendment to a suitable vehicle, such as S. 655.

In that context, the Senate would consider it for not more than 2 calendar days. There would be a division of time for debate equally divided, 6 hours of debate on each of the 2 days.

Amendments to the Boren amendment would be in order and the Boren amendment, which is not now debatable, would clearly be subject to debate.

That seems to me, Mr. President, to be a reasonable unanimous-consent request because it allows the Senator from Oklahoma to have a date certain, an early date, in this case not later than June 1, 1986.

It allows him something he does not have now, which is the ability to speak on his amendment and for other people to join in such debate.

It permits the rest of the Senate the opportunity to offer perfecting amendments to his amendment, which was precluded under the previous consent.

It provides a great deal of debate time, 12 hours, almost the amount we used when considering reconciliation, which was 20 hours. It is almost two-thirds of that amount used on a much more complex measure.

UNANIMOUS-CONSENT REQUEST

Having explained this, I ask unanimous consent that during the 2d session of the 99th Congress, the Senate for not more than 2 calendar days, turn to the consideration of the Boren "PAC" reform issue, to a suitable vehicle, prior to June 1, 1986, and it be considered under the following time limitation: 6 hours of debate on each of the 2 days, to be equally divided, in the usual form; and that following the conclusion or yielding back of time on the second day of floor consideration, that the Senate proceed to vote on disposition of the Boren amendment or

bill, and if the issue is not disposed of, it be placed back on the calendar.

Mr. BOREN. Mr. President, the distinguished Senator from Pennsylvania and I have discussed this matter. The Senator from Oklahoma is perfectly willing to have debate on his amendment. Once the amendment is disposed of, the Senator from Pennsylvania or any other Senator would have the right to offer amendments. There would be no time limitation on the pending bill.

The Senator from Oklahoma cannot agree to give up what has already been gained in the previous unanimous-consent request entered into and accepted on the Senate floor which provided for a vote on this amendment without being amendable.

Mr. HEINZ. The Senator has already gained that.

Mr. BOREN. That is what was agreed to. There was a vote against tabling that amendment. Under the current parliamentary situation, when the amendment returns for consideration of the Senate floor, it would not be subject to further amendment. It would be voted on up or down without further debate.

The Senator from Pennsylvania has suggested in his request that debate would be in order. The Senator from Oklahoma does not object to that part of the request. The Senator from Oklahoma, since he has negotiated with his cosponsor of this proposal, the exact language and provisions of it, and since all the cosponsors joined on it as an exact proposal to be voted on up or down in terms of the previous unanimous-consent request, the Senator from Oklahoma would be constrained to object. If the Senator from Pennsylvania would like to offer the request again, changing merely the provision that it is not be amendable, the Senator from Oklahoma would not object. But to the pending request, I object.

The PRESIDING OFFICER. The objection is heard.

Mr. HEINZ. Mr. President, I deeply regret that the Senator from Oklahoma has objected to a unanimous-consent request that would allow the Senate to consider at an early date the Boren PAC issue and other issues. It is, frankly, to my mind, ridiculous that the Senate—and every one of us knows it—is being asked to rubberstamp without amendment a package that has apparently been agreed to by six Senators without amendment. This Senator never agreed as part of any unanimous-consent request and neither did most other Senators, I expect, to any agreement that would preclude the proper consideration of this or any other issue without amendment, for example, in the next session.

I suggest that the Senator from Oklahoma rethink whether or not it is in his best interests and in the best interest of campaign reform to object to a unanimous-consent request which provides for an early date for consideration, debate where none now exists, amendment where it is necessary, and provides for that action to be taken in a way that is fair to all sides. That seems to me to be a very reasonable proposition.

I am not going to propound a second unanimous-consent request because I understand the Senator from Oklahoma does not want to agree to it. But I urge him to think about it, because it seems to me that he is blocking consideration of his own bill. He has already had the opportunity to have his legislation voted on in accordance with the unanimous consent that we all entered into many months ago.

Mr. President, I must tell the Chair that I do not think any Member can say that the Boren amendment has not had, in conformance with the unanimous-consent request of earlier this year, its day in court, that we have not in every respect met the commitment of the Senate to the Senator from Oklahoma. What he asks for is more consideration and special consideration that we do not easily grant nor should we wisely—we do not grant it because we do not like to do things hurriedly or unwisely—a special form of consideration all over again that would yield him what I gather he considers are special privileges and denies to other Members of the Senate those privileges that we are constitutionally entitled to.

Mr. President, I know the Senator from Oklahoma probably did not intend to block consideration of the Boren amendment, but that is exactly what he has done. I yield the floor.

Mr. BOREN. Mr. President, I have always believed Christmastime is a time to end quarrels, not begin them. There are Senators on the floor who wish to get on with the discussion of important matters here, the low-level radioactive waste compact. This Senator does not want to continue useless haggling ovr what the situation is.

The Senator from Oklahoma is for campaign reform. He brought up an honest, straightforward amendment under a unanimous-consent agreement carefully negotiated with the able help of Senator GOLDWATER and Senator STENNIS, our distinguished senior colleagues. The Senator from Oklahoma is not going to give away on the floor now what those negotiators achieved earlier. I think everyone understands that. There is no point in pursuing this discussion any further. We have had a very amicable discussion with the majority leader and others involved.

Let me just say that I think the majority leader understands this. I have just discussed with the distinguished Senator from South Carolina—if I could have his attention also for just 1 minute. It is my understanding that the omnibus bill which he is moving to take up, wishes to take up, would include the transition rules and would also include the contents of compacts in all of these—I believe there are seven pieces of legislation, which includes the States covered under S. 655, the States of Oklahoma and Nebraska, Louisiana, Kansas, and Arkansas—to be dealt with in an omnibus bill. The Senator from Oklahoma does not object to that. Certainly, the Senator from Oklahoma wants the problems of Oklahoma, Kansas, Arkansas, these five States, taken care of in any omnibus solution. He does not want those five States left out.

I think the Senator from South Carolina can see, and I hope the Senator from Wyoming would understand this matter as well, if I could have his attention for a moment, that if those five States are dealt with in an omnibus bill, which of course this Senator wants—he does not want them left out of this solution—S. 655 then really becomes a shell.

All of the provisions have been taken care of in the omnibus bill, which is appropriate. The only thing left is the number, S. 655, with the pending campaign reform amendment to it. Therefore, there is nothing left to drive us to come back to it other than the commitment of the distinguished majority leader that he would return to that bill number and call it up with the campaign reform amendment pending, do that next year in sufficient time that if we were to act on it in a positive way, the House of Representatives would have sufficient time to act on it next year.

That is the reason the Senator from Oklahoma has been so concerned to get that sort of commitment so his vehicle does not become moot. I have discussed this with the majority leader and I believe the majority leader is willing to make that sort of commitment to the Senator from Oklahoma. If he is, the Senator from Oklahoma is absolutely prepared to allow the Senator from Wyoming and others to present the omnibus bill and let all those States be covered under S. 655.

Mr. THURMOND. Mr. President, as the Senator from Oklahoma has said, we have discussed this with the Senator. We have a volume of all compacts in the substitute amendment. Any unanimous-consent request the distinguished Senator from Wyoming would make, one of those included in his request is to ask unanimous consent that the following companion bills be indefinitely postponed.

That will be all of them except the vehicle upon the compact that contains the States of Oklahoma, Kansas, and others.

In other words, his amendment would be left there, but we would go

ahead with the compacts in the substitute amendment and the transition language, too.

Mr. BOREN. In other words, the omnibus bill would take care of approving the compact for Louisiana, Oklahoma, and Nebraska——

Mr. THURMOND. It would take care of all seven of them——

Mr. BOREN. It would take care of all the 50 States.

Mr. THURMOND. Not all the 50 States, the 37 States that have entered into compacts.

Mr. BOREN. Then we would leave the bill number, S. 655, with the campaign reform amendment pending that the majority leader would call up at some time next year.

Mr. THURMOND. That is Calendar No. 300 and bill S. 655.

Mr. BOREN. Yes, Mr. President.

Mr. THURMOND. We are willing to do that and the Senator from Wyoming will include that in his request.

Mr. DOLE. Mr. President, I am certainly willing to indicate to the Senator from Oklahoma that there is a bipartisan interest in campaign finance reform and we shall bring up S. 655, hopefully early enough—well, early enough in our opinion—have some disposition of it. Maybe it will not pass, but it ought to be done at a stage where if it did pass or something passes, there would still be a chance for some action on the House side. The House may mover independently on finance reform. Maybe they will act on it before the Senate acts.

But I have also indicated as I did a few weeks ago that I intend to designate five Republican Senators today who have agreed to undertake responsibility for campaign finance reform. I hope when we do bring that measure up, though, that the amendment will be debatable. Otherwise, we are in a position where we either have to move to table again or use other dilatory tactics. I also would agree to keep it up for a reasonable time.

But I hope we might be able to debate the amendment. There might be some things the Senator from Oklahoma would want changed in his amendment. So on that basis I am prepared to do that, if the Senator from Oklahoma is prepared to advise the Secretary of Transportation where I have been since noon.

Mr. BOREN. Will the Senator yield?

Mr. DOLE. I will be happy to yield.

Mr. BOREN. The Senator from Oklahoma will certainly do almost anything for the Senator from Kansas, but he is not sure he wants to face the Secretary of Transportation and assume responsibility in that regard.

I appreciate the comments just made by the majority leader. The distinguished minority leader, who is on the floor, has already appointed a working group among our party to work on the subject of campaign reform, which he has asked this Senator to chair. It is my hope that we will have this kind of progress on both sides of the aisle.

As I understand what the majority leader has said, he has said that he will bring the bill, S. 655, with the pending campaign reform amendment up, call it back up for consideration early enough next year that if it were positively acted upon—and maybe it will be amended after it is adopted. Let us suppose that particular amendment would be adopted. After that it would be subject to other amendments, after it is acted upon. Whatever the product is, that we would call it up early enough next year that the House would have a reasonable chance to act upon it so that we would have a chance to get campaign reform through both Houses next year, and that S. 655, what would be left by this action merely is a skeleton with this amendment on it, really the only thing left on it since we are taking care of all 50 States.

Mr. DOLE. Right.

Mr. BOREN. The majority leader would still call back up this number under the conditions we have previously entered into. And I would say at that time, if the majority leader or someone else asks to have additional time for debate, this Senator will not object to additional time to debate the matter at that point in time.

With that assurance, Mr. President, I thank the majority leader for what he has just said. That satisifes the Senator from Oklahoma. The Senator will not lodge objection based upon that commitment of the majority leader to proceeding now to the consideration of the omnibus bill on low-level radioactive waste.

Mr. DOLE. Mr. President, I would just say very briefly in response to that, I hope in the meantime the working group on that side of the aisle and this side of the aisle might work separately for a few weeks in the next year, and then maybe come together and see if there could be a bipartisan package developed. I believe, as most Senators do, we need to take a look at it. We are prepared to do that.

I thank the Senator from Oklahoma, and I thank the Senators who have been interested in this issue. They have taken a lot of time, but we are going to give them a little more time, so I yield the floor.

LOW-LEVEL RADIOACTIVE WASTE DISPOSAL FACILITIES

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of calendar item No. 468, H.R. 1083, the low-level nuclear waste bill.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

A bill (H.R. 1083), to amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste, and for other purposes.

The Senate proceeded to consider the bill.

Mr. SIMPSON. Mr. President, before the Senator from Oklahoma leaves the Chamber, I publicly thank him for his willingness to allow us to go forward. I have had some rather rich emotions to share with the Senator from Oklahoma on this issue, going back and looking at the RECORD. And I suppose, as one would who dabbled in the practice of law for some time, I came on a bit strong in the courtroom. I apologize for any activity that would hinder that relationship with the Senator from Oklahoma and his presence here, and I want to make that quite clear.

Mr. BOREN. Mr. President, I appreciate those words from my good friend from Wyoming. He is my good friend and continues to be my good friend. I have the greatest regard for him and appreciate very much the remarks which he just made.

Mr. SIMPSON. I thank the Senator.

Mr. President, I am most pleased to present for the consideration of the Senate a bill to grant the consent of the Congress to regional interstate compacts for the disposal of low-level radioactive waste. This legislation, which has had the benefit of nearly 4 years of work by three committees of the Senate—the Committee on Environment and Public Works, the Committee on Energy and Natural Resources, and the Committee on the Judiciary—represents a milestone in our efforts to carry out the policies and objectives of the 1980 Low-Level Radioactive Waste Policy Act.

Before I go much further in explaining how we reached this point, I should like to add a special note of appreciation and congratulations to Senator THURMOND, who has pursued a just and effective solution to the crisis that faced his State and Nation in 1979, and that led to the passage of the legislation authorizing States to form regional compacts for the purpose of handling the disposal of low-level radioactive waste generated within each such region. The original act reflected a remarkable degree of equity and balance in the approach that we are now considering today on the Senate floor, and that very same degree of equity and balance has characterized the efforts of the Senator from South Carolina throughout this entire process and indeed throughout his life. I commend him for that and

thank him deeply for his leadership in this area.

We now have pending before the Senate 7 regional compacts covering 37 States. Each of these compacts must be approved before they can be implemented. This legislation that I now present to the Senate, and the amendment in the nature of a substitute that Senator THURMOND and I are proposing, establishes the terms and conditions for congressional approval of all currently pending and future compacts for low-level radioactive waste disposal. It would be my intention, Mr. President, to propose that the Senate consider what has been referred to as the consent legislation, as reflected in the substitute amendment, as the first item of business. At the conclusion of our consideration of this legislation, I will propose an amendment to add the seven currently pending compacts to the end of this legislation, as a new title II, so that the consent legislation and the pending compacts can all be considered as a package. Compacts submitted in the future would, of course, require congressional approval before they could be implemented, and the consent legislation, if adopted by the Senate, would provide the framework for approval of those compacts, as well, when submitted to the Congress for the required approval.

The compacts, when approved by Congress, must be implemented in accordance with the terms and conditions established in this bill. No amendments have been made in the compacts, per se, in an effort to avoid the potential need for subsequent State reratification. Nevertheless, if any such compact is implemented in a manner inconsistent with any of the provisions set forth in this bill, the entire compact shall be deemed to be invalid, notwithstanding the severability provisions that might be contained in individual compacts.

Upon enactment of this legislation, and upon congressional approval of individual compacts, each such compact region may restrict the use of a regional disposal facility located within such compact regions, other than a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b), to the disposal of a low-level radioactive waste generated within such region. Any such restriction may be imposed beginning January 1, 1993, or beginning on the date that such facility commences operation, whichever occurs first. After December 31, 1992, each compact region in which there is now located a regional disposal facility referred to in paragraphs (1) through (3) of subsection (b) of this bill, that is, the commercial disposal facilities located in South Carolina, Nevada, and Washington, may restrict the use of such facility to the disposal of low-level radioactive waste generated within such region.

Mr. President, I commend this package to my colleagues and urge their wholehearted support. We have reached, in my judgment, a fair, effective, and balanced approach to write the final chapter in transferring the responsibility for low-level radioactive waste disposal to the States, and I urge my colleagues to support this measure.

Mr. HART. Mr. President, I rise as minority floor manager for the Environment and Public Works Committee to state that I am pleased today that we finally have an opportunity to consider the Low-Level Radioactive Waste Policy Amendments Act of 1985. This legislation has been the subject of intense debate among interested parties, two House committees, and three Senate committees. The fact that we have managed to arrive here today with a package is testimony to the extraordinary amount of discussions that have taken place in the common interest of providing additional low-level waste storage facilities to relieve sites in three States that currently bear the burden for the rest of the country.

Like any compromise, this legislation is not perfect. It is, however, a workable framework for developing new disposal capacity. As such, it is a needed improvement over the 1980 act, which has had limited effect on inducing States to open up new disposal sites. This legislation improves on the 1980 act, but does not discard the essential element of that legislation; that States are to enter into interstate compacts for the development of low-level waste disposal facilities. What we have done here is expand on that concept and clarify it so States and generators are more clear about what they are expected to do.

In the third section of the bill, the responsibilities of both the Federal Government and the States is clearly defined. States are responsible for the disposal of low-level radioactive waste generated within their borders—other than that generated by the Federal Government—that consists of or contains class A, B, or C radioactive waste as defined by section 61.55 of title 10 in the Code of Federal Regulations, as in effect on January 26, 1983.

States are not responsible, for example, for the disposal of waste generated by the decommissioning of naval reactors. States are also not responsible for disposal of waste from the operation and maintenance of nuclear vessels of the U.S. Navy. In this area, for example, we have attempted to maintain existing law but clarify it so States are clear about their responsibilities.

The States' regional disposal facilities cannot be required to accept anything other than low-level waste or waste identified under the formerly Utilized Sites Remedial Action Program. States may, however, choose to accept these wastes, so long as disposal of such wastes is consistent with their license.

In addition, we have clarified the responsibility of the Federal Government under this legislation. The Federal Government is responsible for the Department of Energy's low-level waste, the Navy's waste—other than operation and maintenance—or low-level waste owned or generated by the Federal Government as a result of any research, development, testing, or production of any atomic weapon.

We have also clarified that the Federal Government is responsible for the disposal of low-level radioactive waste that exceeds the limits established by the Commission for class C radioactive waste, as defined by the regulations cited above. Such disposal is to be in a facility licensed by the Commission. This resolves a contentious issue of above class C waste, which the States were unwilling to be required to dispose of due to the uncertainty surrounding the type of disposal facility that might be required by the Commission for the safe disposal of such wastes. The bill also requires the Secretary of Energy to prepare a study on these wastes and investigate the proper methods of disposal by the Federal Government.

The framework of this legislation is familiar to those who have been working on this issue for so long. There are milestones in 1986, 1988, and 1990 that States must meet in order to retain access to existing sites and to avoid assessment of penalty surcharges.

In 1986, we expect States to have, by legislation, indicated their intent to enter into compacts with other States.

We are moving none too soon on this legislation, since the sited States, Nevada, South Carolina, and Washington, have informed us that as of January 1, 1986, they will close their borders to low-level waste unless new legislation has been enacted. Such action would clearly present a serious problem for all, since low-level radioactive waste is more ubiquitous than many of us realize.

Hospitals and laboratories, for example, generate low-level waste as part of their diagnostic and treatment procedures. These generators also normally have little ability to store their waste, and are thus tremendously dependent upon continued access to the three existing sites. Nuclear utilities are the largest generators of low-level waste, producing a fair amount of contaminated clothing and equipment.

In the legislation before us today, the sited States agree to continue to accept the waste for up to 7 years, by which time we expect other low-level waste disposal sites to be operating. As

an incentive to these three States to continue to accept waste during this transition period, we have included surcharges on the waste that is to be paid by the generators to the sited States.

We have also asked utility generators to reduce their volume of waste and have included utility allocations of waste that the sited States are required to accept, so long as the State in which the utility is located is in compliance with the milestones. In this way the sited States are assured of a limit on the volume of waste they will have to receive over the next 7 years.

This legislation also provides for specific milestones the unsited States are required to meet so we will have greater assurance that at the end of the transition period we will in fact have additional low-level waste disposal sites. The sited States are extremely concerned that we not repeat the failures of the 1980 act. This legislation goes a long way to assure that such additional disposal capacity will be available by the end of the transition period.

There are several mechanisms for encouraging nonsited States to enter into compacts and develop disposal sites. First, there are specific milestones defined in the legislation so it is clear to all what is required by a date certain. In addition, there are penalty surcharges placed on the waste generated in States that fail to meet these milestones. These penalties are in addition to the surcharges paid by generators during the transition period.

Another inducement to comply with the milestones is a 25-percent rebate of the surcharge for States meeting the milestones. This rebate is paid to the State or compact commission during the first 4 years to help finance the new disposal facility and costs associated with it. The rebate is to be paid to the States, rather than the compact commission, during the last 3 years that the State is in compliance with the milestones. We have designated these two recipients of the rebate because there are no reliable cost estimates for the amount of the rebate and the cost of the facilities. The rebate has not been determined based on disposal facility cost, but merely as a compromise percentage that is agreeable to all, thus we thought it fair to designate more than just the compact commission in case the commission had a windfall of rebates and no actual need for the total rebate.

If the milestones and penalties are not enough to encourage compliance, we have added another penalty to this process, which is denial of access to the disposal sites. The sited States are empowered to deny access to States or compact regions that have not met the milestones. Recognizing that hospitals, as well as utilities, are dependent upon access to disposal capacity, we have also included a provision for emergency access.

The Nuclear Regulatory Commission is given the authority to grant emergency access to a generator "if necessary to eliminate an immediate and serious threat to the public health and safety or the common defense and security." We have included a detailed procedure for this emergency access provision to assure that it is used only during a true emergency and is not a perfunctory determination by the NRC.

Thus for each milestone, we have penalty surcharges and denial of access that may be imposed in the event that the State or compact region fails to comply with the milestone requirements in this legislation.

By July 1, 1986, for example, we expected States to have passed legislation indicating their intent to enter into compacts with other States or to have ratified compact legislation. Thirty-seven States are already in compacts, one State has clearly decided to go it alone, and the rest of the States are negotiating with other States regarding their compact. While this has been a long and frustrating process, particularly for sited regions that continue to accept all the low-level waste, I believe that the momentum among the States is finally to enter into these compacts. It is, for the first time, now the rule rather than the exceptions, for States to be in a low-level waste disposal compact. Passage of this legislation would continue to encourage States along the path.

If a State fails to meet the milestone, there is a penalty surcharge assessed. The surcharge is in effect at all times, during this transition period, although at various rates, beginning as $10 per cubic foot during 1986 and 1987. The penalty surcharge for the 1986 milestone is two times this $10 surcharge, or $20 per cubic foot, during the first 6 months after the July 1 1986, deadline. As of January 1, 1987, a State missing this deadline may be denied access by the sited States for failure to meet this milestone.

The second milestone has a January 1, 1988, deadline by which compacts must have selected a host State, the State that will have the disposal facility, or selected a developer and site. The compact region or State is also required to develop a siting plan for the facility, including detailed procedures and a schedule for site selection, application, and construction of the facility.

The standard surcharge during 1988 and 1989 is $20 per cubic foot, and the penalty surcharge for failing to meet the milestone is two times the $20 surcharge for the first 6 months after the milestone and four times the surcharge in the 6 to 12 months after the milestone. In addition, States may be denied access after January 1, 1989.

The third milestone is January 1, 1990. By this date, States are to have filed a license application with the Nuclear Regulatory Commission or the Governor of the State must certify that the State will be capable for providing for the storage, management, or disposal of the low-level radioactive waste generated within such State. The Governor's certification is also to include a description of the means by which the State is to provide such storage, management, or disposal.

If the State fails to meet this deadline, the State may be denied access to a low-level waste disposal facility outside the State.

During our negotiations, we also agreed to include a new 1992 deadline that was not included in S. 1578 as reported by the Environment Committee. By January 1, 1992, States must submit a license application for a low-level waste disposal facility to the Nuclear Regulatory Commission. This change is in essence a modification of the 1990 milestone.

If States fail to meet this milestone, there will be a penalty surcharge of three times the surcharge that is in place. Since the surcharge is $40 per cubic foot, the penalty surcharge would be $120 per cubic foot for States failing to meet this deadline.

In addition, we have decided to scrutinize the situation after the end of the transition period in 1993. Other legislation left a blank when 1993 arrived. We were concerned, however, that a State may choose to "manage" its waste by telling the waste generators that they had to develop a means of storage for their waste. Such a policy would be unacceptable from our perspective and would leave generators with no effective recourse.

In order to provide some framework for addressing this possibility, we told States that by 1993 they must take title to the waste, or the rebates to which they would have been entitled would be returned to the generators. This appeared to be a fair method since States not accepting title would be leaving generators with some serious problems. We believe that the generators should receive some compensation for their storage costs, and thus the generators receive the rebates.

We make it clear, however, that States cannot continue to rely on other entities to solve the low-level waste disposal problem and we require States to take title to the waste in 1996. We give the States up to 3 years after 1993 to take title because of two concerns. First, if States were forced to accept possession of the waste in 1993 and they had no disposal facility available, we could be creating, instead

of eliminating, a public health and safety problem, by transferring possession of the waste to an entity that had no effective storage capacity. The utility generators, in particular, may be better equipped to handle temporary storage of this waste and would also receive the 25-percent rebate—the largest of all the rebates—that the State sacrificed by not taking title to the waste.

Second, we are concerned that the Nuclear Regulatory Commission may need more time than we have provided to license alternatives to shallow land burial, in which many States represented on the Environment and Public Works Committee have indicated an interest. We are clear in demanding that States take title to the waste, but there must be a reasonable deadline that all parties can meet so that we do not exacerbate an already difficult problem.

The combination of these milestones, penalties, and rebates should provide sufficient inducement to persuade even recalcitrant States to become part of the low-level compact process and work diligently to open new disposal facilities.

Since we have developed a new framework for this issue, we have also addressed other tangential issues of interest to many States. We have, as I indicated earlier, addressed the process by which a State can gain emergency access to another State's disposal facility.

We have clarified the role of the Department of Energy to provide financial and technical assistance to States so they can more effectively fulfill their responsibilities under this legislation.

Of great interest to many Environment Committee members in section 8, which considers alternative disposal methods. In this section the NRC is to publish technical guidance for such alternatives within 12 months. This deadline, we are told by the agency, is achievable and it is consistent with the milestones in the bill. We also require that within 2 years after the date of enactment, the NRC is to identify and publish all relevant technical information for alternative methods identified by the Commission in its technical guidance.

The effectiveness of this legislation rests on its deadlines and the abilities of affected parties to meet those deadlines. We are concerned that the NRC, which has not been noted for its swiftness to date, could prevent willing States from complying with the milestones because the necessary guidance or license was not issued in time. The bill addresses this problem by requiring the Commission to establish procedures and develop the technical capability to handle license applications within 15 months of receipt. There must be a thorough and careful review of the license applications, consistent with the Commission mandate to apply the Atomic Energy Act in a manner that protects the public health and safety. The importance of this health and safety responsibility cannot be emphasized enough. At the same time, the Commission should not hide behind this banner to mask its own inefficiencies. It is these inefficiencies that the Commission should reduce wherever possible so that States can meet the deadlines contained in this legislation.

The final section of this legislation concerns what is known as "mixed waste," that is, waste that is subject to regulation both under the Atomic Energy Act and under the Solid Waste Disposal Act. As those familiar with this problem are aware, the NRC and the EPA, the two agencies involved, have been unable to reach agreement on how this or similar waste should be regulated. The regulated community has expressed fears about dual regulation while the environmental community is opposed to EPA being told to abandon its responsibilities to regulate hazardous wastes. This legislation has sunwittingly poked its finger into the fray. As a result, I believe it is fair to say that as much time was spent on this one provision as was spent discussing the rest of the bill.

While this amount of time may be out of proportion to the significance of the remainder of this legislation, it has been time well spent. The compromise we have forged on this issue is an effective one that is designed to achieve results quickly. Under section 11, the NRC and the EPA are told to review the universe of mixed waste and identify the waste, its generators and volumes. In doing so, they should consult with affected States, generators, and disposal facility operators. This first step is important because our discussions over the years have clarified how little is known about this waste, other than that its quantities do not appear to be very large.

After completing this 3-month study on the waste, the agencies are to look at each specific waste stream, such as liquid from scintillation vials, and see if they can agree if the waste can go to one or more facilities already licensed by one of the two agencies. Based on our discussions with the agencies, focus on waste streams should expedite their efforts. We found that specific questions about specific wastes often produced answers in which the two agencies' work complemented, rather than conflicted, with one another.

This process allows the Administrator and the Nuclear Regulatory Commission to review disposal—or treatment and disposal—of substances listed under subsection (a), at facilities meeting only subtitle C requirements under the Solid Waste Disposal Act or NRC requirements regarding the licensing and regulation of radioactive waste disposal. This section states that facilities disposing—or treating and disposing—of such wastes shall be deemed in compliance with the relevant provisions of both the Atomic Energy Act and subtitle C of the Solid Waste Disposal Act if the NRC and EPA jointly determine that the facility in question will achieve a level of performance "adequate to protect public health and safety and to protect human health and the environment. * * *" By referencing the substantive standards of both acts, the language contemplates that such substantive standards are to be applied as performance standards. This means, for example, that in achieving the subtitle C "protect human health and environment" standard, it may not be necessary or appropriate to apply the panoply of subtitle C statutory or regulaory requirements—such as doubleliner requirements—in this context. Likewise, it is not necessary that a facility meet all the technical standards of 10 C.F.R. part 61. In some circumstances though a RCRA standard may appear to be stricter regulation than would be the case under an AEA standard, AEA concerns relating to radioactive materials should not necessarily be overlooked or overridden. Generally speaking, the language envisions that the substantive statutory standards can be met through comparable regulatory activity, not necessarily the prescriptive means appropriate in other areas of waste management.

If there are some wastes that cannot be disposed of at a facility licensed by the NRC or the EPA under existing requirements, then the EPA is to determine what requirements, in addition to the NRC's 10 CFR Part 61 requirements for low-level waste disposal facilities, are necessary in order to meet the Solid Waste Disposal Act standard of protection of human health and the environmment. NRC is required to evaluate those additional requirements and apply those that are not inconsistent with the Atomic Energy Act. This can be done on a facility-specific basis through modification of licenses or through rulemaking. A faculty meeting these modified requirements is deemed in compliance with the Solid Waste Disposal Act requirements including the permit requirements. This applies to requirements based on the Solid Waste Disposal Act in authorized States, as well.

If there are EPA additional requirements that NRC finds cannot be applied consistently with those of the Atomic Energy Act, the NRC, as a last resort, is authorized to prohibit the disposal of the waste in a licensed low-level waste disposal facility.

This approach established a framework for expedited decisionmaking be-

tween the two agencies and eliminates the possibility of dual regulation, which has been a troublesome possibility for some. At the same time, we have assured that the standards of both the Solid Waste Disposal Act and the Atomic Energy Act so we have protected human health and the environment and the public health and safety.

I am pleased that we have developed this innovative compromise that should effectively respond to concerns raised on this issue.

In conclusion, months of negotiation have been held to reach agreement on this difficult issue of providing additional low-level waste disposal capacity. I am pleased that we have an opportunity to bring this legislation before the Senate. I am sure my colleagues will agree with me that the framework provided in this legislation is a constructive, workable solution to our low-level waste problem and I strongly urge passage of the bill.

AMENDMENT NO. 1429

Mr. THURMOND. Mr. President, I send a substitute amendment to the desk. I offer this on behalf of myself and Senators SIMPSON, STAFFORD, BENTSEN, MCCLURE, JOHNSTON, EVANS, HELMS, HART, and DOMENICI. I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from South Carolina [Mr. THURMOND], for himself, Mr. SIMPSON, Mr. STAFFORD, Mr. BENTSEN, Mr. MCCLURE, Mr. JOHNSTON, Mr. EVANS, Mr. HELMS, Mr. HART, Mr. DOMENICI, Mr. HOLLINGS, Mr. HECHT, Mr. BRADLEY, Mr. GORTON, and Mr. GOLDWATER, proposes an amendment numbered 1429:

(The text of the amendment appears under Amendments Submitted.)

Mr. THURMOND. Mr. President, I ask unanimous consent that Senator HOLLINGS, Senator HECHT, Senator BRADLEY, Senator GORTON, and Senator GOLDWATER be added as cosponsors.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, today, I am offering a complete substitute to H.R. 1083, the Low-Level Radioactive Waste Policy Amendments Act of 1985, This legislation will help avert a potential nationwide crisis which would be caused by the closing of the three existing disposal facilities, located in South Carolina, Washington, and Nevada, on January 1, 1986.

In the late 1970's, these three disposal sites became responsible for the disposal of the entire Nation's low-level waste. Congress realized the inequity of this situation and passed the Low-Level Radioactive Waste Policy Act of 1980, which I was pleased to work on with several of my colleagues present here today. This act encouraged States to enter into compacts to handle this waste. As an incentive for entering such regional compacts, the 1980 act authorized compact regions whose compacts have received congressional approval to exclude out-of-region waste beginning January 1, 1986.

Unfortunately, this January 1, 1986, deadline for excluding waste will not become a reality. The sited regions were among the first to enter into regional compacts. However, most of the nonsited States did not choose to enter into compacts until several years after the 1980 act was enacted. Consequently, no new regional disposal sites will be operating by January 1, 1986. For this reason, Congress has not yet approved the seven regional compacts, involving 37 States, that have been submitted for congressional approval during this session. These compacts were referred to the Judiciary Committee, of which I am chairman, and were reported out, subject to the condition that they would not be considered on the floor until joined by suitable transition language.

On August 1, 1985, I introduced S. 1578 which will allow United States continued access to the existing regional sites through December 31, 1992—7 years—while they develop their own regional disposal facilities.

This legislation was considered by the Environment and Public Works Committee, and similar legislation was considered by the Energy and Natural Resources Committee. At this time, I would like to commend Chairman STAFFORD, ranking member BENTSEN of Environment and Public Works, and Chairman MCCLURE, and ranking member JOHNSTON of Energy and Natural Resources for the careful consideration and many long hours of hard work that these committees and their staffs have put into this legislation.

I would also like to thank assistant majority leader SIMPSON whose expertise as chairman of the Environment and Public Works Nuclear Regulation Subcommittee on this legislation was invaluable, as well as Senator EVANS of the Energy and Natural Resources Committee.

The substitute that I offered today is similar to the one that I circulated earlier this week with a Dear Colleague letter with the following major changes: a 1992 milestone requiring that a license application be filed or penalties assessed; and strengthening of the emergency access provision.

This substitute is strongly supported by the Governors of the sited States—South Carolina, Washington and Nevada.

This legislation contains the following major provisions:

First. Nonsited generators would be allowed to continue to dispose of their low-level waste at the existing disposal facilities through December 31, 1992. This means the Barnwell, SC, site will be able to close after December 31, 1992.

Second. Volume caps will be placed on the amount of low-level waste each of the three disposal sites is required to take.

Third. Nonsited regions and nonsited States will be required to meet specific milestones toward developing their own facilities. If the States do not comply with these milestones, generators will be assessed a penalty surcharge during a specified grace period. If compliance is not achieved by the end of the grace period, the generators may be denied access to the existing disposal facilities.

Fourth. An escalating surcharge will be placed on all low-level waste from nonsited regions and nonsited States.

Fifth. Surcharges will be rebated to compact commissions and States that comply with the milestones.

Sixth. States that do not have an operating disposal facility by January 1, 1996, will be required to take title to and possession of all waste generated within the State or compact region. The State or compact region shall also be liable for all consequential damages incurred by the generator due to the failure of the State to take possession of the waste as soon after January 1, 1996 as they are notified that waste is available for shipment.

I strongly urge each one of my colleagues to vote to approve this legislation. When we passed the 1980 act, Congress promised the sited States that the full responsibility for the disposal of low-level waste would not continue to fall on them after January 1, 1986. The Governors of the sited States have realized that this promise will not be kept and have agreed to keep their sites open for 7 more years. These Governors have given all they are willing to give, and they have indicated they will close their sites if this legislation is not enacted by January 1, 1986. It is time for all States to make a serious commitment to be responsible for the disposal of their own low-level waste by January 1, 1993, and for Congress to keep its promise to those States which have so far shouldered this full responsibility.

Mr. BENTSEN. Mr. President, the legislation before us represents a reasonable compromise among many interested parties, including States with existing low-level waste disposal sites, States without such sites, utility generators of waste, and the non-utility generators of low-level waste, such as hospitals. I am confident that this legislation is extremely workable and that at the end of the 7-year-transition period we will see more low-level waste disposal sites in operation.

One reason for my confidence is the example with which I am most familiar the situation in Texas. Texas is well on the way to developing its own disposal facility for low-level waste. The Federal legislation we are consid-

ering today will encourage States, including Texas, to keep moving toward the development of such a disposal facility by including a matrix of milestones with penalties, denial of access, and rebates for each of the milestones.

There has been considerable debate about these milestones. I believe the milestones included in this package represent a realistic set of goals for the States, goals States can meet, but only if the States are seriously addressing the need to develop low-level waste disposal sites on their own or in compacts.

To my knowledge, Texas is the only State that has clearly decided not to enter into the compact process in developing a low-level waste disposal facility, as the State indicated in joint hearings before the Environment and Public Works Committee and the Energy and Natural Resources Committee. The State chose to follow this course for several reasons, primary among them is that the volume of expected waste would be large enough to justify a disposal site for Texas. Most other States have not chosen this route, but I am pleased that this legislation does not preclude the "go it alone" option Texas has endorsed.

This legislation also addresses the difficult issue of what to do with above class C waste, which the States are unwilling to accept. Rather than remain silent on this possible source of "orphan" waste, we declare that such waste is a Federal responsibility and must be put in a facility licensed by the Nuclear Regulatoy Commission. The Department of Energy is to conduct a study on this waste and outline the disposal options for the Federal Government, including any new legislative authority that might be necessary to exercise any of the disposal options the DOE develops.

In sum, this low-level waste legislation corrects the shortcomings of the 1980 act, while maintaining a practical framework for encouraging States to develop additional sites of their own. I strongly support passage of this legislation and encourage my colleagues to do likewise.

Mr. STAFFORD. Mr. President, I am pleased to support the Low-Level Radioactive Waste Policy Amendments Act of 1985. Enacting this legislation this year will avoid a possible shutdown of the existing low-level radioactive waste disposal facilities on January 1, 1986. I would like to commend Senator THURMOND, the distinguished chairman of the Judiciary Committee, for his leadership on this issue.

This legislation will ultimately relieve the three existing low-level radioactive waste disposal sites from their current burden of having to take the entire Nation's low-level radioactive waste. At the same time, it will guarantee that the unsited States will have access to those facilities for the next 7 years. This is expected to be the time necessary for them to develop their own storage or disposal facilities.

I believe this bill represents a fair and equitable solution to the current problem. One part of the country should not have to bear disproportionate burdens of disposing of wastes created in another part of the country. Each State or region should bear its fair share of cleaning up or disposing of the wastes that are produced by the activities in that State or region.

A key element of this legislation is that it generally reflects the compromise between the sited and unsited States on the most appropriate way to achieve this goal. This compromise includes guarantees of access during the 7-year period, volume limitations on such waste being disposed of, milestones for the unsited States to meet in order to be entitled to access, penalties for missing the milestones, surcharges imposed on waste imported into the sited regions, and rebates of such surcharges for meeting the milestones. The compromise also contains a provision allowing emergency access to any disposal facility if the Nuclear Regulatory Commission determines that there is an immediate and serious threat to the public health and safety.

These elements to the compromise were supported overwhelmingly in the testimony before the Environment and Public Works Committee and the Energy and Natural Resources Committee. Representatives from sited States, from unsited States, from generators and environmentalists all testified that the package as a whole represented a workable and fair solution to the present problem.

In particular, however, I would like to note that the milestones in the bill are considered to be achievable by all unsited States or compact regions, and that meeting the milestones will allow the unsited States to accomplish a basic purpose of the act—for the unsited States to be able to provide for the storage or disposal of their own waste after January 1, 1993. After this date the three presently sited regions will have the right to exclude waste generated outside the region.

I would also like to point out that the bill provides the flexibility for unsited States or regions to file an application for a disposal facility even after 1990, up to January 1, 1992. The bill also provides the flexibility for unsited States or regions to obtain a license for and begin operating a permanent disposal facility after January 1, 1993, up to January 1, 1996. These elements of flexibility are necessary because States may wish to pursue disposal methods other than shallow land burial. The Nuclear Regulatory Commission projects that these additional periods of time may be necessary for States wishing to pursue such alternatives.

Nonetheless, States needing such additional time would still be required by January 1, 1990, to certify that such States or regions will be able to provide for the storage, disposal, or management of waste generated within such States or regions after January 1, 1993. The sited States or regions would be able to exclude waste after January 1, 1993, but the unsited States or regions would not be penalized because they needed additional time to provide for the disposal, rather than the storage, of their own waste. The bill therefore accommodates both the interests of the sited regions and the unsited regions.

Mr. President, to date approximately 37 States have entered into compacts. I hope that the remainder of the States will follow soon. I have been impressed with the remarkable spirit among the States of compromise, cooperation, and consensus that has been evident during the consideration of this difficult national issue. I am confident that as this spirit continues the States will easily achieve the goals and purposes of this legislation.

I would like to commend Senator SIMPSON, the distinguished chairman of the Subcommittee on Nuclear Regulation of the Environment Committee, for his leadership and efforts in transforming this consensus into the bill that we are considering today. I also urge my distinguished colleagues to consider and vote for this legislation in the same spirit that was responsible for bringing this process as far along as it is today. This concludes my statement. Thank you, Mr. President.

Mr. HOLLINGS. Mr. President, I urge my colleagues to vote for the compromise low-level nuclear waste bill now before the Senate. I also urge them to vote for related legislation ratifying the regional nuclear waste compacts. To avoid a major crisis over low-level radioactive wastes, we must act now. The time available for discussion has run out.

The simple fact is this: If Congress does not pass this compromise bill soon, Governor Riley will take steps to shut off access to the nuclear waste burial facility in South Carolina. The Governors of Washington State and Nevada, the other two States with burial grounds, will do the same. Our three States will no longer indefinitely accept waste from other regions of the country. We want to carry through with the policy that Congress adopted in 1980—the principle that every State and every region is responsible for handling its own low-level nuclear wastes.

That 1980 law, the Low-Level Radioactive Waste Policy Act, encouraged the States to form regional compacts

and provided that any region with a congressionally approved compact could stop accepting out-of-region waste after January 1, 1986. Frankly, I strongly believe this provision should have been implemented by now. After all, States have had more than 5 years to comply with this provision. Unfortunately, many States have failed to build their own disposal facilities. Rather, many have sought to block the compacts developed by the three States with sites until we three agreed to accept out-of-region waste past 1986.

I didn't like that position when I first heard it, and I do not like it now. The citizens of South Carolina resent it deeply. Last January, our Governor announced that he would shut our facility, if necessary, unless this issue were resolved in a form acceptable to South Carolina. I and every other member of the South Carolina congressional delegation supported him. But Governor Riley also went the extra mile, and said that he would hold good-faith discussions with those of the country that lack disposal capacity.

The bill now before the Senate is the result of those discussions. It does not give the three sited States everything we would like. In fact, it is only barely acceptable. But it protects South Carolina's most important interests, and we will support it. The legislation gives the regions without sites continued access to our three waste facilities, in return for surcharges and, most importantly, a strict schedule by which other States must build their own facilities. The last point is crucial. We don't want this whole issue to resurface again in another few years.

Mr. President, a great many people in and out of the Senate worked long and hard to hammer out this compromise. I want to thank them and compliment them for their efforts to resolve a complex and very difficult issue. I want to thank Senators JOHNSTON, EVANS, and MCCLURE from the Energy Committee, and Senators SIMPSON, STAFFORD, and BENTSEN from the Environment and Public Works Committee. My distinguished colleagues from the Judiciary Committee, Senators THURMOND and BIDEN, did a great deal to move the process forward. Congressman UDALL and his colleagues worked very hard on the House side. I want to thank Patrick Windham and other members of my staff. I particularly want to compliment Gov. Richard Riley and his staff. Without Dick's leadership, we would not have a bill before us today.

Governor Riley and others have led the way on this issue. Now it is time for us in the Congress to finish the business at hand and prevent our differences on low-level nuclear waste from turning into a major confrontation.

Mr. BRADLEY. Mr. President, it is with great pleasure that I rise to support the low-level radioactive waste transition bill that is before us today. I urge my colleagues on both sides of the aisle to approve this important legislation.

Today, Mr. President, South Carolina, Washington, and Nevada contain the only active disposal sites for civilian low-level radioactive wastes. The wastes include rags, paper, protective clothing, and other trash from industry; radiopharmaceuticals and lab equipment from hospitals; and used filters and reactor parts with relatively low levels of radioactivity. These operations mostly escaped public attention until 1979, until the Governors of Washington and Nevada temporarily shut down the disposal sites in their States. About the same time, the Barnwell, SC, disposal area began to limit the amount and type of waste it would accept. Hospitals, medical research facilities, universities, and industries were severely affected by the shutdowns. These institutions have the physical ability and legal authority to store only small amounts of radioactive waste and would have had to halt all work in nuclear medicine and nuclear related research and industry if the disposal sites were closed for any length of time. The crisis eased when the Western States were persuaded to reopen their disposal sites. But those States have served notice that they will not continue to be the country's dumping grounds indefinitely.

In response Congress passed the Low-Level Radioactive Waste Policy Act of 1980. This legislation made each State responsible for providing for the disposal of low-level waste generated within its borders. The act was designed to encourage States to form regional compacts that would cooperatively plan and operate low-level waste disposal sites, thereby more equitably allocating the economic and political costs now borne alone by the States of Nevada, Washington, and South Carolina.

Since passage of the 1980 act, seven regional compacts have been established and presented to Congress for ratification. Included in this group is the Northeast compact in which my State, New Jersey, is a party. These compacts represent 37 States. However, because a number of States have so far failed to enter into compacts, and furthermore, no States have developed new disposal facilities to date, the future of low-level waste disposal is in jeopardy under the current law.

Legislation is clearly needed for the purpose of preventing a nationwide crisis in low-level radioactive waste disposal. The failure to achieve the intended result of the 1980 act can be largely attributed to the act's lack of clearly defined incentives and penalties that would induce the establishment of new disposal capacity within the nonsited compact regions. Thus, the selection of appropriate incentives and penalties with respect to new disposal-site development is an essential element of any solution to the serious problem now facing the States in the unsited regions.

Mr. President, the Energy and Natural Resources Committee and the Environment and Public Works Committee have worked together to produce a low-level radioactive waste management bill with meaningful penalties and incentives. The bill fairly represents all sides of the low-level radioactive waste disposal issue.

Mr. President, passage of the low-level radioactive waste transition bill and ratification of the compacts currently before Congress is the first important step in establishing a cooperative regional low-level waste disposal system. It is imperative that we act quickly so that the low-level waste can be safely disposed of in the future thereby assuring the health and safety of the citizens of our States.

Mr. President, I would like to take this opportunity to thank Senators MCCLURE and JOHNSTON and the staff of the Energy and Natural Resources Committee, along with Senators STAFFORD and BENTSEN and the staff of the Environment and Public Works Committee. My colleagues and their committee's staffs have worked diligently and thoughtfully in preparing this legislation. The final product of their labors is a bill that fairly represents all sides of the low-level radioactive waste disposal issue.

Mr. President, when this legislation was in the Energy and Natural Resources Committee, I raised objections about the penalties for missed milestones and the associated emergency access provision. I fully support the need for meaningful penalties and incentives to ensure that low-level waste sites will be developed. However, I objected to placing the decision to grant emergency access and total control over the terms and conditions of that access in the hands of the currently sited States' Governors.

Mr. President, I appreciate the commitment of Senator MCCLURE, the chairman of the Energy and Natural Resources Committee, and Senator JOHNSTON, the ranking member, to explore the problems that I raised. These issues are very important to States such as New Jersey, which have entered into regional compacts to manage the disposal of low-level radioactive waste, as well as States which have not.

Mr. President, the bill before us today reflects the hard work of my colleagues on both sides of the aisle. I appreciate the efforts of the chairmen of both Senate committees involved and their staffs to produce low-level

radioactive waste management legislation with meaningful penalties and incentives and a fair emergency access provision. I urge my fellow Senators to accept this legislation.

Mr. LEAHY. Mr. President, I have a concern which I would like to raise with my colleagues from the States that are parties to the Northeast low-level radioactive waste compact.

As originally introduced by Senator BRADLEY, a sentence of the compact that had been ratified by the four party States was omitted. At the December 4, 1985, Judiciary Committee markup of this bill, Senator MATHIAS introduced an amendment which reinserted that language into the compact. The amendment was passed by the committee. Senator SIMPSON and I expressed reservations about the constitutionality of the language at that time, and I want to review those concerns now with my colleagues to be certain that they share my understanding of the limited purpose and effect of that language.

It would require the D.C. Circuit Court of Appeals to act within 90 days on a petition for review of a decision by the Northeast Interstate Low-Level Radioactive Waste Commission. If the court failed to do so, the Commission's decision, relative to the designation of a host State, would be deemed to be affirmed.

I am concerned about the part of the language which states "the Commisson's decision shall be deemed to be affirmed." Can Senators tell me what they understand that to mean?

Mr. MATHIAS. Yes. My understanding of the meaning of "shall be deemed to be affirmed" is that it shall be as if the court of appeals never acted on the appeal. The failure of the court to act within the 90 days would be the same as an affirmance in the limited sense that the Commission's decision would remain unchanged. But it would not be the same as an affirmance in the sense that it would not be a judgment by the court of appeals. The failure by the court to act could not be construed to be a ruling by the court on any issue in the case.

Mr. LEAHY. So the failure by the court to act on the appeal would have no precedential value of any kind?

Mr. MATHIAS. That is correct. It would not.

Mr. LEAHY. Would the Senator agree that if "the Commission's decision shall be deemed to be affirmed" was intended to mean "the court's failure to act shall be deemed to be a judgment on the merits upholding the Commission's decision," the amendment would violate the Constitution? That is what the Justice Department concluded in its memorandum on this queston. The Department concluded that such an interpretation would represent an unconstitutional exercise of the judicial function by the legislative branch.

Mr. MATHIAS. Yes. In my opinion, that would be unconstitutional. In that case the language would also violate the provisions of the congressional transition legislation, as amended. The language would thus be of no effect. But under the severability clause contained in article X of the compact, a court could strike the language and the rest of the compact would remain in effect.

"(S)hall be deemed to be affirmed" means only that the case would be ripe for review by the Supreme Court, if the aggrieved party chose to file for Review. The Supreme Court would then have within its inherent powers the right to remand the case to the court of appeals for a decision of the merits, or it could rule on the appeal itself.

Mr. President, I would also like to add that the premise of the Department of Justice letter's footnote 4 is incorrect. While I have no quarrel with the conclusions Justice has drawn, they are mistaken in assuming that this language was not a part of the compact negotiated and enacted by the States. It is for this reason that I felt constrained to offer the amendment including this language in the Judiciary Committee. In addition, I requested an analysis of the language to be prepared by the Congressional Research Service of the Library of Congress, and I ask unanimous consent that it also be included in the RECORD at the conclusion of this colloquy.

Mr. LEAHY. Then am I right that this language was simply intended to expedite the process for appealing a decision of the Commission to the Supreme Court? It would not limit in any way the substantive juridiction of the court of appeals, nor in any way affect the right of an aggrieved party to appeal a decision of the Commission?

Mr. MATHIAS. Yes. That is my understanding and I believe I speak for my colleagues from New Jersey as well. This is in the nature of a housekeeping measure. It would expedite these appeals and nothing more. It does not in any way narrow the jurisdiction of the court of appeals. In fact, if that were its purpose, I believe it would violate the Constitution.

All that this language says is that if the court of appeals does not act within 90 days, the Commission's decision will continue in effect. If the aggrieved party chooses to appeal to the Supreme Court, he may do so.

Mr. BRADLEY. That is also my understanding.

Mr. LEAHY. So I am correct that this language would have no effect on the right or scope of Federal review of the Commission's decision.

Mr. LAUTENBERG. The Senator is correct. I share the Senator's concerns about measures which would seek to restrict the substantive jurisdiction of the Federal courts. We would not support this language if it would in any way affect the right or scope of Federal review. This language is only intended to expedite these appeals.

Mr. BRADLEY. I am in complete agreement with Senators MATHIAS and LAUTENBERG.

Mr. LEAHY. I thank the Senators. Mr. President, I would have preferred it if the language contained in the amendment adopted by the Judiciary Committee had not been ratified by the States that are parties to this compact. At worst it is unconstitutional. At best it is confusing.

Although I would not support it myself, I believe that rather than delete this section and thereby require the States to repeat the lengthy ratification process, it is best to pass this legislation together with the judicial review amendment to the congressional transition legislation offered by the Senator from South Carolina. Assuming the judicial review language in the Northeast compact is ruled to violate the congressional transition legislation, as amended, or to be unconstitutional, it can be severed without affecting the compact as a whole. In my opinion, that would be the best result.

I ask unanimous consent that the opinion of the Department of Justice concerning the constitutionality of this provision be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AND INTERGOVERNMENTAL AFFAIRS,
Washington, DC, December 16, 1985.

Hon. STROM THURMOND,
Chairman, Committee on the Judiciary, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: This responds to your request for our review of the constitutionality of a proposed amendment to the judicial review provisions of S. 1798, a bill "[t]o grant the consent of the Senate to the Northeast Interstate Low-Level Radioactive Waste Management Compact." The amendment would set a 90-day time limit for judicial review of certain administrative decisions made by the Commission established under the Compact, and would mandate that the decision of the Commission be "deemed affirmed" if the court did not rule within that time. As we discuss below, the proposed amendment raises serious constitutional problems.

The purpose of S. 1798 is to grant the consent of Congress pursuant to the Compact Clause of the Constitution, Art. I, sec. 10, cl. 3,[1] and section 4(a)(2) of the Low-Level Radioactive Waste Policy Act, 42 U.S.C. 2021d(2), to the Northeast Interstate Low-Level Radioactive Waste Management Compact. The Compact, which was negotiated by Connecticut, New Jersey, Delaware, and Maryland, implements a regional approach to the management and disposal of low-level radioactive waste by providing a mechanism for establishment of regional waste disposal facilities and by granting to party states the

right to deposit wastes at those facilities. The Compact establishes the Northeast Interstate Low-Level Radioactive Waste Commission ("Commission"), composed of members appointed by the party states. Among other responsibilities, the Commission may designate "host states" that must establish regional disposal facilities to accept wastes generated by other party states, if the states fail to pursue voluntarily the development of such facilities. Art. IV(i)(9).[2]

The Compact establishes jurisdiction in the federal courts for suits arising from actions of the Commission. Jurisdiction is provided in the United States District Court for the District of Columbia for "all actions brought by or against the Commission." Any actions initiated in a state court "shall be removed" to the federal court. Art. IV(n). In addition, the United States Court of Appeals for the District of Columbia Circuit is given jurisdiction "to review the final administrative decisions of the Commission." Art. IV(o).[3] Persons aggrieved by a final administrative decision of the Commission may obtain review of the decision by filing a petition for review within 60 days after the Commission's final decision. Art. IV(o)(1). On review, the court of appeals is precluded from substituting its judgment for that of the Commission "as to the decisions of policy or weight of the evidence on questions of fact," but may remand the case for further proceedings if it finds that the petitioner has been aggrieved because the finding, inferences, conclusions or decisions of the Commission are: (a) in violation of the Constitution of the United States; (b) in excess of the authority granted to the Commission under the Compact; (c) procedurally defective "to the detriment of any person;" or (d) arbitrary, capricious, or an abuse or clearly unwarranted exercise of discretion. Art. IV(o)(3).

As drafted, the Compact provides that the court of appeals "shall accord . . . an expedited review" to any Commission decision "relative to the designation of a host state." Art. IV(o)(2). The proposed amendment you have asked us to review would expand on the requirement for expedited review, by providing as follows:

"[I]f the Court does not rule within 90 days after a petition for review has been filed, the Commission's decision shall be deemed to be affirmed."

We assume that the purpose of this amendment is to insure that the court of appeals will expeditiously consider and rule on the designation of host states responsible for construction and operation of regional disposal facilities, so that the construction of such facilities can proceed as promptly as possible.[4] The effect of this amendment would be to establish an outside limit of 150 days (60 days for filing the petition for review and 90 days for the court's ruling) from the time of the Commission's determination to the end of review by the court of appeals. The amendment, however, would not just limit the time available to the court of appeals to rule on a petition for review; it would also effectively "affirm" any designation decision of the Commission not ruled on by the court within that time, regardless whether the court had in fact reviewed the petition and determined that affirmance was warranted under the standards set out in the Compact.

To our knowledge, this provision is virtually unprecedented. We are not aware of any comparable provision in statutes authorizing judicial review of administrative actions. The closest analogy we have found is the Speedy Trial Act, 18 U.S.C. 3161 *et seq.*, which requires that federal criminal defendants be charged and tried within certain time limits.[5] If the time limits are not met, the charges against the defendant must be dismissed by the court, either with or without prejudice.[6] The constitutionality of the Speedy Trial Act was upheld by the United States Court of Appeals for the Fourth Circuit in *United States v. Brainer*, 691 F.2d 691 (1982).[7] As discussed below, however, we believe that the purpose and effect of the Speedy Trial Act differ significantly from the purpose and effect of the proposed amendment, and therefore that the Brainer decision does not answer satisfactorily the difficult constitutional questions presented by the amendment.

Our primary concern is that the proposed amendment would violate the constitutionally mandated separation of powers between the Legislative and Judicial Branches. "Basic to the constitutional structure established by the Framers was their recognition that '[t]he accumulation of all powers, legislative, executive, and judiciary, in the same hands . . . may justly be pronounced the very definition of tyranny.'" *Northern Pipeline Co. v. Marathon Pipe Line Co.*, 458 U.S. 50, 57 (1982), quoting *The Federalist No. 47*, at 300 (H. Lodge ed. 1888) (J. Madison). Accordingly, "[t]he Constitution sought to divide the delegated powers of the new Federal Government into three defined categories, Legislative, Executive, and Judicial, to assure as nearly as possible, that each branch of government would confine itself to its assigned responsibility." *INS v. Chadha*, 462 U.S. 919, 951 (1983); *See also Buckley v. Valeo*, 424 U.S. 1, 122 (1976). "The hydraulic pressure inherent within each of the separate Branches to exceed the outer limits of its power, even to accomplish desirable objectives, must be resisted." *INS v. Chadha*, 462 U.S. at 951.

The Constitution vests all federal judicial power "in one supreme Court and in such inferior Courts as the Congress may from time to time ordain and establish." Art. III, sec. 1. "[O]ur Constitution unambiguously enunciates a fundamental principle—that the 'judicial Power of the United States' must be reposed in an independent Judiciary." *Northern Pipeline Co. v. Marathon Pipe Line Co.*, 458 U.S. at 60. As Hamilton stated in *The Federalist No. 78* at 466 (C. Rossitor ed. 1961) (citation omitted), it is necessary for the Judiciary to remain "truly distinct from the Legislature and the Executive. For I agree that 'there is no liberty, if the power of judging be not separated from the legislative and executive powers.'" Thus, it is a violation of the separation of powers for the Legislative and Executive Branches to exercise judicial power, just as it is unconstitutional for the Judiciary to engage in lawmaking or executive functions.

The core of the judicial power, which the Legislative and Executive Branches may not invade, it is the rendering of decisions in court cases, *i.e.*, the "application of principles of law or equity of [the] facts" of a particular case. *Vermont* v. *New York*, 417 U.S. 270, 277 (1974); *see also Williams* v. *United States*, 289 U.S. 553, 578 (1933); *United States* v. *Klein*, 80 U.S. (13 Wall) 128 (1872); *Murray's Lessee* v. *Hoboken Land & Improvement Co.*, 59 U.S. (18 How.) 272, 284 (1856). To be sure, Congress has the constitutional authority to enact laws establishing the framework within which judicial decisions must be made. Congress has broad authority to prescribe rules of practice and procedure,[8] to define and limit jurisdiction,[9] and to limit remedies available to litigants.[10] In addition, Congress prescribes the substantive law that governs court decisions.[11] But once that framework has been established, only the courts can render the actual decision.

Separation of powers questions regarding the exercise of the judicial power have frequently arisen in other contexts, such as cases concerning the powers of non-Article III courts. *See Northern Pipeline Co.* v. *Marathon Pipeline Co.*, 458 U.S. at 63-76. The amendment discussed here, however, presents a different—and as we have said, a virtually unique—separation of powers question. Under the proposed amendment, if the court of appeals failed to rule on a petition for review within the prescribed time limit, the Commission's decision would "be deemed to be affirmed." Such an affirmance would be tantamount to a judgment of the court of appeals and would accordingly have a legal status very different from a mere decision of the Commission.[12] Such an affirmance would plainly represent an exercise of the core judicial function of deciding cases. However, it would derive, not from any action taken by the Judiciary, but from an automatic decision-making mechanism created by legislative enactment. Therefore, by enacting this amendment, Congress would in effect be creating a mechanical substitute to do the work of the court of appeals. Because of the novelty of the proposed amendment and the consequent lack of judicial authority addressing the constitutionality of such measures, any judgment about the constitutionality of the proposed amendment must proceed from first principles relating to the separation of powers. Nevertheless, we believe that this measure would be unconstitutional.

We do not believe our conclusion is inconsistent with the Fourth Circuit's decision in *United States* v. *Brainer, supra*, holding that the time constraints and dismissal sanction of the Speedy Trial Act do not violate the separation of powers. The *Brainer* court assumed (691 F.2d at 695) that "the application of existing law to the facts of a case properly before the courts is a judicial function which the legislature may not constitutionally usurp." But the court analogized the challenged provisions of the Speedy Trial Act to "the host of other procedural requirements of unquestioned validity by which Congress regulates the courts of its creation—such measures as the Federal Rules of Civil procedure, the Federal Rules of Criminal Procedure, the Federal Rules of Appellate Procedure, the Federal Rules of Evidence, and statutes prescribing who may sue and where and for what." 691 F.2d at 696. The court added that "[s]tatutes of limitation provide perhaps the closest analogy." *Ibid.*

Whatever the merits of these inexact analogies may be in the context of the Speedy Trial Act, they have no force here. For example, we see no meaningful comparison for separation of powers purposes between a statute of limitations, which bars a party from bringing suit after the passage of a specified period of time, and the proposed amendment, which may result in the rendering by extra-judicial means of a decision in a case that is properly before the court of appeals. A statute of limitations, unlike the proposed amendment, does not create an automatic decision-making mechanism to take the place of a court. A better rationale for the result in *Brainer* is that mandatory dismissal under the Speedy Trial

Act is necessary to remedy a violation of the criminal defendant's statutory right to a speedy trial—a right that has roots in the Sixth Amendment and that plays an important role in safeguarding the accuracy of the trial process. As the Supreme Court has recognized in cases involving the Sixth Amendment speedy trial guaranty, dismissal of the action is really "the only possible remedy" for deprivation of a right to a speedy trial. *See Strunk v. United States*, 412 U.S. 434, 438-40 (1973); *Barker v. Wingo*, 407 U.S. 514, 531 (1972).[13] The proposed amendment, by contrast, does not appear to be designed to protect any particular substantive right (let alone any constitutional right), for it mandates an automatic affirmance of the Commission no matter what the Commission has decided. Although the proposed amendment demonstrates Congress' desire to have an expeditious review of the Commission's designation decisions, affirmance of such decisions cannot be viewed in any sense as a "remedy" to redress injury to other parties from delay in completion of judicial review. It is not at all clear, for example, that parties who support the Commission's decision would necessarily be injured by any further delay in review, or that affirmance of the decision would alleviate any such injury.

Moreover, under the Speedy Trial Act the court has discretion to dismiss the case either with or without prejudice, based on the court's evaluation of the reasons for and effect of the delay in the particular case. The choice whether to give the dismissal preclusive effect is therefore left to the courts, and requires the courts to conduct the sort of factfinding that is at the core of the judicial function. No such latitude is given the court of appeals under the proposed amendment; regardless of the circumstances and the merits of the petition for review, the Commission's decision is automatically deemed to be affirmed once the 90-day period has run.

In *Brainer* the court also considered a separate constitutional challenge to the Speedy Trial Act based on the time limits imposed by the Act—that those time limits, in and of themselves, "intrude upon the zone of judicial self-administration to such a degree as to 'prevent[] the [Judiciary] from accomplishing its constitutionally assigned functions.'" 691 F.2d at 698, *quoting Nixon v. Administrator of General Services*, 433 U.S. 425, 443 (1977). While expressing some doubt about the existence and scope of the Judiciary's inherent power to administer its own docket, the court concluded that the Speedy Trial Act did not unduly intrude upon that power. 691 F.2d at 698. In reaching that conclusion, however, the court cited the considerable flexibility provided by the Act, including the ability of the courts to dismiss an action without prejudice, exclusion of certain common types of delay from the time limit, and the authority of the courts to grant continuances, upon certain conditions, if "the end of justice . . . outweigh the best interests of the public and the defendant in a speedy trial." *Ibid.*

There is no such flexibility built into the proposed amendment. Moreover, it may well be unreasonable in particular cases to require that the entire process of appellate decisionmaking be completed within 90 days. Ninety days is less than the time generally allowed under the Federal Rules of Appellate Procedure just for briefing a case.[14] We note that at the present time in the District of Columbia Circuit the average case is not decided until almost seven months after the last brief is filed in the case.[15]

We do not believe that statutes prescribing a time limit for judicial decisions in particular types of cases are necessarily unconstitutional. *See, e.g.*, 28 U.S.C. 1826(c) (30-day limit for disposition of appeals under the recalcitrant witness statute).[16] As the court noted in *Brainer*, the separation of powers inquiry must focus on the extent to which such time limits actually prevent the Judiciary from accomplishing its constitutionally assigned functions, and the justification for legislative intervention.[17] Without knowing how the time limit in question here would affect the ability of the District of Columbia Circuit to conduct its business, and without additional information about the need for and purpose of the proposed amendment, we cannot predict how that balance would be struck.

In sum, we believe that the proposed amendment raises serious constitutional problems, arising from the doctrine of separation of powers. The most critical of those problems—that Congress would usurp the Judiciary's role in determining the outcome of particular cases—could be alleviated by deleting from the amendment the provision that the Commission's decision "shall be deemed to be affirmed."

We trust that this analysis has been useful to you. Please let us know if we can be of further assistance.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

FOOTNOTES

[1] The Compact Clause provides that, "[n]o State shall, without the consent of Congress, . . . enter into any Agreement or Compact with another State."

[2] The Commission also would exercise several other responsibilities, including approving the export or import of hazardous wastes not otherwise permissible under the Compact, accepting applications of other states to become members of the Compact, adopting a regional management plan for the disposal of low-level radioactive wastes, and overseeing implementation of the Compact. The Commission is given authority to hold hearings and to require testimony or other information from the party states, to intervene in judicial or administrative proceedings, and to impose sanctions on party states for violation of the Compact, including revocation of membership.

[3] The Compact does not define "final administrative decisions"; nor does it state expressly that jurisdiction in the court of appeals to review such decisions is exclusive of the district court jurisdiction to review "all actions brought by or against the Commission." It does state, however, that the provision granting jurisdiction to the district courts "shall not alter the jurisdiction of the United States Court of Appeals for the District of Columbia Circuit to review the final administrative decisions of the Commission . . . . " Art. IV(n).

[4] Because the Compact negotiated by the states does not include this provision, the proposed amendment would in effect be a condition imposed by Congress on its consent to the Compact. Congress may attach binding conditions to its consent to the formation of an interstate compact, provided such conditions are otherwise within Congress's authority and not in contravention of any constitutional limits. *See, e.g., Petty v. Tennessee—Missouri Commission*, 359 U.S. 275 (1952); *Tobin v. United States*, 306 F.2d 270 (D.C. Cir. 1962), *cert. denied*, 371 U.S. 902 (1963). A state that objects to such conditions may, of course, withdraw from an interstate compact in accordance with its terms.

[5] The Speedy Trial Act requires, *inter alia*, that any information or indictment charging an individual with an offense be filed within 30 days from the date of arrest, and that the trial be commenced within 70 days of the filing date of the information or indictment. 18 U.S.C. 3161(a), (b), (c). The statute excludes from the computation of time several types of delay, including delays resulting from other proceedings concerning the defendant; delays during which prosecution is deferred by agreement with the defendant; delays resulting from the absence or unavailability of the defendant or an essential witness; delays resulting from the mental incompetence or physical inability of the defendant to stand trial; delays resulting from the treatment of the defendant under 28 U.S.C. 2902; delays occasioned by the joinder of the defendant with a codefendant as to whom the time for trial has not run; and delays resulting from a continuance granted by any judge "if the judge granted such continuance on the basis of his findings that the ends of justice served by taking such action outweigh the best interest of the public and the defendant in a speedy trial." 18 U.S.C. 3161(h).

[6] In determining whether to dismiss with or without prejudice, the judge must consider three factors: the seriousness of the offense; the facts and circumstances of the case which led to the dismissal; and the impact of a reprosecution on the administration of the Speedy Trial Act and on the administration of justice. 18 U.S.C. 3162(a)(2).

[7] *Cf. United States v. Bounos*, 730 F.2d 468, 471 & n.2 (7th Cir. 1984) (court need not reach issue).

[8] *See, e.g., Hanna v. Plumer*, 380 U.S. 460, 472 (1965); *Palermo v. United States*, 360 U.S. 343, 353 n.11 (1959); *Sibbach v. Wilson & Co.*, 312 U.S. 1, 9 (1941); *Wayman v. Southard*, 23 U.S. (10 Wheat.) 1, 43 (1825).

[9] *See e.g., Sheldon v. Sill*, 49 U.S. (8 How.) 441 (1850); *Cary v. Curtis*, 44 U.S. (3 How.) 236 (1845).

[10] *See e.g., Yakus v. United States*, 321 U.S. 414 (1944); *Lauf v. E.G. Shinner & Co.*, 303 U.S. 323, 330 (1938); *Lockerty v. Phillips*, 319 U.S. 182 (1943);

[11] *Sec, e.g., Vandenbark v. Owens-Illinois Glass Co.*, 311 U.S. 538 (1941); *Carpenter v. Wabash Ry.*, 309 U.S. 23 (1940); *United States v. The Schooner Peggy*, 5 U.S. (1 Cranch) 102 (1801).

[12] In general, an affirmance by the court of appeals of a final administrative decision would bar relitigation of the same claims, under the doctrines of res judicata and collateral estoppel. Because of the preclusive effect of an "affirmance," it is possible that an individual who had sought judicial review could mount a due process challenge to the judicial review provisions. Congress may, of course, preclude or limit judicial review in cases involving statutory rights. *See, e.g., Morris v. Gressette*, 432 U.S. 491 (1977); *Johnson v. Robison*, 415 U.S. 361 (1974); *Weinberger v. Salfi*, 422 U.S. 749, 761-2 (1975); *See generally Abbott Laboratories v. Gardner*, 387 U.S. 136, 140 (1967). An absolute bar against judicial review of constitutional claims, however, raises difficult constitutional questions that have not been fully resolved by the Supreme Court. *See, e.g., Weinberger v. Salfi*, 422 U.S. at 762 (an interpretation that absolutely precluded review of constitutional claims "would have raised a serious constitutional question of the validity of the statute"); *Briscoe v. Bell*, 432 U.S. 404, 414-15 (1977) (absolute preclusion of judicial review of Attorney General's determination under the Voting Rights Act upheld as within Congress's specific power to enforce the 14th and 15th Amendments). Although Congress could therefore preclude any judicial review of Commission determinations, leaving to the original jurisdiction of the district courts constitutional challenges to such determinations, the effect of an "affirmance" under the terms of the proposed amendment could well be to cut off the individual's right to litigate constitutional issues, because of the operation of res judicata.

[13] In *Strunk*, the Court explained, 412 U.S. at 438-40 (citations omitted): "[b]y definition, such denial is unlike some of the other guarantees of the Sixth Amendment. For example, failure to afford a public trial, an impartial jury, notice of charges, or compulsory service can ordinarily be cured by providing those guaranteed rights in a new trial. The speedy trial guarantee recognizes that a prolonged delay may subject the accused to an emotional stress that can be presumed to result in the ordinary person from uncertainties in the prospect of facing public trial or of receving a sentence longer than, or consecutive to, the one he is presently serving—uncertainties that a prompt trial removes . . . In light of the policies which underlie the right to a speedy trial, dismissal must remain, as *Barker* noted, 'the only possible remedy.'"

[14] Under the Appellate Rules, the record must be filed within 40 days after service of the petition for review; the appellant must file his brief within 40 days after filing of the record; the appellee must file his brief within 30 days after service of the appellant's brief; and the appellant has 14 days after service of the appellee's brief to file a reply. Fed. R. App. P. 17, 31.

[15] The Administrative Office of the United States Courts has informed us that as of June 1985, the

average time in the D.C. Circuit from filing of the last brief to hearing or submission is 4.5 months, and the average time from hearing or submission to final disposition is 2.4 months.

[16] "The circuits are in general agreement that the passing of the 30-day period does not deprive an appellate court of jurisdiction." *United States v. Johnson*, 736 F.2d 358, 362 n.5 (6th Cir. 1984). *See also, e.g., In re Grand Jury Proceedings*, No. 85-6258 (2d Cir. Nov. 14, 1985), slip op. 251; *Melickian v. United States*, 547 F.2d 416-420 (8th Cir.), *cert. denied*, 430 U.S. 986 (1977). *But see In re Berry*, 521 F.2d 179, 181 (10th Cir.), *cert. denied*, 423 U.S. 928 (1975) (dictum that 30-day rule is mandatory).

[17] The *Brainer* court stated (691 F.2d at 697-98, *quoting Nixon v. Administrator of General Services*, 433 U.S. 425, 443 (1977)), that "[i]n determining whether the Speedy Trial Act disrupts the constitutional balance between Congress and the courts, 'the proper inquiry focuses on the extent to which [the Act] prevents the [Judiciary] from accomplishing its constitutionally assigned functions.' A considerable degree of congressional intervention in judicial administration is constitutionally permissible if such intervention is 'justified by an overriding need to promote objectives within the constitutional authority of Congress.'"

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, DC, December 12, 1985.

To: Senator Charles Mc. Mathias, Attention: Eileen Mayer.

From: American Law Division.

Subject: Judicial Review of Host State Designation Decisions Made by the Northeast Interstate Low-Level Radioactive Waste Management Compact Commission.

This will respond to your inquiry and our conversation relating to various legal issues concerning the judicial review of host state designation decisions made by the Northeast Interstate Low-Level Radioactive Waste Management Compact Commission. Of specific concern to you are provisions contained in S. 1798, as recently reported by the Senate Committee on the Judiciary.

We understand that the text of S. 1798, as introduced, did not contain language adopted by the legislatures of the participating states relating to the automatic affirmation of the regional commission if the U.S. Court of Appeals for the District of Columbia failed to rule on appeal within ninety days. Specifically, the entire provision of concern reads as follows:

"The United States Court of Appeals for the District of Columbia Circuit shall have jurisdiction to review the final administrative decisions of the Commission.

"1. Any person aggrieved by a final administrative decision may obtain review of the decision by filing a petition for review within 90 days after the Commission's final decision.

"2. In the event that review is sought of the Commission's decision relative to the designation of a host state, the Court of Appeals shall accord the matter an expedited review, *and, if the Court does not rule within 90 days after a petition for review has been filed, the Commission's decision shall be deemed to be affirmed.*" (Italics added.)

The underlined portion of the excerpt is the provision at issue and is the language added to S. 1798 during committee mark-up. The legislatures of the four states participating in the compact have already passed legislation containing the text of the foregoing provision—including the underlined portion.[1] We also note that the companion bill in the House of Representatives contained the text of the foregoing provision, including the underlined portion, in the H.R. 3372, as introduced.

Apparently the reason the underlined language was not included in S. 1798, as introduced, was because of concerns about the constitutional implications of the language. However, the language was restored apparently because of the perceived need for Congress to give its full approval of the same language already adopted by the four states.

You have asked that we address the constitutional implications of the underlined language.

JURISDICTIONAL ISSUES

The provision limiting the amount to time the Court Appeals has to review the regional commission decision before the decision is automatically deemed to be affirmed might be reviewed as jurisdictional. That is to say that the provision could be viewed as granting limited jurisdiction to the Court of Appeals for a ninety day period, after which the Court of Appeals would no longer have jurisdiction to review the regional commission decision.

Characterized in this fashion, the provision raises the question of the extent to which Congress may limit or restrict the jurisdiction of federal courts. Historically, this question has been raised on several occasions,[2] and question of Congressional jurisdictional limitations also have been raised in various contemporary legislative initiatives.[3] Inferior federal courts owe their creation to the Congress and several early cases are often cited in support of the proposition that Congress possesses the power to limit their jurisdiction.[4] Nevertheless, Congress' ability to restrict jurisdiction has not been viewed as unrestrained. For example, in *United States v. Klein*,[5] the Supreme Court of the United States struck down a statutory limitation of jurisdiction relating to proof of loyalty. While reaffirming the authority of Congress to control inferior courts, the Supreme Court concluded that Congress could not accomplish certain forbidden substantive acts by casting them in jurisdictional terms.

Thus, in general terms the precise limits on the power of Congress to define Federal court jurisdiction are difficult to identify. One summary makes this observation:

"There thus remains a measure of doubt that Congress' power over the Federal courts is as plenary as some of the Court's language suggests it is. Congress has a vast amount of discretion in conferring and withdrawing and structuring the original and appellate jurisdiction of the inferior federal courts and the appelate jurisdiction of the Supreme Court; so much is clear from the practice since 1789 and the holdings of many Court decisions. That its power extends to accomplishing by means of its control over jurisdiction action which it could not do directly by substantive enactment is by no means clear from the text of the Constitution nor from the cases."[6]

It does not appear that courts have ever been called upon to address a jurisdictional limitation of the sort at issue here, where the jurisdiction of a court would be withdrawn by operation of a statutory deadline for a ruling by the Court. As a consequence, a definitive statement with regard to the constitutionality of such a legislative restriction cannot be made.

Certainly, Congress has enacted, utilizing many variations of language, numerous expedited judicial review provisions that have had the effect of accelerating access to the courts without encountering constitutional objection. However, Congress recently modified many of the statutory provisions allowing for preferential or expedited judicial consideration and, instead, vested by statute broad discretion in the courts to determine the priority of hearing civil actions.[7]

It is also noteworthy that when the courts have been asked to deal with statutory deadlines for certain federal agency action, they have been reluctant in most cases to do much more than "jawbone" the agencies to move more quickly.[8] The same reluctance might result when courts, themselves, are confronted with statutory deadlines requiring final disposition of cases.[9]

Viewed from the perspective of jurisdictional limitation, it cannot be definitively asserted that Congress possesses the constitutional power to limit the amount of time the Court of Appeals has to rule on a case before the decision of the regional commission will be deemed to be affirmed.

DUE PROCESS ISSUES

From a somewhat different perspective, the language of the bill automatically affirming the Commission's host state designation decision if the Court of Appeals does not rule within ninety days may raise Fifth Amendment due process issues. A leading case that demonstrates the potential due process issue is the 1982 decision by the Supreme Court in *Logan* v. *Zimmerman Brush Co.*[10] At issue in that case was statutory procedure giving the Illinois Fair Employment Practices Commission 120 days in which to convene a fact-finding conference to obtain evidence relating to allegations of discrimination. The mandatory fact-finding conference was not held within the 120 day period, and the employing company moved that the complaint be dismissed. The Illinois Supreme Court found that the language was mandatory and held that the Commission was deprived of jurisdiction for failure to convene the fact-finding conference and rejected arguments of violations of due process and equal protection.[11] The U.S. Supreme Court made this observation:

"[We are led to conclude] . . . that appellant Logan is entitled to have the Commision consider the merits of his charge, based upon the substantiality of the available evidence, before deciding whether to terminate his claim. Logan's interests in retaining his employment, in disproving his employer's charges of incompetence or inability, and—more tangibly—in redressing an instance of alleged discrimination, are all substantial. At the same time, the deprivation here is final; Logan, unlike a claimant whose charge is dismissed on the merits for lack of evidence, cannot obtain judicial review of the Commisison action. A system or procedure that deprives persons of their claims in a random mannering . . . necessarily presents and unjustifiably high risk that meritorious claims will be terminated. And the State's interest in refusing Logan's procedural request is, on this record, insubstantial." [12]

The Court went on to observe that ". . . it has become a truism that "*some* form of hearing" is required before the owner is finally deprived of a protected property right," (emphasis in original) and cited with apprpoval *Board of Regents* v. *Roth*.[13]

We note that the regional commission under the Northeast Interstate Low-Level Radioactive Waste Management Compact is "deemed to be acting in a legislative capacity except in those instances where it decides, pursuant to its rules and regulations,

---

Footnotes at end of letter.

that its determinations are adjudicatory in nature." [14] It appears that the decisions to designate a host state potentially involve an adjudicatory process by the Commission, rather than a legislative process. The Commission is authorized to conduct hearing and studies, to take evidence and testimony, to conduct public hearings in each candidate state, and to render its decision on host state designation on the basis of specified criteria that include: health, safety, and welfare considerations, environmental, ecomomic, and social effects, along with consideration of the economic benefits and costs, the volumes and types of waste generated, the minimization of transportation, the existence of regional facilities within party states.[15]

For this reason, it could be argued that the host state designation process is more akin to an administrative adjudicatory proceeding than a legislative proceeding. As a consequence, it could be said that an administrative hearing must be held by the Commission, thereby disposing of at least minimal due process hearing requirements in advance of a taking. However, in order for the administrative hearing to adequately accord full due process, the proceeding may be required to hear and rule on all of the issues that might be the subject of appeal. Otherwise, some risk of denial of due process might result.[16]

But even so, the automatic affirmation of the commission decision without a Court of Appeals ruling potentially creates disparate procedural results for different litigants—the main objection in *Logan*. Certainly, *Logan* appears to involve a procedual mechanism closely analogous to the provision at issue here—with the admitted exception of the fact that the procedure in *Logan* was found in an administrative setting rather than a judicial setting.

CONCLUSION

For the reasons set forth above, it would appear that the provision in question raises extremely novel constitutional issues for which little definitive guidance can be gleaned from judicial precedent. While there is little doubt that the Congress has broad powers to control the federal courts, it is not clear that the use of a deadline to remove jurisdiction from a court once it has been vested is a valid legislative restriction. Moreover, the disparate treatment of failing to accord all similar litigants the same right to decisions on the merits may raise due process issues under the 5th Amendment.

We note that the compact contains a severability provision that would seemingly allow the Court of Appeals, itself, to address the constitutionality of the dealine (if the issue is raise) without doing harm to the remainder of the compact. Nevertheless, the enactment of the provision may serve as precedent for similar jurisdictional restrictions on federal courts, and for that reason, it my raise important policy considerations for the Congress.

We trust that the foregoing has been responsive to your inquiry.

Mr. JOHNSTON. Mr. President, I am happy to cosponsor the compromise substitute low-level radioactive waste bill offered by Senator THURMOND. This compromise is based on a draft developed last week after many hours of very hard work by the majority and minority staffs of the Senate Committee on Energy and Natural Resources and the Senate Committee on Environment and Public Works. I also thank Senator THURMOND's staff member, Cindi Blackburns for invaluable assistance in keeping the process moving along.

The draft developed by the staff last week did not have the full support of the chairman of the Environment and Public Works Committee, and was also not fully supported by Senator EVANS, of the Committee on Energy and Natural Resources. But I believe that the compromise version offered by Senator THURMOND today does have the support of both these Senators. There is real urgency associated with this legislation. The Senate should act promptly to pass the Thurmond substitute. I believe the House can accept it.

The substitute before us today is a compromise between the approach taken by the Committee on Energy and Natural Resources, which involves tough, enforceable milestones for State action over the next 7 years to deal with low-level radioactive waste disposal, and the approach of the Environment and Public Works Committee, which involves considerable more flexibility in the near term and a potentially very tough requirement at the end of the 7-year period that any State that has failed to provide for the disposal of its low-level radioactive waste must take title to, and assume possession of, that waste.

At my suggestion, all the Senators involved agreed that this sanction would be considerably strengthened if we also made such a State liable for the consequential damages resulting from the failure of the State to comply with these two requirements. The compromise language we are introducing today incorporates this concept, which makes a State that is unable to provide for the disposal of low-level radioactive waste generated within its borders after January 1, 1996, "liable for all damages directly or indirectly incurred by the generator or owner of the waste as a consequence of the failure of the State to take possession of the waste as soon after January 1, 1996, as the generator or owner notifies the State that the waste is available for shipment."

This language insures that the State will not be able to avoid the financial consequences of failure to provide adequately for the disposal of its low-level radioactive waste, even though it may find a way to avoid taking title or possession in a timely manner. The consequential damages language ensures that, if the State does fail to take possession for whatever reason, it will not avoid liability for the damages that result directly or indirectly from that failure. This liability begins as soon after January 1, 1996, as the waste is ready for shipment, not at some indefinite date in the future when the State actually assumes possession of the waste. In the context of this amendment, the term "damages" includes both actual and punitive damages from actions taken against a generator or owner of wastes because that State has not taken possession of the waste and the costs incurred by the generator to safely manage waste that the State fails to possess.

In my opinion, this language is essential to provide the teeth to the more flexible Environment and Public Works approach. We need this language to ensure that we are not faced in the 1990's with the same situation we face today—inaction by a few generating States and no available leverage to force action. If these States were faced with liability for the consequences of inaction today, we would not have a low-level radioactive waste crisis upon us. Those States would have long ago taken the steps necessary to deal with their low-level radioactive waste so as to avoid the very liability this language would assign to them.

The liability for consequential damages is not being imposed on the States. The States that enter into compacts accept the terms of the legislation we are enacting. By entering into compacts, States assume the risk that they may incur the penalties set

forth in the act for failure to comply with its provisions. In return for assumption of this risk, these States receive the benefits of the act, chief of which is the right to exclude low-level radioactive waste not generated in the compact region from any disposal facility located within the region.

Mr. President, I thank my chairman, Senator McCLURE, and his staff, Marilyn Meigs, K.P. Lau and Gary Ellsworth, for all their help during the development of this bill. Special thanks should also go to Jim Curtiss, Senator SIMPSON'S counsel on the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works, who kept his head when all about him were losing theirs.

Mr. President, I congratulate all my friends who have put this bill together. It is a classic compromise, a difficult and detailed bill. But I think, in the best traditions of the Senate, staffs and principals have worked well together in this bill. I especially congratulate the two Senators from South Carolina who have been very assiduous and constant in their fidelity to this issue. They have not let us forget it for one single moment of a single day. I think it is a great monument to them to get this passed.

Mr. President, there is one provision of the bill to which I would like to make further special reference, and that is the so-called consequential damages provision. If the States do not meet the 1993 deadline, they could be responsible not only for taking title but immediate possession of the nuclear waste. If they fail to meet the 1996 deadline, they must be responsible for taking title and possession of the waste. In either case, upon failure to do so, the State becomes liable for all damages, directly or indirectly, caused by that failure.

That means that if some generator of nuclear waste must close down, for example, by reason of the failure of the State to accept possession and title to this nuclear waste, and that generator has to go out of business, then the State is responsible for all the damages.

It is a very far-reaching, difficult, and punitive provision, but we meant it to be precisely that.

As part of our compromise, in order to have this very strong provision in 1996, we relaxed a bit the provisions for the interim dates—1988, 1990, and 1992.

So, Mr. President, with that, I congratulate my friends, and I yield the floor.

Mr. THURMOND. Mr. President, I yield to the distinguished Senator from Idaho [Mr. McCLURE].

Mr. McCLURE. Mr. President, I thank my colleagues, and I hope that by taking a few minutes to discuss this measure, I do not burden the discussion unduly. I think it is important to make a few points that are essential to an understanding of what has happened this year.

Mr. President, earlier this year, I had the opportunity to meet with Senator THURMOND and Governor Riley of South Carolina. The purpose of this meeting was to discuss the pending crisis in commercial low-level radioactive waste disposal management. As representatives of one of three States that have assumed the entire Nation's burden of low-level waste disposal for far too long, Senator THURMOND and Governor Riley emphasized the fact that the Low-Level Radioactive Waste Policy Act that was passed in 1980 has failed to achieve its goal of development of new disposal capacity by 1986. The January 1, 1986, deadline, by which time new regional disposal facilities should have been developed, is upon us. Unfortunately, no real progress has been made by the various States charged under the act with the responsibility to develop such disposal facilities. Governor Riley stated to me in no uncertain terms that his State, along with Nevada and Washington, would close down their low-level waste disposal facilities by January 1, 1986, if significant progress were not made to resolve the present impasse. I heard the same warning later in a meeting with Governor Gardner of Washington State. Senators EVANS and HECHT of my committee later reiterated sentiments similar to those voiced by Senator THURMOND.

The three Governors of the sited States subsequently proposed a compromise by which they would be willing to continue accepting a limited amount of waste for an "interim period," provided that sufficient monetary compensation were realized by their States, and more importantly, that significant, real, and measurable progress was generated on behalf of nonsited States.

I then pledged to those concerned parties my unconditional commitment to see that transition legislation was enacted by the end of this year that would achieve the goals of the Governors' compromise.

The Committee on Energy and Natural Resources has put its best efforts forward to fulfill the pledge I made. Committee members listened carefully to the testimony received during a joint hearing with the Environment and Public Works Committee held on October 8. I especially recall comments made by Gov. Booth Gardner at the hearing—

That the original 1980 act had failed because it lacked "teeth" to ensure that States would not delay unnecessarily in accepting their disposal responsibilities.

That real-time pressure would be essential to move the new-facility siting process forward.

That, while the sited-State Governors could "live with" the milestones in the House-proposed transition legislation, they were aware of the fact that these milestones were easy to meet, and that they probably were too weak.

That the sited States would accept "emergency access" provisions only if they were tightly drawn so as not to become major "loopholes"

That it was important to consider what additional incentives we could include in the legislation so as to ensure the timely opening of new disposal facilities.

Mr. President, the actions taken in the Committee on Energy and Natural Resources met the objections and the objectives of the States point by point; and I want to underscore what the Senator from Louisiana has indicated—that it is important that we have real milestones. It is important to note that the discussions between staffs and principals have produced and agreement that does have some real teeth in it at some points.

Mr. President, the bill reported out of the Energy Committee—S. 1517—addressed every single one the points I have just listed in a way that none of the other proposals before Congress has done. In particular, I would note the following provisions of the Energy Committee bill:

The milestone requirements of S. 1517, as reported, are more rigorous than those found in H.R. 1083 or in S. 1578 or in the compromise substitute proposal. I believe, however, that the milestones in S. 1517 are not only realistic and achievable, but are also crucial to the attainment of measurable progress on behalf of the nonsited regions during the next 7 years.

The penalties contained in S. 1517 for not meeting the milestones are directed to the States at fault—rather than to the generators—as is the case in all other proposals—generators who have no direct control over the attainment of the milestones. Furthermore, flexibility—rather than rigidity—is included in the penalty system to allow the penalty to be tailored to reflect the particular circumstances leading to the missed milestone.

The incentives in S. 1517 are in the form of monetary rebates—or shall I say rewards—directed with no strings attached to the States accepting the politically unpopular burden of waste disposal on behalf of their region.

The "emergency access" provision in S. 1517, which requires a bi-State agreement, rather than relying on a federal agency bailout, eliminates the possibility of a guaranteed "loophole" in the transition legislation.

The Federal Government assumes responsibility for all classes of waste above class C low-level waste, thereby eliminating "orphan waste" categories that now exist due to the absence of any Federal law governing their disposal.

The problem of dual-agency regulation of mixed wastes at low-level waste disposal facilities is resolved in a

straightforward, unencumbered manner.

I could go on to describe other features of S. 1517, as reported, that make this bill far superior to other proposals now before Congress.

But instead, I will turn to the compromise agreement reached last week after many long hours of negotiation between the staffs of the Energy and Natural Resources Committee and the Environment and Public Works Committee. This compromise is similar to Senator THURMOND's proposal in one critical respect: It contains a so-called fourth milestone, which would require each host State, by a time certain, to have filed a license application with the Nuclear Regulatory Commission for operation of a low-level waste disposal facility in the State.

I want to emphasize that the Energy Committee, in its negotiations with the Environment Committee, gave in on almost every major issue, provided that this one key—element the fourth milestone—as preserved in the final compromise. We sacrificed our bill's stiffer milestone requirements, our bill's penalty provision, our bill's incentive provision, our bill's emergency access provison, and our bill's approach to the mixed waste issue. We did this conditioned on the inclusion of this fourth milestone, without which States would be able to sail through the entire 7-year transition period without ever having to file a disposal facility license application with the NRC.

I hate to think what might happen if this fourth milestone were deleted from the bill. If I had to wager a guess, I would predict that in 1992, we'd have large numbers of States still happily shipping their waste to South Carolina, Washington, and Nevada, all guilty of inadequate efforts to develop new disposal sites, and all coming to Congress crying for mercy and begging for more time. And I'm afraid that that Congress, in its wisdom, would grant yet another extension of the current temporary arrangement, precisely because a time-clock was again turning into a time-bomb for the Senators representing those States that had failed to meet their commitment.

The Energy Committee's insistence on a fourth milestone will go a long way toward preventing such an unacceptable result. And, I reiterate, that fourth milestone was the basis for all our other concessions to the Environment Committee. This key provision is essential if we are to enact legislation that will solve the serious problem now confronting us. That is why I cannot accept anything less than the basic elements of the compromise agreement originally negotiated by staff on behalf of the two committees.

This compromise, as now offered by Senator THURMOND, is certainly not preferable to S. 1517 as reported by the Energy Committee, but it certainly is preferable to the House bill, H.R. 1083, especially in the following respects:

The inclusion of the fourth milestone will ensure actual progress during the 7-year transition period.

The post-1993 sanctions should further encourage pre-1993 diligence on the part of nonsited States.

The emergency-access provision is more tightly drawn than the one in H.R. 1083.

The mixed-waste provision is a less cumbersome process by which to resolve the current dilemma in mixed-waste disposal.

The administrative provisions are more carefully drafted, reflecting the Energy Committee's concerns about protection of proprietary information.

The incentives for meeting milestones are drafted to more accurately reflect the agreement reached by the sited-State Governors in their compromise proposal.

Several Energy Committee proposals are included in the substitute, including, in particular, Senator JOHNSTON's proposal to satisfy milestone requirements through separate agreements between States, and his proposal with respect to a States taking title to its low-level waste after the January 1, 1993, deadline.

And so, Mr. President, I must admit that I am deeply concerned and frustrated about the end result of our negotiations between the two committees. I nevertheless feel that, given the lack of time to adequately flush out the weaknesses inherent in this package, and given the sited-State Governors' unconditional endorsement for such an approach, we have no choice but to move this legislation forward at this time. I therefore urge my colleagues to support Senator THURMOND in the passage of this legislation.

I would like to thank Senator STAFFORD, Senator SIMPSON, and Senator BENTSEN of the Environment and Public Works Committee for their cooperation in arriving at this compromise. I also wish to thank Senator JOHNSTON, Senator DOMENICI, Senator HECHT, and particularly Senator EVANS for their assistance on this matter. Senator THURMOND's role, of course, has been instrumental. Finally, as always, the staff has provided invaluable assistance in putting this legislation together. I would particularly like to acknowledge the efforts of David Doane, Marilyn Meigs, K.P. Lau, and Ben Cooper of the Energy staff, Jim Curtiss and Kate Kimball of the Environment staff, Cindi Blackburn of the judiciary staff; and Phil Jones and Scott Cameron of Senator EVANS and HECHT's staff respectively. The dedication and timeless efforts of these people made this bill possible and we owe them our thanks.

Mr. EVANS. Mr. President, first, let me depart from my formal remarks to say that it has been an interesting and worthwhile experience, and particularly enjoyable, for me to be working on the same side as both Senators from South Carolina, after we crossed swords so avidly just a few weeks ago on the issue of textiles.

This is a critically important bill for the United States, particularly important for the States of Washington, South Carolina, and Nevada. It is my hope that it will be transmitted promptly to the House and that they will accept the Senate version, to put this into law before the first of the year.

Mr. EVANS. Mr. President, I have some serious reservations about the way in which a nonsited State or compact region may use the emergency access provisions in the bill. I am concerned that a nonsited State or compact region will petition the Nuclear Regulatory Commission for an emergency access waiver for a lack of diligence in attempting to meet the required milestones provided for in the act. After the 7-year transition period ends on December 31, 1992, I am also concerned that a State or compact region without a facility licensed or constructed will petition for unlimited grants and extensions of emergency access. This is especially true since the only means by which a nonsited State or region after 1992 can gain access to the sited States is through emergency access or a voluntary agreement.

Can the Senator from Wyoming assure me that emergency access will only be used in limited circumstances?

Mr. SIMPSON. The Senator is correct in his understanding that the emergency access provisions in section 8 of the full substitute are meant to be used in only very limited circumstances. The intent of the bill's language is that emergency access will only be granted by the Nuclear Regulatory Commission in rare circumstances when a real and immediate threat to public health and safety exists. The NRC is first to examine and exhaust all the possible alternatives to granting emergency access such as on-site storage, voluntary agreements with sited States, and purchasing the unused allocations of utilities.

Mr. EVANS. Is it my further understanding that ceasing to generate low-level radioactive waste shall be considered by the Commission as an equal alternative with the ones the Senator just mentioned?

Mr. SIMPSON. Yes, the Senator is correct. In fact, I think we have accommodated the concern of the Senator from Washington by including this criterion in the statutory language of the substitute. Let me clarify that such alternatives must be "consistent

with the public health and safety" as defined by the NRC. There may be some benefits from the generation of low-level radioactive waste to the public health that the Commission must consider in making its determination of the need for emergency access. For example, the Commission would probably consider the benefits to the public health and safety brought about by the use of radiopharmaceutical products in cancer research and other critical medical research.

Mr. SYMMS. Mr. President, I wish to take this opportunity to compliment my distinguished colleagues, Senator McCLURE and Senator SIMPSON, for their diligent work and creative thinking in working out an acceptable compromise in a most difficult area. I support their proposal, although I realize it won't be completely acceptable to everyone.

Resolution of this issue now is absolutely imperative. As you all know, we presently have only three sites in this Nation that accept low-level nuclear wastes. These three sites are not satisfied with the present situation and their position is understandable. One of these States may cease accepting wastes in January. If this happens it will cause some real hardships. If the three States choose to refuse wastes, many institutions such as research facilities, hospitals and universities will be in a difficult situation.

Mr. President, this situation has been building since 1980. Its my understanding that today 37 States have joined compacts for waste disposal. We must provide the guidances for them to proceed to prepare to accept wastes.

Its important that any legislation on this subject has guidelines firm enough and penalties for noncompliance severe enough to assure that we won't be back here in 1992 working on this same issue.

Again, I wish to compliment my colleagues and urge that their work be recognized by passing this legislation. We need to proceed in an orderly way to facilitate the use of the technology available to us.

Mr. GORTON. Mr. President, I speak in support of S. 1578, the Low-Level Radioactive Waste Policy Act Amendments of 1985, as amended. I want to commend the chairman of the Energy and Natural Resources Committee, Senator McCLURE, the chairman of the Environment and Public Works Committee, Senator STAFFORD, and the chairman of the Judiciary Committee, Senator THURMOND, for their diligent efforts in bringing this important piece of legislation to the floor. I want particularly to commend my colleague, Senator EVANS, a member of the Energy Committee, for his tireless work on, and insightful contributions to, this consensus package.

S. 1578 is necessary because several States failed to fulfill their obligations under the Low-Level Radioactive Waste Policy Act of 1980. The 1980 act gave each State responsibility for disposal of low-level waste generated within its borders, and permitted the States to enter into interstate compacts to provide for the development of new regional waste sites. A key element of the act was a provision which allowed compacts to exclude waste from outside their compact regions beginning January 1, 1986.

This date is almost upon us, Mr. President, and as of today there are still only three operating low-level waste disposal facilities, located in Washington, South Carolina, and Nevada. Seven compacts have been formed, representing 39 States, but progress toward the development of new facilities has been practically nonexistent. Since these States failed to comply with the 1980 act in a timely manner, congressional ratification of the compacts has been blocked in an attempt to prevent the three States with existing disposal sites from excluding all waste generated outside their respective regions beginning January 1, 1986.

Mr. President, Washington, South Carolina, and Nevada have shouldered all of the other States' low-level waste burden for too long. The State of Washington has done much more than its share and has cooperated in dealing with the national problem in an exemplary fashion. In 1981, Washington State, in conjunction with other Northwest States, established the first compact in the Nation. While waiting for Congress to pass S. 356, the bill I introduced to grant congressional consent to the Northwest Interstate Compact on Low-Level Radioactive Waste Management, Washington State has continued to accept for disposal over 50 percent of the low-level waste produced in the United States, although Washington itself generates only 3 percent of the Nation's waste.

To break this stalemate, the Governors of the three sited States developed a compromise legislative package in consultation with unsited States, which contained the following key elements. In exchange for congressional ratification of their compacts, they would agree to accept a limited amount of waste over a 7-year period. To ensure that States make progress in developing facilities over the 7-year period, the Governors proposed the establishment of milestones for various stages of new site development. The failure to meet such milestones would result in financial sanctions and, ultimately, the loss of access. In addition, since the sited States will only be accepting the amount of waste which they accepted in 1983, and 33 new reactors are scheduled for operation during the 7-year period, the Governors devised allocations for utility generators which would represent reductions in waste volumes which the three existing facilities would accept for disposal.

This compromise became the basis of the Low-Level Radioactive Waste Policy Act Amendments of 1985, of which I am an original cosponsor. The amended version of S. 1578 which is before us today represents a true compromise that will benefit all. Members of the Energy and Environment Committees have, through careful negotiations, crafted a consensus bill which achieves the proper balance between tough but realistic deadlines to ensure that new disposal sites are opened and limited exemptions to those deadlines to ensure public safety.

S. 1578 is being adopted in conjunction with ratification of the regional compacts which are pending before Congress. Unsited States have 7 additional years in which to develop new sites. But on January 1, 1983, regardless of whether or not those new sites have been developed, Washington, South Carolina, and Nevada will be closed to out-of-region waste.

This legislation would establish annual volume caps, which limit the amount of low-level waste which the existing sites are required to accept. In addition, it would require the utilities, who are the primary generators of low-level waste, to reduce the volume of waste they ship to the existing sites.

To provide an incentive for the development of new sites, S. 1578 would authorize the States with existing sites to impose surcharges for out-of-region waste. If the other States meet certain milestones for various stages of new site development, part of those surcharges will be rebated to them. On the other hand, if they miss the milestones, the amount of the surcharges will increase. If a State fails to meet the milestones even after generous grace periods, generators from that State may be denied access to the existing sites before the 1992 deadline.

In the unlikely possibility that an emergency might arise in which there is an immediate and serious threat to the public health and safety or our Nation's defense and security, this bill authorizes the Nuclear Regulatory Commission—under very narrow circumstances and for a limited period—to grant emergency access to a low-level waste disposal site.

S. 1578 also would provide for the resolution of conflicting regulations under the Solid Waste Disposal Act and the Atomic Energy Act relating to hazardous waste that is also low-level waste. The Environmental Protection Agency and the Nuclear Regulatory Commission would be required to resolve substantive and procedural regulatory conflicts and to consolidate procedures where practicable.

I am confident that S. 1578, in conjunction with ratification of the pending interstate compacts, is a fair and balanced package. By approving this legislation today we will have taken a vitally important step toward guaranteeing that our hospitals, our university research programs, and our industries and utilities will stay in business. I urge my colleagues to give it their full support.

Mr. HECHT. Mr. President, I thank the distinguished Senator from South Carolina [Mr. THURMOND] and the distinguished Senator from Washington [Mr. EVANS], who have worked with the State of Nevada to work out this problem.

Mr. President, the Senate is considering a bill that is very important to all of our Nation's people.

Everyone who has had a friend or relative treated for cancer, or who is interested in our national defense, or who is excited about research possibilities at the frontiers of science, or who uses electricity from a nuclear powerplant has a strong interest in the passage of this bill.

This bill, the Low-Level Radioactive Waste Policy Act Amendments of 1985, has been subjected to extensive consideration by both the Senate Energy Committee and the Environment Committee. Individual committee action was followed by difficult and time consuming negotiations between the Senators on the two committees in an effort to bring a final product to the floor of the Senate for consideration. I would also like to extend my thanks to the staffs of all the committees that have struggled long and hard on this legislation.

This was all done under great time pressure, because the Nation is faced with the very real possibility that without the enactment of this legislation the three existing low-level nuclear waste disposal facilities will close indefinitely on January 1, 1986.

This time pressure stems from the fact that back in 1980 the Congress enacted legislation that called for the States to organize themselves into compact regions by 1986 to dispose of low-level radioactive waste. The problem is that only 37 States entered into these compacts, and no other States developed additional disposal facilities.

The three States with existing sites, Nevada, South Carolina, and Washington, are understandably running out of patience. This bill gives the other 47 States 6 more years to comply with the intent of the 1980 law. In return, three States with existing sites are provided assurances that all their sister States will finally meet their responsibilities. These assurances take the form of milestones, coupled with incentives for cooperation, and disincentives for noncompliance.

Nevada, South Carolina, and Washington will not indefinitely bear the full burden of the the Nation's low-level nuclear waste disposal. Existing law gives these States the right to close their sites in just 12 days. I hope all Members of Congress realize that the three governors are quite likely to exercise this right if the Congress fails to enact this legislation before we recess for the holidays.

The other body recently passed its own version of this legislation, which is marginally acceptable, but I must tell my colleagues I believe that the Senate has put together a better bill, which I hope we will very soon pass and send over to the other body for its consideration and approval.

Mr. THURMOND. Mr. President, if there are any questions, I will be glad to try to answer them at this time.

I ask unanimous consent to have printed in the RECORD a resume of this bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

KEY POINTS OF THE THURMOND COMPROMISE PROPOSAL

(1) Non-sited generators will be allowed to continue to dispose of their low-level waste at the existing disposal facilities through December 31, 1992.

(2) Volume caps will be placed on the amount of low-level waste each of the three current disposal sites is required to take through 1992, and then current sites will be allowed to exclude out-of-region waste after 1992.

(3) Utility generators will be allocated a specific amount of this disposal space to be used at their discretion.

(4) Non-sited regions and non-sited states will be required to meet specific milestones toward developing their own facilities. If the states do not comply with these milestones, generators will be assessed a penalty surcharge during a specified grace period. It compliance is not achieved by the end of the grace period, the generators may be denied access to the existing disposal facilities.

(5) Another escalating surcharge will be placed on all low-level waste from non-sited regions and non-sited states, but these surcharges will be rebated to states that comply with the milestones.

(6) States which do not have an operating disposal facility by January 1, 1996, will be required to take title to, and possession of, all waste generated within the state. A state will also be liable for consequential damages if it fails to take possession of this waste after January 1, 1996.

(7) This proposal is essentially the draft I circulated with a Dear Colleague letter on Tuesday of this week with the following major changes:

(a) All states and compact regions will be required to file a disposal facility license application by January 1, 1992, or face a nonrebatable surcharge of three times the normal surcharge; and

(b) The emergency access provision has been strengthened.

(8) This legislation will also give consent to the seven regional compacts that were reported out of the Judiciary Committee.

Mr. THURMOND. Mr. President, this is one of the most complicated and sensitive pieces of legislation in which I have ever participated since I have been in the Senate. It is one of the most important pieces of legislation.

This legislation concerns every State in the Nation. There are only three States now that take this low-level waste: South Carolina, Washington, and Nevada. The Governors of those States have announced that they would close down the sites at the end of this year unless this action is taken. It is important that we take this action, anyway. The States should have acted before now to get these compacts ready.

This legislation contains seven compacts, and I ask unanimous consent that a list of these compacts be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATES THAT HAVE SUBMITTED COMPACTS FOR CONGRESSIONAL CONSENT

SOUTHEAST (SITED) (8) S. 144

Alabama, Florida, Georgia, Mississippi, North Carolina, South Carolina, Tennessee, and Virginia.

CENTRAL (5) S. 655

Arkansas, Kansas, Louisiana, Nebraska, and Oklahoma.

NORTHWEST (SITED) (7) S. 356

Alaska, Hawaii, Idaho, Montana, Oregon, Utah, and Washington.

MIDWEST (7) S. 899

Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, and Wisconsin.

ROCKY MOUTAIN (SITED (4) S. 442

Colorado, Nevada, New Mexico, and Wyoming.

NORTHEAST (4) S. 1798

Connecticut, New Jersey, Delaware, and Maryland.

CENTRAL MIDWEST (2) S. 802

Illinois and Kentucky.

Mr. THURMOND. Mr. President, I wish to say again that I deeply appreciate the tremendous cooperation that has been given by so many people.

I do not know of any piece of legislation that has brought into being the works of so many Senators in this Senate or so many staff members.

I especially wish to express my appreciation to Senator SIMPSON, who is the assistant majority leader, and also he is chairman of the Subcommittee on Nuclear Regulation of the Environment and Public Works Committee. Senator SIMPSON has worked on this day and night. He has been a giant in this matter, and I just cannot thank him enough.

I wish to express my appreciation to Senator STAFFORD, the able chairman of the Environment and Public Works Committee. He has been a stalwart here. He has cooperated beautifully and worked hard on this matter.

I express my appreciation to Senator MCCLURE, chairman of the Energy and Natural Resources Committee.

We had two big committees here that acted on this matter, and Senator McCLURE has been very sound on this. He has cooperated with Governor Riley and me all the way through on this, just the same as Senator STAFFORD has and Senator SIMPSON, and he has been most helpful.

I wish to express my appreciation to Senator EVANS of Washington State with whom we worked so hard, and yesterday we finally got Senator STAFFORD, Senator EVANS, and Senator SIMPSON in the President's pro tempore's office and overcame obstacles that I was not sure we would be able to do.

We are deeply appreciative of the consideration and the care that they gave to this legislation and came through in such fine style. I wish to also express my appreciation to Senator BENTSEN, the ranking minority member of the Environment and Public Works Committee for his cooperation, so Senator JOHNSTON, the ranking minority member of the Energy and Natural Resources Committee, for his fine cooperation, and who made many helpful suggestions and whose advice was very valuable.

I wish to also express my appreciation to Senator HECHT of Nevada who was so active and conferred with me and I am sure others from time to time and cooperated in every way we could to get through this legislation.

I wish to thank Senator DOMENICI, from New Mexico. Senator DOMENICI is a member of the Energy and Natural Resources Committee, and he has been most helpful in this matter.

I wish to thank Senator GORTON, of Washington State, who has cooperated in this effort and has been helpful.

I wish to express my appreciation to Senator HOLLINGS, my distinguished colleague from South Carolina, for his interest in this matter and all that he did to help bring it to fruition.

I thank also the distinguished majority leader, Senator DOLE. We could not have brought this matter here without his cooperation and assistance, and we are deeply grateful.

I thank Senator BYRD for his cooperation and assistance in bringing this matter to the floor and helping as he did.

Mr. President, this matter not only concerns all the Senators but it consumed many hours of work. You just do not realize how many hours went into this work by so many valuable staff members.

I wish to call their names because they deserve due credit for this.

Cindi Blackburn, of the Judiciary Committee; Jim Curtis, of the Environment and Public Works Committee under Senator SIMPSON; Dan Berkovitz, of the Environment and Public Works Committee under Senator STAFFORD; Kathy Cudlipp, of the Environment and Public Works Committee under Senator STAFFORD; Marilyn Meigs, of the Energy and Natural Resources Committee, under Senator McCLURE; Gary Ellsworth, of the Energy and Natural Resources Committee under Senator McCLURE; Ben Cooper, of the Energy and Natural Resources Committee under Senator JOHNSTON; Kate Kimball, of the Environment and Public Works Committee under Senator BENTSEN; Phil Jones, of the Energy and Natural Resources Committee, under Senator EVANS; and K.P. Lau, of the Energy and Natural Resources Committee, under Senator DOMENICI.

Mr. President, I also wish to express my appreciation to Dennis Shedd, who assisted greatly in the negotiations. He is the chief counsel of the Judiciary Committee. He, and as I mentioned, Ms. Blackburn, were both very helpful.

I also express my appreciation to Wright Andrews, Libby Langworthy, and David Shelledy, lawyers with the law firm of Sutherland, Asbill, & Brennan, a law firm here in Washington. They were most helpful. They conferred with us from time to time and made suggestions. They conferred with most of the Senators here who are players in this program, and they rendered a magnificent service in connection with it.

Mr. President, again I wish to say that I do not know of any piece of legislation that has required as much skill, as much patience, and as much effort and cooperative effort to pass since I have been in the Senate as this particular piece of legislation, and I am very grateful to all who participated and assisted in connection with it.

Mr. SIMPSON. Mr. President, before we get too much farther, we probably should pass this legislation and it might be an excellent idea.

So, I say that in the best humor because Senator THURMOND has really covered what a difficult thing it had been and without his graciousness and persistence we would not be here.

Mr. LAUTENBERG. Mr. President, I am pleased that the seven interstate compacts are before the Senate today. In 1980, the Congress declared that the disposal of low-level radioactive waste is a State responsibility. To meet this responsibility safely and efficiently, the States must develop regional plans. I am gratified that 37 State legislatures have responded by enacting enabling legislation for seven interstate compacts. These seven compacts represent an important step in moving toward regional disposal of these wastes. In consenting to these compacts, the Congress gives its go ahead to the implementation of regional disposal of low-level radioactive waste.

Having ratified the northeast compact, New Jersey has taken an essential step in assuring its access to the existing sites for low-level radioactive waste generated within New Jersey. This compact provides the framework for implementing siting plans and for establishing a new facility. Two concerns were raised, however, by New Jersey during the consideration of the northeast compact: shallow land burial and institutional control. In addition, the question of judicial review is addressed in a colloquy by several Senators.

Mr. President, a provision in the low-level radioactive waste policy amendments act, legislation which establishes the institutional framework within which the compacts will operate, requires the Nuclear Regulatory Commission to provide the technical guidance needed to develop and license new facilities by alternative disposal methods. This provision, that I authored, ensures that in meeting performance objectives, attention is paid to the careful balance of the combination of institutional control and engineered factors.

Each of these seven interstate compacts contains similar provisions for policy and purpose. In addition, they provide for the regional disposal of their own low-level radioactive waste, but vary in many other aspects. I commend my colleagues for developing consent language that respects the individual State needs and, yet reinforces the underlying Federal policy of the amended act.

Mr. President, I urge my colleagues to support the adoption of this consent legislation.

Mr. McCLURE. Mr. President, I rise in support of S. 1578, the Low-Level Radioactive Waste Policy Amendments Act of 1985. This legislation requires States to develop management plans for disposal of all low-level radioactive wastes generated within their boundaries. We owe a debt of gratitude to Senator STAFFORD, chairman of the Environment and Public Works Committee, and other members who have moved to resolve the important question of low-level radioactive waste disposal constructively and expeditiously to ensure passage this year. Certainly there is a need to enact this legislation in 1985, however, in responding to this urgency, important environmental protections should not be neglected. Thus, several issues addressed by this bill are of special concern to me.

Radioactive substances are used widely to generate electric power, and in medicine, research and manufacturing. Each year these uses produce 75,000 cubic meters of radioactive waste. These wastes represent one of the challenges of the nuclear age: To utilize radioactive materials for the general good, but to safely manage for eons the resulting radioactive waste.

Initially, the Federal Government was responsible for all low-level radioactive waste. Then in 1962, the Atomic Energy Commission started licensing privately owned commercial burial grounds for waste disposal. Eventually some of these sites were closed for environmental reasons, leaving only three States to accept all of the Nation's waste. To resolve this situation, Congress responded by passing the 1980 Low-level Radioactive Waste Policy Act. This act requires States to develop management plans for the disposal of all waste generated within its boundaries.

The bill we are approving today ensures access to the three operating disposal sites while new facilities are constructed. During these 7 years, milestones must be met by all the States. Surcharge penalties are imposed on those States that miss deadlines. Under certain circumstances, grace periods are granted to allow the States flexibility in meeting the deadlines. Flexibility grace periods prevent jeopardizing the careful analysis necessary for constructing new facilities. Also, generators of waste must reduce the waste volume produced each year. These steps provide incentives for both State and generator compliance but, also, encourage the development of sound facilities.

The emergency provision in the bill grants all the States time-limited access to the operating sites. This important feature is necessary to eliminate any serious threat to public health. Since New Jersey produces substantial amounts of this waste, these milestones, grace periods and emergency access provisions are essential. These provisions allow New Jersey access to the operating sites while a new regional facility is constructed that is safe and environmentally sound.

Another provision in the bill, that I authored, directs the Nuclear Regulatory Commission to provide all the States with technical guidance and licensing requirements for alternative disposal methods. This information is important because many States are still selecting disposal methods. To ensure efficient licensing, the NRC shall provide information necessary for meeting the performance objectives by alternative disposal methods. The inclusion of these provisions arose from my concern that the published requirements are directed only to shallow land burial, a disposal method of questionable environmental soundness.

I am also concerned that the NRC provide guidance to all the States about the feasibility of varying the institutional control and engineered features to meet the specific needs of each State. As many State plans are still in the developmental stages, the NRC should provide this essential information to ensure timely licensing of the new facilities. We must be assured that the combination of institutional control and engineered features will adequately protect public health and the environmental over the full lifetime of the hazard of the low-level radioactive waste.

Mr. President, I urge my colleagues to support the adoption of this legislation and its companion bill containing the text of the seven separate interstate compacts.

Mr. SYMMS. Mr. President, section 5 of the bill includes a provision that authorizes the Secretary of Energy to allocate additional disposal capacity to commercial nuclear power reactors that experience unusual or unexpected operating, maintenance, repair, or safety activities. Is it your understanding that the Secretary is authorized under this provision to make available additional disposal capacity to accommodate increased waste volumes which result from operation of a reactor without discharge of radioactively contaminated water into the environment?

Mr. SIMPSON. Yes; the Senator from Idaho is correct.

Mr. McCLURE. I would like to ask the distinguished chairman of the Judiciary Committee a question regarding the relationship of the Low-Level Radioactive Waste Policy Act, as amended by our action today, and the several related compacts to which Congress is consenting. Am I correct that the compacts are consented to on the condition that they are subject to the Low-Level Radioactive Waste Policy Act, as amended?

Mr. THURMOND. The Senator is correct.

Mr. McCLURE. Am I also correct in my understanding that the consent of Congress is granted only for so long as the regional commissions, committees, or boards established in these compacts comply with all of the provisions of such act, as amended?

Mr. THURMOND. The Senator is correct.

Mr. McCLURE. Am I also correct that, when we say the consent is granted as long as all provisions of the Low-Level Radioactive Waste Policy Act, as amended, are complied with, we include the provisions of section 5(d)(2)(C) regarding the States taking title to, possession of, and liability for waste which is their responsibility?

Mr. THURMOND. The Senator is again correct.

Mr. McCLURE. Does the Senator believe there are any constitutional problems with this approach of conditioning consent in this manner?

Mr. THURMOND. None that I am aware of.

Mr. McCLURE. I thank the Senator.

Mr. LAXALT. Mr. President, the safe and permanent disposal of this Nation's low-level nuclear waste is an issue of vital importance. For too long, the burden of nationwide disposal has been borne by three States—my home State of Nevada, as well as Washington and South Carolina.

In seeking a more equitable solution to this problem, Congress in 1980 enacted the Low-level Radioactive Waste Policy Act. The objective of the act was to create a safe and efficient national system of waste disposal by encouraging States to enter into regional compacts to handle the low-level waste generated within their borders. Consequently, this would allow the States to exercise the primary responsibility for such waste disposal, either through establishment of their own disposal site or through agreement with another State that has a disposal facility. An important provision of the act provided that regions with congressionally approved compacts may exclude out-of-region waste beginning January 1, 1986.

With the January 1, 1986, deadline less than 2 weeks away, it is imperative that Congress ratify the seven compacts for several reasons. For one thing, in the past 5 years no additional storage space has been created. Furthermore, the Governors of Nevada, Washington, and South Carolina have indicated that they will close their sites at the end of this year if Congress has not satisfactorily addressed this disposal problem. National inaction regarding the creation of additional storage facilities threatens to curtail seriously medical research and other activities vital to the public health and welfare.

In an effort to avoid this impending problem, the Governors of Nevada, Washington, and South Carolina along with unsited States and other interested parties have worked out legislation to provide for a reasonable and orderly system of nationwide low-level nuclear waste disposal for the next 7 years.

Under this bill, Nevada, Washington, and South Carolina are guaranteed that by 1993 they will no longer be the only dumping ground for all low-level nuclear waste. States that do not yet belong to a regional compact with an operating site are allowed access for 7 years to existing sites under tough but reasonable conditions. Moreover, enforceable milestones toward opening new sites will ensure continued progress in creating new disposal capacity.

It is high time that States which produce significant amounts of low-level radioactive waste and refuse take meaningful steps toward their own means of disposal. It is not fair, nor is it any longer acceptable, that three States shoulder this burden for the entire country. Congress and the individual States must act, and act now. We must assure continued adequate

nationwide low-level nuclear waste disposal for all States by adopting these compacts and enacting the transitional legislation.

Mr. MITCHELL. Mr. President, this legislation, the Low-Level Waste Policy Act Amendments of 1985, that sets the guidelines under which disposal of this Nation's low-level radioactive waste will be handled during the period between January 1, 1986, to January 1, 1993, when all access to low-level waste disposal sites can be terminated to unsited States or compacts.

It has been developed in order to maintain access for the disposal of low-level waste while keeping three States from having to take all the Nation's waste.

It represents a compromise which would avoid an immediate cut-off of access to generators as of January 1, but which assures the sited States that they will not have to continue accepting all of the Nation's low-level waste indefinitely.

A detailed explanation of the bill has already been given. In my statement, I would like to give a short explanation of the necessity of this legislation and its importance to all States.

Under the Low-Level Radioactive Waste Policy Act of 1980, States have the responsibility for disposing of low-level radioactive waste. The act authorizes States to organize into interstate compacts on a regional basis to handle the waste. After January 1, the act allows those regions whose compacts have been approved by Congress to exclude waste generated outside the region.

Seven regional compacts, covering 37 States, have now been submitted to Congress for the required congressional approval. Some 12 States, including my State of Maine, are negotiating possible compacts. Texas has announced its intention to build a Texas only disposal facility.

The 19 sited States in compact regions with operating low-level waste disposal sites: Southeast (Barnwell, SC), Northwest (Richland, WA), and Rocky Mountain (Beatty, NV) have been pressing Congress for quick approval of their compacts so that they can close their sites to out-of-region wastes.

Not surprisingly, the 31 "unsited" States, concerned that they will not be able to bring new regional disposal sites on line by the end of the year, have opposed action that would result in their being denied access to the only three sites currently licensed to accept low-level waste.

Earlier this year, Governors of the three sited States, Governors of many of the unsited States, and congressional leaders reached agreement on the general framework for congressional approval for all pending and future compacts. The compromise, which is embodied here, contains four basic elements.

The sited States will keep the three operating sites open for an additional 7 years. But under the compromise, the three sites do not have to accept more low-level waste than the volume currently accepted by the sites.

In exchange for the 7-year extension, the unsited States are required to meet three milestones toward opening new sites. If the milestones are not met, the States in violation may be denied access to an operating site.

Nuclear utilities, the largest generators of low-level waste, are required to reduce the volume of waste they generate over several years. Utilities in unsited States must make the largest reductions.

To encourage volume reductions by other, nonutility generators, sited States may impose surcharges on waste accepted between 1986 and 1992.

Under this bill, the sited States will keep the three operating sites open to generators from unsited States or compacts for an additional 7 years. States or compacts would be expected to have an operational low-level waste disposal facility in operation by that time. In exchange for the 7-year extension, the unsited States are required to meet three milestones toward opening new sites.

By July 1, 1986, each State legislature must ratify compact legislation or enact legislation indicating its intent to develop a disposal site within its borders.

By January 1, 1988, each compact region or State must choose a site or site developer and prepare a siting plan.

By January 1, 1990, a complete application for a disposal facility must be filed with the NRC or the Governor of a State must certify that the State will be able to provide for the disposal or storage of any low-level waste requiring disposal after January 1, 1993.

Sited States are not required to accept any volumes of waste greater than the amount they currently accept on an annual basis. Because the number of nuclear reactors is expected to increase in the next 7 years, utility generators must reduce their volume of waste based on fixed percentage reductions from the current utility industry average.

To encourage volume reductions by generators and as an economic incentive for other States to develop their own sites, sited States may impose surcharges on waste accepted between 1986-92. Under current law, States are prohibited from imposing higher surcharges on out-of-State waste.

If a State or compact region fails to meet either of the first two milestones, the sited States may impose a penalty surcharge, a doubling of the surcharge, on wastes disposed of from that State or region during the period of noncompliance, and for a limited grace period after the milestone deadline.

The sited States would be able to deny access after the grace periods. There is no grace period for the third milestone; sited States would be able to deny access immediately to States or compacts that have not met this final milestone.

This legislation also tackles the difficult problem of mixed waste, that is, waste that is subject to regulation both under the Solid Waste Disposal Act and under the Atomic Energy Act.

As those familiar with this issue know, EPA and NRC, the two agencies involved, have been struggling to resolve this apparent conflict for years. I believe the approach taken in this bill provides an effective and workable mechanism for resolving this conflict.

The agencies are first asked to focus on specific waste streams in deciding the appropriate method of handling the waste. In our discussions with the agencies, the level of conflict appeared greatly reduced when the discussion focused on specific wastes.

After the waste is identified, the agencies are to determine if the waste can be properly disposed of in a facility currently licensed by either agency. If the agencies cannot agree to send the waste to such a licensed facility, then they are to discuss what requirements in addition to the NRC's regulations would be necessary to protect the public health and safety and human health and the environment. If no accord can be reached on this issue, the NRC may prohibit the disposal of the wastes in a low-level waste disposal facility.

This provision is not perfect, but it serves the dual purpose of reducing uncertainty for the States, while not providing for mandatory years of joint rulemaking by the agencies.

States are entitled to know what kind of disposal facility they will need for mixed waste, and this provision attempts to give them a prompt answer.

I am pleased that such a practical compromise could be forged and I strongly support this provision.

This bill is important to my State of Maine. Like all other States, Maine has been grappling the questions involved with the disposal of low-level radioactive waste generated within its borders.

Maine's low-level waste siting commission (now called the Radioactive Waste Advisory Commission) has tried, without success, for several years to join with other States in forming a compact to dispose of its waste. As another alternative, Maine has explored the possibility of having its own disposal site.

Representatives from Maine State Legislature and the Governor's office have expressed support for the basic

concepts of the umbrella legislation. I think that is a tangible demonstration of my State government's willingness to address its responsibilty for the safe disposal of low-level radioactive wastes.

I believe the State's particular concerns regarding the transition bill originally introduced by Senator THURMOND have been addressed in two provisions that were developed with the cooperation of Senator SIMPSON, the chairman of the Nuclear Regulatory Subcommittee and Senator STAFFORD, the chairman of the full Environmental and Public Works Committee during that committee's consideration of this issue.

Under the 1980 act, States have the responsibility for disposing of Federal low-level waste generated within their borders with the exception of atomic weapons and research and development activities of the Department of Energy.

Low-level waste generated through nuclear submarine overhauls at the Kittery Naval Shipyard, which accounts for about 1,000 cubic feet of low-level waste annually, or roughly 10 percent of the State's waste, is the responsibility of Maine under current law.

The transition bills passed by the House and reported by the Senate Energy Committee included language that required submarine decommissioning wastes to be sent to Federal disposal sites.

Similar language is included in this bill. That will not take all of the shipyard's low-level waste out of Maine's hands, but it will allow the State to plan on a fairly constant and consistent flow of waste.

The second Maine concern centered around the feasibility of constructing and operating a site in Maine. The State's studies have found it may be feasible to site a low-level waste disposal facility in Maine safely, if regulatory approval can be obtained from the Nuclear Regulatory Commission.

The studies indicated that it would be preferable for any facility in Maine to use engineered above-ground construction rather than shallow land burial, which is the technique now in use in the three existing sites, because of the State's high water table and deep frost line.

Section 8 of this bill will help Maine and other States and compacts deal with this problem. It has two parts.

Twelve months after enactment, the NRC would have to establish and publish technical guidance for the licensing of facilities that use methods other than shallow land burial.

Twenty-four months after enactment, the NRC would have to establish the framework under which a low-level waste site utilizing an alternative disposal methodology could be licensed by the Commission. The amendment does not limit the NRC to rulemaking in order to set the requirements.

Enactment of this language should provide reasonable assurance that the NRC will be in a position to license any type of disposal site deemed appropriate by a compact or State by the January 1, 1990, deadline for States or compacts to submit a license application for a low-level waste disposal facility.

This bill represents months of extensive negotiations involving States and both Houses of Congress in order to reach a fair compromise in this most controversial, difficult, and sensitive issue for all concerned parties.

The bill offers sited States and regions assurance that they will not have to continue to accept the low-level waste from the rest of the country with no end in sight. That is critical for those States.

Equally critical to States or compacts without presently operating sites is the question of continued access to low-level waste disposal facilities until their own disposal sites can be constructed and licensed by the NRC. That has also been included in this legislation.

The fact that the Senate has such an effective piece of legislation before it is a direct result of the very diligent work and persistence of many Members. I'd like to particularly note the efforts of the chairman of the Judiciary Committee, Senator THURMOND, who introduced the legislation and who has played a critical role in its travels through this body over the past several months.

Commendations are also deserved for the leadership of both the Energy and Natural Resources Committee, Senators MCCLURE and JOHNSTON, and the most able leadership of the Environment and Public Works Committee, Senators SIMPSON and HART of the Subcommittee on Nuclear Regulation, and Senators STAFFORD and BENTSEN from the full committee.

I strongly support this important legislation and I urge my colleagues in the Senate to do likewise.

Mr. LEVIN. Mr. President, this legislation is very important to all States including Michigan who must do something to properly dispose of the low-level radioactive waste generated within their borders. It is important to all of us that this waste be properly disposed of.

At the present time, this Nation has only three commercial waste disposal sites and no new disposal facilities are expected to open before the early 1990's. Consequently, the Governors of those States have threatened to close the sites to any out-of-the-region waste after January 1, 1986—a deadline set in the 1980 Low-Level Radioactive Waste Policy Act for regional compacts to take care of their own waste. That presents a very real problem to States like Michigan, whose low-level waste generation is large enough to cause interim storage problems.

Therefore, it is my assessment that States like Michigan cannot afford to take the risk of those three facilities being closed and I would not stand in the way of passage of this legislation, which gives nonsited States an extended period of time in which to open their own disposal sites.

I do, however, have strong reservations about a provision which makes the State liable for all waste generated within its borders, if it is not able to dispose of all its waste by 1996. I understand the basis for this provision, which is to provide an additional incentive to States to properly dispose of their waste. However, I feel this measure is too drastic and could cause severe waste management problems for the States. I am concerned that it may be impossible for States which generate significant amounts of low-level radioactive waste to dispose of all of the waste generated within its borders by that date due to circumstances beyond their control, such as litigation. I believe that consideration should be given to States who cannot meet that deadline if they have made every effort to meet the milestones and the process set forth in that law and flexibility should be exercised on this provision, although it is my hope no States will be unable to meet this deadline.

Mr. President, I will follow the progress of the formation of the regional compacts very closely to make sure that we have not set unreasonable milestones in the bill.

THE NEED FOR A CHANGE IN THE LOW-LEVEL WASTE POLICY ACT OF 1980

Mr. DIXON. Mr. President, I rise today to commend my colleagues for working out a solution to the serious problem 47 States will face on January 1, 1986, because of the Low-Level Waste Policy Act of 1980.

Congress passed the Low-Level Radioactive Waste Policy Act of 1980 to allow individual States to treat and dispose of low-level waste that they generate. Congress determined, in the 1980 act, that low-level waste could best be dealt with on a State or regional level.

In response to the Low-Level Radioactive Waste Policy Act, the States of Illinois and Kentucky entered into a regional compact called the central midwest interstate compact. This measure was passed by the Illinois General Assembly. Further, an executive agreement was reached between the two States and signed by Illinois Gov. James Thompson and Kentucky Gov. Martha Layne Collins a year ago. The Low-Level Radioactive Waste Policy Act of 1980 requires that Con-

gress give its consent to such arrangements negotiated by the States.

Low-level nuclear waste is defined as any radioactive substance, but is generally confined to contaminated materials from commercial reactors, hospitals, research institutions, and industrial sites. Low-level waste decays faster than high-level waste and is measured by volume rather than radioactivity. Low-level waste is not spent reactor fuel or radioactive liquids produced by reprocessing, rock and sand from which uranium has been extracted, or transuranic waste.

Currently, all low-level waste that is privately owned in the United States is deposited at one of three sites: Barnwell, SC; Beatty, NV; or Hanford, WA. Additional sites are needed to respond to an increase in low-level waste generated from private operators, particularly from the growing field of nuclear medicine from which all Americans benefit.

Citizens of the 47 nondepository sites and the District of Columbia recognize the need to form regional compacts. In fact, the people of Illinois understand the concerns of the people from the depository States, because we have had a low-level waste site in the past. Currently, it is closed. However, the target date of January 1, 1986, as established under the 1980 act, was too optimistic. After this deadline set by Congress, a State could refuse to accept waste generated from outside its region.

The central midwest interstate compact, which would store low-level nuclear waste from Illinois and Kentucky, does not have an existing, operating site. The leadtime needed to build a site is 7 years from today. The State governments of Illinois and Kentucky are currently developing a detailed plan to be used for their site selection process.

I recognize the desire of the depository States to restrict the use of their facilities. Illinois and Kentucky State officials have been in contact with both the private operators and Federal officials to inform them of progress on the central midwest regional compact. However, the operators of the sites must realize that without the extension of the deadline for low-level nuclear waste this country will have unregulated nuclear waste at several unsanctioned sites across the country. Congress must not allow this situation to continue.

I am pleased that a 7-year extension has been worked out in a way that will ensure a more orderly transition designed to protect all Americans, as well as the citizens of Illinois and Kentucky.

Mr. BINGAMAN. Mr. President, I rise today in support of the passage of the bill amending the Low-Level Radioactive Waste Policy Act of 1980. This legislation is desperately needed to avoid the shutdown of existing low-level waste facilities.

The 1980 act was designed to encourage States to form regional compacts that would cooperatively plan and operate low-level waste [LLW] disposal sites, thereby more equitably allocating the economic and political costs now borne by just three States that host active disposal sites—Nevada, Washington, and South Carolina. The act included an exclusionary provision that enabled compacts consented to by Congress to exclude wastes from outside their region effective January 1, 1986.

Since passage of the 1980 act, seven compacts have been established and presented to Congress for eventual ratification. These compacts, representing 37 States, include the 3 sited region compacts and 4 unsited region compacts. Other States are in various stages of progress.

Because there remains a number of States that have not entered into compacts, and, no States have developed new facilities, the future of low-level waste disposal is in jeopardy unless the law is changed. Knowing that ratification of the compacts currently before Congress would allow the three existing sites to close their doors to out-of-region wastes, Congress has denied consent to any compacts.

Meanwhile, the Governors of the three States have threatened to close down the facilities January 1, 1986, if Congress does not take some action to resolve the impasse.

The legislation the Senate considers today would resolve this impasse. This legislation is the result of almost a year of effort to develop a compromise by which unsited regions would be allowed continued access to the existing disposal sites for a 7-year period. In return, the sited regions would be assured of specific volume limitations on incoming wastes, and restrictions on the access by any compact region that has failed to meet certain prescribed milestones for development of new disposal sites.

This legislation would ensure that we could continue disposing of civilian and certain Federal agency wastes at commercially operated facilities and minimize changes to the proposed interstate compacts.

I congratulate the sponsors of the bill for their diligence in keeping this issue before the Senate. I appreciate their willingness to make necessary changes in the definition of low-level waste in order to exclude certain wastes that are more appropriately the responsibility of the Federal Government.

I strongly urge my colleagues to support the bill.

It is imperative that the Senate act immediately on this legislation.

Thank you, Mr. President.

Mr. MOYNIHAN. Mr. President, the low-level nuclear waste bill before us is a well-balanced compromise, and a most necessary one. Without clear action by the Congress, the Governors of the three States that have been disposing of all of our commercial low-level nuclear wastes have threatened to shut down the disposal sites in their States. I cannot say that I blame them.

In 1980, when Congress passed the Low-Level Waste Policy Act, we thought that by now new disposal capacity would be available; such has proved not to be the case. The citizens of South Carolina, Nevada, and Washington deserve to know that a firm schedule is in place by which others will share the burden. At the same time, the rest of the Nation deserves to know that the existing sites will continue to accept these byproducts of both nuclear power and nuclear medicine until new sites are opened.

Mr. President, as a member of the Subcommittee on Nuclear Regulation of the Environment and Public Works Committee, I am pleased to report that this complex bill meets those conflicting needs very well. New Yorkers will continue to light some of their lights with nuclear electricity—and their doctors will continue to use life-saving laboratory tests that depend on the use of radioactive materials. So will the citizens of South Carolina—and they will be able to watch New York, and the rest of the Nation, make their own arrangements to dispose of their own low-level radioactive wastes.

The timetables required by this measure are firm and realistic. It is indeed an equitable approach for all concerned, and I am pleased to support it.

Mr. SPECTER. Mr. President, it is critical that the Senate take action today to allow a transition period for States to enter into compacts for the disposal of low-level radioactive waste.

Pennsylvania is one of a number of States which would be caught in a terrible bind beginning on January 1, 1986 without passage of this legislation. Although the Commonwealth has taken strides toward arranging a compact with neighboring States, it has not been able to finalize an agreement. Acting responsibly and in good faith, Pennsylvania has simply not had enough time to establish a comprehensive and worthwhile agreement.

Because so many States are in a similar situation, the Nation will face a certain environmental crisis beginning in the new year without congressional approval of a transition period. This can be prevented.

I am convinced that the Low-Level Radioactive Waste Policy Amendments Act of 1985 will provide the necessary time for States like Pennsylvania to complete negotiations and ar-

rangements for their respective compacts. I appreciate the diligence and persistence of my colleagues in bringing this vital legislation to the floor of the Senate before sine die adjournment.

H.R. 1083—LOW-LEVEL RADIOACTIVE WASTE

Mr. EVANS. Mr. President, I am delighted that we key Members of the Senate have been able to reach an agreement on an acceptable bill to bring to the Senate floor. It has been an interesting and challenging bill to consider, since it truly is a highly complex and technical subject. It is also a bill of immense importance to the State of Washington, which is why I have taken such an active role in this bill. The State of Washington currently accepts for disposal more than 50 percent of all commercially generated low-level radioactive waste in this country. We have a relatively large site for commercial waste at Hanford that will probably bear the brunt of the Nation's nuclear generators over this 7-year transition period unless a bill has strong and enforceable volume limitations. Furthermore, one should not overlook that fact that the Hanford site in the State of Washington also takes a large portion of our Nation's defense low-level radioactive waste—in fact, over 317,000 cubic meters of such waste has accumulated over the past several decades at the Hanford site.

There are really two fundamental parts in this bill: establishing milestones and State taking title to the waste. I am a strong believer in the importance of milestones that are both a challenge and can be enforced. In our negotiations in the Senate, I insisted that the 1988 milestone be strengthened to include a stronger definition of "siting plan." Yet it is the period from 1990 to 1993 that is critical. If a nonsited State or compact region has not filed a complete license application with the NRC by 1990, or is near filing one, it probably is not going to reach the 1993 deadline. And remember that the 1993 milestone is to have a disposal facility licensed and constructed for acceptance of waste.

Since I understood that the Senate Environment Committee was insistent on the language in the 1990 milestone, I suggested that a State or compact region which fails to reach the NRC license application deadline by January 1, 1990 be required to pay a higher surcharge. I originally intended the surcharge to be set at the discretion of the Governor of the accepting State. But I realize that some of the unsited regions have a concern that the Governor would have unlimited discretion to set the surcharge. So I agreed to limit the surcharge to a range between $40 to $120 per cubic foot. I also agreed to allow the surcharge to apply only after January 1, 1992.

The inclusion of this provision allows the market to operate more freely in setting a market-clearing price. I would like to have seen more market-oriented concepts contained in the final version passed by the Senate. We included a large number of those provisions in the bill passed by the Senate Energy and Natural Resources Committee. Indeed, this act provides that a nonsited State or compact region may at any time enter into a voluntary agreement with a State that has a disposal facility, which allows the market to operate to some degree. The voluntary agreement provisions, along with the surcharge provisions for the 1992-93 period, do introduce a healthy dose of the marketplace into the current situation.

I also had several serious reservations about the emergency access provisions in the bill. The Senate Environment Committee draft set significantly tighter provisions than the emergency access provisions in the House consensus bill. But, frankly, they were not tight enough. After 1993, there would only be two ways in which a nonsited State or region could continue to ship waste for disposal at States with disposal facilities: through voluntary agreements or through emergency access. For voluntary agreements, the Governor of the sited State would have great discretion in setting the terms and conditions for acceptance of such waste. But, for emergency access waste, I was concerned that we were giving too much authority to the NRC and too little authority to the sited States. That is why I insisted upon several changes to the emergency access provisions, including a provision that the NRC should consider ceasing to generate low-level radioactive waste as a coequal alternative before granting such access. I must stress that such alternatives must be consistent with the public health and safety. But the intent is that the NRC only grant emergency access in rare emergencies, after every other alternative has been exhausted.

In conclusion, Mr. President, I think we have crafted a good bill in the Senate. There is an appropriate balancing of equities and economic incentives and penalties. The three sited States have agreed to accept the waste for another 7 years. But they will be able to charge higher surcharges for such access, and, importantly, the generators are required to reduce the volume of waste significantly. Nonsited States are also provided a sufficient monetary incentive through the 25-percent rebate provisions.

Mr. President, we have already experienced 6 years of small progress by the States and regions without sites. We are giving them another 10 years with this bill. I am reluctant to do that, but I feel that the milestones, penalties, and incentives in this bill will prod the nonsited regions toward developing sites on schedule. Let us hope that progress is made and that we do not have to revisit this act in another 6 or 7 years.

STORAGE OF LOW-LEVEL RADIOACTIVE WASTE

Mr. DOLE. Mr. President, the Low-Level Waste Policy Act of 1980 directed each State to enter into a compact with neighboring States, by January 1, 1986, as a way to select a site for the disposal of low-level radioactive wastes. My home State of Kansas is a member of the central interstate low-level radioactive waste compact we are voting on today.

BACKGROUND

Kansas has joined with the States of Arkansas, Louisiana, Nebraska, and Oklahoma in an effort to pick an appropriate low-level radioactive waste disposal site in one of the five States. The phase I study authorized by the Central Interstate Low-Level Radioactive Waste Compact Commission has been completed and eliminates counties in each of the member States as possible disposal site locations. This study eliminated 73 counties in Kansas, thereby leaving 32 counties in contention for this dubious honor.

Once funding is approved, phase II of the study will begin. Phase II will further limit the sites down to two possible locations in each member State. At that time, it is hoped that one of the member States will volunteer to be the host State. This would be for economic reasons, of course. However, if no State volunteers, the compact will then invite developers to submit bids for a site location and the Commission members will then select the site. All of this must be completed by 1992.

KANSAS IMPLICATIONS

Since the completion of the phase I study, I have been contacted by a number of my Kansas constituents who are concerned about their counties being selected as possible waste disposal site locations. I have been contacted primarily by those living in north central Kansas and join them in urging the compact group to select a site outside of Kansas.

DEADLINE APPROACHING

Mr. President, although the Senator from Kansas has reservations about the possibility of my home State being selected as the location of a low-level radioactive waste disposal site, we are facing a deadline for the States to either have their compacts approved by Congress or have nowhere to send their low-level radioactive wastes after January 1, 1986. My State, as well as a majority of the other States, do not have the proper facilities to dispose of these wastes. Therefore, Mr. President, I urge my colleagues to approve this compact.

Mr. SIMPSON. Mr. President, I ask unanimous consent to add Senator DENTON as a cosponsor of the Thurmond amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina in the nature of a substitute.

The amendment (No. 1429) was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read a third time.

Mr. SIMPSON. Mr. President, I move that we pass H.R. 1083, as amended.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 1083), as amended, was passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. McCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I ask unanimous consent to make technical and cross-references in connection with the bill as passed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the following companion bills be indefinitely postponed with particular emphasis on the colloquy between Senator BOREN and Senator HEINZ:

Calendar No. 297, S. 44; Calendar No. 289, S. 356; Calendar No. 299, S. 442; Calendar No. 301, S. 802; Calendar No. 302, S. 899; Calendar No. 432, S. 1798; Calendar No. 461, S. 1578; and Calendar No. 469, H.R. 3878.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SIMPSON. Mr. President, I move that we amend the title so as to read as follows:

To amend the Low-Level Radioactive Waste Policy Act to improve procedures for the implementation of compacts providing for the establishment and operation of regional disposal facilities for low-level radioactive waste; to grant the consent of the Congress to certain interstate compacts on low-level radioactive waste; and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the title amendment.

The title amendment was agreed to.

Mr. SIMPSON. Mr. President, let me then very quickly thank the principal participants in this activity. Senator Evans has been extraordinary. He brings his engineering background to the fray. It has been a difficult thing. He has been exemplary in the leadership on this.

Senator STAFFORD, my chairman of the Environment and Public Works Committee, has been absolutely persistent and realistic, and I admire him greatly and was pleased to stick with him.

Senator MCCLURE has been just as dogged and persistent, as has Senator JOHNSTON. They have both again disclosed how closely the Energy and Natural Resources Committee works with the Environment and Public Works Committee, and at this time also with the Senator from South Carolina, Senator THURMOND, and I wish to pay special tribute to Senator THURMOND, my other chairman, Senator STAFFORD being, as I indicated, the chairman.

Thanks to STROM THURMOND for his bulldog persistence, best described as, I believe, if we could say so, a Brahma bull on low-level waste matters; and to Senator JOHN GLENN for his effort in removing the very important amendment so that we will have a hearing in March; and, again, to Senator BOREN, for his extreme sensitivity to a rather crushing issue. Again I thank you.

I reiterate my thanks to the fine staff, particularly to Jim Curtis, who serves as the right hemisphere of my brain in matters nuclear and regulation of low-level waste.

With that, Mr. President, I will conclude. I thank the body.

Mr. JOHNSTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE NEED FOR PROMPT ACTION ON THE GENOCIDE CONVENTION

Mr. PELL. Mr. President, I wish to express my deep regret that the Genocide Convention will not be considered during the first session of the 99th Congress.

Just 13 months ago, we briefly considered the convention in the final days of the 98th Congress, with the prospects for ratification greatly enhanced by President Reagan's strong endorsement in his September 1984 address to the B'nai B'rith International Conference. Faced with the reality of a filibuster at the end of the last Congress, the Senate suspended consideration of the convention and in its stead adopted a resolution expressing support for the principles contained in the Genocide Convention, and pledging expeditious action in the first session of this Congress.

That resolution, Senate Joint Resolution 478, passed this body by a vote of 87 to 2, and represented a commitment on the part of the Senate to at long last get this treaty to the Senate early enough in a session to give it a favorable chance of passage.

I regret that we have not kept the commitment embodied in Senate Joint Resolution 478. The Genocide Convention arose from the ashes of the Holocaust, and there could be no more fitting way for the United States to commemorate the 40th anniversary of the liberation of the Nazi death camps than by ratifying this treaty in 1985. In the words of Elie Wiesel, the Genocide Convention, when ratified, would become "not only an act of justice, but above all, a solemn and noble act of remembering."

I sincerely hope—and I know that many, many of my colleagues are of the same mind—that the convention will be made the first item of business when we return in January. It is time for the Senate to get on with the unfinished business of ratifying the Genocide Convention.

Mr. METZENBAUM. Mr. President, I wish to commend my distinguished colleague and ranking member of the Foreign Relations Committee for his remarks concerning bringing up the genocide treaty to the floor. I believe that he spoke directly to the point, that we made a commitment 13 months ago. We have not lived up to our own commitment. It was as firm and as forthright a commitment as could possibly have been made. Yet the fact is that we have dillied and dallied for 13 months and have not taken any action whatsoever.

The distinguished ranking member of the Foreign Relations Committee expresses his hope, as I have expressed mine previously, and as the Senator from Wisconsin and the minority leader have indicated, that we would like to act on the ratification of the genocide treaty. I believe it has been before this body for something like 28 years.

I wish to say—and I am sorry that the majority leader is not on the floor at the moment, but my guess is he will be advised—that all of us recognize his right to set the calendar. All of us respect the fact that the majority leader has the right and normally does decide what will be taken up and what will not be taken up.

But I believe there has been so much delay with respect to the genocide treaty that, if there is no action and no strong movement to take up the genocide treaty and make an all-out effort to bring it before this body for a vote, including, if necessary, a cloture motion, then I believe some of us may determine on our own that we will attempt to set the calendar by moving to take the matter up.

I hope we will not get to that point, but I strongly urge the majority leader to set a date and give those of us who are anxious to vote on the issue an opportunity to do so. I feel certain that in such an effort and undertaking the ranking member of the Foreign Relations Committee will be in a leadership role and I commend him for it.

Mr. PELL. I thank the Senator from Ohio for his remarks. I will only point out that the convention in its present form is really a middle ground. It contains some weakening reservations to it, perhaps, but no one on the committee voted against the convention in its present form.

It is a little too extreme for those in the extreme right, and maybe not strong enough for those on the left. But I think it represents a consensus position. It would be a symbolic act, if we passed it, and it would signify our commitment to human rights and the protection of human life against the most terrible of all crimes.

For that reason, although I sympathize with those who feel it is not strong enough, I support it in its present form. I hope the convention will be ratified, although the cannons from the right and the cannons from the left volley thunder at it.

FURTHER CONTINUING APPROPRIATIONS, 1986 CONFERENCE REPORT

Mr. HATFIELD. Mr. President, I would like to put the Senate on alert that the continuing resolution that has passed the House a little while ago will be arriving shortly in the Senate. I would like to do a number of preliminaries to taking up the conference report in order to have them out of the way and, therefore, expediting the conference report as much as possible.

Mr. President, the conference agreement was reached last night between the House and the Senate, has now been adopted by the House, has had the approval of the representatives of the White House as to the role that the White House will play in this in signing or rejecting the bill, and is recognized as House Joint Resolution 465 as a further continuing resolution for fiscal year 1986.

It provides for a total of $368,164,465,261 for programs, projects, and activities funded through the accounts of seven regular appropriation bills not yet enacted into law as separate measures, plus amounts provided by several general provisions of the joint resolution.

The seven bills not yet enacted into law and covering under this continuing resolution are Agriculture, Defense, District of Columbia, Foreign Assistance, Interior, Transportation, and Treasury. For three of these bills, District of Columbia, Agriculture, and Treasury the joint resolution references a conference report to establish the spending level with certified adjustments to Agriculture and Treasury in order to accommodate the administration's wishes on spending bills.

The four remaining bills; namely Defense, Foreign Assistance, Interior, and Transportation are incorporated into the joint resolution in their entirety.

Mr. President, I regret that this measure has been so long delayed, and that it covers so many fiscal year 1986 appropriation bills. Perhaps more than anyone in this body I deplore conducting our business in this way. For 5 years I have pushed, pulled, and urged, wheedled, and cajoled this body, striving to attain timely consideration, passage, and enactment into law the 13 regular appropriation bills.

Some years have been better than others, and this has not been a very good year. Because a budget resolution was not adopted until August 1, the Committee on Appropriations was not able to secure Senate passage of regular appropriation bills prior to the August recess except for two that were called up under a unanimous-consent agreement waiving section 330 of the Budget Act.

Once Congress returned from the August recess on September 8, the legislative calendar was cluttered with other priority items, and only one more regular fiscal year 1986 bill, the Treasury bill, was passed by the Senate before the first continuing resolution to maintain the operations of Government became necessary. That first continuing resolution was a straightforward measure unencumbered with extraneous amendments, and it passed the Senate in short order, and went straight to the White House on September 25, a week before the deadline.

I thank my colleagues again for their forbearance and cooperation in that expeditious action.

In the duration of that continuing resolution which expired on November 12, the Senate was able to make good progress on additional fiscal year 1986 appropriation bills despite extraordinary contentiousness with our colleagues on the Budget Committee on the question of outlay estimates, and the initial debate on reconciliation and the debt limit.

In that time, we passed 7 more fiscal year 1986 bills; namely, Commerce, Agriculture, HUD, District of Columbia Transportation, Labor-HHS, and Military Construction bringing the total acted upon by the Senate to 10. Unfortunately, we were not able to complete Senate consideration of the remaining three bills although we did have some debate on the Interior bill.

I really do not like that situation, Mr. President, when the Senate does not have an opportunity to consider an appropriations bill on their own as separate measures. This is true of all of them, but particularly so of the Defense bill. Senator STEVENS and Senator STENNIS worked long and hard to craft a bill under very difficult circumstances.

And their product was deserving of the consideration of the entire body. But that was not to be, Mr. President. And we have now before us the continuing resolution that will complete our appropriations business for this year. It is supported by the administration, as I have indicated, and it passed the House earlier this afternoon by a vote of 261 to 137, almost 2 to 1.

I will urge its adoption when it comes time for that consideration.

Mr. President, I ask unanimous consent that the statement of the administration's policy on House Joint Resolution 465 relating to the continuing resolution be placed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF ADMINISTRATION POLICY

H.J. RES. 465, MAKING CONTINUING APPROPRIATIONS FOR FY 1986 (HATFIELD (R) OREGON, WHITTEN (D) MISSISSIPPI)

The Administration supports Senate passage of the Conference Report to accompany H.J. Res. 465.

Mr. RUDMAN. Mr. President, will the Senator from Utah, the distinguished chairman of the Appropriations Subcommittee on HUD-Independent Agencies, have a discussion with me on the conversion and launch of NOAA weather satellites K, L, and M?

Mr. GARN. I would be pleased to do it with the acting chairman of the Commerce-State-Justice Appropriations Subcommittee.

Mr. RUDMAN. The fiscal year 1986 budget request for the National Oceanic And Atmospheric Administration assumes the launch of weather satellites K, L, and M on Air Force Titan II rockets—an assumption that was incorporated with certain reservations into the recent conference agreement for the fiscal year 1986 Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriation bill, H.R. 2965. However, for a variety of reasons, the National Aeronautics and Space Administration would prefer to launch these satellites on the Space Transportation System,

the shuttle. Based on my review of the most recent NASA launch proposal that would be my preference as well, assuming the distinguished ranking member of the subcommittee is agreeable.

Mr. HOLLINGS. Mr. President, I am interested in maintaining the integrity of the programs of both NOAA and NASA. It is my understanding that a letter of October 11, 1985, from NASA Administrator James Beggs to NOAA Administrator Anthony Calio, specifies the conditions under which NASA would procure, convert, and launch NOAA weather satellites K, L, and M on the Space Transportation System. It is my further understanding that NASA has agreed to modify the launch price quoted in the October 11 letter from $98.5 million to $86 million.

Mr. RUDMAN. As usual, I concur with the able ranking member. I now understand that NASA has agreed to charge NOAA $86 million for launching these three payloads. The NOAA K, L, and M launches would then be subject to the same price as DOD launches pursuant to the NASA/DOD shuttle pricing agreement finalized in accordance with National Security Directive No. 164.

Mr. HOLLINGS. I totally agree with the Senator's description of the agreement to launch NOAA K, L, and M on the shuttle.

Mr. RUDMAN. Based on the terms and conditions of the most recent NASA proposal that we have outlined, I believe there should no longer be an objection to the launch of NOAA weather satellites K, L, and M on the space shuttle.

Mr. GARN. I am pleased to see the NOAA and NASA intend to cooperate on this issue to the mutual benefit of both agencies. I support the amended NASA proposal affecting the conversion and launch of NOAA weather satellites K, L, and M and am happy to see this matter resolved. I compliment the chairman and ranking member of the Commerce-State-Justice Appropriations Subcommittee for their efforts in this matter and for their pragmatic solution to this problem.

Mr. RUDMAN. Mr. President, I thank the Senators from Utah and South Carolina for their willingness to engage in this discussion. There now appears to be no reason for the National Oceanic and Atmospheric Administration to further delay issuing a request for proposal [RFP] to procure weather satellites K, L, and M and I urge NOAA to move expeditiously in this matter.

I also ask unanimous consent that the letter of October 11, 1985, from NASA Administrator James Beggs to NOAA Administrator Anthony Calio, be reprinted in the RECORD. Recognizing of course that the launch cost in the letter should be amended to read $86 million.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
Washington, DC, October 11, 1985.

Hon. ANTHONY J. CALIO,
Administrator, National Oceanic and Atmospheric Administration, Department of Commerce, Washington, DC.

DEAR TONY: We have been considering for an extended period of time the question of how best to launch the NOAA spacecraft series and what steps are necessary to proceed immediately with the procurement of NOAA K, L, and M which are required for service beginning in approximately 1989.

It is my understanding that our respective staffs have been discussing the major points that are important to our two agencies and have identified the key issues which we must resolve. It is my proposal that NASA and NOAA continue their past relationship in accordance with the principles of our basic Memorandum of Understanding, with such updating modifications as may be necessary, under which we have successfully operated for almost two decades. The essence of my proposal is that: (1) we launch the NOAA polar orbiting spacecraft, NOAA K, L, and M, from the Western Test Range (WTR) on the Shuttle beginning with a nominal 1989 launch; (2) NASA will continue to provide a callup launch capability to replace inoperative NOAA satellites on the current callup schedule (120 days). We will insure that the Shuttle pricing policy will not result in a penalty to NOAA because of launch delays caused by longer than anticipated orbital lifetimes; and (3) NASA will also provide for the avoidance of sole user charges for these WTR launches. These last two points will be accomplished by entering into a fixed price launch service agreement for these three spacecraft. For the launch of NOAA K, L, and M into an orbit of the required inclination and crossing time, we will charge the sum of $98.65M in real year dollars as specified in the enclosed schedule. We believe that the NOAA K, L, and M spacecraft, modified for launch on the Shuttle, can be procured for the sum of $438.1M, and we will enter into an agreement with NOAA to procure the spacecraft for that amount. As in the case of past unmanned launches, NASA will accept responsibility for delivery of the payload to the STS on time and will hand over the spacecraft to NOAA after its injection into the final operational orbit. A Goddard facility will be available for control of the spacecraft during this period.

It is understood that the quoted Shuttle price includes related services required for the launch unless modifications, other than the conversion to STS, are made by NOAA to the spacecraft which would significantly increase our costs. In the event that additional spacecraft beyond NOAA M are required to bridge the time until the initial operating capability of the Space Station polar platform, a continuation of this agreement will be negotiated. In the meantime, we will work with you to facilitate utilization of the Space Station for the needs of the operational programs.

If this arrangement is acceptable to NOAA, we will proceed to make arrangements with RCA for the procurement of the NOAA K, L, and M spacecraft. We have included in our FY 1987 budget, as submitted to OMB, the funding requirements for the spacecraft conversion from Atlas F to STS compatibility.

I believe it is in the interest of the U.S. government to provide for the maximum use of the Shuttle as a national launch capability and, particularly, that we maintain the minimum launch rate at WTR sufficient to maintain this national capability at that location. I am hopeful that, after the NOAA conversion, the Defense Meteorological Satellite Program (DMSP), which utilizes an almost identical spacecraft, will see fit to utilize the WTR/Shuttle capability.

Sincerely,

JAMES M. BEGGS,
Administrator.

Mr. KASTEN. Mr. President, the foreign operations section of the continuing resolution totals approximately $15,025 million, about $7 million below the budget request levels for these activities and $175 million below our 302(b) allocation.

Mr. President, the agreement on foreign operations is not one that all of us are particularly happy with, a fact which is probably the best evidence that we truly compromised the very widely divergent views on this section of the continuing resolution of the two bodies. I would like to highlight several points of the agreement:

For the Philippines, the conferees agreed to a compromise military level of $55 million, as opposed to $70 million which was in the Senate bill and $25 million in the House bill.

For Greece and Turkey, the House agreed to drop legislative language which proscribed that aid to Greece and Turkey be at a 7-to-10 ratio and because of the overall reductions necessary, military aid to those two countries was reduced by 10 percent from the Senate number. The conferees in its report agree that the 7-to-10 ratio should be maintained, but it is not something we believe should be proscribed in law.

While Central America items created little controversy compared to previous years, the conferees did agree to loosen restrictions which the House had suggested on Guatemala in view of the recent elections there, and the Senate once again went along with a development assistance limitation, although at a higher level than suggested by the House. Also, report language makes it clear that should the administration need to provide more than the limitation amount, it can do so through the regular notification process.

The conferees agreed to accept the Senate initiative to establish a separate line item for the Inspector General for the Agency for International Development. This action is a long overdue reform which the conferees believe is required for a truly independent and effective Inspector General. The conferees expect that in the fiscal year 1987 budget submission to Congress that the Inspector General's activities will be requested as a sepa-

rate item in accordance with this action. The conferees also agreed to report language, applicable to both the operating expenses of the agency as a whole and the Inspector General, which attempts to clarify expenditures which may be made under the operating expense account as opposed to the program account.

Mr. President, one issue which has caused some controversy relates to the so-called privateness test of private and voluntary organizations. The conferees agreed to a provision which requires private and voluntary organizations which receive AID grants to raise at least 20 percent of their total funding from non-Federal sources. The conferees have included report language further defining this provision. We believe that this is an important first step in assuring that private and voluntary organizations retain their private character, although it is, of course, not intended to prevent any PVO from competing for AID contracts.

Mr. President, the last issue I wish to highlight deals with the efforts of the Senate Foreign Operations Subcommittee to establish more realistic environmental policies in the multilateral development banks. We are pleased that the House has chosen to follow our lead on this issue, and, of course, welcome their support. The conferees agreed to the Senate provision on this matter, with some revisions which had been suggested by the House, as requested by the Department of the Treasury. The intent of the provision is, first of all, that the Treasury Department be directed to call for adding environmentally trained staff in the World Bank and inter-American development bank and to strengthen or add environmental staff in the Asian and African development banks. The words "add or strengthen" express the recognition of the conferees that the situation in the World Bank and the inter-American development bank urgently calls for the creation of more environmental review positions to be filled by qualified professionals, whereas in the two other regional development banks other measures to strengthen environmental review may be, at least initially, more appropriate.

It is the intent of the conferees that, in addition to promoting increased environmental staffing in the World Bank and IDP, the Treasury Department should also promote other measures to strengthen environmental review in those two institutions, as well as in the Asian and African development banks, such measures could include career incentives to reward professionals within those institutions for increased attention to environmental concerns in their work. We wish to emphasize that this provision calls for additional environmental review positions to be created within existing total staffing levels, and not to increase the already large bureaucracies of the banks.

The conferees also intend that environmental and public health ministers should be involved in bank activities where those activities have an indirect or direct effect on the environment and/or public health. Similarly, nongovernmental conservation and indigenous peoples' organizations in developing countries should be consulted and used by the banks. It is not the intention of the conferees to affect or change in any way the existing procurement policies and procedures of the banks.

We expect that the U.S. executive directors of the banks will also discuss the environmental performance of the banks, and ways in which this performance can be improved, in informal meetings, discussions and other fora, as well as in informal board meetings.

First priority should be given to promoting within the Inter-American Bank and International Bank for Reconstruction and Development the reviews of projects called for in the provision.

The provision calls upon the Department of the Treasury and the Department of State to use their influence through diplomatic and other channels to encourage other donor nations to the multilateral development banks to consider and promote operational and staffing reforms in the banks which will ensure systematic integration of sound management of the environmental and natural resources in bank programs and projects. In addition, other donor nations must be encouraged at every appropriate opportunity to promote environmentally beneficial projects and project components.

Mr. President, the foreign assistance section of the continuing resolution is balanced, and deserves the support of the Senate.

Mr. BAUCUS. Mr. President, the Bonneville Power Administration recently completed a study of several rate and service options that relate to its direct service industrial customers. To date, the conclusions of this options study have not been implemented.

The Bonneville Power Administration is proposing to publish in the Federal Register a strategy to implement a variable power rate sometime next week. They then propose to continue the process and move toward implementation of a variable rate for the direct service industry in the Pacific Northwest.

This proposed rate structure will operate within the laws now governing BPA's activities. At the same time, it will maintain or improve the strong, financial condition BPA has been able to achieve in the past 2 years while distributing benefits fairly among BPA's customers.

Peter Johnson, Administrator for the Bonneville Power Administration, is to be commended for his leadership in undertaking this process. It will insure a continued, strong aluminum industry in the Pacific Northwest.

The ratepayers in the Pacific Northwest have a shared interest in maintaining a strong economy. The proposal that Peter Johnson has developed goes a long way toward providing for future economic and rate stability in the region.

Implementing BPA's variable rate option will insure the continued presence of a strong aluminum industry in the region. It will preserve the industry's role as a steady electrical energy customer who can provide stability for all of BPA's ratepayers. They key to the variable rate option is that the largest block of the industry is maintained.

Currently, the Dallas Martin Marietta Plant is closed. The Spokane Kaiser Plant has expressed grave concerns over its ability to continue in the future. Columbia Falls Aluminum Plant in my own State has recently been given to an employee group and is trying to cut costs to maintain a viable operation. Only this week, Alcoa has announced an additional 25-percent cutback in aluminum production.

Mr. President, the aluminum industry is in a difficult period. The Bonneville Power Administration options-study process takes a positive step toward saving the industry, but it may not be implemented quickly enough to meet its objective.

Each State in the Pacific Northwest is dependent on the Bonneville Power Administration. All have a direct or indirect stake in the aluminum industry.

The Columbia Falls aluminum facility in my own State represents a large dependence on the aluminum industry. The approximately 1,100 jobs represented by this facility provides over 40 percent of the economy in the Flathead Valley.

Montana can ill afford to lose this industry. In 1950, per capita income in Montana was $2,664. At that time, the U.S. per capita income was $2,385. In other words, Montana's economic health was 12 percent better than our national average.

By 1984, U.S. per capita income had climbed to $4,939, while Montana's per capita income had only risn to $3,989. Now our per capita income is only 81 percent of the Nation's.

My point in recounting these figures is to show how devastating the loss of industrial jobs can be to a State. In our case, it was the decline of the copper industry.

We are now faced with the very real possibility of losing our aluminum in-

dustry. All involved parties are working hard to preserve the industry. Labor concessions have been successfully negotiated. Transportation agreements are very close to being completed. What remains is to obtain an electrical rate that will allow for the survival of this industry.

The Bonneville Power Administration option study, with its proposed variable rate, will meet this goal and allow the Columbia Falls facility to continue.

Mr. HATFIELD. Mr. President, my colleague, the able Senator from Montana, raises a concern that I share. Maintaining a viable aluminum industry is in the best interest of all the residents of the Northwest. The Bonneville Power Administration has shown tremendous leadership in moving forward with an option study to ensure a positive future for the direct service industry and all ratepayers in the Northwest.

As the Senator knows, I worked closely with Secretary Hodel and Peter Johnson to initiate the current lower-incentive rates for the DSI's which offer some short-term power rate relief and enhance the viability of the industry. In addition, I have been following the DSI options-study process very closely. In the report which accompanied the fiscal year 1986 energy and water appropriations bill, the Appropriations Committee urges Bonneville to increase its efforts in the area of industrial load stability, looking at such options as industrial modernization, conservation, increased interruptability, and variable rates. I share my colleague's interest in seeing Bonneville Power Administration move ahead to implement the results of its study.

Would the Senator comment on why action by BPA is needed expeditiously to implement the variable rate?

Mr. BAUCUS. The ability of the domestic aluminum industries to survive in the region depends upon swift action by BPA in the adoption of a properly designed variable rate. All of the aluminum industry would benefit.

The operation of two smelters in the region, Columbia Falls and The Dalles could be secured if BPA minimizes the time involved in adopting a variable rate. Both proposed sales arrangements of these smelters and their operations are heavily dependent on a workable variable rate being in place. Without assurance of a stable rate, these smelters cannot make the financial commitments necessary to secure the raw materials needed to assure operation.

BPA has been evaluating the variable rate as one of several proposals which will improve BPA's prospective revenues from the aluminum industry. The potential form and level of the rate have been widely discussed and reviewed by BPA with its customers, the regional power council and the public over the past 11 months.

Mr. HATFIELD. What impact would the proposed BPA variable rate have on other customer groups and BPA ability to meet repayment obligations?

Mr. BAUCUS. BPA studies show that BPA revenues will increase if power rates to existing regional aluminum plants vary with the price of aluminum over a limited range. The ability of BPA to repay its obligations to the Federal Treasury are improved, not reduced. There is no proposal to reduce or change BPA's statutory obligation to recover the cost of producing power to repay the Federal investment in its regional power system.

Mr. HATFIELD. The Senator from Montana raises a number of important points. He is correct in his assessment that Peter Johnson is to be commended for the fine job he is doing as Administrator for the Bonneville Power Administration. He has developed a series of options to address the serious problems facing the aluminum industry in the Northwest. I commend BPA for the public policy and involvement process that was followed during the options study. BPA does need to move as quickly as possible to implement the findings of the option study. It is my understanding that the variable rate proposal will be published in the Federal Register next week. BPA should then diligently move this process forward.

Mr. BAUCUS. The Bonneville Power Administration has agreed to move forward and do whatever is possible to have a variable rate structure in place by May 1, 1986. I believe that BPA's willingness to accelerate the process and to move as swiftly as possible with the May 1 date as a target to strive for shows the commitment of BPA to work for the good of the region.

I appreciate my colleague from Oregon's willingness to enter into this discussion.

Mr. HATFIELD. I thank the Senator from Montana for raising this issue and what to reiterate my support for BPA moving ahead with the option study process including the variable rate option.

Let me assure the Senator that I will help push BPA and FERC to take expedious action on this matter.

Mr. HATFIELD. Mr. President, I would like to make some further remarks on this continuing resolution.

Mr. President, frequently we have conveyed by various and sundry sources, political and media-wise, the impression that somehow the Congress is the big spender, and the White House is usually the fiscal constrainer to spending programs. I want to read into the RECORD at this point some basic statistics relating to this whole matter of the level of funding that the appropriations process provides the Government, that which is required under the budget resolution, and that which is basically requested by the White House.

First of all, I would like to say that this continuing resolution is $9.6 billion under the budget resolution in total.

Let me repeat, this continuing resolution is $9.6 billion under the budget resolution.

I was somewhat interested to read the morning press, filled with the actions of the appropriations conference of yesterday but more specially focusing upon what was going to happen under a new procedure we have set forth for budget reduction and deficit control. In not one line in that story on the matter of the actions of the appropriations process did it indicate where this figure was that we came out with in relation to anything, let alone to the Budget resolution.

Let me emphasize again that for the last 5 years the Congress has underappropriated the requests of the administration in the aggregate, accumulated funds that have been appropriated. So this imagery, somehow, that we are the wild, big spenders up here on the Hill just is not borne out by fact.

It is illustrative again today by this action of the conference committee between the House and the Senate on House Joint Resolution 465. We are $9.6 billion under the budget resolution.

Let me just take two other measurements. Under budget authority, the continuing resolution has $368.2 billion, as I indicated. The President requested, within the context of this continuing resolution $386.6 billion. That means that we were within budget authority $18.4 billion under the President's request.

But let us look at last year. Last year the fiscal year 1985, with the same aggregate number of appropriations matters, was $374.1 billion as against the $368.2 billion. That means that Congress has reduced the spending under the budget authority measurement by $5.9 billion under last year's level.

Now let me look at the total 1986 appropriations bill at the moment, the total bills including this resolution and the other bills that have been enacted. They total $568.6 billion. But in that same number of aggregate bills the President had requested $576.8 billion. That means, then, that in the total fiscal year 1986 we were $8.2 billion under the President's total request and compared to last year, 1985, which was a $577.2 billion aggregate level we are $8.3 billion under last year's levels of spending.

I think that illustrates again the fiscal constraints. I might say it has not just been in the last 5 years. I note the Democratic leader on the floor. I recall a time perhaps a number of months ago, maybe it is 1 year or 2

years by now, that the Democratic leader gave a recitation of 30 years of record on whether the Congress was above or below the Presidential requests. In that time, as I recall, the President was only under the final action of the Congress by 2 years; in other words, the Congress underappropriated the Presidents, Democrat and Republican alike, for at least 28 out of the 30 years, as indicated by the record.

Mr. HATFIELD. Mr. President, I submit a report of the committee on conference on House Joint Resolution 465 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of further conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 465) making further continuing appropriations for the fiscal year 1986, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 16, 1985.)

Mr. HATFIELD. Mr. President, I have a copy of the CR report, indicating that its size only reflects the complexity of this whole measure.

I might say that we had two conferences on the CR after the House defeated it the first time around. We had to have the second conference. At that time the first conference consisted of 76 Members: 47 House Members and 29 Senate Members. It was indeed a very, very difficult conference.

Throughout all of this time, again the great warrior and soldier of the Senate, a man who has been surely an inspiration for many of us for many years in the Senate, was there in the battle, who never left his post, who assisted so vitally in the accomplishment of this moment when we are here to consider this, a man upon whom I have said so many times I depend so much in being able to give leadership to the whole appropriations process, the ranking member of that committee, Senator STENNIS, of Mississippi.

At this time I yield to the Senator from Mississippi for his opening remarks or any other remarks he cares to present.

Mr. STENNIS. Mr. President, I am most grateful indeed to the Senator from Oregon for his yielding at this point, and to warmly thank him for his generous remarks. I have tried to respond to his challenges and friendly leadership. This year he has been almost overwhelmed with work. His response has been the highest, and the best. He has given truly great leadership. Along with the other committee members, I very much appreciate his efforts so greatly.

Let me say this, too, that his bill is very unusual. It has been a very unusual course for legislation to take, a continuing resolution that covers for over half of the active budget. It is not the best but it was the only way that this could be handled this year. The difficulties of Government that go with the times are all here to be contended with, as I say, under a handicap. I believe this bill, itself, is perhaps the largest, most extensive appropriations bill that has been passed in the history of this Nation and carries the complications of many of the departments of the Government, being a continuing resolution.

We have enacted it in the final statutes now. It is going to be very difficult to meet. I do not say that to discredit those laws, but just stating a fact. It is going to require the patience, indulgence, and best efforts of the membership of this body, both Houses, and the President of the United States and the understanding people, the people who vote under our system of government and know something at least of some of the problems that beset us in these times. It is going to take their understanding and backing and patience.

I want to say a special word, in addition to the services here in this very difficult role that he plays, about the Senator from Alaska [Mr. STEVENS]. I have been on the Appropriations Subcommittee with him for many years and with the work he has handled every year, it has seemed as if he has had more than usual this year. The work he has in connection with the Armed Services Committee of the Senate, of which I also have a privilege to be a member, there are very sweeping duties that he has in connection with that committee's jurisdictions and problems to go along with the Appropriations Committee. The way he works at it—his thoroughness, his understanding, his terrific, inexhaustible energy and willingness to do more than his share of the work—is one of the truly fine assets of this body.

You are not dealing with learners or beginners when you have to deal with the House of Representatives' Appropriations Subcommittee on Military Affairs for military funds. I am proud of them and their record. They have worked for many years, and I tell you, Mr. President, they know their business, they know this subject. They will give you a run for your money on anything. They are well prepared. I think that the work this year of Senator STEVENS and others on that subcommittee with him paired off, as it were, with the problems which fell in Senator STEVENS' pathway as he was carrying that load and responsibility. The way he met them deserves a great deal of credit. I am glad to put it on record here.

I want to mention one item here in this huge bill. It did not come up for debate as such, but we have undertaken and have a commission already started, in operation, the commission for the celebration of the 200th anniversary of the writing and adoption and beginning of Government under our present Constitution of the United States. The Nation has been fortunate—has been blessed, I think—by the fact that the Chief Justice of the United States has agreed to serve and is already serving as chairman of that commission. They have already started on their program. We have in this bill an open-ended authorization. That has gone out of style in a way, but there is an open-ended authorization in this bill of the funds for this purpose. We have here in our body three Members, the Senator from South Carolina [Mr. THURMOND], the Senator from Massachusetts [Mr. KENNEDY] and the Senator from Alaska [Mr. STEVENS], as members of that commission.

I am just a sideline supporter, but I believe that to meet some conditions prevailing, there could not be a better chance to drill into the minds and hearts of the boys and girls, school children of our great Nation, the fundamental principles of our Constitution—why it was formulated, the reasons the provisions are there and the reasons they have stood the test of time for now these 200 years. This is a godsend of the way for us to take advantage of this anniversary and spend a relatively small amount of money under this leadership to which I have already referred. I think this body and the House of Representatives would give them any reasonable amount of money that they might suggest to us that they need. We already have here within the law an open-ended, unlimited authorization for the appropriation of funds without any further authority. We already have in this bill the sum of $12 million for this purpose.

Another far-reaching provision is an amendment which was adopted authorizing all the other departments to give this commission employees or talented people on their staffs or in their departments, an unlimited amount of their time to this commission which is, moneywise, the same as appropriating a sum of money in that amount, the amount that they may need. So these matters speak for themselves, being of strong backing and in unlimited form as far as money is concerned of this commission in its undertakings. I believe that when understood, it is just as strong support for them and their opportunity of service to the Nation is

just as strong as these other things that have happened.

We want to arm them in every way with the facilities that they need to make the work of their commission really count. I point to them with pride and emphasize again that it is a highly commendable step that the Chief Justice of the United States was willing to give his time, to undertake the job to give this work meaning, his backing and the backing of his position.

I know that the product that they turn out will be a great blessing and a strength maker for our country.

Mr. President, so far as opposition to this bill from this side of the aisle is concerned, certainly, the bill does not represent everything that everybody wanted or just exactly what their position was, but I do not believe any major bill with such far-reaching complications has gotten better or more extensive consideration of all major and minor points. I do not know of any opposition here now, today, at this point in this legislative step that we are taking or anyone who wants to defeat or oppose the provisions of the bill that has been presented here by the Senator from Oregon, the chairman of our Appropriations Committee [Mr. HATFIELD].

I trust that it will get a solid, strong vote here. It represents a lot of money and a lot of work, a lot of effort, and it is a forerunner for another year of it that is going to follow. I am proud that we have a product like this, more particularly a system that can produce a product like this bill and what it represents.

I thank the Senator again for yielding to me.

Mr. HATFIELD. Mr. President, I thank the ranking member of the committee for his analysis and his continuing contribution and for his very kind remarks.

Mr. BYRD. Mr. President, this measure includes a number of provisions of particular importance to flood victims in West Virginia and other States. I have gone back home on a number of occasions and have seen firsthand the destruction wrought by the flood waters. Homes have been washed away; bridges demolished; highways and rail lines severed; and once prosperous businesses destroyed or severely damaged.

The amendments I offered to this resolution are designed to help those victims of floods start the long process that will help them to begin their lives again.

This resolution includes the following proposals which I offered to assist the States and individuals affected by the disaster:

An additional $40 million to the Soil Conservation Service for reconstruction of levees, rechanneling of streams, and rehabilitation of farm land. Not only is this funding necessary to reclaim farm lands that have been so terribly damaged, but it is money that the Soil Conservation Service indicates it needs to do the work necessary to prevent future flooding.

For the transfer of $10 million for the Small Business Administration for additional staffing to process disaster loan applications for flood victims.

Three million dollars in funding to accelerate the implementation of the integrated flood observation and flash flood warning system (inflows), which would expand this program—not only to those 29 counties in my State of West Virginia that were hit by this flood, but would also expand the program in the States of Pennsylvania, Tennessee, and North Carolina.

Authority to raise the cap on the emergency relief fund through the U.S. Department of Transportation from $30 million to $55 million for emergency road and bridge repair and reconstruction.

Authority to allow students whose parents have lost their source of income because of flooding to apply for Pell grants for the second half of the 1985–1986 school year.

Funding for emergency flood repairs at the Parsons Forest Products Laboratory, the Monongahela National Forest, and the Harpers Ferry National Historic Park.

Mr. President, the sheer magnitude of the destruction wrought by this flood in West Virginia is hard to imagine. We cannot turn back the clock, but we can provide the necessary tools to rebuild. I thank the distinguished chairmen and ranking members and other members of the Appropriations Committees of both Houses for their understanding and cooperation and support.

Mr. President, I am also pleased that this continuing resolution contains approximately $400 million for clean coal technology demonstrations that will be cost-shared jointly between the Federal Government and the private sector. The cost-sharing criteria governing this program require that the private sector provide at least 50 percent of the cost of any project. So, clearly, any technologies which are demonstrated under this program will have the strong backing and support of industry.

There has been strong support for the Clean Coal Technology Program to date. In its May 1, 1985, report, the Department of Energy noted that industry had indicated an interest in 176 projects in 29 States. Half of these expressions of interest identified levels of cost-sharing that, in the aggregate, amount to a willingness for the private sector to share 57 percent of the demonstration program costs.

In addition to industrial interest in the Clean Coal Technology Program, the Sierra Club, the Environmental Policy Institute, the Izaak Walton League, the League of Women Voters, the National Governors Association, as well as many State governments, also have indicated strong support for joint Federal-private sector development of new clean coal technologies. When the U.S. House of Representatives considered funding for this matter on July 31, 1985, it indicated, by a vote of 317-98, its overwhelming support for an immediate funding level of $500 million. The few opponents of this program in the Senate were never able to mount a credible attack on the Clean Coal Technology Program and I believe, for obvious reasons, determined not to press their disagreement to a vote. Mr. President, the Clean Coal Technology Reserve continues to authorize a full $750 million Clean Coal Technology Program. While I would have preferred that the full amount be made available in this bill, I believe that the $400 million which is included in this bill for these demonstrations represents a spartan but adequate start at a time of very necessary Federal budgetary constraint. These are not new moneys. The $400 million for the Clean Coal Technology Program comes from funds previously set aside for the Synthetic Fuels Corporation. I believe that these funds will be better spent for the development of clean coal technologies which generally improve on the previous synthetic fuels proposals in terms of economic efficiency, smaller size and environmental performance. So, Mr. President, while I regret to see the demise of the Synthetic Fuels Corporation, we are taking a positive step here today in establishing a Clean Coal Technology Program, a program that means greater energy independence, more jobs for Americans, improved energy efficiency and environmental performance and which can provide a sensible approach toward meeting the clean coal concerns of our Canadian neighbors.

Mr. President, the next step is for the administration to carry out the intent of Congress in initiating this demonstration program as quickly as possible, and, ultimately, the burden will rest with the private sector to propose sound clean coal technology proposals which will benefit all Americans. I challenge the private sector to come forward with its best proposals, and I believe that we all look forward to its response.

Mr. MURKOWSKI. Mr. President, H.J. Res. 465, the fiscal year 1986 continuing resolution, includes an appropriation to fund the first of a series of payments by the Federal Government to various Alaska Native corporations under section 1411 of the Alaska National Interest Lands Conservation Act of 1980. This appropriation was requested by the administration in an

amendment to its fiscal year 1986 budget estimate. I want to thank the distinguished chairman of the Interior Appropriations Subcommittee, Senator McCLURE, and Linda Richardson of his staff for their quick response to the administration's request. I also want to commend Secretary of the Interior Don Hodel and Assistant Secretary Bill Horn for their efforts to resolve this issue.

Several disputes regarding the interpretation of section 1411 still exist. The most prominent include the accurate determination of the amounts that should have been escrowed from Alaska Railroad receipts or transactions and from economic interests acquired by Native corporations under section 14(g) of ANCSA and the determination of the portion of seal harvest revenues owed to Native corporations for the use of their land and property.

Mr. President, it is my hope—and I believe, the hope of Senator McCLURE—that the Department of the Interior will settle these disputes expeditiously so that funds can be appropriated to discharge the obligation of the Federal Government under section 1411.

Mr. McCLURE. Mr. President, I agree with the comments of my colleague from Alaska. It is important that the Federal Government move quickly to resolve this issue.

Mr. COCHRAN. Mr. President, the conference report on this continuing resolution includes funding for programs as provided in H.R. 3037, the appropriations bill for agriculture, rural development, and related agencies. This bill provides funding for the agencies of the Department of Agriculture—except the Forest Service—the Food and Drug Administration, and the Commodity Futures Trading Commission, and it places a limitation on the administrative expenses of the Farm Credit Administration.

The conference report on the agriculture appropriations bill contains a funding level of $36.5 billion in budget authority. However, the conference report on the continuing resolution reduces all appropriated accounts in the agriculture bill except child nutrition and special milk programs by sixtenths of 1 percent. This brings the total appropriated level to $36.3 billion. This is $4.3 billion under the fiscal year 1985 level, $148 million under the President's budget request, $57 million under the House-passed bill, and $1.2 billion below the Senate-passed bill. I ask unanimous consent that a table containing these reduced levels appear in the RECORD at the conclusion of my remarks. The remainder of my statement, however, will make reference to the levels contained in the agricultural appropriations conference report, rather than the reduced amounts.

Mr. President, the conference committee on this bill considered 102 Senate amendments to the House bill. There were some issues on which the House and Senate positions were vastly different, but after intense negotiations, those differences were resolved.

One of the most difficult issues to resolve was the funding approach for reimbursement of Commodity Credit Corporation net realized losses. The conferees finally agreed that $9.2 billion would be the appropriated level, and that an additional $4 billion would be available upon receipt of an official budget request. This total of $13.2 billion will not be sufficient to last throughout the year, so we expect that a supplemental appropriation will be necessary sometime next spring.

The Farmers Home Administration programs were also items in conference. The conference report contains a 35-percent cut in rural housing programs from the fiscal year 1985 level. Agricultural credit programs were maintained at levels which are near the levels available in fiscal year 1985. For farm operating loans, the conferees agreed to $2.7 billion for insured loans and $1.7 billion for guaranteed loans. For ownership loans, the conference report contains $400 million for insured loans and $250 million for guaranteed loans.

The rural development loan and grant programs of Farmers Home will be funded at a level of $540 million for loans and $169.5 million for grants. This includes $340 million for water and sewer loans and $115 million for water and sewer grants.

The nutrition programs of the Department of Agriculture will be fully funded for the first time in several years. The levels for the primary food programs are as follows:

[Dollars in billions]

Child nutrition programs	$4.11
Food stamps	11.89
Feeding program for women, infants, and children (WIC)	1.57

In the research portion of our bill, the conferees agreed to funding levels of $44.5 million for competitive research grants and $28.8 million for special grants. Overall, the conference report reflects a total of $1.12 billion for agricultural research and extension activities.

For soil and water conservation activities of the Soil Conservation Service and the Agricultural Stabilization and Conservation Service, the conferees agreed to a total of $832.7 million, which is roughly the same amount as was appropriated in fiscal year 1985.

The Rural Electrification Administration loan programs have been given strong support by both the House and the Senate. The electric and telephone loan programs will be funded at levels of $2.06 billion for loans and $30 million for the purchase of capital stock of the Rural Telephone Bank.

The conference report makes available $430,967,000 for the Food and Drug Administration. This includes $10 million for AIDS research, $4.7 million for orphan product work, and makes available, subject to the submission of a budget request, $6.7 million for increased operating and personnel costs. The conference agreement also provides a ban on the implementation of user fees during fiscal year 1986. It is my hope that the authorizing committees can reach an agreement concerning this matter, so that it will not be necessary for the Appropriations Committee to address this matter in next year's appropriations bill.

Mr. President, I have one last item I would like to mention. The conferees made sufficient funds available to the Food Safety and Inspection Service [FSIS] to perform its mandatory inspection programs.

Mr. President, while I believe that the bill as passed by the Senate was a more responsible bill, this conference report represents the best possible compromise with the House on the many issues before the conference. The totals in this bill are within the subcommittee's 302(b) allocation for budget authority and outlays.

I urge the Senate to support the conference report on the continuing resolution, which includes the provisions of the conference report on the Agriculture appropriations bill.

Mr. President, I also want to congratulate and commend the staff members who worked so hard and effectively to help develop and get approval of this conference report. Many long hours of tedious work went into this effort. I especially single out my chief clerk, Irma Hanneman, her assistant clerk, Forest Thigpen, and Koni Gleason, for their excellent work. Without them, this bill could not have been enacted.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Comparative Statement of New Budget (Obligational) Authority

	FY 1985 Enacted	FY 1986 Estimates	House	Senate	Conference	Conference Less 0.8 Percent	Difference
TITLE I - AGRICULTURAL PROGRAMS

1986 INTERIOR APPROPRIATIONS BILL

Mr. McCLURE. Mr. President, the portion of the conference report which funds the Department of the Interior and related agencies provides a total of $8,097,121,000 in new budget authority. This is $102,879,000 below the conference budget resolution and $290,543,000 below the fiscal year 1985 enacted level. In addition, this report is $140,956,000 below the House passed level and $22,013,000 below the Senate passed level.

The report includes language that essentially closes the Synthetic Fuels Corporation and provides for the rescission of SFC funds.

The report provides for a $400 million Clean Coal Demonstration Program to be funded from the energy security reserve. Of this amount, $100 million is available immediately, with $150 million available on October 1, 1986, and $150 million available on October 1, 1987.

For the first time in 4 years, this report does not include a moratorium on leasing in Federal waters off the coast of California. The conferees do agree that negotiations between the Secretary of the Interior and Members of Congress should continue on this long standing dispute. The Secretary will report, every 60 days, on the progress of these negotiations. Any agreement, however, is not binding on the Congress or on the Secretary but will provide the Secretary with a broad range of advice on the issue.

Other highlights of the fiscal year 1986 interior appropriations bill are contained in the accompanying conference report.

In the National Park Service construction account, the managers agree that planning for the Playalinda Beach access road, in Canaveral National Seashore, FL, should proceed, from funds available in the Federal Lands Highway Program advance project planning activity.

FISCAL YEAR 1986 DEFENSE BILL CONFERENCE AGREEMENT

Mr. STEVENS. Mr. President, we come to the floor today with a final defense bill within the continuing resolution that is a product of what I consider to be the most difficult and protracted conference negotiations in recent years. The final product, I submit, represents the best possible compromise of what appeared to be irreconcilable differences between the House and Senate. We were nearly $14 billion apart on appropriations, and that was only part of the problem. There were sharp differences over a number of major issues such as chemical weapons production, antisatellite weapon testing, inflation projections, and allocation and use of more than $6 billion in prior year savings. These and hundreds of other differences were spread over more than 200 pages of detailed conference notes that consumed 5 grueling days of negotiations.

We developed a final agreement on $281.2 billion for the defense appropriations bill, $1.5 billion below the Senate level and $12.3 billion above the House. It is $22.8 billion below the President's budget request and $4.3 billion below the defense bill allocation under the budget resolution process. This is much lower than the Senate wanted, Mr. President, and much lower than I wanted. It is also $1.3 billion below our original agreement embodied in the first conference report that was rejected by the House—rejected for a number of reasons that in my opinion did not center on the defense portion of the continuing resolution.

In terms of total defense funding in budget function 050, which includes appropriations in other bills, the total appropriation is $297.6 billion, or nearly $5 billion below the $302.5 billion target Congress agreed to in the budget resolution.

UNOBLIGATED BALANCES

There are those, Mr. President, who like to count apples and oranges and call them all apples. They are critics of defense spending for the most part, and they like to add unobligated balances of appropriations from prior years on to the new budget authority number and insist that we really approved $287.5 billion— a number much closer to the total funding calculation in the Senate-passed bill. But this $6.3 billion in prior year funds reflects real savings stemming from favorable inflation and from substantial spending reductions produced by procurement reforms and improved management practices in the Pentagon. This is a happy reversal from the situation confronting us in 1981 when it was necessary to approve a supplemental appropriations bill containing $1.6 billion to cover excessive inflation and rampant cost overruns. This remarkable achievement has gone largely unnoticed amid all the media attention to fraud and abuse that has surfaced as a result of increased attention to defense contractors practices. Now the defense critics want to turn those savings into new appropriations and accuse us of using the savings as a "slush fund" for the Department, ostensibly to cushion the impact of Gramm-Rudman sequestering.

There is a lot of misinformation being peddled in the other body on this issue, Mr. President, and I have heard criticism in the Senate as well.

Let me say that we cold simply have ignored those prior year savings in our handling of the defense appropriations bill, and they would have lain unnoticed among all the various appropriation accounts. Instead we dug up those savings and we established

controls over their use. They are not a hedge against Gramn-Rudman but a reserve to cover the expenses we know will be incurred as a result of congressional action or inaction on matters such as military pay raises and retirement benefits. To satisfy the critics in the second conference report, we detailed in the bill how those funds will be committed. But to argue that this is some kind of illegitimate gift to the Pentagon simply does not recognize the facts. The Appropriations Committtees in both Houses spent long days assembling the savings and providing for their use, and we did it up front. Nothing new emerged in conference. Those savings were contained in both House and Senate bills as they moved through the congressional process.

BALANCE OF DEFENSE AGREEMENT

Mr. President, while the defense funding total is not as high as we would wish, I think we have struck the best possible agreement in view of the wide gulf between the House and Senate positions. And funding was not the only critical issue. We struck an intricate balance in conference negotiations that sustained the Senate position on several critical points including:

First. Full authorized funding for the strategic defense initiative at the level of $2.75 billion.

Second. Facility and production funding at $126 million for modernizing our chemical weapons deterrent, an urgent national security progam, in my judgment.

Third. Full funding for the deep interdiction battlefield surveillance system, commonly called JSTARS. We restored the full $180 million Senate allowance.

Fourth. A budget addition of $1.5 billion for National Guard and Reserve equipment, more than twice the House allowance.

Fifth. Nearly $50 million, or most of the Senate allowance, for enhancing the Defense Department's drug interdiction mission.

Sixth. The full $375 million proposed by the Senate for procurement of Coast Guard vessels, aircraft and equipment, much of it for drug interdiction.

In addition, we accepted the $100 million proposed by the House to bolster Coast Guard operating requirements.

And these are highlights, Mr. President. We enjoyed success in a myriad of other items and were able to protect the Senate interests to a great degree.

ASAT TESTING

The downside of this good news is the concession to the House position against space testing of the antisatellite weapons system, commonly called Asat. We fought hard on this issue, Mr. President, to preserve the Senate position allowing limited testing under specific conditions, but the House was adamant. In the end Asat testing became a key link in the overall agreement and, in effect, the price for the successful conclusion of other high prority issues. So the agreement is on a testing moratorium, but the Senate position is that this issue can be reopened at any time in future appropriation acts. We will watch the progress of arms control negotiations in Geneva, and we will watch the activities of the Soviets in Asat development to ensure that this temporary halt in testing does not jeopardize our defense posture.

CONFERENCE DELIBERATIONS

Mr. President, I should go no further without expressing my personal gratitude to the members of the conference committee on both sides. Support for the Senate position was strong among our Senate conferees and helped preserve what I considered to be an intricate and, at times, quite fragile agreement. This is due in no small regard to my stalwart colleague, the senior Senator from Mississippi. Senator STENNIS is my predecessor and mentor as chairman of the Defense Appropriations Subcommittee and the senior Democrat on the Armed Services Committee. It was not his rank but his experience, leadership, patience and plain know-how—together with his willingness to stay at the conference table throughout the long hours—that strengthened the Senate resolve.

My commendation as well for the House conferees, in particular the chairman of the Defense Appropriations Subcommittee in the House, Congressman JOSEPH ADDABBO, and the acting chairman during Mr. ADDABBO's recent illness, Congressman WILLIAM CHAPPELL. They and their fellow conferees are hard bargainers, as I have said, but hard bargainers in good faith and in a forthright fashion. They were always willing to meet the Senate halfway without surrendering House priorities. Without their honest and skillful negotiations I, frankly, do not believe we could have achieved any agreements on these difficult issues.

DEFENSE SPENDING TREND

Mr. President, I pointed out the bill does not carry the funding level the Senate would have preferred. I think this is unfortunate because it marks the first real decline in defense spending since President Reagan entered the White House and successfully established a high priority for improving military readiness and modernizing our national defenses. Although the budget resolution established a no-growth target it did provide for inflation and avoided any actual program reductions. The final total appropriation for the defense function, however, has actually produced a real decline of nearly 2 percent for 1986 appropriations compared to the 1985 level. After sequestering under the Gramm-Rudman deficit reduction legislation just 3 short months away, the surviving appropriations will produce a real decline in defense of nearly 7 percent. This is a long way from the projected average of 7.5 percent real growth over this period and more recent projections of at least 3 percent real growth.

What alarms me most, Mr. President, is the impact this will have on future defense funding. By lowering the fiscal year 1986 base we are creating unacceptable demands in 1987. I estimate it would take real growth of nearly 10 percent from the sequestered 1986 level just to get back to our modest goal of 3 percent real growth from the current budget resolution figure. To put that in dollars, we are looking at an increase over 1986 of nearly $20 billion just to get back to the 1987 target projected by the current budget resolution. And that, too, will doubtless be subject to sequestration under Gramm-Rudman.

There is no question in my mind, Mr. President, that we are confronted with a systematic dismantling of the very initiatives for modernization and improved readiness that Congress supported so strongly at the beginning of this decade. If we cannot reverse this funding trend, I fear we must face up to difficult and dangerous decisions about our military force structure and our worldwide commitments.

What are those choices? The alternatives are not pleasant. It seems we must look to sharp reductions in the personnel of our Armed Forces and perhaps a return to the draft. Or we must consider abandoning the costly but essential modernization of military weapons and equipment and look to a realignment of the force structure. That means we must find a smaller objective than a 600-ship Navy and a 40-wing Air Force. Or we must consider again a dramatic reduction in our military commitment to NATO and reassess our expensive commitments to Middle East and Asian security.

If we don't correct this trend—forget the real growth calculations, the budget scorekeeping, and the projections that never occur. When the dollars aren't there our present military posture is simply not affordable.

If we don't correct this trend—we won't have to agonize so long over whether we test Asat in space, whether we modernize our chemical deterrent, whether we support the strategic defense initiative.

If we don't correct this trend—we can set aside the debate over MX versus Midgetman and other key elements of our strategic defenses. The dollars won't be there.

If we don't correct this trend—even the goal on which we all seem to agree, the improved readiness of con-

ventional military forces, is put in jeopardy.

CONGRESSIONAL FUNDING PROCESS

Mr. President, I cannot end without pointing to one of the biggest villains in the defense funding scenario. It is the cumbersome and increasingly ineffective congressional process for developing funding goals, not only for defense but for all Federal programs. And the legislation we now discuss is the best example of the failure of that process. Here we are again considering a catch-all continuing resolution created simply to rescue a gaggle of appropriation bills that could not be passed in orderly fashion. And I am not pointing the finger at the Appropriations Committee. I am talking about the process as a whole that begins with a seemingly endless debate over budget resolution goals that fails to produce a budget resolution on time. This is followed by delays in authorization bills and, in turn by delays in the appropriation measures.

It is December 19, Mr. President, 2 months and 19 days into fiscal year 1986—2 months and 19 days after we should have completed action on all appropriation bills. How the Department of Defense can operate without an established budget and still do its job is beyond my understanding. The Pentagon is now trying to develop a 1987 budget, and they don't even know what the 1986 budget is. Can you imagine running a sizable private corporation with that kind of fiscal irresponsibility?

We need to bring down the deficit, but we also need to get our own house in order. We need to establish real priorities and support them in an orderly and timely fashion. Let's quit adopting budget resolutions that project 3 percent real growth when we're not willing to put up the dollars to support even a zero real growth. The Congress is simply unwilling to put money where its mouth is—to fund the level of spending authorized and required.

In closing, Mr. President, I reiterate that we came out of conference with the best agreement possible on defense spending under the circumstances. I acknowledge some will claim that we got more than our fair share of the $14 billion separating the House and the Senate. But I maintain we did not come back with enough. I maintain that this settlement may easily set the stage for more damaging reductions in 1987 and beyond. I maintain that we must reverse this trend or retreat from our foreign policy and security commitments.

We had better decide soon, Mr. President. We are adrift.

Mr. President, I ask that a comparative table displaying the conference agreement on Defense appropriations be included in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Comparative Statement of New Budget (Obligational) Authority

	1/ FY 1985 Enacted	2/ FY 1986 Estimates	House	3/ Senate	Conference	Conference compared with Enacted	Conference compared with Estimates	Conference compared with House	Conference compared with Senate

1/ Includes amounts in Supplemental Appropriation Act, 1985.
2/ Includes $383,000 for the Intelligence Community Staff (H.Doc. 99-69).
3/ Funds are included in individual appropriation accounts.
4/ Includes $100 million for Coast Guard (House section 8101).
5/ As amended on the Senate Floor during consideration of H.J. Res. 465.

Mr. JOHNSTON. Mr. President, I rise to express my appreciation and admiration for the work of Senator STEVENS on the Defense Subcommittee joint conference this past week. The joint conference on defense lasted for approximately 30 hours of the most intense negotiations. For a large portion of that time, Senator STEVENS was the only Member of the Senate at the table while the House always had many Members present. The entire Senate owes Senator STEVENS a resounding vote of thanks for his diligence and determination in representing the Senate position throughout the conference, and I particularly want him to know of my appreciation for his oustanding work.

In addition, I am very pleased that Senator STEVENS proposed and the conference approved an increased funding to enhance the Coast Guard's operational capability. It is my understanding, and I want to confirm with the Senator from Alaska, that in order to put this new equipment to work as soon as possible, the Navy and the Coast Guard should avoid developing new design changes and specifications and should proceed to acquire these items without delay and as expeditiously as possible while having due regard for competitive procurement whenever possible.

Mr. STEVENS. Mr. President, I might state to my good friend and to the Senate that that was our intent. We have included $375 million for specifically listed items to be procured by the Navy that are needed by the Coast Guard. This additional equipment will not only help the drug interdiction effort but also other law enforcement missions. This equipment is vitally needed by the Coast Guard now and would be essential to the Coast Guard's mission in the time of war or national emergency. The items ought to be procured as quickly as possible without any delay for design. There is no money in the bill for design. It is for acquisition.

Mr. JOHNSTON. I thank the distinguished Senator from Alaska.

I also wish to say, Mr. President, that our distinguished ranking minority member from the Defense Appropriations Subcommittee, Senator STENNIS, who is also, of course, the ranking minority member on the full Appropriations Committee, did his usual outstanding job in handling the Defense Appropriations Subcommittee's work. It was a grueling conference. I, myself, was there part of the time. Every time I was there, the distinguished Senator from Mississippi was there sitting with the distinguished Senator from Alaska as a great tem representing the position of the Senate.

Mr. President, we owe a great debt of gratitude to both Senators for the outstanding work they did on a very,

very difficult bill. There were literally hundreds and hundreds of items in disagreement. I think they worked well not only to represent the views and interests of the Senate, but the interests of this country and its national defense, as well.

ADVANCED FIELD ARTILLERY TACTICAL DATA SYSTEM [AFATDS]

Mr. QUAYLE. Mr. President, I would like to address a question regarding a provision of this continuing resolution as it applies to fiscal year 1986 defense spending to the Senator from Alaska and chairman of the Appropriations Committee Defense Subcommittee. I note with concern the joint conference findings with respect to the U.S. Army's Advanced Field Artillery Tactical Data System [AFATDS]. Is this a repudiation of the Army's development plan that was submitted to the Congress this past September?

Mr. STEVENS. Absolutely not. We expect that this small augmentation for near term equipment improvements is fully in consonance with the plan. We fully support and endorse the Army's plan to develop the fire support segment of the Army's Command and Control System.

Mr. QUAYLE. I thank the Senator for his clarification of this point.

CONFERENCE AGREEMENT ON MICROELECTRONIC ENGINEERING

Mr. D'AMATO. One of the serious obstacles to the revitalization of American industry and our continuing effort to maintain a strong and modern military is the shortfall of engineers trained in microelectronic engineering. The United States, over the past decade, has been losing its competitive edge in the development of microchip computer circuitry. The U.S. electronic induatry places the blame primarily on the lack of qualified microelectronic engineers.

A recent study commissioned by the Texas Instruments Corp. found that by the end of 1985, the shortfall of high technology engineers with expertise in microelectronics processing and design is expected to be approximately 2,000, with a subsequent need for 400 additional microelectronic engineers each year thereafter. Part of this increase in demand for microelectronic engineers is a result of the Defense Department's need for computer engineers in research and development of high technology weapons and defensive systems required by the military services. In recent years, Defense Department officials have expressed concern about inadequate numbers of microelectronic engineers and have been supportive of new university programs to train increased numbers of them.

The Rochester Institute of Technology has been the focus of many national corporations in the high technology field and the Department of Defense because of its advanced program of study in microelectronic engineering. A number of these corporations, interested in recruiting entry-level microelectronic engineers, worked with the university in designing our Nation's first undergraduate degree program in microelectronics. This program will be incorporated into a Center for Microelectronic Engineering and Imaging Sciences. In its first year of operation it will graduate nearly 100 microelectronic engineers; this figure is expected to increase to 300 engineers in 4 years.

Equally noteworthy is the fact that the proposed microelectronic center has already received pledges from 16 corporations for equipment and research support totaling more than $7 million. In order to take advantage of the financial pledges made to the center by private corporations, the university was forced to begin development and construction activites. The total cost of the center is $22.4 million. The Federal contribution provided under the Defense portion of this continuing resolution—$11.1 million—will be matched by private and university moneys on a two-to-one basis. The Federal contribution is intended to cover all design, construction, equipment and other development costs of the Center for Microelectronic Engineering and Imaging Sciences center, including those costs already incurred by the Rochester Institute of Technology. I would like to know whether the Senator from Alaska has the same understanding about this project?

Mr. STEVENS. I agree with the Senator from New York that it is unfortunate that the supply of microelectronic engineers has not kept pace with the demand, both in defense and in private industry. At the present time, there is a serious shortfall of microelectronics engineers. Electronics industry leaders and Defense Department officials believe that this shortfall places the United States at a serious disadvantage in the development of advanced computer circuitry and high technology systems.

For this reason, I supported funding to help establish a Microelectronic Engineering and Imaging Science Center at the Rochester Institute of Technology. This program will greatly benefit our Nation. The center and the university's undergraduate microelectronic program is designed to address the serious shortfall of microelectronic engineers by graduating 100 engineers in its first year of operation and 300 by its fourth year. A significant number of leading corporations, including Texas Instruments, IBM, Eastman Kodak, and Digital Equipment joined RIT in the development of the center and the microelectronic curricula.

This conference agreement provides $11.1 million for the design, construction, equipment and other related development costs of the Microelectronic Engineering and Imaging Science Center. Since the university had to begin construction and development activities in order to take advantage of the considerable corporate pledges made to the center, the Federal funds provided in this conference agreement also are intended to cover costs already incurred by the university as a result of this necessarily accelerated schedule. I am pleased to support this ongoing public/private partnership that will enhance our scientific capabilities, especially in the field of microelectronic engineering.

Mr. D'AMATO. I thank the Senator from Alaska for answering my question and clearly expressing the need for this program. It addresses America's shortfall of engineers trained in the high sophisticated field of microelectronic engineering.

Mr. President, the microelectronic center will address a critical national need by providing the U.S. electronics industry and the Department of Defense with increased numbers of high tech engineers. I thank the Senator from Alaska, and my distinguished colleagues, for supporting for this effort that will enhance our scientific capability and strengthen our position in science and engineering.

Mr. EXON. Mr. President, I want to ensure that one provision of this continuing resolution is made perfectly clear to everyone involved.

This continuing resolution conference report contains a section which will extend for 9 months the authority of the Department of Energy to negotiate three remaining Federal loan guarantees to construct ethanol plants of the United States.

The 1980 Biomass Energy and Alcohol Fuels Act set this Loan Guarantee Program in place. The Loan Guarantee Program initially expired on September 30, 1984. Public Law 99-24, signed by the President on April 16, 1985, extended this deadline. The extension was until September 30, 1985, for those conditional commitments which were in existence on September 30, 1984. In other words, there were four pending ethanol plant projects which had conditional committments in place on September 30, 1984, which would be allowed to continue receiving consideration for loan guarantees. This fall one of these projects, in Louisiana, received Energy Department approval for its loan guarantees. Three remaining projects, in Nebraska, Minnesota and Maine, still are being evaluated for loan guarantee approval by the Department of Energy.

Unfortunately, the Department did not complete its evaluation of these last three projects by the September 30, 1985, revised deadline. Therefore, an amendment to extend the deadline for approval to June 30, 1986, was of-

fered and passed the U.S. Senate three times this fall—on October 15, as part of the Agriculture Appropriations Act; on November 13 on the Reconciliation Act; and on December 6 on the continuing resolution.

The section contained in this conference report to the continuing resolution being considered today will extend the authority of the Energy Department to evaluate loan guarantee applications for these remaining three pending alcohol plants—only those which had conditional commitments pending on September 30, 1984.

I also want to make clear that the "September 30, 1984" date which is to be stricken and replaced by the "June 30, 1986" date in this continuing resolution refers only to the original "September 30, 1984" expiration date of the Loan Guarantee Program and obviously not to the date by which conditional commitments for loan guarantees had to be in existence.

Clearly, this provision reflects Congressional intent that the evaluation period for these last three ethanol plant loan guarantees be extended to June 30, 1986. Congress has spoken once again. The Department of Energy must proceed expeditiously, complete its evaluation and make a decision by June 30 of next year.

DELAWARE AND OTSEGO PROJECT

Mr. LAUTENBERG. Mr. President, I rise to engage the distinguished Chairman of the Subcommittee on Tranportation, Senator ANDREWS, in a colloquy regarding the Redeemable Preference Shares Program.

Mr. Chairman, in the report of the conferees on the transportation portion of the continuing resolution, language was added to the Section 505 Redeemable Preference Shares Program to designate three projects, beyond those earmarked, for special consideration. These include the Massachusetts and Vermon project, the tri-county commuter project and the Delaware Otsego project in New York and New Jersey. While these projects are not earmarked, the committee indicated that they should be given "priority consideration".

I would like to ask the Senator from North Dakota two questions. First, is it the Chairman's view that the Federal Railroad Administrator will have the discretion to fund these projects as soon as he can determine that the earmarked projects either will or will not require the funding appropriated in this legislation? And second, is it the Chairman's view that the Administrator should make a determination on applications as early in the fiscal year as possible, so that the applications for the Delaware Otsego and the other two projects might be acted upon?

Mr. ANDREWS. The Senator is essentially correct on both counts. Given the strong interest in these rail rehabilitation funds, if the Federal Railroad Administrator and the representatives of the earmarked projects can determine that a project will not go forward or require the funding noted in the report accompanying this bill, the three projects the Senator mentions should be funded. The Delaware Otsego project, as the report specifies, should go forward as soon as it can be determined that available funding exists.

Mr. LAUTENBERG. I thank the Senator from North Dakota for that assurance. the Delaware Otsego project can enhance rail competition in New Jersey and I appreciate the Chairman's assistance in moving this project along.

Mr. ANDREWS. Mr. President, the fiscal year 1986 Transportation Appropriations bill is contained in this conference agreement. The total spending of $10.46 billion is well within the Appropriations Committee's 302(b) allocation under the budget resolution.

Balance among transportation programs is maintained: Coast Guard operations and capital acquisitions, when augmented by Defense funds, exceed the budget request. Federal Aviation Administration funds will support additional air traffic controllers, security personnel, air carrier inspectors, as well as necessary hardware improvements. The limitation on Federal-aid highway obligations is $12.75 billion, and highway safety programs have been increased.

Transit funding is continued within the parameters of the current authorization. Current law levels for operating subsidies, and formula and capital projects will be continued.

Amtrak is funded consistent with the budget resolution assumptions.

This has been a particularly challenging year for me as subcommittee chairman. The administration's insistence on dramatically reduced domestic spending clashed with the transportation priorities of both the House and Senate. We were unable to craft a separate bill which satisfied all parties. But this conference agreement represents a compromise under which our Federal transportation commitments are responsibly met.

I urge my colleagues' support for the conference agreement.

Mr. ARMSTRONG. Am I correct that under this bill the agreement between Union Oil Co. and the Synthetic Fuels Corporation will be honored by the Government and will be funded according to the terms of their October 1985 agreement?

Mr. McCLURE. Yes, you are correct.

Mr. ARMSTRONG. I also understand that the Synthetic Fuels Corporation will have authority to complete documentation necessary in accordance with its agreement with Union Oil Co. and that the Treasury is obligated to honor the Corporation's commitment. Is my understanding correct?

Mr. McCLURE. Yes, it is.

Mr. ARMSTRONG. The SFC has awarded Union an agreement committing the Corporation to make price guarantee payments and to execute a guaranteed loan agreement upon fulfillment of conditions to the satisfaction of the SFC Board of Directors. I understand that the conditions to the execution of the guaranteed loan agreement are set forth in the October 16, 1985, agreement executed by the parties.

Is this the situation contemplated by the language in the continuing resolution which states that "nothing in this act shall impair or alter the powers, duties, rights, obligations, privileges or liabilities of the Corporation (its Board or Chairman or Project Sponsor) in the preformance and completion of terms and undertakings of a legally binding award or commitment"

Mr. McCLURE. The Union amendment agreement executed by SFC and Union Oil on October 16, 1985, is in fact a commitment contemplated by the cited proviso. This proviso permits that the completion of the terms of legally binding awards or commitments previously executed by the loan guarantee agreement covered by the October 16, 1985, agreement would not increase the Government's fiscal obligation as the loan guarantee amount is within the funds obligated for this project by the SFC.

Mr. ARMSTRONG. And this is true although the actual financial documents for the loan guarantee have not been signed and completed and the agreement executed by the Corporation and Union Oil Co.?

Mr. McCLURE. That is true. It is our intent and in fact the intent of the Administration that the Union Oil Co. agreement of October 16, 1985, with the Synthetic Fuels Corporation will be fully honored.

SYNTHETIC FUELS RESCISSION

Mr. McCLURE. Mr. President, on numerous occasions since the oil embargo of 1973 I have risen to address the need for the development of a commercial synthetic fuels capability in the United States. That need continues today, and is growing.

That need, Mr. President, was reviewed in the October 4 dear colleague letter that was signed by 21 Members, which I ask unanimous consent be included at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
COMMITTEE ON ENERGY AND NATURAL RESOURCES,
Washington, DC, October 4, 1985.

DEAR COLLEAGUE: In the near future it is expected that you will once again be asked to vote on an amendment to abolish the Synthetic Fuels Corporation (SFC), which we urge you oppose.

Last year the Congress rescinded $7.375 billion of the SFC's off-budget obligational authority and eliminated the synthetic fuels production goals in the Energy Security Act. Subsequently, the SFC Board of Directors reformulated its business plan and is renegotiating the size of individual projects so as to achieve further budgetary savings of between $1.2 and $2.5 billion. When completed, this reduced program will significantly contribute to the statutory objective of establishment of the infrastructure necessary to support a commercial synthetic fuels industry in the United States. Moreover, this critical initial commercialization objective will be achieved at less than 10 percent of the cost contemplated by the Congress in the Energy Security Act.

In requesting your opposition to this amendment we urge that you consider the following recent reports that underscore the United States' continuing economic and international oil supply vulnerability:

The Iran-Iraqi War poses a new and greater threat to U.S. interests, according to Reagan Administration oil analysts and former Ambassador Richard Helms (Washington Post, September 27, 1985);

Iran's oil exports have declined by two-thirds as a result of Iraqi's attacks (Wall Street Journal, September 27);

Significant oil price increases recently have occurred because of such factors as Iran's and the Soviet Union's temporary suspension of oil exports, and the Saudi announcement that it will take on no new contracts (New York Times, September 27); and

Recently the U.S. Geological Survey concluded that the Middle East will increasingly monopolize dwindling world petroleum supplies and the U.S. can expect to return to the energy crisis of the 1970's, experiencing regular supply interruptions with but a few decades left to enjoy the convenience of crude oil as our major energy fuel and therefore it is essential for the Nation to develop its own alternative energy resources (Washington Post, September 26).

These recent reports do indeed highlight the danger of dependence on international oil supplies. Further, they emphasize our continuing need to develop the domestic alternative of synthetic fuels which relies on our abundant supplies of coal, oil shale, heavy oil and tar sands.

The SFC is close to completing the modest, but commercial, program that the Administration agreed to last year. This program will provide the operating and environmental experience that is essential to provide the United States with a synthetic fuels capability when required to meet our energy and security needs. Now, when we are about to culminate a four-year effort to achieve the principal goal of the Energy Security Act—commercialization of synthetic fuels in the United Staes—is not the time to scrap this critical program.

Opponents of the SFC argue that significant budget savings can be achieved from its abolition, but they fail to mention that, according to the Congressional Budget Office, the outlay savings are minimal. In FY 1986, for example, the savings are only $14 million. In later years there may be additional savings, but they would not occur, if at all, until after 1990. The CBO estimate also fails to take into consideration several significant factors: namely, (a) the profit sharing provisions that have been negotiated by the SFC; (b) cancellation of the Great Plains project; (c) significantly lower outlays as a result of the SFC's rescaling of proposed projects; (d) under last year's agreement, one-half of any savings—an estimated $1.2 to $2.5 billion—will be automatically returned to the Treasury; and (e) any costs associated with SFC assistance only occur in later years after the projects achieve commercial production. But more importantly, it can be aniticipated that any funds that are released now from abolition of the SFC will not be returned to the Treasury; instead they will be redirected to other Federal programs, which will immediately contribute a greater amount to the deficit than if we let the SFC program continue.

The importance of the SFC's program to our country's energy future was recently supported unanimously by the Western Governors' Association, the Southern Governors' Association, and the Southwest Regional Energy Council. Please join us and these 34 States and 5 territories in opposing any amendment which further erodes our necessary commitment to a strong U.S. synthetic fuels effort.

Sincerely,

James A. McClure, Chairman; J. Bennett Johnston, Ranking Minority Member; Wendell H. Ford, Quentin N. Burdick, Mark Andrews, Gary Hart, Arlen Specter, Alan J. Dixon, Paul Simon, William L. Armstrong, John W. Warner, Orrin G. Hatch, Jay D. Rockefeller, John Heinz, Ted Stevens, Paul S. Trible, Jr., Peter V. Domenici, Russell B. Long, Jake Garn, Robert C. Byrd, James Abdnor.

Mr. McCLURE. But, Mr. President, there is a complacency in the United States regarding the seriousness of our long-term energy vulnerability. The current ready availability of petroleum supplies at reduced prices is misleading. The suggested abundance of supplies has diverted our attention from the fact that over the longer term these supplies are politically and economically insecure. Our complacency, while understandable, does not reduce our energy vulnerability.

I recognize that today, as a nation, we are far better prepared to cope with disruptions in the world supply of petroleum than in the recent past. The strategic petroleum reserve now has over 100 days of imports. Once drawndown, however, this oil is gone. The SPR was designed to buy us time in the event of an interruption of international oil supplies. It was not intended or designed to serve as a replacement for lost oil imports.

Meanwhile, domestic petroleum supplies are declining. This decline is documented in the President's draft 1985 national energy policy plan, as reported by the December 3 issue of Energy Daily, and I quote,

"The United States faces a continuing long-term decline in domestic oil reserves and production, coupled with increased oil imports. This translates into spiraling costs for imported oil, from roughly $60 billion this year to more than $100 billion a year by 2000."

This is only 15 years from now.

"In total, the United States will spend more than $2.4 trillion for oil imports from 1984-2010 * * * ."

The President's draft National Energy Policy Plan presumes that in the 1990's the Organization of Petroleum Exporting Countries will regain market control, with resulting price increase. Annual oil imports costs—in constant 1984 dollars—will grow from $60 billion this year to $106 billion in the year 2000 and $182 billion in the year 2010. Only 5 years from now, in 1990, the United States will be more heavily dependent upon oil imports than it was before the 1973 oil embargo. Moreover, by the year 2000 oil imports could provide 47 percent of total U.S. oil consumption, an all time record, compared to 35 percent in 1984. I want to emphasize that these are administration figures, not mine, and the Gas Research Institute, among others, shares DOE's view of increased imports and decreased domestic production.

On the domestic front the draft National Energy Policy Plan projects that domestic oil production will decline from 10.2 million barrels per day in 1984 to 9.0 million barrels per day in the year 2000 and 7.6 million barrels per day by 2010—an overall decline of 25 percent from 1984. This decline of approximately 1.6 percent per year is projected to occur during a period when real oil prices are projected to increase at a substantial annual rate of 4.6 percent from $23 per barrel in 1990, to $30 per barrel in 1995, to $37 per barrel by the year 2000; to $47 per barrel by the year 2005; to $57 per barrel by the year 2010.

Recent events in the Middle East, as was reviewed in the October 4 "Dear Colleague" letter, argue for increased efforts toward ensuring energy security for the United States. We have made commendable progress in the area of energy conservation, but that is not enough. We have also made considerable progress in filling the strategic petroleum reserve, but that also is not enough.

Nevertheless, the United States continues to be faced with the specter of supply disruptions accompanied by precipitous price increases. Mr. President, I am convinced that foreign policy blackmail remains on the horizon.

CONFERENCE AGREEMENT

As we are all aware, Mr. President, the U.S. Synthetic Fuels Corporation was established in 1980 by the Energy Security Act to create a domestic synthetic fuels capability as an alternative to oil imports. After considerable debate and repeated attacks by its critics, the Synthetic Fuels Corporation, under this continuing resolution, will finally fall before the budgetary ax, at the very time that it is about to successfully achieve its statutory mission.

By comparison, the Senate of the United States correctly approved a further rescission of $3 billion of SFC

obligational authority, but allowed the Corporation to complete implementation of its business plan. In my judgment, and that of many of my colleagues, the Senate provision offered a clear choice between maintaining a much reduced and restructed—but meaningful—synthetic fuels program that was responsive to current budget realities, while at the same time recognizing the long-term national security importance of this vital energy program.

However, the position of the House prevailed in the conference, following a change in the administration's position in favor of abolition of the Synthetic Fuels Corporation. In my judgment, this action is a tragic mistake. Under this conference agreement, the United States and American consumers will be denied a long-term national capability for achievement of the domestic production of synthetic fuels in this century. Consequently, the American people are going to be denied a major insurance policy against the real and ever widening gap between domestic consumption and production of petroleum, the very fuel that drives our economy.

The importance of synthetic fuels was endorsed in July 1985 by the Department of Energy's Energy Research Advisory Board in a draft study on "Long-range Energy R&D Strategy," which stated:

> The major domestic source of fluid fuels, both liquid and gas, which could replace imports appears to be synthetic fuels produced from coal, with significant contributions potentially available from shale and biomass.
>
> Total replacement of imported fluids by synfuels is technically feasible. However, conversion of coal and shale to liquids and gases is intrinsically expensive. Imports will remain the cheaper option for a long time. This does not imply that we should wait to pursue synfuel development projects. Only operating synfuel plants can establish synfuels as a "real option. This was the rationale which resulted in creation of the Synthetic Fuels Corporation [SFC], which was assigned the task of establishing this option.

The budgetary savings from termination of the Synthetic Fuels Corporation have been consistently overstated by its critics. For example, although the Synthetic Fuels Corporation is being terminated and over $6.5 billion is being rescinded, the fiscal year 1986 budgetary savings, according to the Congressional Budget Office, are only $96 million. The 3-year total for fiscal years 1986 through 1988 is only $491 million. This is because the principal forms of financial assistance undertaken by the Corporation are conditional awards involving either price guarantees and, in some instances, loan guarantees.

The continuing resolution would restrict the Board of Directors of the Corporation from making any new awards for financial assistance under the Energy Security Act after enactment of this provision, except that the Corporation and its successor (Department of Treasury) is to perform and complete the undertakings of the Corporation's existing, legally binding, awards or commitments. By the statutory terms of the conference agreement, nothing in this act shall impair or alter the powers, duties, rights, obligations, privileges, or liabilities or the Corporation, its Board of Directors, or project sponsors in the performance and completion of the terms and undertakings of a legally binding award or commitment entered into prior to the date of enactment.

This restriction also applies to changes in existing financial assistance awards or commitments of the Corporation. It is not intended, however, that this limitation on changes or modifications to existing financial awards or commitments restrict changes which may be necessary as part of normal contract monitoring or administration activities. This restriction on changes, in coordination with the rescission of funds in the Energy Security Reserve, does however limit the authority of the Board (or the Secretary) to make changes which would increase the maximum obligations authority established by the Corporation with respect to any such award or commitment.

The Corporation has entered into a legal binding financial assistance award for the Union Oil Parachute Creek Oil Shale project which obligates the Corporation to pay up to $500 million in price guarantee payments for the production of shale oil from new improved facilities to be constructed by Union Oil Company at its existing oil shale facility in Colorado. This award also legally commits the Corporation to use its best efforts to complete documentation of the terms of a loan guarantee, and execute the loan guarantee agreement, of up to $327 million within the $500 million in obligational authority available for the price guarantee payments. The language of the provision preserves the Corporation's obligation to complete the terms of the Union Oil loan guarantee agreement. Further, it recognizes the need for consultation with the Secretary of the Treasury on the interest rate, timing, and substantial terms of the loan guarantee, and requires that the Secretary provide such consultation within 30 days of enactment of this provision.

The Board of Directors of the Corporation is continued for 60 days after the date of enactment in order to perform these and other functions, including transmission to appropriate authorization committees of the Senate and House of a report containing a review of implementation of the Corporation's Business Plan, which also fulfills the requirements of section 126(b)(3) of the Energy Security Act.

Within 120 days of enactment the Corporation shall terminate and transfer all its functions to the Secretary of the Treasury in accordance with the provisions of existing law.

Because the Corporation is being terminated earlier than originally envisioned by the Congress, the conference agreement provides, first, that, with respect to the salaries and benefits of Directors, officers and employees of the Corporation, no officer or employee shall receive a salary in excess of the rate of basic pay payable for level IV of the executive schedule.

Second, the Director of the Office of Personnel Management shall determine the amount of compensation Directors, officers, and employees shall be legally entitled to under contracts in effect on the date of enactment. With respect to compensation and benefits not covered by contract, no change shall thereafter be allowed or permitted unless the Director of the Office of Personnel Management agrees that such change is reasonable.

While the Corporation's by-laws and written policies and procedures in effect on the date of enactment of the act will remain in effect until changed, the Corporation will not be permitted to waive any of their requirements which are necessary for a Director, officer or employee to qualify for pension or termination benefits under the Corporation's by-laws or written personnel policies and procedures in effect on the date of enactment.

CONCLUSION

Mr. President, this abolition of the Synthetic Fuels Corporation will go down in history as one of the major breaches of faith between the Federal Government and American industry. The losers, however, are the American people.

Because of an extraordinary national need, we asked American industry to step out to the frontier of energy development in the United States and undertake the significant technological and financial risks necessary to advance the commercial development of synthetic fuels. It was recognized that this was to be a joint effort in recognition of the risks involved. What was at stake was greater control of our energy future, and the resultant national security benefits energy independence would provide.

By our action today we may well be sacrificing the security of our energy future. Just as important, we are clearly sacrificing significant private sector investment that has been made and would likely not have been made at this time if it were not for the Federal synthetic fuels initiative that led to the creation of the Synthetic Fuels Corporation. Once again the Federal Government has failed to fulfill its

commitment to the American people and to the companies that have relied on it.

Mr. MATTINGLY. Mr. President, if I might, I would like to address a brief question or two to my distinguished colleague, the Senator from Idaho, who chairs the Interior Appropriations Subcommittee. I am concerned that one provision of the continuing resolution has the effect of repealing a part of the Outer Continental Shelf Lands Act which requires the Government to reimburse geophysical exploration contractors who are required by the same act to furnish data to the Government. In some instances, this data includes resource assessments of frontier areas, and is collected and processed at a loss by the contractor. The reimbursement requirement deters the Government from requisitioning data it does not need. The provision in the continuing resolution could open up the doors and perhaps allow the Government to requisition huge volumes of data. That would exacerbate the losses to the geophysical contractors, and perhaps discourage them from conducting this exploration in the future. The Mineral Management Service has relied upon this source for its resource assessments in determining what offshore areas to offer for lease, and what potential resources might be located in an area which would give the Department a more accurate idea of whether to accept or reject bids at lease sales. I think we may very well have adopted a provision which will cost the Treasury more money in the long run.

Mr. McCLURE. The Interior Subconference had to make some very tough choices in order to reduce the deficit. Although the continuing resolution denies geophysical contractors the reimbursement, it is not our desire to inflict economic loss on the independent contractors who take the risks in collecting the data. Therefore, I feel it is appropriate to caution the Department to requisition no more data than they have historically required to conduct resource assessments, and not to attempt to merely build a complete library of geophysical data. We will keep a close watch on the Department to make sure that they do not abuse the provision contained in the resolution. Also, we will be examining this matter shortly to determine whether or not any further safeguards are needed to ensure that this requirement does not lead to actions which damage the commercial value of the data to the contractors.

FUNDING FOR THE EMERGENCY VETERANS' JOB TRAINING ACT OF 1983

Mr. CRANSTON. Mr. President, as the ranking minority member of the Committee on Veterans' Affairs, I want to express my great disappointment in the decision of the conferees to delete the provisions, from the third continuing resolution for fiscal year 1986, House Joint Resolution 469, as it was passed by the Senate, that would have appropriated for fiscal year 1986, $55 million for continued operations under the Emergency Veterans' Job Training Act of 1983 [EVJTA] contingent upon the enactment of a law authorizing that appropriation.

The EVJTA Program provides cash incentives to employers to hire and train certain long-term unemployed Vietnam-era and Korean-conflict veterans. The program authority has at the present time expired in one respect; the period during which veterans could apply for participation closed on February 28, 1985. However, the period during which veterans may enter training who have applied and been certified eligible for the program, which period had expired on September 1, 1985, was extended to July 1, 1986, by Public Law 99-108, enacted on September 30, 1985. The program presently has a carryover balance—from the $150 million originally appropriated for the program in the fall of 1984—of some $15 to $20 million which is being used to place previously certified eligible veterans. Since September 30, more than 750 veterans have been placed in training positions through the use of these carryover funds.

More than 403,500 applications were received from veterans for participation in training under EVJTA, and almost 52,900 employers have been approved for more than 124,000 job slots. More than 37,000 veterans have entered into training under EVJTA. According to an evaluation of the program—carried out under contract with the Veterans' Administration—those who completed the program had an average hourly wage of $6.77; the completion rate for veterans who entered training under the program was estimated to be 44 percent; and the direct cost of training per participant was estimated to be $3,000.

Although an authorization of fiscal year 1986 appropriations for EVJTA has not yet been enacted, I feel certain that it will be early next year. Both Houses have passed legislation authorizing the appropriation of additional funds.

On May 20, the House of Representatives passed legislation, in H.R. 1408, authorizing the appropriation of $75 million for EVJTA in fiscal year 1986.

And on December 2, the Senate approved an amendment to S. 1887, the proposed "Veterans' Compensation and Benefits Improvements Act of 1985", offered on behalf of the distinguished chairman of the Veterans' Affairs Committee [Mr. MURKOWSKI] and myself, that includes a fiscal year 1986 authorization level of $55 million and program improvements designed to deal with the weaknesses outlined in the EVJTA Program evaluation. My statement on the amendment—which appears at page S16634 of the CONGRESSIONAL RECORD for December 2—discusses in detail the provisions of the amendment approved by the Senate.

I regret very much, Mr. President, that this legislation became bogged down in the negotiations between the House and Senate Committees on Veterans' Affairs over the numerous differences between our compensation, education, and other VA benefit measures embodied in S. 1887 and H.R. 1408, H.R. 2343, and H.R. 2344. Those negotiations have reached an impasse over certain provisions in the Senate bill—now endorsed by the administration—designed to improve, and enhance the fiscal stability of, the home-loan guaranty program. Although enactment of EVJTA extension legislation is not likely in the short timeframe remaining to us in this session, if we are not able to resolve our differences over the larger legislation early in the next session or proceed in some other fashion to pass—outside of S. 1887—this EVJTA extension and improvement legislation, Senator MURKOWSKI and I have agreed to return the Senate-passed EVJTA extension legislation to the House in a separate bill by early February. Nevertheless, by making the additional funds available in this continuing resolution, we would have been able to ensure that, when the program reopens—on February 1, 1986, under the Senate-passed legislation—sufficient resources would be available to serve the eligible veterans who seek to participate. It is thus very unfortunate that the House and Senate conferees chose to drop the Senate amendment.

Mr. President, I again want to note the fine work of the distinguished Senator from Arizona [Mr. DECONCINI], who serves on both the Veterans' Affairs Committee and the Appropriations Committee, for his successful efforts in persuading the Appropriations Committee to adopt his amendment to provide this funding that the House of Representatives has rejected.

I regret very much, Mr. President, that support for our provision to help unemployed veterans was not forthcoming from the other body and that the funds were, consequently, deleted from the conference agreement.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that tables showing the relationship of the conference agreement on the continuing appropriations resolution to the congressional budget, the Senate- and House-passed bills, and the president's request, and a summary of congressional action to date be printed in the RECORD at an appropriate place prior to final passage of the resolution.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1986—SPENDING TOTALS—CONFERENCE AGREEMENT

[Dollars in billions]

Fiscal year 1986	Budget authority	Outlays
Outlays from prior-year budget authority, bills enacted this session, and other actions completed	201.5	339.8
H.J. Res. 465, conference agreement	364.5	214.8
Possible later requirements: (see attached table for details)	3.2	3.0
Adjustment to conform mandatory programs to budget resolution assumptions and other adjustments	−14.0	−2.6
Appropriations Committee total	555.3	555.0
Appropriations Committee 302(a) allocation	567.1	554.1
House-passed level	547.0	556.3
Senate-passed level	562.3	555.3
President's request	567.9	562.3
Appropriations Committee total compared to:		
302(a) allocation	−11.8	+0.9
House-passed level	+8.3	−1.3
Senate-passed level	−7.0	−0.3
President's request	−12.6	−7.3

Note.—Details may not add to totals due to rounding.

FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1986—POSSIBLE LATER REQUIREMENTS

[Dollars in billions]

	Fiscal year 1986	
	Budget authority	Outlays
Agriculture:		
Salaries and expenses	0.1	(1)
ACIF/Net realized losses	0.4	
RHIF/Net realized losses	0.3	
RDIF/Net realized losses	0.1	
Extension Service/OIG transfer	0.1	0.1
Standard level user charges	(1)	(1)
Defense: Military pay raises		0.7
HUD-Independent Agencies:		
Veterans compensation COLA	0.4	0.3
Readjustment benefits	0.2	0.1
Interior: Forest firefighting	0.1	0.1
Labor-HHS:		
Federal unemployment benefits	0.1	0.1
Advance to unemployment trust funds	(1)	(1)
Black lung	(1)	(1)
Payment to health care trust fund	0.9	0.9
Special benefits for coal miners	(1)	(1)
Supplemental security income	(1)	(1)
Aid to families with dependent children	0.5	0.5
Legislative Branch: Official mail costs	(1)	(1)
Total—possible later requirements	3.2	3.0

[1] Less than $50 million.

Note.—Details may not add to totals due to rounding.

CONGRESSIONAL ACTION TO DATE—FURTHER CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1986—H.J. RES. 465; CONFERENCE AGREEMENT

	Fiscal year 1986	
	Budget authority	Outlays
Congressional action to date	724.5	776.6
H.J. Res. 465	364.5	214.8
CCC adjustment	−11.1	
Offsetting receipts	−4.4	−4.4
Possible later requirements: [1]		
Child nutrition	0.2	0.2
Defense pay raises		0.7
Bureau of Land Management programs	(3)	(3)
Payment to air carriers	(3)	(3)
Payment to civil service retirement [2]	(0.2)	(0.2)
Total-possible later requirements	0.3	0.9
Total	1,073.7	987.8
Budget Resolution	1,069.7	967.6
Over (+)/under (−) budget resolution	+4.0	+20.2

[1] CBO estimates that entitlements and other mandatory programs will need the additional funding shown here based on the assumptions contained in the budget resolution (S. Con. Res. 32).

[2] This is an interfund transaction that does not add to budget totals.
[3] Less that $50 million.

Note—Details may not add to totals due to rounding.

Mr. QUAYLE. Mr. President, as chairman of the Defense Acquisition Subcommittee of the Committee on Armed Services, I want to make a brief statement that may be useful as legislative history on the amendments to section 2324 of title 10, United States Code that are included in this continuing resolution.

First, let me say that amendments to the Department of Defense Authorization Act for 1986 should not even have been considered in the appropriations bill. Both Houses have rules against including substantive legislation in appropriations acts, and those rules have a sound policy basis. Appropriations are difficult enough to enact without complicating them further by controversy over substantive law. However, the other body insisted on revisiting the issues that we had just resolved in the conference committee on the authorization bill and I am proud that the Senate, led by the able Senator from Alaska as chairman of the Defense Appropriations Subcommittee, resisted this undermining of proper procedure. I wish to publicly thank him for the vigor and ability with which he put and preserved the Senate position.

However, at the very end of the process, I was asked to negotiate some concessions to the House so that the continuing resolution could be passed. I want to describe the provisions that were agreed on and make clear their meaning.

First, there are two provisions requiring the Department of Defense to submit proposed regulations to specified committees before publication. I want to point out that these regulations may be submitted at any time before publication and these provisions are thus little more that a courtesy and a codification of normal practice.

Second, there are provisions for certain studies and evaluations by the General Accounting Office. These are the kinds of studies that are normally requested by committees from the GAO. I want to emphasize that, while these studies are to evaluate the regulations in the light of the legislative history of section 2324, that legislative history emphasizes the need for flexibility in the regulations to meet the variety of circumstances. See House Report 99-235 page 4490.

Third, the only substantive amendment to section 2324 provides that the Secretary may waive the requirement for certification of indirect costs in "an exceptional case." It is, of course, a truism that waivers are not for ordinary cases but rather for the unusual or the extraordinary case—and that is precisely the dictionary definition of exceptional.

In short, Mr. President, while the exigencies of the situation required that we include some provisions relating to defense acquisition in the conference report, the practical effect of these provisions is miniscule or, to be blunt about it, nil. Committees get advance copies of regulations a day or two before publication in any event; the GAO does studies requested by committees whether or not required to do so by statute; and the waiver provision merely restates the self-evident proposition that waivers should not be granted in the ordinary case.

INCREASES IN HONORARIA

Mr. DECONCINI. Mr. President, 2 weeks ago, the Senate briefly debated a bill to limit PAC contributions. I was a cosponsor to the Boren measure and the Senate should be ashamed that through various maneuverings, we did not vote passage on that reform. The intent of Senator BOREN's bill was to reduce the influence of PAC's on congressional policymaking. At the time the bill was raised, almost all Senators paidlip service to the notion of reducing PAC influence, yet 2 weeks later, we are raising the honoraria limit from $22,530 to $30,040, an increase of $7,510. In some ways, honoraria are more sinister than PAC money in that they are given in the guise of payment of a service—that is, giving a speech—when in actuality, it is a thinly disguised payoff.

When I first came to the Senate, I was surprised to discover that groups wanted to pay me money for having dinner or breakfast with them. I was raised to believe that a public servant is just that—a servant of the public and therefore should be accessible to the people he represents and that money should not be necessary to afford such access. For that reason, I have always refused personally to accept honoraria. In recent years, I have turned it over to charity.

I am sensitive to the arguments of some of my colleagues that Washington is an expensive town in which to live and for some Members, honoraria are necessary to survive. For that very reason, when confronted with a choice of increasing congressional salaries or increasing honorarium limits, I supported a proposal to increase congressional salaries as the lesser evil. And I do not begrudge my colleagues who support the honorarium increase—that is a choice they make. I do begrudge the fact that this new honoraria increase was slipped into the continuing reduction in the dead of night without a vote.

The arguments against honoraria are very similar to the ones raised 2 weeks ago on PAC's. Whether or not these honoraria actually buy anything, the public perception is that they do. Perhaps if the honoraria were limited to the traditional lecture cir-

cuit, I would not find them so offensive. But it is not the colleges and universities, the civil and religious groups that make up the lion's share of honoraria; rather it is trade associations—the same groups providing PAC contributions.

Common Cause reported that in 1984, Members of Congress reported over $5 million in honoraria payments. They further noted that approximately one-fifth of all honoraria went to the Members of the House and Senate tax-writing committees. Perhaps I am wrong, but I have trouble believing that my brethren on the Senate Finance Committee are that much more articulate than the rest of us, that their prose flows more sweetly or their thoughts are more original. I believe it is because there are more lobbyists interested in tax issues.

It is obvious to me that on the last day of the session, we are not going to get a vote on this issue. I wish we would but, being a realist, I have agreed to refrain. But this issue will not go away, and I would like to put my colleagues on notice that I do not plan to let sleeping dogs lie on this one. Not only do I believe that this honoraria increase is wrong and ill-timed but I firmly believe that we should be reducing the amount of honoraria we are allowed to take.

Last week we passed the Gramm-Rudman balanced budget package. I have serious reservation about what we did. But since we have decided that across-the-board decreases are what the rest of the country should live with, perhaps we should make a goodwill gesture and agree that honoraria should be decreased by that same percentage decrease mandated by Gramm-Rudman. I hope my colleagues will give this some thought for I plan on raising this again in the future.

I consider myself a reasonable man, and reasonable men disagree. However, those disagreements should be made in the light of day where everyone has a chance to make public their position. Therefore, I can promise my colleagues that this matter will return.

LOS ANGELES METRO RAIL PROJECT

Mr. WILSON. I would like to ask my friend from North Dakota a question about the metro rail project in Los Angeles.

As the chairman knows, mitigation measures to address the presence of methane gas along the metro rail alignment during construction and operation were first identified in 1983 in the environmental impact statement for the project. These measures were refined in the environmental assessment which was prepared specifically for the first phase, known as MOS-1, in 1984. In fact, I have a letter from the Urban Mass Transportation Administration dated November 21, 1984, which states that no further environmental work would be required on MOS-1. I ask unanimous consent that this letter be made a part of the RECORD.

This bill now before us requires a study of the existence of methane gas in an area beyond the first phase of metro rail. As I understand it, since full environmental studies and methane gas mitigation measures have been developed for MOS-1, it was not the intent of the committee to require this additional study for MOS-1.

Mr. ANDREWS. The Senator is essentially correct. In accepting this House-passed language in the bill, the conferees did not intend to either require a new methane mitigation environmental assessment for MOS-1, nor did they intend to preclude full environmental impact compliance associated with any MOS-1 construction. Regarding the methane gas study that the Senator mentions, a supplemental environmental impact statement for the area to the west of MOS-1 may be required if the geological assessment mentioned in the statement of managers generates significant changes in the project. A full alternatives analysis/environmental impact statement is not expected because the same corridor and same mode, heavy rail are assumed to be utilized.

Mr. WILSON. I thank the chairman.

OPPOSITION TO INCREASE IN HONORARIA CEILING

Mr. BUMPERS. Mr. President, I commend the distinguished chairman of the Appropriations Committee and ranking member for their tireless efforts on this continuing funding resolution. None of us likes the fact that almost 3 months into the fiscal year we are not even close to having passed all of the regular appropriations bills, and I share the chairman's distaste for this manner of governing.

But I do not rise primarily to make the point that we seem to be incapable as a Congress of getting our work done on time, although it is a point worth making time and time again. I wanted only to comment briefly on the issue.

Mr. President, the primary purpose for my seeking the floor is to express my strong opposition to the provisions of this continuing resolution which both increase the honoraria ceiling for Senators and make it easier for a congressional pay increase to be enacted at some point in the future. At a time of retrenchment, when we are asking the American people to cinch their belts, when we will probably be voting to eliminate or substantially cut many important Government programs, this kind of back door pay increase is a breach of faith with the American people. We have no business adopting these changes.

Mr. President, I just wanted to make the record clear on this point and to express my most strenuous objection to these provisions.

Mr. SARBANES. Mr. President, the continuing resolution contains an important provision that will ensure that flood damage repairs on the historic Chesapeake & Ohio Canal can get underway immediately. The measure authorizes the Park Service to use emergency funds to repair the extensive damages caused by the November floods. I want to thank the members of the Appropriations Committee and my colleague Senator MATHIAS for their efforts on this matter and for acting so expeditiously.

The C&O National Historic Park—one of our Nation's and Maryland's great public resources—suffered severe damages from the flood-swollen Potomac River last month. Portions of the C&O Canal and sections of the towpath, a popular hiking and biking trail that divides the canal and the Potomac River, were completely destroyed. Currently, only about a quarter of the 189-mile towpath remains open for recreational use. Experts estimate that the cost of making repairs and restoring the canal and towpath will exceed $10 million and could take up to a year to complete. However, emergency repairs must be made immediately to prevent even further deterioration of this important natural resource from winter storms. Any delay in acting to stabilize the canal and towpath would only mean more costly repairs in the future.

The measure approved by the Appropriations Committee will enable the Park Service to tap emergency funds immediately for necessary repairs. I urge my colleagues to join me in supporting this measure.

Mr. BURDICK. Mr. President, I am pleased to recommend to my colleagues that the continuing resolution conference report be accepted by the Senate as far as the agriculture section is concerned. I commend the chairman of the Agriculture section is concerned. I commend the chairman of the Agriculture Appropriations Subcommittee for his hard work in putting together a resolution that is fiscally responsible and enables the very important programs involving agriculture to continue.

I would, however, like to look briefly at the farm credit situation. In 1985, $5.3 billion was made available in farm loans due, in large part, to the transfer of over $2 billion from the Emergency Disaster Loan Program. The Senate recommended the same amount for 1986, but the conferees agreed to a reduced level of $5.1 billion. While this amount is considerably more than the $3.4 billion requested by the President, I am still very concerned that it will not be enough.

We have every indication that the spring of 1986 is going to be worse than the spring of 1985 as far as our farmers are concerned. The prices

they receive for their produce have not increased. Their land values have fallen. The exportation of their products has decreased significantly.

Congress has agreed to a new farm bill that, over time, will reduce farmers' income instead of increasing it. Also, we recently passed a farm credit bill which saves the Farm Credit System, but does not provide additional credit or direct assistance to the farmer.

Because of these factors, the possibility exists—indeed it is a probability—that many, if not most, of our farmers will have difficulty obtaining the necessary money to put the crop in the ground next spring. When that time comes, and it will be here very soon, I hope that my colleagues will be willing to come to the assistance of the American farmer. He is the backbone of this country and there is no greater need that can be served by the American dollar than maintaining a system of productive family farmers on our land.

NAVAJO-HOPI LAND DISPUTE

Mr. DECONCINI. Mr. President, woven into this country's 200 year history are the lives and destinies of our Native American peoples. The United States has always recognized a governmental relationship with the Indian tribes which embodies the constitutional principles of fairness and equity envisioned by America's founding fathers. This body is vested with the responsibility to uphold those principles as it sets the policy and makes the laws which determine the circumstances under which tribal people like the Navajo and Hopi families have to live.

Since 1958, Congress has been involved in setting the stage for an ultimate settlement of a conflict in land claims by the Navajo and Hopi Tribes. I remind my colleagues here that this conflict, known as the Navajo-Hopi Land Dispute, was originally set in motion by ill-defined Federal Government actions dating back to 1882. Now over 100 years later the tribes and their members are still bearing the burden of the heart-breaking human misery and escalating fiscal costs engendered by these decisions. To date, Federal intervention has in my view served only to complicate a legal dispute which will leave a dark mark in American history. I realize the good intentions behind these past interventions were sincere. But now it appears that we are adhering to a solution which in concept appears legally reasonable but which in the face of intangible human considerations associated with the issue is a dismal failure.

The nature of the problem cries for the attention of a compassionate and just government. I have always tried to make our current policy more responsive to the families who are being buffeted around by our misguided policy. In September, the Senate Appropriations Committee rejected my proposals to eliminate all the additional money originally provided by the Senate version of the Interior Appropriation bill, H.R. 3011, for relocation activities. I strongly believe that targeting more money for moving families without first re-evaluating the situation is fiscally irresponsible. As an alternative, my proposed bill language making the expenditure of those funds conditional upon the submission of a report by the Relocation Commission to Congress was adopted by the full Senate.

I am still deeply disturbed and troubled by the course we are on now. Never has a federal policy reached so far into the lives of people. In so doing we are destroying a world critical to the survival of these native Americans while spawning additional and costly litigation that may place their lives in an even more precarious situation. And these are people who, having lived under the dark cloud cast by the legal dispute for many years, crave stability and a sense of certainly. Even those who have decided to accept the risks and uncertainty or relocation are forced to deal with a Federal agency which has demonstrated limited sensitivity to the turmoil and upheaval in their lives.

As a Government responsible equally for all citizens, we cannot ignore the indelible identification of the Navajo families with the particular lands from which they are being forced to move. As long as their cultural and tribal memory serves them, these lands have been theirs by virtue of their daily usage. In the face of this, any Government action to confer title of those lands to another tribe and mandate the removal of the residents creates an emotionally and physically life threatening set of circumstances for these families. It may resolve a legal disagreement, but it does not compassionately respond to the more critical human problem associated with the issue.

That is why I have opposed the use of relocation to attempt settlement of this problem. I do not deny the legal basis of the Hopi claim to the land in question. However, we are thrusting families, who did nothing to place themselves at the mercy of this legal dispute, into a traumatic experience. They may not all successfully withstand the emotional pain and economic hardships certain to visit them. As the Clark report states "removal from family lands to strange lands, even though to other Navajo reservation lands, creates a sense of failure accompanied by severe emotional trauma and withdrawal."

We unfortunately cannot comfort ourselves with the assumption that those who have been entrusted with the responsibility of administering the relocation program are placing equal emphasis on mitigation the impacts of relocation as on moving the people. In March of this year, a House Committee on Appropriations investigation concluded that it was apparent that "the Commission did not adequately prepare the relocatees to make the transition from life on-reservation to life off-reservation." There are families who have been relocated away from their long-term employment on the reservation, subsequently lost their replacement homes and have ended up without a permanent homeland in a state of financial hardship and mental despair.

All this confirms the difficulty and pitfalls of implementing a Government policy which goes to the core of people's existence. If indeed a relocation policy is found to be the only way to resolve this kind of problem, then it must be carried out with the utmost sensitivity and unwavering commitment to protecting the basic rights of the relocatees. Much evidence abounds today indicating that the Navajo and Hopi Relocation Program is being handled so that the political considerations of a few takes priority over the lives of the relocatees.

We have a moral responsibility not to close our eyes to this extremely difficult situation in the belief that the passage of time will lessen the inhumanity of the relocation program. A public policy which ignores the damage it brings upon a community always leaves scars which starkly stand out in history. Ultimately, the real tragedy of our refusal to face the unpleasant reality of the failed relocation policy will be the creation of a new group of dispossessed people. I am compelled to ask: What public good is served by a Government which allows this to occur? I do not believe that the people of this country can in good conscience be proud of our Government for upholding a law which is humanly unjust.

In the final analysis, the value of human life must dictate the course we take and the manner in which we finally settle this problem. As the Clark Report urged us, "The whole range of issues—not just today's relocation problem—must be addressed. Unless a comprehensive plan be thoughtfully developed and put in place, fundamental tribal disputes may persist for still another century." I am convinced that beyond the tribal disputes we will end up with a monumental human tragedy so injurious to the livelihood of families affected and to the integrity of our great Government that it is imperative for us to take another look at the matter.

I urge my colleagues to consider the findings of the eminent Judge William Clark which were filed on October 21, 1985. These findings reflect the need

for a settlement which is more comprehensive in nature. Judge Clark's report fairly lays out the important elements of the dispute and gives us an excellent basis from which to proceed to a new era of understanding between the Navajo Nation, the Hopi Tribe and the Federal Government.

In the meantime, we must do everything possible to assure those families who are undergoing the relocation process the full protections of existing law. The Interior provisions of the continuing resolution incorporate new bill language which address current concerns about the volatile and sensitive nature of the situation. One provision requires the Relocation Commission to file with the Appropriations Committees of each House of Congress a report detailing the planned expenditure of the housing construction funds appropriated to the Bureau of Indian Affairs for relocatees. A second provision provides specifically:

Provided further, the none of the funds contained in this or any other Act may be used to evict any Navajo household who, as of November 30, 1985, is physically domiciled on the lands partitioned to the Hopi Tribe until such time as a new or replacement home is available for such household.

As I understand it, this bill language is intended to permit Navajo families to continue to reside on lands partitioned to the Hopi Tribe without fear of eviction after the July 7, 1986 deadline for completion of the relocation program. The conference committee has accurately recognized the fact that hundreds of Navajo families will not be relocated from Hopi lands by the July 7, 1986 deadline. These families will not have been provided with the replacement homes and related facilities which are required to be provided to them by the mandate of the Navajo and Hopi Settlement Act of 1974, as amended.

It is my understanding that the committee by adopting this amendment, intends to ensure that all Navajo relocatees will receive the full measure of the benefits provided by Public Law 93-531 prior to their removal from Hopi lands. The benefits to be provided include compensation for their existing dwellings, replacement homes and "related community facilities such as water, sewer, roads, schools and health facilities." Finally, I would like to point out that this provision in no way alters the duty of the Navajo and Hopi Indian Relocation Commission to minimize the adverse "social, economic, cultural and other impacts" of relocation of these Navajo families.

I have grave reservations about the funding levels for relocation activities and the other provisions regarding the administration of a program which maintains current policy without reviewing the affect it is having on people. It is my hope that my colleagues will not forget that we are dealing with a human issue, not a simple real estate transaction.

Mr. GORTON. Mr. President, I want to take this opportunity to make a brief statement about the continuing resolution before us. First, I would like to congratulate all of the conferees on the agreement they have hammered out. Spending measures are a prime example of the exercise of congressional power and responsibility, and on this act, the conferees have exercised their power responsibly.

I would also like to take this opportunity to thank especially several Senators who have worked with me so thoughtfully to try to address issues of particular importance to my State. High among these is the distinguished Senator from North Dakota, Senator ANDREWS, who displayed great skill and diligence in helping meet a special concern without violating considerations of good national policy. The language contained in the act instructing the Urban Mass Transportation Administration [UMTA] to enter into a full funding contract to construct a bus tunnel in downtown Seattle is of great importance to Metropolitan Seattle. This is a project which is highly meritorious, having been ranked No. 1 in the Nation by UMTA itself. Senator ANDREWS has been consistent in his support of annual appropriations for the project.

But the instruction to enter into a full-funding contract is a special sign of support for this project, an expression which is especially valuable at this critical time. I appreciate Senator ANDREWS' diligent efforts to find a way to do this which avoided the problems inherent in the statutory letters of credit originally proposed by the House. Far from being a second-best substitute, the alternative statutory language Senator ANDREWS has drafted, together with the very strong supporting report language—which requires consummation of a contract within 90 days, or a report to Congress why the effort has not succeeded—address my constituents' needs in an even more helpful fashion. I am pleased that the Congress is taking this explicit and special step of indicating its support for this project.

There are, of course, numerous other items in this bill that are of special interest in my State, and for which I am appreciative of the hard work of the members of the Appropriations Committee in finding ways to solve the various problems I have brought to them. In particular, I appreciate the special efforts made by my good friend Senator MATTINGLY to secure both construction and planning assistance for the Everett Navy Base, as well as making repeated efforts to secure the discharge of a debt to the State of Washington—efforts which were finally successful.

My friend and neighbor Senator MCCLURE has been particularly generous and helpful on a large number of items, and Senator WEICKER was a great help in understanding and accepting changes in the freeze on indirect cost rates on HHS sponsored research—a provision that means more than a million dollars to the University of Washington.

Finally, I am elated at the generous restoration of absolutely needed funds for the Federal Aviation Administration and the Coast Guard.

I could continue on with a litany of items in the continuing resolution that are particularly important in Washington State, but I will not do so here. I have thanked those Senators who worked with me to address the problems I raised, and my not repeating that here is certainly not intended to slight the other Senators who worked with me. I merely repeat my congratulations to all of the conferees for producing a good bill in the face of great difficulties, and for having the patience to focus on small items as well as on the great.

Mr. GLENN. Mr. President, I rise to acknowledge and offer my support for the conference committee's actions regarding the Clean Coal Technology Program.

While the amount of Federal assistance committed is not as high as I had hoped, nor for as long a period as I would have wished, nevertheless, I commend the committee for its ultimate decisions on this matter. For I feel this program is vitally important if we are to establish a stable and environmentally acceptable energy supply that will sustain economic growth and competitiveness on into the next century.

Originally, both the House and Senate had approved $100 million in fiscal year 1986 for the clean coal technology reserve, but the total program approved by the House would have run for 3 years and cost $500 million, while the Senate voted for a 4-year, $750 million program.

The conference committee voted to set aside $750 million from the energy security reserve of the soon-to-be dismantled Synthetic Fuels Corporation [SEC]. However, only $400 million was actually appropriated: $100 million for fiscal year 1986 and $150 million each for fiscal year 1987 and fiscal year 1988.

I know that the Reagan administration has indicated its willingness to accept the fiscal year 1986 appropriation, but opposes the advance funding for the following 2 years. I firmly believe, however, that without a strong, multiyear commitment on the Government's part, the private sector would be reluctant to obligate the substantial investments required by the 50

percent cost-sharing provisions of this program.

Additionally, the conferees have further earmarked, through authorization, $350 million for the clean coal reserve. These funds are not available until released by a future appropriations act.

All we have to do is look at the facts in order to see why this program is vital to our national interest at this time. Eighty-two percent of the U.S. fuel energy reserves are coal, compared to just over 6 percent for natural gas and oil. Nearly 75 percent of electric power generation in our country is derived from fossil fuels, including almost 58 percent from coal, 4 percent from oil, and 12 percent from natural gas. However, recent studies have indicated that we have been overly optimistic in estimating our domestic recoverable reserves of oil and natural gas.

The United States, on the other hand, with over 470 billion tons, has the world's largest demonstrated coal reserves. This represents a supply of energy adequate for over 300 years at current and projected rates of consumption.

I would like to point out the major role Ohio plays in this regard. The Buckeye State itself has more than 15 billion tons of proven coal reserves. This amount alone would be sufficient to supply the State's current consumption level for the next 200 years and enough to power the entire country for 30 years. Moreover, Ohio has another 40 billion tons of potential coal reserves.

If we are to harness the enormous potential coal has to fuel our economic growth, we must launch a balanced and cost-effective research and development program which will pinpoint the most promising and efficient coal technologies. It seems apparent that our present generation of coal-burning techniques will not be adequate to meet our future requirements.

Conventional base-load pulverized coal units are characterized by economies of scale which require relatively large units with long construction periods and enormous capital investments. In addition, our current methods of controlling high sulfur emissions to conform with environmental regulations are costly and imperfect. Electrostatic precipitators trap flue gas particles on metal plates, like dust to a cloth, but many particles escape. Scrubbers can remove sulfur from smokestack gases by injecting limestone and water, but each year one scrubber generates enough paste-like waste from a single large plant to cover a square mile 1 foot deep. Moreover, it can also add 40 percent to a plant's cost and use up to 8 percent of the power output.

The clean coal technology reserve will help us overcome these obstacles. Its purpose is to identify emerging clean coal technologies that may be commercialized in the near term for reducing emissions from new and existing coal-burning powerplants and industrial coal uses and providing incentives to assure the earliest practicable commercial availability of these new techniques.

This program is also fiscally pragmatic. Private companies will put up at least half of the project costs. The commitment by private industry to move forward with the commercial demonstration of these technologies has already been demonstrated. More than 170 proposals have been received from project sponsors, including 14 from Ohio, representing more than $8 billion in total project costs.

Mr. President, while the funding of this program has vast benefits for the Nation as a whole, it certainly has great implications for those States with large deposits of high-sulfur coal. For instance, in 1970, my home State of Ohio, which burns more coal than any other State, produced some 55 million tons or about 9 percent of total U.S. production. By 1983, however, production had fallen to 33 million tons—just over 4 percent of our country's total. The effects in human terms have been devastating. Just between 1980 and 1983, employment in Ohio mines fell from 14,600 to 10,200.

Less than half of Ohio's consumption now is produced from Buckeye State mines. Ohioans, as consumers, are paying over $1 billion to import coal, primarily low-sulfur, from other States.

On November 5 of this year, Ohio citizens showed their determination to meet this challenge by voting to allow the State to issue up to $100 million in bonds to finance the creation of a statewide Clean Coal Research and Development Program similar to what we are now considering on the Federal level. This will assist a growing number of private companies and State institutions in Ohio that have already begun, or are planning, research, development, and demonstration activities devoted to clean coal burning processes.

It is essential that we move forward to meet the challenges of the 21st century by funding the clean coal technology reserve. Advanced power generation techniques which are modular, economic at smaller scales than conventional plants, and require shorter construction periods can better match capacity additions with actual demand and at lower costs to electric ratepayers. The Clean Coal Program will provide the necessary experience which will allow us to utilize our massive coal reserves in an environmental acceptable manner. It will bolster our energy and national security while enhancing our economic and industrial vitality. Moreover, greater reliance on domestic coal means that more of our energy dollars will support American jobs at home rather than employment in coal mines or oil fields abroad.

Mr. SPECTER. Mr. President, I rise to express my deep concern regarding the removal of funding for the Synthetic Fuels Corporation (SFC) in this year's House-Senate conference on the continuing resolution. It is with regret that I note the decision of Senate conferees to recede to the House position on the elimination of the SFC program.

If the Oil Embargo of 1973 taught America anything, it clearly proved that dependency on foreign suppliers for strategic commodities engenders economic and political vulnerability. As chairman of the Senate Coal Caucus, and Senator from Pennsylvania, a State rich in energy reserves, I believe we must maintain our Nation's energy independence through the use of coal and other domestic fuels for our energy needs.

The SFC provides an important synergism between research and development of new technologies and the commercial application of these technologies. When we created the Synthetic Fuel Corporation, we recognized that the road to commercial energy development is tenuous and expensive, but nonetheless, critical for our goal of long-term energy independence. Joint Government-industry participation is essential to the attainment of this goal.

When synthetic fuels are needed, they will be needed in quantities approaching 2 million barrels per day of production capacity. In a time of crisis, we will simply not have the time to build the necessary facilities to produce fuel in these quantities. That is why we must work now, in a time of relative energy abundance, to develop technologies which will allow us to produce the energy we will need the next time our foreign supplies are threatened.

The legislative memory of members of the House of Representatives can not be so short as to forget the economic and political chaos which followed in the wake of the 1973 oil crisis. We still feel these reverberations today. Yet, the House voted to abolish funding for the Synthetic Fuels Corporation. This action is not only historically naive; it is economically and strategically indefensible.

Although the SFC experienced initial difficulties, the program is close to completing its goal of providing the operating and environmental experience that is essential for our energy and security needs. Now, when we are about to culminate a 4-year effort to achieve synthetic fuel commercialization, is certainly not the time to eliminate this program.

In addition to the national security implications, I am also concerned over the economic impact of dismantling the SFC. Our Nation's energy industry employs thousands of people in Pennsylvania and across the United States in the research, production and extraction of fossil fuels. Many current and proposed projects, including the Keystone project near Johnstown, PA, would be terminated, resulting in layoffs and economic disruption.

With the energy surplus at the moment, we can delude ourselves into believing that we will never again be forced to deal with an energy crisis. Or we can face reality and continue to prepare for the future. Mr. President, it is my sincere hope that we can act and maintain funding for the critically important Synthetic Fuels Corporation programs, instead of having to react to a crisis at some later date.

Mr. BYRD. Mr. President, the continuing resolution, House Joint Resolution 465, was the fifth in a series of such resolutions since this past October 1. The Committee on Appropriations reported this particular resolution to the Senate 2 weeks ago, on December 5, 1985. The lengthy consideration of the measure was due in large part to the numerous and complex issues incorporated within that continuing resolution.

Throughout this wearing process, when many other tempers had shortened, I believe that the Senate was very fortunate, indeed, to have had the calm hand of Chairman MARK HATFIELD guiding this measure to a fair resolution as speedily as was possible. I thank Senator HATFIELD for his hard work on behalf of the Senate and for the many courtesies which he extended to me in this continuing resolution. He has exhibited true leadership and friendship.

I wish to thank Senator STENNIS, as well, for his wisdom and guidance in representing the interest of those on my side of the aisle. Much of the thanks also belongs to Senators JOHNSTON and MCCLURE and to Representatives YATES and REGULA for their tireless efforts to reach agreement on many of the tough issues in the resolution such as clean coal technology. I would also like to add a special thanks to Chairman WHITTEN, and to Senators ANDREWS, COCHRAN, BURDICK, RUDMAN, and HOLLINGS for their cooperation and understanding of the emergency needs of those many West Virginians whose possessions, homes, and communities were destroyed by the recent floods this past November. Without the assistance of these Members, the task of rebuilding would be even more difficult for these citizens. The efforts of these Members will be long remembered by those of us in West Virginia.

Mr. PROXMIRE. Mr. President, I rise reluctantly because there is a part of this bill that I think is a very, very great mistake. Last week the Senate decided to cut nearly $12 billion from the fiscal year 1986 budget. Today it is about to authorize a back door $7,510 pay increase for some Members of the Congress.

Like so many of the special provisions which bring Congress into dispute, this one was added at the last minute to an indispensable piece of legislation, this continuing resolution. Buried in the bill's fine print is a provision which allows Members to keep $30,040, an increase of $7,510 in speaking fees, honoraria.

Now, but just before we act on this, Members can keep $22,530. We are going to raise the limit on the honoraria we keep from 30 to 40 percent of our pay or to $30,000. What Congress cannot do directly it can often do indirectly.

Mr. President, the last time the Senate dealt with this issue in 1983, we voted on it. In fact, our late esteemed colleague, Henry Jackson, offered a series of amendments. Each had a different combination of pay and honoraria limits. Each amendment was the subject of a rollcall vote. Senators were counted on where they stood on increasing the honoraria.

What a difference 2 years can make.

This time neither the House nor the Senate voted to increase honoraria when each considered its version of the continuing resolution. After looking through the debate, the Senator found not one single, solitary mention of the word "honoraria," not a peep, not a chirp or even a whisper. And incidentally, Mr. President, in the conference it was made clear yesterday that the House will not go along with the Senate. As far as they are concerned, they will not take this additional 40 percent. They will keep their outside income at 30 percent.

Mr. President, for all these reasons the Senate should vote on this issue. The Senate may decide that this increase is unjustified. We may vote it down. The Senate should work its will on the issue.

Now, Mr. President, let me just speak briefly on the substance of this issue. In the spirit of the Christmas season, why should Senators and Congressmen not be generous with themselves? What is wrong with Members of this body pushing up their honoraria earnings from $22,500 to $30,000? Why should Senators not enjoy a potential increase in their total compensation? That is, their Senate salary of $75,000 plus $30,000. That would raise the compensation of Senators who want to go out and earn the maximum contribution from the present maximum potential level of $97,500 to $105,000. At $2,000 per speech, a Senator could with only 15 speeches earn the full amount each year.

Why not? There are many reasons why not, and here are a few.

First, for the first time Senators' total compensation would exceed six figures, which would mean it would put Senators in the exclusive class of less than 2 percent—in fact, about 1 percent; I just checked it out—of the American people. I am talking about American households earning $100,000 per year.

Now, many Senators are smart; all are special. There are only 100 Senators in this powerful body, so each of us has very considerable power. Why should we not have compensation to match? One reason is because this increase moves us more out of touch with our constituents who mostly have to get along on less than one-third of what we receive.

Now, most Americans still consider anyone with an income of more than $150,000 per year as rich. They consider those relatively few Americans with incomes of more than $100,000 anually as very rich. The increased honorarium levels puts Senators further than ever removed from their constituents.

No. 2, Senators do not need it. Greed knows no bounds, but certainly there is no rational basis for the arguments that Senators need to earn more than $100,000 per year to live. If the majority of Americans can secure the food they need, the housing they have to have, the transportation and recreation, clothing and education for less than $30,000 per year, why in the world does a Senator need $100,000? If Senators cannot live on less than three or four or five times as much as most taxpayers who pay their salaries live on, they are living an extravagant life which they should not expect the taxpayers to support.

No. 3, most of the honoraria earned by Members of the Senate comes from special interest groups that hire the Senators as speakers, not because those groups are thirsting for good oratory or good entertainment or inside information but because they want to win his support for their cause.

If you serve on the Senate Banking Committee, as I have for more than 28 years, you receive invitations to speak to national and State banking groups that are deeply interested in the legislation that you have a major role in drafting and amending. Your vote can make a big difference in opportunities for banks to increase their profitability. You also have a major influence on savings and loan institutions. Your vote and your influence can seriously help or hurt firms building homes and shopping centers. Construction unions have a direct interest in your position on Federal housing programs. It can literally increase or decrease total wages in the housing industry by billions of dollars. So what happens

when you as a Senator speak before any of these groups? What happens is that you literally go on their payroll. You speak for a half hour or hour and get a nice tidy $1,000 or $2,000.

With the maximum honoraria lifted to 40 percent of your Senate pay, it means that of your total compensation at $105,000, more than a quarter of that total may come from special interests which have a direct pecuniary interest in whether you support or oppose legislation.

Now what happens? As a Senator, your $75,000 pay is neutral. It has no effect on how you vote on legislation. You receive that $75,000 regardless of your position on legislation. But the $30,000 you receive in honoraria may come in large part from those who believe—and with good reason—that they are getting a good and faithful employee by putting you on the payroll at $1,000 per hour or so and up. Oh, sure, once in a while a Senator will read the riot act at his audience, disagree with them and tell them their legislative interest is self-serving, blatantly against the public interest, and he intends to oppose it, and kill it if possible.

That happens occasionally but how often? Let us face it, most of us tell our audiences what they want to hear. We do not insult them or enrage them. We support them. And when the vote comes in committee or on the floor, we want to be their friend, not their enemy.

It is not that $1,000 or $2,000 buys our vote. It does not. But as they say, there are two sides to everything. And if one side has the good judgment to listen appreciatively to your speech and pay you a fancy dollar for it, well, you sure give that side very careful consideration.

Fourth and finally, Mr. President, there is the matter of time. It is possible that some Senators can get the maximum, $2,000 per speech. They can limit their speeches to 15. They even can schedule the whole kit and caboodle in a month or 2. This is true for those Senators who chair critical committees or have a reputation for wielding plenty of power. For others, $30,000 means 30 speeches. That includes travel and preparation. A conscientious Senator wants to deliver a $1,000 speech for $1,000. So it does take time to serve so many masters. And at least in some cases Senators miss crucial rollcalls or committee meetings. With this expansion in honoraria, and therefore in speeches, more of the time on the lecture circuit comes at a time that otherwise could be spent on Senate business or assisting constituents as we were elected to do.

So in summary, Mr. President, we should not increase our honoraria for these reasons: For the first time even, Senators would go over $100,000 in their potential earnings and would find themselves in the company of only 2 percent—I should say 1.2 percent—of all American households who earn such a massive sum.

Senators would be further out of touch with the world of their constituents.

Secondly, Senators do not need it. A majority of constituents get along with less than a third of the more than $100,000 Senators would earn. Taxpayers should not be required to support such extravagance.

Third, most of the honoraria comes from special interest groups who buy legislation with their honoraria. The increase makes the special interest payoff worse than ever.

Fourth, the increase in honoraria will take Senators who are paid a handsome $75,000 per year to do the Senate business away from that business, so it is unfair to constituents.

Now, Mr. President, I had intended to amend the continuing resolution, or to try to get a point of order vote so that I could strike the provision increasing the honoraria limit from 30 to 40 percent.

But after talking with the Senate Parliamentarian I have decided not to proceed for now. To do so will mean defeating the continuing resolution. Even so, I would have been willing to do so if we could have an up or down vote on the issue of increasing the honoraria limit. But there is evidently no way to get a vote on this issue.

To raise the issue, the Senate would first have to overrule the Presiding Officer on a point of order that the conferees had exceeded their authority by including this increase. If the Senate were willing to do that, then the continuing resolution would fall. You can imagine the reaction in this body. We would then have to request another conference with the House and appoint new conferees. After all this, I could offer a motion to instruct the conferees to strike the provision increasing the honoraria. In the process, of course, this could take a week or even longer. It would mean that the continuing resolution would be stalled and stopped.

Furthermore, those favoring an increase would have ample opportunity to cloud the issue. They could argue that we would be risking a shutdown of the Federal Government. They could argue that it would take another week to resolve this issue. They could argue that the House would want to reopen other issues. By raising all these points, those favoring an increase would be likely to prevail on a procedural vote.

This is the situation those of us opposed to this increase face. It is outrageous that we are so boxed in.

It is even more outrageous that we have not had a chance to vote on this. Up until last week we would not have been faced with this impasse. But we are now operating under a precedent where anything in a conference report which is even remotely relevant is germane to the conference report. For that reason, the honoraria increase was put in and cannot be taken out. It was put in although there was no discussion, no debate, no appreciation that it might happen on the floor of the Senate or on the floor of the House.

I want to put the Senate on notice that this issue is not settled. Next February or March, the Senate will be dealing with the first spending cuts mandated by the Gramm-Rudman bill. The Senate will deal with this issue then. In an election year, we will see how many Senators are willing to defend this increase, even as we are cutting programs which are beneficial to millions of Americans.

Unfortunately, I cannot offer the point of order, which would be the basis for killing the whole conference report.

Mr. WALLOP. Mr. President, I rise to object to the provision in the continuing resolution that bans antisatellite testing. During the 6 months preceding the Geneva Summit, the Soviets had a strong, worldwide public relations case to lay groundwork for attaining their major goals for the summit meeting, a limitation restricting the U.S. Strategic Defense Program to laboratory research and a broad ban on antisatellite testing.

The Soviet carrot of deep cuts in offensive weapons played on the free world's desire for peace in order to gain unilateral concessions. President Reagan resisted attempts to bargain away the strategic defense initiative. Both sides came away with statements supporting cuts in offensive systems. The world knew that the tough work of hammering out a real and verifiable arms control agreement was yet to come.

Congress apparently cannot wait for the difficult and tedious process of negotiations. The continuing resolution appropriations conferees, following the lead of the House of Representatives, banned the testing of the U.S. antisatellite systems against objects in space.

The U.S. Asat Program, ready for tests No. 2 and No. 3 is effectively put on ice for the remainder of this fiscal year. Representative GEORGE BROWN, a supporter of such action said, as reported in the Washington Post, this "gives a little breathing space for the President if he wants to enter into real negotiations" with the Soviet Union. Perhaps it is poison gas he wishes the President to breathe. Whatever else he doesn't plan to give much breathing room as the Post article further says he hopes "by next year to have enough votes to abolish the program."

Perhaps Congressman BROWN does not realize that he has not been elected President by the people of the United States nor has he been appointed by the President of the United States and confirmed by the Senate to a role of negotiaton for this Nation. Rather than putting some type of antisatellite moratorium on the bargaining table for use in gaining offensive cuts or reaching reliable verification measures, the appropriations conferees have put Asat under the Soviet Christmas tree. The Soviets are achieving a major goal without any concessions on their part.

By any reasonable standard, the President needs his full arsenal in the months ahead if he is to have any chance to negotiate a treaty with the Soviets that enhances the security of the American people. Congressionally imposed unilateral disarmament is scarcely going to enhance American safety.

The conferees did more damage than this body typically sees on appropriations bills. They exceeded the scope of the House and Senate bills and prohibited the use of fiscal year 1985 funds for the testing authorized and appropriated in that year.

What Representative BROWN and his like-minded colleagues forget is the Soviets have an operational ASAT capability that has been tested, while ours has had but one test. In a potential conflict, the Soviet Union will have quantitative data on which to gage the reliability of their ASAT capability. They will continue to test a variety of capabilities and improve their margin of safety. We will not! The appropriations conferees now give the Soviets control over our ability to obtain that data. Theirs is the decision to test or not. They can decide to sit back with the known capability to destroy our surveillance and early warning satellites when they desire and testing undetectable capabilities. Or they can continue with their own ASAT development programs, selecting the most efficient time to do their own testing. And should they decide to test, I suspect that we will hear the words of the know-it-alls saying, "It was only one test, perhaps they will do no more,—it is best we don't respond. Besides, they have no technical capability, and why should we be the ones to destroy the climate?"

Those who have looked into how satellites fit into military strategy know that the Soviets use satellites differently than we do. Their satellites are not designed to stay in orbit as long as ours, and therefore the Soviets have an impressive relaunch capability. Even equal ASAT capabilities do not have equal tactical value since they can relaunch quickly.

Some say that is a reason to ban all testing and hope that neither side does anything to interfere with the other's satellite capability. It is naive to believe in a period of high tension that the Soviets would not use their existing capability, or that they would not use their extensive missile launch capability to use direct ascent attack on satellites in addition to the tested co-orbital ASAT weapon.

Numerous reports demonstrate that the Soviets continue with a broad scope ASAT and Strategic Defense Research Program, irrespective of what we do. Yossef Bodansky reported in a special to the Washington Times on October 1, 1985 that the Soviets "Already have most or all of the components for a successful antisatellite weapon system."

Research and development has pursued two lines simultaneously. One is a large missile, with a booster based on the technology of the Soviet BL-10, a new supersonic air-launched cruise missile. The other is a smaller missile to fit on a fighter-interceptor, "Most likely the SU-27 Flanker, the Mig-25 Foxbat or the Mig-31 Foxhound." In addition to these systems, Bodansky reports that the Soviets have two military installations in central Asia that have large ground-based lasers that can already be used to blind or destroy satellities.

The Soviets believe in testing their system. To illustrate the Soviet commitment to integrated testing in an operational environment, Bodansky describes a major Soviet exercise to test their offensive-defensive capabilities. One component of that test, only a component, was the launch on June 6, 1982, on a Kosmos-1375 satellite that was subsequently destroyed by a Kosmos-1379 satellite. The entire exercise tested the launching of ICBM's and even ABM operations. If in the face of a single, fully integrated Soviet test we are unconvinced of their intentions and our national need what on Earth would convince us to start to rebuild our limited Asat Program.

The Soviet ground-based lasers illustrate a major problem with the House-initiated ban that makes United States testing contingent on Soviet action. Many Asat actions cannot be verified by present means. Tracking the Soviet coorbital satellite killer is relatively straightforward. When a United States satellite, or even one of their own, is "blinded" or made less effective by a Soviet ground-based laser, verification that a Soviet test has occurred is difficult, if not, impossible. If we cannot even be able to tell when a Soviet test has occurred, the continuing resolution contingency of allowing a United States test should the Soviets do so is of little comfort. It is an act of national thumb sucking and Americans should know what their Congress has done.

In addition to undercutting the President in arms control negotiations, a second major problem exists with the Asat testing ban, the inefficiency it causes when defense dollars are extremely scarce. The press reports describing the House rejection of the initial conference report on the continuing resolution indicate Democratic dissatisfaction with the level of defense spending. The level on that conference report was something less than a full adjustment for inflation, down from the 6-percent real growth in the President's budget request. Some speculate that the passage of Gramm-Rudman-Hollings may even cause a real decrease in future year defense spending.

The ban on the final stage of Asat testing is a most irresponsible waste of increasingly critical dollars for national defense. Scientist and technicians are paid to do nothing but wait on Congressman BROWN and others or the Soviet cat toying with his American mouse. Wake up, brothers, before breakout is on us.

The F-15 Asat Program anticipated a total of 10 intercepts against objects in space. This is not as many as the 20 the Soviets are said to have conducted, but are an adequate number. As in any technical program, many problems must be identified, fixed, and reliability assured.

Testing is necessary. Only one test has been completed, on September 13, 1985. It demonstrated that certain problems with the motors had been solved. Under the Defense authorization bill, three tests were authorized for fiscal year 1986—including the September 1985 test. Following the testing plan, on December 13, 1985, the Air Force launched two targets for use in the remaining two tests for this year. Launching these two targets cost approximately $20 million. Because these targets have a limited useful lifetime, a moratorium for fiscal year 1986 would result in the loss of $20 million. Very efficient my colleagues. Very efficient.

Presently the F-15 Asat Project is costing $10 to $15 million a month. With a moratorium, since only ground testing can be done, the test and development team is essentially on hold. The Defense Department and the Air Force have two options, cancel the program or put the project on hold at a cost of $10 to $15 million each month. This body which has raised a great outcry against waste and inefficiency in the Defense Department should be incensed at this. It is inefficiency of the worst kind, and a waste of increasingly scarce defense dollars. While the expenditure of millions of dollars per month will pay the bills, members of the technical team will undoubtedly begin to look for new, more active projects to use their talents. Restarting a program becomes harder and harder.

Perhaps more important than the dollars wasted each month to keep a

technical team together is the lack of confidence that a capability which looks good on the drawing boards can perform as required in an operational sense. I would not be surprised to see in a year or two the same Members who pushed so hard for this moratorium assailing the Air Force about how we can know that Asat and SDI Systems will work as designed.

Mr. President, I object strongly to this ban on antisatellite testing. It undercuts the ability of the President to negotiate with the Soviets, it wastes scarce defense dollars, and impedes the ability of this Nation to protect itself. At this time late in the session when Members are eager to go home for the holiday, I know I am not able to do much to change this situation. Christmas pleasures must of course take precedence over national need. All of us can see that. My prayer is for a Christmas gift to the Nation. A Congress desirous of peace on Earth which is at last willing to face the dreadful challenge the Soviets thrust upon us. We did not seek that challenge and we do not wish it to be so—but it is here and it is real. Wishing will not make it go away. Wishing will make it here to stay. The clouds are dark. The hour grows ever later. Merry Christmas my colleagues. Absent courage there may not be many more.

Mr. STEVENS. Mr. President, will the Senator yield?

Mr. WALLOP. I yield the floor.

Mr. STEVENS. Mr. President, I commend the distinguished Senator from Wyoming for the statement he has just made.

One of the saddest portions of the last 2 weeks has been the vacillation of support for defense and the way that the whole fabric of our procedures has been eroded by the process of reconciliation and also by this continuing resolution.

We have not yet seen reconciliation come forward, although many of the people who were involved in our conference were taken away from the reconciliation process. It hampered us and prevented getting an earlier resolution to our problems. Then, as the Senator knows, we suffered defeat of the first conference report in the House.

The comments of the Senator from Wyoming concerning the defense portion of this bill are, in my judgment, well taken.

Mr. WALLOP. Mr. President, I thank the Senator from Alaska. I would say that the thrust of my remarks primarily is directed at those in the House. I know perfectly well of the commitment of the Senator from Alaska to the defense of this Nation, and I thank him for it. I yield the floor.

Mr. EXON. Mr. President, before the distinguished Senator from Wyoming leaves the floor, I, too, want to add my compliments to him for bringing this up. If there was one principal mistake made, it seems to me, it was yielding to the House position on antisatellite testing. I wish to generally associate myself with the remarks the Senator from Wyoming has made.

I wish to compliment the Senator from Alaska. I was glad that our conferees held, at least on the matter of chemical warfare, which is equally important and is another area where we are sorely behind the Soviets.

I hope that we will not live to regret the decision that was made. Maybe we can repair it somewhere along the line. But it seems to me that the testing of our antisatellite adventures, let me put it that way, rather than experiments, compared with what the Soviets have done in the past is something that we did not do wisely.

So I thank my friend from Wyoming for bringing up that point.

Mr. WALLOP. I thank the Senator from Nebraska. I know, too, of his commitment to it. We simply must find somehow or another to put this Nation's good above temporary political judgments, not that I am suggesting the conferees did that, but I am suggesting perhaps some in the House may have.

Mr. HATFIELD. Mr. President, if I may have the attention of the Senator from Idaho, if there is no further debate, I urge the adoption of the conference report.

The PRESIDING OFFICER (Mr. ARMSTRONG.) The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. HATFIELD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. STENNIS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I want to be recorded as voting "no" on the conference report.

Mr. EXON. Mr. President, I ask that I be recorded in opposition to the continuing resolution that was just passed. This Senator was on the floor very recently, 15 or 20 minutes ago, or shortly before that, and was advised the conference report had not yet come over. I did not know we were not going to have a rollcall vote. I guess myself and others assumed we would.

But in any event, I would like to have this Senator as voting no at the appropriate place in the RECORD.

Mr. GOLDWATER. Mr. President, I believe this is the fifth—I may be one short or one long—but I believe this is the fifth continuing resolution in a row to take care of the military authorization and the funds required to provide for the defense of this country. The fifth in a row for this Congress or other Congresses of the past.

Mr. President, this is no way in the world to run not only the defense of the country, but any department of our Government. Here we have been in session now nearly 12 months and we have probably done more business and spent more of the taxpayers money in the last 6 hours than we have in those whole 12 months.

Mr. President, I, as Chairman of the Armed Services Committee, am going to repeat some of the things that I have said in the years before, particularly regarding the way that we have to go about providing these funds for the operation of our Government.

We meet here approximately January 1, and we are required by law to provide by May 15 this authorization for the different departments that we are responsible for. I believe the Armed Services Committee was the only committee ready by May 15, of last year. We held more hearings, longer hearings, and heard more testimony than any other committee. When we had completed this work, the Budget Committee said, "No, that was not quite the way its should be." So we went back to work, held more hearings, had more consideration, and came up with another military authorization bill.

Now, Mr. President, when the Budget Act was passed, I believe, in 1977, I voted for it. I thought it was a splendid idea to have this additional oversight on the expending of money that this Congress does every year. I have to admit now that it was probably the worst idea, in, at least, my humble opinion, that was ever adopted by the Congress of the United States.

What we are slowly doing, Mr. President, whether we like to admit it or not, is working ourselves into a situation where we do not really need committees of this Congress to conduct the business of this Congress. Let me try to explain that.

I have taken the military authorization bill through two processes already this year where we, I believe, as the only major committee in this body, reduced the funding by $20 billion. No other committee even approached what they were supposed to reduce their spending to so that we might help reduce the deficit and bring the budget more into balance.

After the Budget Committee had raised havoc with our first efforts at authorization, then it came back to us. We rewrote the bill. It came to the floor. It was passed in the Senate. At the same time, the House of Representatives was going through these same problems, the same actions. They passed their bill and, as is customary, the Senate and the House met in conference. We had a relatively successful conference this summer. It lasted only a little over 3½ weeks.

Then the bill came back to the Senate, where it was adopted by the Senate. We thought, "Well, that was probably the end of it." No, we had not reckoned yet with the Appropriations Committee.

Now, the normal process of the passage of legislation through this body and the other body, I must remind my colleagues, is that we meet in the early days of the session. We authorize what we feel is necessary to conduct the business of our particular part of Government for the year.

It then comes to the floor, goes to the House for conference, comes back, and then the Appropriations Committee approves or disapproves. That is the old way—just what we did.

But now let us see what we do today. I have already taken the listener through one authorization attempt, then through another authorization attempt, then through a joint authorization attempt by the House and the Senate. But now we are confronted with the Appropriations Committee.

I have to say this with all due respect to the Senator from Alaska. If we did not have him on that Appropriations Committee, I do not know where the military of this country would be. Mind you, here is a subcommittee that he Chairs, made up of committee chairmen from other committees who do not have the time, and, with one or two exceptions, do not have the expertise to consider the considerably intricate subject of the military.

Then they rewrite the bill. If it were not for the Senator from Alaska, who has had military experience, and understands what he is talking about, I do not know where the military of our Government would stand.

I am afraid we would be in far, far worse condition in relation to any potential enemy than we are today.

I would also say with great respect about the Senator from Oregon, who is chairman of the Appropriations Committee, that I do not think in all of my years in politics, particularly all of my years in the Senate I have ever known a more honest man, a man whose words are as good as all the gold you will ever find. However, this fine gentleman does not agree with the military. He very rightfully, as is the right of every American, having served his country well, feels that building a military necessary to defend our freedom as not particularly necessary confronts us with another problem.

So here we are. A military affairs committee faced with the defense of this country, and we have to go through all of these actions day after day after day, hour after hour after hour after hour with the American press telling lie after lie about the expenditure of the people's money for defense purposes.

We spend around $300 billion a year. We write over 15 million contracts a year in the Pentagon to go out to construct the equipment we need. Yet, we are doing it over constantly increasing difficulties.

Mr. President, if we do not do something about this budgetary process that we are in, and I think the chairman is doing a very fine job with all the problems that he has on his shoulders connected with it, I can see the day coming—in fact, I can see it not far off—where any chairman of any committee can stand on the floor of this body, or on the floor of the other body, and make an honest suggestion, Mr. President, that we do away with committees such as Armed Services, Interior, Agriculture, and so forth, that we turn it over to the Appropriations Committee, and let them in their wisdom write the legislation, bring it to the floor, have our amendments, and then feel that we have done our job.

(Mr. WALLOP assumed the chair.)

Mr. President, I do not believe that was the way the Founding Fathers of our country designed this country to be run. It is the finest Constitution, and it is the finest idea of government that was ever conceived by man. But we are slowly turning it into chaos. We are slowly making it impossible for intelligence to come to the floor of this Senate, and say we need this piece of equipment, or we do not. We bring bills to this floor under ample rules. Mr. President, there is nothing really wrong with the rules of this Senate except one thing. We ignore them.

We are not supposed to legislate on appropriations bills nor appropriate on legislation bills. But we do it, and do it, and do it. The military authorization bill that I started off on had 117 amendments when we brought that bill to the floor, and five of them had any relation at all to the defense of our country.

There is nothing wrong with the rules of this Senate. What is wrong with the rules of this Senate is nobody pays any attention to them. Just one little matter. It does not amount to much.

We have a 15-minute voting rule. Last year we spent 12 days, 12 days, voting on 15 minutes where we do not pay any attention to it. We some days may take an hour, half an hour, some days it might even take a half a day if somebody is off flying their airplane back to get in here, and they need the vote.

Mr. President, I did not intend to get off on this. But this has been bugging me for a long, long time. I have watched this Senate for nearly 30 years of my life. I have watched it operate under the rules as it should. I have watched it operate as a wonderful body where we knew what was going on. We knew when it was going on. We had a pretty good idea of how long it would take. And here it is a week from Christmas, and I do not know anybody around here that would make me a small-sized bet that we are going to get out of here before Christmas Eve.

Why? We do not work Mondays. We work Tuesdays, Wednesdays, and Thursdays. We do not work Fridays. That is wonderful if you come from a State east of the Mississippi. But if you live out in the States like the occupant of the Chair and I do, far, far west of the Mississippi, getting away from here on Friday does not mean a hoot. You cannot get an airline reservation. You cannot get home. So we stand around here, looking at some lousy television, read—I will not use the same term for the newspapers because they do have pretty good funnypapers. But this body, this Congress, is not being run the way it should in the best interests of our country.

I have served here nearly 30 years. I do not think I have ever served in a Congress that has served so badly as this one where it is the time to go home, and the time has long since passed when we should have gone home. And we still do not know what the other House is going to do. We still do not know what we are going to do.

So, Mr. President, I merely stood up, and when I did we just passed by voice vote a bill that contains over $300 million for defense purposes—no discussion, no understanding. When it came time yesterday, and the day before and the day before that for the military affairs under this bill to be discussed, do you think anybody from the Armed Services Committee discussed it? No. Somebody from the Appropriations Committee discussed it. That is as silly as asking me to discuss the agriculture bill. I do not even know which end of the shovel goes in the ground first. By golly, I am a little different than the other 100. I will admit it.

We bring bills in here, and we watch amendments pile up, pile up, pile up. They are not germane. We will not pass a rule relative to germaneness. So anything can be passed. The bills become nothing but Christmas trees.

When I came to this body I think we had, 1,300 people working on the Hill. I think we now have over 30,000 people working on the Hill. I honestly believe that some of their jobs consist of sitting before a typewriter or a computer and doing nothing but writing amendments all day long so that somebody can stand on this floor and offer, and I have counted one day, eight different amendments by one Member.

Mr. President, that is no way to run this body.

We are fooling ourselves. We are lying to the American people when we

try to tell them that we are doing the best we can for them.

We are doing a lousy job. It is time we faced up to it.

I regret that I was not here the other day when Senator BIDEN and some others began to call attention to the lack of work that we do, to the poor quality of work that we accomplish.

This country is in very, very serious trouble. We have a deficit that I doubt seriously will ever be met. I do think the Gramm-Rudman bill, contrary to what many people think, will work. At least we will try.

We will never reach a balanced budget in this body. We will not even come close to it.

I worry, Mr. President, about the future of my country. This is what I am alive for, it is what I live for, it is what I was raised for—to defend my country. When I think of the millions of men and women in uniform defending their country, and the handful of citizens in the Congress who do not seem to give a tiddly bing about whether we have defense or not, knocking out a program such as ASAT, the first real break we have had to be able to destroy an incoming missile should that sad day ever come, what are we thinking about?

I go back to the late 1930's when it took four Congresses to buy the B–17. It did not win the war for us in the 1940's but it sure was a help.

I sit now and listen to debate over whether we should buy chemicals for warfare, and whether the Russians are using it on Afghans day after day.

I have listened to debates as to whether we should allow the Chinese, the most double-crossing, undependable people—not the Chinese as Chinese people, but the Government of China, a Communist government—to allow those people to have our atomic secrets and then have the President defend it.

I hope the Glenn amendment comes up next year. I will be on that bill and I will argue my head off for it.

The greatest ally we ever had in the Pacific is Taiwan, and the perimeter of the Pacific is the future of this world, not Europe, not Asia. Someday, and I will be long gone, Asia will be one of the great productive areas, like South America. But we pay our attention to Europe and we ignore the countries of the Pacific where we have the country of Taiwan ready to defend us and yet we are arming their natural enemy, the home of the Red Chinese, not the home of the Chinese that I know and you know and we love, but the home of the Chinese Communist Government that will do everything to become the world power in this world.

I do not worry so much about the Soviets. I worry about the Chinese under a Communist form of government.

I am wandering around here.

(Mr. ARMSTRONG assumed the chair.)

Mr. WALLOP. Will the Senator yield for an observation?

Mr. GOLDWATER. I yield.

Mr. WALLOP. Mr. President, it is sometimes so sad that we have speeches on the floor that miss the ears of our colleagues. We have just been in the middle of a warning that this Senate, this Congress, this President, this Nation should take to heart.

Here we sit with our closest allies, the only ones willing to fight in our behalf, and certainly willing to fight in our behalf, and we limit them to technology that we know they cannot fight with while we advance the technology of their enemy who we know they will have to confront someday.

It gives this Nation such a peculiar aura of shamefulness that it does not deserve. The country does not feel that way. The country subscribes to what the Senator from Arizona just said. I only wish more of our colleagues had heard it. I salute him for it. I wish to God we had it more often. I hope one of these days the rest will hear and the rest will heed.

Mr. GOLDWATER. I thank my friend.

I did not plan on mentioning this, but I remember the great remarks of support that President Reagan gave to Taiwan during his first time of trying to get elected President. While I happened to have liked him and I would have voted for him anyway, Taiwan is the biggest aircraft carrier we have on any ocean, anyplace in the world, and yet Taiwan has been double-crossed by our State Department. I do not believe they understand what it means to get along with countries, to have peace in the world. We have people who say anything they want and they are never challenged.

I remember the day that it was suggested that President Nixon go to China and make a deal with China. Now we have recognized a Communist government bent upon the destruction of the world—and particularly the destruction of Taiwan—and which is our enemy. Our Government does not seem to understand that Taiwan is our friend.

Mr. President, if I went through all the things I can find wrong with our Government, I would be here for a month. But I do not want to do that. I love my country. I do not like to see it kicked around. I do not like to see 535 experts on foreign policy, 535 experts on every subject in the world, get up and try to run this country.

The committee system is the way this Government was planned to be run. The committee system can run this Government. But it cannot run this Government under the budget system and sooner or later, like it or not, we are going to have to get away from the budget system and go back to the system allowing the committees of Congress to operate.

I am glad this bill was passed. I again want to congratulate the Senator from Alaska who is the only man on the Military Affairs Committee who understands military. We at least came out of it with a lot more than I ever thought we would.

Mr. President, I yield the floor.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MOYNIHAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

THE GRAMM-RUDMAN-HOLLINGS DEFICIT REDUCTION PLAN

Mr. MOYNIHAN. Mr. President, on December 11, the Senate, as we know, adopted by a 2-to-1 vote the legislation which has come to be known as the Gramm-Rudman-Hollings deficit reduction plan. At that time I spoke at some length in opposition to the measure, having in mind a number of things. The first was that it represented a basic decision by the U.S. Congress to avoid and formally to renounce the responsibility for imposing priorities on public spending. On that occasion I recalled a statement President John F. Kennedy was fond of making when he would say that "To govern is to choose." To decide rather than choosing what to spend on, what not to spend on, and let such choices be made by kind of mechanical processes involving various bureaucracies, OMB, CBO, GAO, was an abdication of constitutional responsibility and of elemental good sense, which is that some things are more important than others, that resources are limited, and choices have to be made.

I also said at the time, Mr. President, that the way we were putting into place this automated mechanism was such that inevitably there would be large reductions in the provisions for the national defense. I spoke about this at great length and wondered what possibly could be our intention in setting in process such a reversal of what is now almost a 10-year, steady increase in the defense appropriations—a trend which has certainly restored our forces from the levels to which they had declined in the early and middle 1970's. This is a general proposition, not something we should do.

I observed that the highest levels of the Pentagon had assured that morning that the Gramm-Rudman-Hollings

legislation would require a 3-percent real reduction in fiscal 1987, 5 percent in 1988, 8 percent in 1989—an accelerating decline—just at the moment when we had once again aroused 5 NATO allies to keep the commitment which we made, and we all made together, under President Carter, in 1978, to maintain a 3-percent real growth rate in defense outlays. We agreed to go up 3-percent and yet under the provisions of Gramm-Rudman-Hollings we would reduce real defense outlays by 3-percent, which is hardly promising for a conventional force.

I recalled a remark which the distinguished Senator from Colorado (Mr. HART) had made in the early stages of this debate, when we had a number of colloquys. He noted that in this context the almost necessary movement of the force posture is of greater reliance on strategic nuclear responses to crises, a formulation which in the 1950's got the somewhat baleful designation of "more bang for the buck." That is to say that no matter what degree of engagement between powers might be, any hostilities will be nuclear hostilities, which is exactly the opposite of what the world needs or we want.

Mr. President, I went further in speaking of the implications of the action we were taking for the arms negotiations in place now in Geneva, negotiations to which I have the honor to be one of the Senate observers.

I said at the time, on December 11, that the Soviets had returned to the negotiating table with us probably out of a number of considerations, of which surely one was that the President had announced the intention to launch a major initiative called the Strategic Defense Initiative. SDI envisioned as a missile defense system of enormous range and consequence, far beyond anything ever contemplated in the days of point defense of ballistic missile fields or indeed of particular cities, but, rather, a shield that would cover the whole continental United States.

I acknowledge that the United States had not made such a proposition or offer, but it seemed to me that if there were going to be an agreement, it would take the following rough form: In return for a Soviet agreement to scrap their heavy missiles, those great SS-18's, and a possibility implicit in a proposal on warhead limits which they tabled sometime ago, we would agree to scrap this SDI.

I did not say that this is something our administration had proposed. But people who follow these things say that, in that rough context, there was indeed the prospect of a major agreement which, among other things, would bring about the President's repeated and genuine and admirable proposal that we reduce the numbers of warheads and missiles and not just lower the rate of increase.

In a brilliant article in the current Foreign Affairs, Mr. Thomas C. Schelling discusses the proposition that this particular preoccupation might not be as productive as it seems. Still, it is the President's goal, and it cannot do any great harm, and it could do great good.

Then, Mr. President, I said—and I take the liberty of quoting myself on that occasion:

> What about the Strategic Defense initiative? With an estimated cost of $1 trillion, clearly it is one of the concerns that has brought the Soviets to the bargaining table. With what credibility can the spokesmen for a country that is slashing its defense expenditures look across the table and say to their negotiating partners: "You know, if we cannot reach an agreement on real reductions, we are going to put a trillion dollars into the SDI." There is no trillion dollars for the SDI. There will be no SDI, and the Soviets will know it. Any downstream possibility of negotiating a real reduction, as the President has sought, on strategic weapons disappears. It disappears on this floor today. Arms control disappears.

I had previously inserted in the RECORD an article from the Washington Post of that morning which was headed: "Pentagon Warns Anti-Deficit Would Be Comfort to Soviets."

Mr. President, we had some further comment on that score, and it occurs again today. This morning, in the Washington Post, my friend and the widely-admired political commentator Mr. Ben Wattenberg has an article which has the headline: "Deficit Plan Is a Plus for the Soviets." In a way, he repeats, restates, and adds to the argument I made on December 11.

I should like to leave that as the first part of my statement this afternoon: It is my conviction that we have jeopardized the arms talks by the measures we have adopted in the first session of the 99th Congress.

To a second point, Mr. President: In that floor statement I did say that the Republican Party had initiated this proposal, the Gramm-Rudman-Hollings proposal; that it came to the floor without hearings, without any previous announcement, and indeed without even being printed. I made what I thought was the not altogether inaccurate statement that this was probably the first privately-printed bill that had ever been enacted by the Senate.

I recall standing here that day with Senator HART and asking, "Where is the bill? Can we see a copy of the bill?" Of course we could not. We were 3 days in debate before there was even a mimeographed version in circulation.

In this morning's Washington Post, Mr. Hobart Rowen, who is surely the Capital's most respected and experienced commentator on economic matters, has a column which is headed "The Democrats Will Have To Answer For It."

It begins:

> Now that the infamous Gramm-Rudman-Hollings budget-balancing gimmickry has been enacted into law, the Democratic Party must assess its shared responsibilities for getting it through Congress.

It is a fact that in the first vote on the matter a majority of Members on this side of the aisle voted for the measure and in the final measure it was an even 22 for and 22 against. That divides us.

I think it is fair to say that indeed this side of the aisle does have to account for, and is responsible in some measure for the success of that proposition, and I think it only fair that I should acknowledge that this is the case and that it might have been more graceful of me to say so at the time.

A third observation I wish to make, Mr. President is that we have come to the end of a tumultuous session with yet once again nothing in fact done about deficits. I am led into this third portion of my remarks on this closing afternoon by the closing paragraph of Mr. Rowen's essay this morning. He said:

> The folly of the whole exercise of budget-balancing via a blind formula is matched only by the deception symbolized in 1981 by the Laffer supply-side "curve" that was supposed to yield greater tax revenues and ample national savings out of lower tax rates. What supply-side economics produced, when tested, was the giant deficit that curbed the flow of savings, sapped the Democratic Party's virility and now, finally, has given us the Gramm-Rudman era.

I say this in the context of my disappointment in this session of Congress at the repeated rejection of the effort I have made along with distinguished friend from New Jersey [Mr. LAUTENBERG] to persuade Congress to make at least a small effort at the reduction of our debt and our deficit by selling in commercial markets portions of the $245 billion loan portfolio which various agencies of the U.S. Government have accumulated over the years.

At the time this proposal was first made in the Budget Committee and on the two occasions we debated it and voted on it in the Chamber, I have been first to acknowledge that some of these debts are not really collectible and we probably never expected that they would be. Famine assistance to countries that have changes their names twice since they fought famine before the present one are not going to pay back food assistance we gave them in the 1950's or 1960's.

But it is still the case that a very great deal of that loan portfolio represents valid debts which can be paid, will be paid, are regularly paid, and could be sold to other lenders, as is the normal commercial practice of banks and other institutions.

Mr. President, I have only a few remaining remarks to be made. If one looks at that portfolio you find it is, made up of loans of high quality which are perfectly marketable. The largest single loan in our portfolio is the $2 billion loan to a Government-owned public utility in South Korea for the purchase of American generating equipment through the financing of the Export-Import Bank.

I raise this issue again for two reasons. First, the terror with which the Members of this body seemingly faced the prospect that the public would learn just how huge a subsidy these loans are to those who receive them. They are. They are made at below market rates, such that the $2 billion loan if sold would sell for about $1.6 billion.

It is not that we would make some mistake in selling it. It would be worth $1.6 billion as it was the day it was made. The difference represents the subsidy involved in the transaction.

The fact that we might have picked up, as we still can do, $100 billion or $130 billion or $140 billion, cutting into the deficit that amount and saving in perpetuity or near thereto the interest payments, $10 billion or $12 billion per year, mounting as it compounds, did not attract any interest in this body.

It does not attract any interest in this day when we are approaching the point where it will require half the revenues of the personal income tax just to pay the interest on the debt.

The transfer of wealth from labor to capital which this represents I believe has no precedent in the annals of this Republic.

But there was another reason, Mr. President, that this proposal has not been welcomed, and that is that the Office of Management and Budget fiercely opposed this measure. They opposed it here. They opposed a much more modest proposal on the House side because all along we have been dealing with a grand design in the administration—a design of incredible folly—to create a deficit that would force not just the diminishment but in some measure the dismantling of the modern American Government in its domestic aspects.

I first made this observation in an article in the New Republic 2 years ago next week, that the deficit was deliberate. At that time, this was not a proposition generally agreed to. Since then we have the testimony of persons of such distinction as Friedrich von Hayek and Norman Ornstein, and others, who testified to having been told this by high officers in the administration, by the President's close counsellors.

At some level it could be forgiven as a policy if there were in fact that degree of options available. There have not been, as this body has over and over demonstrated. There just were not that may Government programs to be reduced.

And indeed instead of reducing what could be, as we surely have done as much as there was to be done, or as much as the political disposition of this body was to do at any given time, the strange fact is that early in the administration history, the realization came that these options were not there. You could not cut that much money.

If it were there, Mr. President, one elemental event would occur: The President would have sent us a balanced budget. One elemental fact: In 1981 or 1982 or 1983 or 1984 or 1985, he would have sent us a budget that was balanced. He has never done or anything near that which is testimony to their own understanding of this reality. And yet at the level of rhetoric, it is denied.

The statements continue that Congress must do its duty and balance the budget by taking down domestic spending. Even today, this morning, Mr. President, the New York Times reports in an article on the front page and the headline is "Reagan Denies cut Will Hurt Military," "Says Budget Bill"—meaning the Gramm-Rudman-Hollings bill—"Says Budget Bill Means End of 'Wasteful' Domestic Plans."

Mr. President, this attains to the condition of fantasy—5 years, doubling the national debt. Time will not be far off when the whole of the personal income tax will be required to pay the interest on the debt, a transfer of wealth from labor to capital, from workers who pay income tax to investors who hold Treasury bills. And we still are using the rhetoric which got us into the situtation. And that was really quite unforgivable of OMB, by which time the officials who did know the reality, even resisted as simple and elemental a measure as Mr. LAUTENBERG and I have put forward.

So here we are. Come to the end of 5 years, we have doubled the debt; turned ourselves into a debtor Nation. We are about, I think, to see the wreckage of the defense program. We are about to see, I think, the loss of an opportunity for a major arms agreement, a historic arms agreement, something the President came to this city with as high of a priority of anything he had.

It is tragic, Mr. President. No one can take any pleasure in it. But it also compels us to ask: Where did this leakage of reality begin? How long can we live in a world in which what we say and what we do is at such contrast?

The Financial Times of London, in an editorial about the Gramm-Rudman-Hollings legislation, not long ago said of the President—and they admire him, as we all admire him, as a person—in describing in one wonderful sentence his first 5 years in office with respect to fiscal matters: "He said one thing, did the opposite, and got credit for both." And yet, Mr. President, the crisis does not go away; it only compounds. And we look forward to the next session.

I hope that what I have said about Gramm-Rudman-Hollings is wrong. And if it is wrong, I hope I shall have the integrity to so state. And I fear it is not. And I find when what I have to say is confirmed by as eminent an economist as Hobart Rowen and as able a political commentator as Ben Wattenberg, I look forward with even greater apprehension to the year ahead.

Mr. President, I ask unanimous consent that the articles by Mr. Rowen and Mr. Wattenberg be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[Washington Post—Dec. 19, 1985]

THE DEMOCRATS WILL HAVE TO ANSWER FOR IT

(By Hobart Rowen)

Now that the infamous Gramm-Rudman-Hollings budget-balancing gimmickry has been enacted into law, the Democratic Party must assess its shared responsibility for getting it through Congress.

In the end, 22 Senate Democrats (including Edward M. Kennedy) voted for the bill, exactly equal to the 22 who had the guts to call it a fakery. And in the House, almost as many Democrats voted for it as against—118 to 130. These Gramm-Rudman Democrats will have to live with their vote to dismember the old left-labor-liberal-inner city coalition.

To be sure, some House Democrats succeeded in amending the original Senate bill to exclude from its automatic budget-cutting ax eight programs serving low-income families and disabled veterans, including Medicaid and food stamps.

And a few Democratic senators—including Pat Moynihan of New York and Gary Hart of Colorado—bluntly told their colleagues that Gramm-Rudman was bad medicine and a shirking of their responsibilities.

But as a party, the Democrats, in their new reliance on the political payoff of "fiscal integrity," were afraid, to try to kill Gramm-Rudman outright. Meanwhile, President Reagan's willingness to accept Gramm-Rudman as his own lends credence to the charge made some weeks ago by Moynihan that from the beginning, the president and then budget director David Stockman planned the huge tax cuts of 1981, along with the boost in military spending, for the precise purpose of creating the deficit that would then allow the final assault on social programs.

Moreover, no one—Gramm, Rudman, Hollings, Reagan or Kennedy—has yet explained why a balanced budget should be a national goal in and of itself. The proper goal, of course, should be to balance the economy, one that is both compassionate and competitive. That is something that President John F. Kennedy understood when he recommended a tax cut despite the existence of a budget deficit in 1962.

Gramm, the genius behind the revolution that takes budget decision-making out of

the hands of individual congressmen, is disarmingly candid about his objective.

"The whole genius of the American political system is imposing limits on the power of government. I think the American people want to control the growth and size and the expense of the government," he said in an interview.

Last week on PBS's "Capitol Journal," Gramm brushed aside discussion of one basic weakness of his scheme—its inadequate provisions for dealing with recession. Since Herbert Hoover turned a recession into Depression by attempting to cut government spending as an antidote to bad times, no national administration—Republican or Democratic—has repeated that mistake. But Gramm-Rudman will require budget cuts even if the economy is limping along, say at just a 2 percent real growth rate, accelerating the downturn.

The precise economic consequences of Gramm-Rudman are among the major worries. According to Data Resources, Inc., unless the Fed loosens the money supply considerably, the fiscal drag of deep, sudden budget reductions under Gramm-Rudman will push the unemployment rate sharply higher, to over 9 percent in 1987 before it retreats to around current levels.

That could provide a major surprise for congressmen who expect to brag to their constituents that they voted to balance the budget.

But Phil Gramm doesn't intend to rest on his laurels. He served notice that he'll be back next year trying to get those eight exempted programs under his budget-cutting knife, which would make it easier to meet deficit targets without excessive whacks at the military budget, or raising taxes. Even the exemption of Social Security benefits isn't safe forever.

Gramm doesn't talk much about the dangerous aspects of his brainchild. He is on the way to success in achieving his pet goal—eliminating government services—unless the courts declare the whole business unconstitutional, or a new Congress comes to its senses.

The folly of the whole exercise of budget-balancing via a blind formula is matched only by the deception symbolized in 1981 by the Laffer supply-side "curve" that was supposed to yield greater tax revenues and ample National savings out of lower tax rates. What supply-side economics produced, when tested, was the giant deficit that curbed the flow of savings, sapped the Democratic Party's virility and now, finally, has given us the Gramm-Rudman era.

[New York Post—Dec. 19, 1985]

DEFICIT PLAN IS A PLUS FOR SOVIETS

(By Ben Wallenberg)

There are more than initials that link the Gorbachev-Reagan diplomatic process with the new Gramm-Rudman budget process. In fact, the latter may emasculate the former.

You will recall that the first G-R process was featured recently in Geneva. President Reagan had said simply that America was strong again, and so we could negotiate—from strength—with the Soviets. It was simple, but probably accurate.

Apparently Gorbachev and the Soviets believed it. American military strength had increased. Then arms talks resumed; the summit occurred; two more summits were scheduled.

Perhaps something could come of it. Maybe we had forced the Soviets to behave reasonably.

Enter the second G-R. The Gramm-Rudman balanced budget bill, as you probably have heard, provides for a balanced budget by 1991, which, if you want a balanced budget, is a nice time to have a balanced budget by.

Have you been confused about Gramm-Rudman?

Confused because it forces the President to make big budget cuts, which the Congress will then change, which will then go back to the White House where a computer will do the real cutting, which will then go back to the Congress for another shot at it, which at some point may or may not involve a tax increase, all of which may or may not sharply cut defense and social programs?

You are not alone in your confusion. I am confused, too. That's all right, I am not a budget expert. But I will tell you something. The experts are confused, too. No one knows how it will work out. Including Gorbachev.

Imagine you are Gorbachev. You have decided to negotiate seriously because your adversary has demonstrated that he is serious: big arms buildup, a real push for Star Wars. Now, suddenly, everyone is talking about big defense cuts. Will the cuts really happen?

My guru on congressional matters is the scholar Norman Ornstein, a colleague at the American Enterprise Institute. Ornstein guesses—and he is guessing—that when it's all over, defense spending will probably come in at a range between no increase and a 5 percent cut.

Interesting: Recall that a year ago Reagan and Defense Secretary Caspar Weinberger were still talking about 6 percent increases.

Recall that the impact of Gramm-Rudman probably gets tougher and tougher each year until 1991, as the mandated deficit cuts go deeper and deeper.

I repeat: Imagine you are Gorbachev. What do you do? Negotiate? Or sit? Sit is not a bad strategy. You may well be able to let the U.S. give away for free what you were willing to trade for. The Soviet strategy has always been for America to unilaterally disarm.

In the end, Ronald Reagan will have to make a tough choice. New York Sen. Daniel P. Moynihan has described Gramm-Rudman as a "suicide pact." That's correct. It links defense spending to domestic spending. If one goes off the cliff—so does the other. If you save one, you have to save both.

It works out that if Reagan wants to preserve one of his dreams—promoting liberty via defense spending—he will have to give up another—cutting back the welfare state via domestic spending cuts.

One assumes that after much bluffing back and forth, much confusion, incredible boredom as three-cushion budget strategies are debated by arcane pundits—Reagan will go with the "save both" decision.

He will defend liberty and leave the welfare state alone. That means an over-his-dead-body tax increase, which he will inch up to—very, very slowly.

That G-R budget process will take a year, and perhaps two or three or four years. While that happens, it may well put the G-R diplomatic process on hold, as Gorbachev sits tight instead of backing down to a reasonable position.

Would you like to know my reaction?

Grrrr. . .

CONGRATULATIONS TO THE MEMBERS OF THE BOARD OF DIRECTORS OF THE U.S. INSTITUTE OF PEACE

Mr. MATSUNAGA. Mr. President, I rise to congratulate the nine members of the Board of Directors of the U.S. Institute of Peace who were confirmed last night shortly before the Senate recessed.

As members of the first Board of Directors of the Institute of Peace, these nine will have a most important task. It will be up to them to set the Institute's course for the next several years. They will establish the Institute's research priorities, set up its information services division and establish the Jennings Randolph Center for International Peace, named in honor of my good friend and former colleague, who was the first to cosponsor the bill which I introduced in the Senate to establish the Institute. They will be responsible for finding ways to involve Americans from all walks of life in the Institute's work, and I am sure that this is one of the areas which Congress will analyze closely when considering legislation to reauthorize the Institute in future years. To paraphrase John Norton Moore, the designated Chairman of the Institute's Board of Directors, there is nothing more important to the citizens of our country than the search for peace and human dignity.

I am confident that the nine Directors nominated by President Reagan and confirmed last night by the Senate will fulfill these duties in an outstanding manner, and I urge President Reagan to expedite his nomination of the two remaining Board members so that the Institute will be able to begin its work with a full compliment.

As one who worked for 22 years in Congress to establish the U.S. Institute of Peace, I take great pleasure and pride in congratulating its first Board of Directors. They are John Norton Moore, Chairman; Allen Weinstein, Richard J. Neuhaus, W. Bruce Weinrod, W. Scott Thompson, Evron N. Kirkpatrick, Dennis L. Bark, William R. Kintner, and Sidney Lovett.

SUSTAINING PRESIDENTIAL VETO OF TEXTILE AND APPAREL TRADE ENFORCEMENT ACT OF 1985

Mr. MATSUNAGA. Mr. President, if and when this body attempts to override the President's veto of the Textile and Apparel Trade Enforcement Act of 1985 (H.R. 1562), I strongly urge my colleagues to vote to sustain the veto.

Mr. President, I have had keen reservations about this legislation from the very outset. As a member of the International Trade Subcommittee of the Senate Finance Committee, I voiced

my strong concerns about this bill when it was the subject of hearings before the subcommittee on July 15, 1985, and on September 12, 1985. On those occasions, I stated that I would filibuster against the bill on the Senate floor unless the discriminatory provisions of the bill were removed and the Hawaiian garment industry was protected from its provisions. During the Senate floor consideration of H.R. 1562 on November 13, 1985, I once again expressed my vigorous opposition to the bill as written. In keeping with my commitment to filibuster against the bill, I opposed a motion to invoke cloture to foreclose any prolonged debate. Unfortunately, the proponents of the legislation were able to garner more than the requisite 60 votes necessary to proceed to the consideration of, and final vote on, the bill.

In the hope that my colleagues who voted against the bill on final passage will vote to sustain the President's veto, I wish to reiterate the arguments I raised during that earlier debate.

Mr. President, the Textile and Apparel Trade Enforcement Act, H.R. 1562, in applying additional quota restrictions on textile and apparel imports, blatantly discriminates against Asian-Pacific nations and Brazil. The European Economic Community [ECC] is totally exempt from the bill's coverage, as is Canada, despite the fact that textile and apparel import growth from these two areas are increasing faster than from most developing countries. Imports from Multi-Fiber Arrangement [MFA] developing countries during the period October 1984 to March 1985 declined 4 percent, as compared with the same period in the preceding year, while imports from the EEC and Canada increased by 35 percent during the corresponding period, according to an international business and economic research consultants [IBERC] report. Imports from the EEC alone increased 22.5 percent from January 1984 through August 1985, while imports from Taiwan, Korea, Hong Kong, and China experienced a marked decline during this same period. Asian/Pacific rim nations, however, are the major targets of the import restrictions under the legislation.

In order to address this apparent discrimination I offered an amendment with the distinguished Senator from Alaska [Mr. MURKOWSKI] which would have expanded the coverage of the legislation to all foreign countries with which we have trade relations. The Matsunaga-Murkowski amendment would have redefined the term foreign country in order to eliminate unfair discrimination and restore American fairness to the legislation. Unfortunately, this amendment was not adopted by the Senate due to the opposition of the proponents of the bill.

The second issue which I raised on the Senate floor and which I restate today is the effect of the bill on the garment industry in Hawaii.

Mr. President, the proponents of the Textile and Apparel Trade Enforcement Act have asserted that due to textile and apparel imports into the United States, workers in domestic textile companies have lost employment and have been otherwise materially and adversely affected. Assuming the legitimacy of this assertion, the growth and development of the Hawaiian garment industry cannot be said to have caused the slightest increase in unemployment in South Carolina or any other State. Indeed, from its inception, the Hawaiian garment industry, which directly employs 2,950 workers, has depended on Asian textiles because the quality of prints and colors are available from only a few domestic mills and are not produced in sufficient quantities to meet the demand of Hawaii's industry. Since Hawaii's industry has always relied on Asian sources for textiles, jobs have not been taken away from domestic mills and no economic dislocation has occurred as a result of this reliance. In fact, the 2,950 garment workers in Hawaii, who are employed in 138 establishments with an annual gross product of $80 million, represent American jobs, which deserve to be protected from legislation which would result in the crippling of their industry.

Representatives of the Hawaii garment industry testified before the Trade Subcommittee of the Finance Committee that enactment of the Textile and Apparel Trade Enforcement Act of 1985 would mean the dismantling of the garment manufacturing industry in Hawaii and the loss of 2,950 jobs, or more—American Jobs, I repeat. Hawaiian garment industry leaders such as William S. Foster, Sr., and Gunter Von Hamm provided the subcommittee with valuable information on jobs which would be lost in Hawaii as a result of this bill. These are American jobs, I repeat, Mr. President. Certainly, if the intended purpose of the pending legislation is to save American jobs, these 2,950 jobs in Hawaii deserve saving.

Coupled with its crippling effect on the garment industry in Hawaii, this bill would also seriously harm the tourism industry, which constitutes the States largest industry. In 1983, for example, visitor expenditures on clothing and accessories totaled $417.8 million, which I must add, contributed favorably to the U.S. balance of trade. Textiles and apparel imported into the customs territory of Hawaii run at a level of 15 million square yards annually. This is an infinitesimal amount in relation to the total annual textile and apparel imports into the United States. According to the U.S. Department of Commerce, textile and apparel imports amount to approximately 7 billion square yards annually. This means that Hawaii's share of imports amount to less than one-fifth of 1 percent of the National total.

In order to prevent the Hawaiian garment industry from being harmed by this legislation, I offered an amendment on the Senate floor which would have exempted printed textiles imported for consumption and substantial transformation into the noncontiguous States from coverage of the bill. This amendment would have had minimal or no effect on our mainland domestic textile industry and would have served to maintain the economic viability of the garment industry in Hawaii. This amendment, However was not adopted as part of the Senate-passed bill due to the opposition of the Senate proponents of the bill.

Mr. President, I believe that the economic circumstances of the domestic textile industry should be addressed in the context of a comprehensive U.S. Trade Policy and not by legislation which is violative of international trade agreements. I believe this bill is discriminatory in its application to foreign countries and is harmful to our trade relations with such countries. Therefore, I will vote to sustain the President's veto of the Textile and Apparel Trade Enforcement Act of 1985, and urge my colleagues to do likewise.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA REVENUE BOND ACT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate now turn to Calendar Order No. 460, H.R. 3718, the District of Columbia Revenue Bond Act.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3718) to waive the period of congressional review for certain District of Columbia acts authorizing the issuance of revenue bonds.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Committee on Governmental Affairs, with an amendment to strike out all after the enacting clause, and

insert the following, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in bold face brackets, and the parts of the bill intended to be inserted are shown in italics.)

H.R. 3718

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "District of Columbia Revenue Bond Act of 1985".

SEC. 2. WAIVER OF CONGRESSIONAL REVIEW PERIOD FOR CERTAIN DISTRICT OF COLUMBIA ACTS AUTHORIZING THE ISSUANCE OF REVENUE BONDS.

(a) WAIVER.—Section 602(c)(1) of the District of Columbia Self-Government and Governmental Reorganization Act shall not apply to certain acts of the District of Columbia described in subsection (c) authorizing the issuance, sale, and delivery of revenue bonds.

(b) EFFECTIVE DATE OF ACTS.—Notwithstanding section 404(e) of the District of Columbia Self-Government and Governmental Reorganization Act and any provision in any District of Columbia act described in subsection (c), the District of Columbia acts described in subsection (c) shall take effect on the date of the enactment of this Act.

(c) CERTAIN ACTS OF THE DISTRICT OF COLUMBIA AUTHORIZING THE ISSUANCE OF REVENUE BONDS.—The District of Columbia acts authorizing the issuance, sale, and delivery of revenue bonds referred to in subsections (a) and (b) are as follows:

(1) The Georgetown University Higher Education Facilities Revenue Bond Act of 1985, District of Columbia act 6-101, transmitted to the Speaker of the House and the President of the Senate November 7, 1985.

[(2) The George Washington University Revenue Bond Act of 1985, District of Columbia act 6-76, transmitted to the Speaker of the House and the President of the Senate October 3, 1985.**]**

[(3)**]** *(2)* The Sibley Memorial Hospital Revenue Bond Act of 1985, District of Columbia act 6-94, transmitted to the Speaker of the House and the President of the Senate October 23, 1985.

[(4) The Washington Hospital Center Corporation Revenue Bond Act of 1985, District of Columbia act 6-92, transmitted to the Speaker of the House and the President of the Senate October 10, 1985.**]**

(3) The American University Revenue Bond Act of 1985 (Series A) District of Columbia act 6-111, transmitted to the Speaker of the House and the President of the Senate December 4, 1985.

(4) The Forrest Marbury House Project Revenue Bond Act of 1985, District of Columbia act 6-112, transmitted to the Speaker of the House and the President of the Senate December 4, 1985.

(5) The George Washington University Revenue Bond Act of 1985 (Series A).

The provisions of subsections (a) and (b) shall not apply to the District of Columbia act described in clause (5) of this subsection unless such act is passed by the District of Columbia by December 31, 1985. If the District of Columbia act described in clause (5) is passed by the District of Columbia after the date of enactment of this Act but before January 1, 1986, the effective date of such act, notwithstanding subsection (b) of this section, shall be the date of passage by the District of Columbia.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to

AMENDMENT NO. 1430

(Purpose: To strike provisions relating to the Forrest Marbury House Project)

Mr. BYRD. Mr. President, on behalf of Mr. METZENBAUM, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from West Virginia [Mr. BYRD], for Mr. METZENBAUM, proposes an amendment numbered 1430.

Mr. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3 strike lines 17 through 20.

On page 3 strike "5" on lines 21 and 24 and insert in lieu thereof "4".

On page 4 strike "5" on line 2 and insert in lieu thereof "4".

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 1430) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed for a third reading and the bill to be read the third time.

The bill (H.R. 3718) was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ARMS EXPORT CONTROL ACT AMENDMENTS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar 475, S. 1831.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1831) to amend the Arms Export Control Act to require that congressional vetoes of certain arms export proposals be enacted into law.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill.

Mr. CRANSTON. Mr. President, S. 1831, the pending measure, is neither complicated nor controversial. It amounts to what is really a one-word change in law—changing "concurrent" to "joint" in the legal reference to the types of arms sales disapproval resolutions which enjoy expedited procedures.

This measure has very strong bipartisan support, both on the Foreign Relations Committee and throughout the Senate. I understand this measure is supported by the chairman of the Foreign Relations Committee. And it is cosponsored by Senators DODD, SARBANES, BOSCHWITZ, KERRY, PELL, EAGLETON, INOUYE, HATFIELD, LAUTENBERG, PACKWOOD, KENNEDY, HEINZ, LEVIN, GORTON, KASTEN, SASSER, and BINGAMAN.

It would simply restore the provision in law providing expedited procedures for resolutions of disapproval introduced pursuant to section 36(b) of the AECA, in a fashion similar to the Dodd-Cranston legislation, adopted on the pending measure last Friday, which provided expedited procedures for any Jordan-specific resolution of disapproval we might consider next February.

Let me stress that our proposal would not grant Congress any new powers in this area. The AECA already provides for expedited procedures for concurrent resolutions. Since the 1981 Supreme Court decision in the *Chadha* case rejecting the legislative veto, Congress has employed joint resolutions of disapproval as means of manifesting opposition to a particular sale. The problem—which we faced recently on the Jordan arms resolution—is that while a concurrent resolution of disapproval enjoys expedited procedures preventing filibusters, a joint resolution does not.

The AECA provisions of section 36(b) for arms export reviews work best when Congress can proceed in a deliberate and timely manner. For this reason, I hope that our colleagues will join with us in supporting this important proposal to clarify procedural safeguards which was unanimously passed by the Foreign Relations Committee on December 11.

I appreciate the bipartisan spirit with which we have proceeded thus far on this issue—it is not a partisan issue, it is simply a question of Senate rulemaking prerogatives, and therefore an issue in which the executive branch really has no say.

It is my hope the full Senate will now adopt this measure so that we can have this safeguard enacted into law.

I move the adoption of S. 1831.

Mr. DODD. Mr. President, I welcome the decision by the conferees on the continuing resolution to retain the Senate provision which provides for expedited procedures to govern any

joint resolution, introduced on or after February 1, 1986, objecting to the proposed arms sales to the Government of Jordan.

My colleagues will recall that on October 21, the administration officially notified Congress of its intention to sell 2 billion worth dollars of sophisticated armaments, including advanced aircraft and air defense systems, to Jordan. Three days later, the Senate acted on a resolution giving the President the authority to implement this sale after March 1, of the coming year.

I endorsed the concept of delaying this sale until next year. But, Mr. President, I could not support Senate Joint Resolution 228 because it did not guarantee this forum an opportunity to review this sale and to vote to disapprove it, should a majority of the Members determine prior to March 1, that implementing the sale after that date would not serve United States interests in helping to move the Middle East peace process forward.

As I have noted on other occasions, the sale of a variety of advanced weapons systems to the state of Jordan is simply too important to allow it to go forward without the appropriate procedural safeguards. We all recognize the volatility of the political environment of the Middle East, and because of this volatility, we all realize that we must approach arms sales to the region with great care and caution.

Like others in this Chamber, I hope such care and caution are unnecessary in this case; I hope the peace process proceeds apace; and I hope direct negotiations between Israel and Jordan begin tomorrow.

But I am also a realist, and I realize, as do others, that when it comes to the Middle East, there is an awful lot of history to suggest that our hopes will not be fulfilled, or at least, not fulfilled in the timeframe we expected.

The amendment which I offered to the continuing resolution, together with 51 cosponsors, recognized these realities and insisted on the necessary procedural safeguards with respect to the Jordan arms sales issue. The Senate adopted my amendment without objection. That amendment, I am pleased to report, has now been incorporated into the conference report on the continuing resolution.

Mr. President, because of this amendment the U.S. Senate is assured of a meaningful role in the final decision with respect to the Jordan arms sales proposal. I welcome this role, and I thank the conferees who insisted on keeping this amendment in conference report.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill (S. 1831) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1831

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 3(d)(2) of the Arms Export Control act is amended—

(1) in subparagraph (A), by striking out "adopt, within such 30-day period, a concurrent resolution disapproving" and inserting in lieu thereof "enact, within such 30-day period, a law prohibiting"; and

(2) in subparagraph (B), by striking out "adopt, within such fifteen-day period, a concurrent resolution disapproving" and inserting in lieu thereof "enact, within such fifteen-day period, a law prohibiting".

(b) Section 36(b) of the Arms Export Control Act is amended—

(1) in the fifth sentence of paragraph (1), by striking out "adopts a concurrent resolution stating that it objects to" and inserting in lieu thereof "enacts a joint resolution prohibiting";

(2) in paragraph (2), by inserting "joint" before "resolution" each of the four places it appears; and

(3) in paragraph (3)—

(A) by striking out "adoption of concurrent resolutions" and inserting in lieu thereof "enactment of joint resolutions"; and

(B) by striking out "such resolution" and inserting in lieu thereof "such joint resolution".

(c) Section 36(c) of the Arms Export Control Act is amended—

(1) in paragraph (2)(B), by striking out "adopts a concurrent resolution stating that it objects to" and inserting in lieu thereof "enacts a joint resolution prohibiting";

(2) in paragraph (3)(A), by inserting "joint" before "resolution"; and

(3) in paragraph (3)(B)—

(A) by striking out "adoption of concurrent resolutions" and inserting in lieu thereof "enactment of joint resolutions"; and

(B) by striking out "such resolution" and inserting in lieu thereof "such joint resolution".

(d) Section 63 of the Arms Export Control Act is amended—

(1) in subsection (a)(1), by striking out "adopts a concurrent resolution stating that it objects to" and inserting in lieu thereof "enacts a joint resolution prohibiting";

(2) in subsection (b), by inserting "joint" before "resolution"; and

(3) in subsection (c)—

(A) by striking out "adoption of concurrent resolutions" and inserting in lieu thereof "enactment of joint resolutions"; and

(B) by striking out "such resolution" and inserting in lieu thereof "such joint resolution."

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNION STATION DEVELOPMENT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1706.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1706) entitled "An Act to authorize the Architect of the Capitol, in cooperation with the Union Station Redevelopment Corporation, to design a building or buildings adjacent to Union Station in Washington, D.C.", do pass with the following amendments:

Strike out all after the enacting clause, and insert:

SECTION 1. STUDY OF CONSTRUCTION OF OFFICE BUILDING.

(a) REQUIREMENT FOR JOINT STUDY. The Architect of the Capitol and the Secretary of Transportation, in consultation with the Chief Justice of the United States, shall jointly study alternatives for the construction on squares 721 and 722, bounded by F Street, 2nd Street, Massachusetts Avenue, and Columbia Plaza, Northeast, in the District of Columbia, of a building or buildings to meet the current and future needs of the administrative office of the United States Courts, the Federal Judicial Center, and other judicial functions and such other commercial, governmental, cultural, educational, and recreational activities which the Architect and the Secretary determine may appropriately be located in such building or buildings. Such building or buildings shall complement the areas surrounding such squares and fulfill the goals of mixed use in the Public Buildings Cooperative Use Act of 1976.

(b) ELEMENTS OF STUDY.—The study under subsection (a) shall include—

(1) a study of alternative sizes and designs for such building or buildings and the estimated cost of each such alternative necessary to meet the current and future needs referred to in subsection (a);

(2) an analysis of other commercial, governmental, cultural, educational, and recreational activities which may appropriately be located in such building or buildings;

(3) an analysis of methods of providing security, utility, fire, and other related services for such building or buildings and allocating the cost of providing such services among the occupants of such building or buildings;

(4) an analysis of methods for financing and constructing such building or buildings in the most feasible and economical manner; and

(5) an analysis of methods of financing the construction of such building or buildings, including methods to minimize or eliminate initial capital investment by the United States through the use of public-private partnerships or nongovernmental sources of financing such construction.

(c) REPORT.—Not later than August 15, 1986, the Architect of the Capitol and the Secretary of Transportation shall submit to Congress a report on the results of the study conducted under subsection (a), together with recommendations concerning the size and design of such building or buildings and methods of financing the construction of such building or buildings.

(d) AUTHORIZATION OF APPROPRIATION.—There is authorized to be appropriated to the Architect of the Capitol $2,000,000 for fiscal year 1986 to carry out this Act. From funds appropriated to carry out this Act, the Architect shall make available to the Secetary of Transportation such amounts as may be necessary for the Secretary to carry out the Secretary's functions under this Act.

Funds appropriated to carry out this Act shall remain available until expended.

Amend the title so as to read: "An Act to authorize the Architect of the Capitol and the Secretary of Transportation, in consultation with the Chief Justice of the United States, to study alternatives for construction of a building adjacent to Union Station in the District of Columbia, and for other purposes.".

Mr. STAFFORD. Mr. President, I urge the Senate to approve this bill.

For quite some time, Congress has sought to redevelop Washington's Union Station and the area around it.

Prior to the creation of Amtrak, Congress enacted legislation to convert Union Station to a National Visitors Center. Tens of millions of dollars were spent to begin construction on a parking garage and the conversion of the Station. Following a series of cost overruns and other problems, the project was abandoned and the structure closed.

In 1981, Congress passed the Union Station Redevelopment Act as Public Law 97-125. The concept of that law was to revive Union Station as a station for Amtrak, while attracting commercial development into the building.

As a part of Public Law 97-125, Congress included a provision allowing the Department of Transportation, which is in charge of the revival of Union Station, to obtain from the Architect of the Capitol the use of two squares, 721 and 722, on the north side of Massachusetts Avenue. For the past decade, these two squares have been used as open, ground-level parking for Senate staff.

In that 1981 law, Congress took the position, which remains valid today, that development on these squares must occur in a manner that complements the revival of Union Station.

But because the Department of Transportation has not requested use of that land, control over those two squares remains somewhat uncertain. While the land continues to be a part of the Capitol Grounds, yet it is also subject to an option that has not been exercised.

When it became clear that both the Union Station Act and the Master Plan for Capitol Hill projected construction of some sort of Federal building on squares 721 and 722, discussions began to focus on the opportunity to locate there the Administrative Office of the U.S. Courts and related judicial activities.

The Administrative Office faces a severe housing problem. In this fiscal year, its 635 employees, along with another 122 persons assigned to the Federal Judicial Center, will be scattered among eight buildings in Washington, many of them several miles from the Supreme Court, to which they are responsible ultimately.

In an effort to resolve this question, I was honored to introduce S. 1706, a bill to move study of the project forward, while retaining the proper and effective degree of public control.

S. 1706 passed the Senate in October. The House later modified the bill, in no way undermining the basic intent of the Senate.

S. 1706, as amended by the House, authorizes two steps: An assessment on the size of a building that would be suitable for this site, while meeting the needs of the administrative office and other potential uses.

For example, the best proposal might be a building far larger than one needed simply to accommodate the administrative office. Such a building could include restaurants, shops, and other offices. This would be in line with the goals of the Public Buildings Cooperative Use Act—Public Law 94-541.

In this study, the Architect is also expected to review what types of tenants might be appropriate and which might be inappropriate to sharing a building with the administrative offices. It seems to this Senator, for example, that space should never be leased to law firms that might have business dealings with various components of the administrative office.

Second, the assessment will make a careful study of actual proposals for financing the building or buildings. We should expect to receive plans for alternative financing that would lessen or eliminate any need for a direct Federal capital investment.

While the study is undertaken by the Architect, in cooperation with the Department of Transportation, it is intended to be sufficiently flexible so that developers can bid at a later date to participate in the financing and construction.

While the bill does not address directly this point, I am convinced the bill also provides sufficient flexibility to the Architect to conduct a national architectual competition on the building's design.

Such a competition, as I see it, would involve selection of half a dozen or so leading architects, each of whom would be paid a sum, possibly $10,000 to $25,000, to develop a basic design.

We anticipate that the Architect and the Secretary of Transportation will have a panel of experts to help judge and select the design. Such a panel will be valuable whether we use this route, or one of the other financing alternatives.

The building's ultimate design would be selected from these submissions, with work on the drawings to begin immediately, using some of the $2 million that is authorized in this bill.

No matter how the building is to be financed, it is very important the size and design of this building fit in with the national significance of the site: Adjacent to the U.S. Capitol, near the office buildings of the U.S. Senate, and next door to Union Station. And it must also be recognized that it is across the street from an area of residences and small businesses.

The building must reflect the importance of the setting; we cannot settle for a glass box, a typical ticky-tack structure designed to turn a quick buck.

This bill offers a sound approach. But I must stress three points:

This is a cooperative venture, between the Architect and the Department of Transportation, working through its Union Station Redevelopment Corp.

This bill is intended to assure that as much of the construction financing as possible comes from non-Federal sources.

This bill is intended to meet the spirit of mixed use in the Public Buildings Cooperative Use Act, enhancing Union Station both visually and economically.

Mr. President, I move the adoption of the bill.

Mr. STEVENS. Mr. President, I move that the Senate concur on the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INDIAN YOUTH ALCOHOL AND DRUG ABUSE PREVENTION ACT

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate turn to the consideration of S. 1298 which deals with drug abuse among Indian youth.

Mr. BYRD. Mr. President, I have no objection to the waiver of the 3-day rule.

Mr. STEVENS. I thank the distinguished minority leader.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1298) to coordinate and expand services for the prevention, identification, and treatment of alcohol and drug abuse among Indian youth, and for other purposes.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the bill which had been reported from the Select Committee on Indian Affairs with an amendment to strike out all after the enacting clause insert the following:

That this Act may be cited as the "Indian Youth Alcohol and Drug Abuse Prevention Act".

TITLE I—INTERDEPARTMENTAL AGREEMENT

SEC. 101. (a) The Secretary of Health and Human Services shall take action to enter into a written agreement with the Secretary of the Interior to—

(1) coordinate the Bureau of Indian Affairs and Indian Health Service Indian youth alcohol and drug abuse programs existing on the date of enactment of this Act and programs established by this Act;

(2) identify Federal, State, local, and private resources to combat Indian youth alcohol and drug abuse;

(3) delineate the responsbilities of the Bureau of Indian Affairs and the Indian Health Service to coordinate Indian youth alcohol and drug abuse-related services at the central, area, agency, and service until levels;

(4) determine the scope of the Indian youth alcohol and drug abuse problem and its estimated financial and human costs;

(5) authorize the Bureau of Indian Affairs agency superintendents and education superintendents and the Indian Health Service service unit directors to enter into agreements described in section 102; and

(6) provide for biennial review of such agreement of the Secretary of Health and Human Services and the Secretary of the Interior.

(b)(1) The Secretary of the Interior and the Secretary of Health and Human Services shall consult with, and solicit the comments of, interested Indian tribes, Indian individuals, and Indian organizations in developing the agreement under subsection (a).

(2) The agreement under subsection (a) shall be submitted to Congress and published in the Federal Register within 180 days of the date of enactment of this Act.

SEC. 102. (a) After publication in the Federal Register of the agreement entered into under section 101, any Indian tribe may submit a written request to the Secretary of Health and Human Services to coordinate resources and services related to Indian youth alcohol and drug abuse prevention, identification, education, treatment, and followup care.

(b) Within 90 days of receipt of a written request of any Indian tribe submitted under subsection (a), the Secretary of Health and Human Services, in consultation with the Secretary of the Interior, shall—

(1) enter into an agreement with such tribe to identify and coordinate the responsibilities and referral resources of all agencies and programs providing youth alcohol and drug abuse-related resources or services within the service area of such tribe; and

(2) review and modify such agreement, as necessary, to reflect changes in the availability of resources and services related to youth alcohol and drug abuse prevention, identification, education, treatment, and followup care.

TITLE II—EDUCATION

SEC. 201. (a) The Secretary of the Interior shall require Bureau of Indian Affairs schools, and schools operated under any contract entered into with the Bureau of Indian Affairs, to provide a program of instruction regarding alcohol and drug abuse to students in kindergarten and grades 1 through 12.

(b) The program required under subsection (a) shall be developed in consultation with the Indian tribe or tribes that will be served by such program and with appropriate education and health personnel at the local level.

(c) Schools providing programs of instruction under subsection (a) shall include family participation in the instruction.

SEC. 202. The Secretary of Health and Human Services shall, within 9 months of the date of enactment of this Act, begin publishing an alcohol and drug abuse newsletter in cooperation with the Department of the Interior and the Department of Education which shall report on Indian alcohol and drug abuse projects and programs. The newsletter shall be published once in each calendar quarter and shall be circulated without charge to schools, tribal offices, Bureau of Indian Affairs agency and area offices, Indian Health Service area and service unit offices, Indian Health Service alcohol programs, and other entities providing alcohol and drug abuse-related services or resources to Indian people.

SEC. 203. Subsection (a) of section 423 of the Indian Education Act (20 U.S.C. 3385b(a)) is amended by inserting "clinical psychology," afer "medicine,".

TITLE III—FAMILY AND SOCIAL SERVICES

SEC. 301. (a) Any initial training program for new community health representatives and community health aids funded under the authority of the Act of November 2, 1921 (25 U.S.C. 13) shall include not less than 80 hours of instruction in the area of alcohol and drug abuse and shall include training in crisis intervention and family relations in the context of alcohol and drug abuse, youth alcohol and drug abuse, and the causes and effects of fetal alcohol syndrome.

(b)(1) The Secretary of Health and Human Services shall, either directly or through contract, make available instructions in the area of alcohol and drug abuse, including instruction in crisis intervention and family relations in the context of alcohol and drug abuse, youth alcohol and drug abuse, and the causes and effects of fetal alcohol syndrome to—

(A) personnel at schools operated any contract entered into the Bureau of Indian Affairs,

(B) personnel of programs operated under any contract entered into with the Indian Health Service,

(C) personnel of the Bureau of Indian Affairs,

(D) personnel of the Indian Health Service, and

(E) supervisors of emergency shelters described in section 401(b)(1),

who are responsible for, or work with, Indian youth.

(2) Upon request, the Secretary of Health and Human Services shall offer the instruction described in paragraph (1) to—

(A) members of school boards or designated school personnel who—

(i) govern, or are associated with, any school at which at least 20 percent of the enrollment consists of Indian students, and

(ii) are responsible for, or work with, Indian youth;

(B) urban Indian center personnel who are responsible for, or work with, Indian youth;

(C) judges of tribal courts and courts of Indian offenses;

(D) personnel associated with any tribal, State, or Federal Court who are responsible for, or work with, Indian youth;

(E) Bureau of Indian Affairs law enforcement personnel; and

(F) members of local community and tribal organizations or educational or health institutions responsible for, or working with, Indian youth.

(3) The Secretary of Health and Human Services shall provide the instruction described in paragraph (1)—

(A) in local Indian communities, whenever practicable, and

(B) within an integrated program for all participants.

(4) The Secretary of Health and Human Services—

(A) may provide the instruction described in paragraph (1) at no expense to the participants, or

(B) may charge a fee for the provision of such instruction to a participant.

If such a fee is charged, the amount of such fee shall not exceed the direct costs incurred by the Secretary of Health and Human Services in providing such instruction to the participant.

(5) The Secretary of Health and Human Services shall coordinate the planning of the instruction described in paragraph (1) with the Secretary of the Interior.

TITLE IV—LAW ENFORCEMENT

SEC. 401. (a) The Secretary of the Interior, in consultation with the Attorney General of the United States, shall—

(1) promulgate guidelines under which any tribal or Federal law enforcement officer shall, for the benefit of any Indian youth arrested for an offense in which the abuse of alcohol or drugs was a contributing factor, place such Indian youth in an emergency shelter licensed under subsection (b), a community-based alcohol or drug abuse treatment facility, or any other medical or detention facility, and

(2) make these guidelines available to any State which exercises criminal jurisdiction over any part of Indian country pursuant to Federal law.

(b)(1) By no later than the date that is 210 days after the date of enactment of this Act, the Secretary of Health and Human Services, with the concurrence of the Secretary of the Interior, shall establish standards for the licensing of temporary emergency shelters to house, whenever appropriate, Indian youth apprehended by any law enforcement officer for any offense in which the abuse of alcohol or drugs was a contributing factor.

(2)(A) Indian tribes may elect to adopt the standards prescribed by the Secretary of Health and Human Services under paragraph (1) and issue licenses to temporary emergency shelters that qualify under such standards. If an Indian tribe does not elect to perform the function of licensing temporary emergency shelters in accordance with such standards, such function shall be performed by the Secretary of Health and Human Services.

(B) Any license issued under subparagraph (A) shall be subject to renewal on an annual basis and, if an emergency shelter fails at any time to comply with the standards prescribed under paragraph (1), such license shall be revoked by the Indian tribe that issued such license or, if the Indian tribe fails to act, by the Secretary of Health and Human Services.

(3) An emergency shelter may be licensed under paragraph (2) only if the individual supervising such shelter has completed the training described in section 301(b)(1).

(4) The costs of constructing any emergency shelter are not authorized by this Act.

TITLE V—YOUTH ALCOHOL AND DRUG ABUSE TREATMENT AND REHABILITATION

SEC. 501. When the budget for the Indian Health Service for each fiscal year succeeding the fiscal year in which this Act is enacted is submitted to the Congress, the Secretary of Health and Human Services shall submit to the appropriate committees of the Congress, a detailed estimate of the cost of providing, under existing authority, comprehensive Indian youth alcohol and drug abuse treatment services, including detoxification and counseling services, and followup care in Indian Health Service facilities and in health facilities operated under any contract entered into with the Indian Health Service.

SEC. 502. The Secretary of Health and Human Services, in consultation with Indian tribes, shall, within 1 year of the date of enactment of this Act, complete a study to determine—

(1) the size of the Indian youth population in need of residential alcohol and drug abuse treatment;

(2) the location of residential facilities at which such treatment is available or could be made available; and

(3) the cost of providing such treatment.

SEC. 503. (a)(1) The Secretary of Health and Human Services shall, in consultation with Indian tribes, identify and utilize whenever possible existing—

(A) facilities owned by the Federal Government or by an Indian tribe, or

(B) local community or private hospitals or other appropriate facilities,

that would be suitable for use as residential alcohol and drug abuse treatment centers for Indian youth in order to meet the needs identified in the study conducted under section 502.

(2) Any facility described in paragraph (1) may be used under such terms and conditions as may be agreed upon by the Secretary of Health and Human Services and the agency, or the local government unit, having responsibility for the facility.

(3) The Secretary of Health and Human Services may, directly or by contract, renovate any facility described in paragraph (1). Any such renovation shall conform with such terms and conditions as have been agreed upon under paragraph (2).

(b) The Secretary of the Interior shall identify for the Secretary of Health and Human Services any existing Bureau of Indian Affairs facilities which may be suitable for residential alcohol and drug abuse treatment centers for Indian youth.

(c) If the facilities identified and utilized under subsection (a) or (b) do not adequately meet the treatment needs identified in the study conducted under section 502, the Secretary of Health and Human Services shall, within 2 years of the date of enactment of this Act, advise the appropriate committees of Congress as to the cost required to construct such facilities as the Secretary of Health and Human Services finds necessary to meet such treatment needs.

TITLE VI—DEFINITIONS, EFFECTIVE DATE, AND AUTHORIZATION OF APPROPRIATIONS

SEC. 601. For the purposes of this Act—

(1)(A) The term "Indian tribe" means any Indian tribe, band, nation, or other organized group or community of Indians, including any Alaskan Native village or regional or village corporation as defined in or established pursuant to the Alaska Claims Settlement Act (43 U.S.C. 1601, et seq.) which is recognized as eligible for special programs and services provided by the United States to Indians because of their status as Indians.

(B) For purposes of section 102, the term "Indian tribe" includes an urban center (within the meaning of section 4 of the Indian Health Care Improvement Act (25 U.S.C. 1603)).

(2) The term "youth" means any Indian under the age 19.

(3) The term "drug abuse" includes, but is not limited to, abuse of inhalants and chemical substances.

(4) The term "service unit" means an administrative entity within the Indian Health Service serving one or more Indian tribes within a geographical area defined by regulation by the Indian Health Service.

(5) The term "service area" means the geographical area served by a service unit.

SEC. 602. The Secretary of the Interior and the Secretary of Health and Human Resources are authorized to prescribe such regulations as may be necessary to carry out the provisions of this Act.

SEC. 603. (a) There is authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

(b) Notwithstanding any other provision of law, the receipts from any fees charged under section 301(b)(4)(B) for the provision of instruction shall, in lieu of being deposited in the general fund of the Treasury of the United States, be credited as a refund to the appropriation from which the expenses of such instruction were paid.

SEC. 604. The Secretaries shall allocate the monies appropriated under this Act on the basis of need.

Mr. STEVENS. Mr. President, I move adoption of the committee substitute.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The committee amendment in the nature of a substitute was agreed to.

The bill (S. 1298), as amended was ordered to be engrossed for a third reading, was read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION FOR INSPECTION AND RECEIPT OF TAX RECORDS

Mr. STEVENS. Mr. President, on behalf of Mr. ROTH, Mr. NUNN, and Mr. DOLE, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A resolution (S. Res. 284) to authorize the inspection and receipt of tax records by a subcommittee of the Committee on Governmental Affairs.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the resolution.

● Mr. ROTH. Mr. President, the Permanent Subcommittee on Investigations, of which I am chairman, is charged with investigating irregularities in the labor-management field and with examining instances of reported inefficiencies and improper functioning of Government operations. The subcommittee has undertaken an investigation to examine the handling by the Department of Justice, the Department of Labor, and the Federal Bureau of Investigation of a labor fraud investigation of Jackie Presser, President of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America. As the press has widely reported, serious questions have arisen concerning coordination of the Presser investigation among the Department of Justice, the Department of Labor and the Federal Bureau of Investigation.

As part of its investigation, the subcommittee is attempting to uncover facts concerning Mr. Presser's and his associates' dealings over time with various Government agencies. This inquiry is prompted by public reports that these agencies may have established relationship with Mr. Presser and his associates that may have resulted in deferred prosecutions or other favorable treatment. For example, a Time magazine article referred to Internal Revenue Service files, allegedly containing reports of its agents that three Teamsters officials—then president Frank Fitzsimmons, William Presser, and Jackie Presser—regularly met with IRS agents between 1972 and 1974 and supplied the IRS with information about rival union members. At least one of these meetings was reportedly arranged by one Harry Hall, also known as Harry Haler, Harry Haller, and Harry Helfgot. The subcommittee believes that information contained in these IRS investigatory files may be relevant to its present investigation of the handling of the recent investigation and declined prosecution of Mr. Presser.

On advice from the permanent subcommittee's chief counsel, the ranking minority member Senator NUNN and I have determined that it is necessary for the subcommittee to inspect and receive materials held by the Secretary of the Treasury. Section 6103(f)(3) of the Internal Revenue Code of 1954, as amended, provides that a subcommittee of the Senate has the right to inspect returns or return information if the subcommittee has been specifically authorized to do so by the Senate. This resolution would provide the Permanent Subcommittee

on Investigation with such authorization, and enable the subcommittee to inspect and receive information that may bear on its investigation of the Presser case.●

Mr. DOLE. Mr. President, I move the adoption of the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 284) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 284

Whereas, the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs is conducting an investigation of the handling by the Department of Justice, the Department of Labor, and the Federal Bureau of Investigation of a labor fraud investigation of Jackie Presser, president of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America;

Whereas, allegations have been made that various Federal agencies, including the Internal Revenue Service, may have conducted other investigations involving Mr. Presser and other individuals that may relate to the handling of the recent investigation and declined prosecution of Mr. Presser;

Whereas, in order to conduct its investigation of the handling of the labor fraud investigation of Mr. Presser it is necessary for the Permanent Subcommittee on Investigations to inspect and receive tax returns, return information, and tax-related material held by the Secretary of the Treasury consisting of investigatory files pertaining to certain named individuals;

Whereas, information necessary for such investigation cannot reasonably be obtained from any other source; and

Whereas, under sections 6103(f) and 6104(a)(2) of the Internal Revenue Code of 1954, as amended, a committee of the Senate has the right to inspect tax returns and return information if such committee is specifically authorized to investigate tax returns and return information by a resolution of the Senate: Now therefore, be it

Resolved, That the Permanent Subcommittee on Investigations of the Senate Committee on Governmental Affairs is specifically authorized, in conducting its investigation of the handling by the Department of Justice, the Department of Labor, and the Federal Bureau of Investigation of a labor fraud investigation of Jackie Presser, to inspect and receive for the tax years 1970-1985 any tax return information, or other tax-related material held by the Secretary of the Treasury consisting of investigatory files pertaining to Jackie Presser, William Presser, Frank Fitzsimmons, and Harry Hall, alias Haler, Haller, Helfgot.

EXECUTIVE CALENDAR

Mr. STEVENS. Mr. President, I would like to inquire of the minority leader if he would be in a position now to go into executive session for the purpose of considering the nominations of Thomas A. Bolan and James R. Richards, Calendar Nos. 641 and 642.

Mr. BYRD. Mr. President, there is no objection on this side.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I make that request, that the Senate now go into executive session to consider the nominations of Thomas A. Bolan, of New York, to be a member of the board of directors of the Overseas Private Investment Corporation, and James R. Richards, of Virginia, to be inspector general, Department of the Interior.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Without objection, the nominations are confirmed.

The nominations confirmed en bloc are as follows:

U.S. INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Thomas A. Bolan, of New York, to be a member of the board of directors of the Overseas Private Investment Corporation.

DEPARTMENT OF THE INTERIOR

James R. Richards, of Virginia, to be inspector general, Department of the Interior.

Mr. ROTH. Mr. President, the nomination of James R. Richards to be inspector general of the Department of the Interior was referred to the Committee on Energy and Natural Resources on November 13, 1985, and was favorably reported by that committee on December 17, 1985. On December 17, it was referred to the Committee on Governmental Affairs, of which I am chairman, for a period not to exceed 20 calendar days.

The Committee on Governmental Affairs reviewed biographical and financial information supplied to the committee by Mr. Richards and conducted an inquiry as to his experience to serve in the position for which he has been nominated.

For the past 4 years, Mr. Richards has been the inspector general for the Department of Energy. He has been an active member of the President's Council on Integrity and Efficiency and in January of this year was named as Vice Chairman of the PCIE.

The review conducted by the committee revealed nothing which could appear to preclude confirmation of Mr. Richards. That fact, coupled with Mr. Richards experience in the inspector general community and the favorable recommendation of the Energy Committee, led committee members, both Republicans and Democrats, to determine that, in this particular instance, it was not necessary for the committee to conduct a hearing or take formal action on the matter. In order that the Senate will have an opportunity to consider Mr. Richard's nomination before the recess, the committee is requesting that it be discharged from consideration of the nomination.

This determination, however, does not in any way indicate the committee's intention not to fully consider or vote on other nominations of inspector general in various Government departments and agencies which are sequentially referred to the Committee on Governmental Affairs.

NOMINATION OF JAMES R. RICHARDS

Mr. McCLURE. Mr. President, I am pleased to support the nomination of James R. Richards to be the inspector general for the Department of the Interior. Mr. Richards has complied with all requirements of the Senate and of the Committee on Energy and Natural Resources. He appeared before the committee on December 12, 1985, and has fully responded to all questions asked of him by the committee. The committee met in open business session on December 17, 1985, and unanimously ordered his nomination favorably reported to the Senate.

Mr. Richards has previously been considered and favorably reported to the Senate by the committee, and confirmed by the Senate to be the inspector general for the Department of Energy. His performance at the Department of Energy strongly supports the decision and confidence of the President in nominating him to be inspector general for the Department of the Interior. At the Department of Energy he was responsible for the coordination, supervision, and management of investigations and audits of all departmental activities, including those of the Federal Energy Regulatory Commission, to ensure honest and efficient management.

Mr. Richards is Vice Chairman of the President's Council on Integrity and Efficiency, a member of the Administrative Conference of the United States since 1984, and a member of the board of directors of the Association of Federal Investigators since 1984. He is also a member of the American, District of Columbia, and Colorado Bar Associations. Mr. Richards brings an outstanding career to this difficult position and I strongly urge my colleagues to support is nomination.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nominees were confirmed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominees.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate now return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, I should inform the distinguished acting majority leader that a Senator has requested the yeas and nays on the conference report on reconciliation at such time as it is before the Senate.

Mr. STEVENS. Mr. President, I thank the Senator. It is my hope that we will have action on the reconciliation bill tonight and all Senators ought to be on notice that under those circumstances, there will be a rollcall vote if it is presented to the Senate.

Mr. BYRD. Mr. President, I thank the Senator.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

Mr. PRYOR. Mr. President, will the Senator withhold that?

Mr. STEVENS. I withhold that, Mr. President.

USAGE OF TIME IN THE SENATE THROUGH DECEMBER 17, 1985

Mr. PRYOR. Mr. President, from time to time during the course of this year, it has been my opportunity to point out to our colleagues how we have spent our time during the course of this year with the hope that our time can be spent better. I have through December 17, 1985, recorded certain facts and figures that I think would be interesting to my colleagues in the Senate.

The reason I wait until these last few hours of the Senate session when we are about to go home for Christmas is that next year I shall do the same thing in order that we might have a benchmark to compare our progress or nonprogress, as the case may be.

For example, Mr. President, if we assume a hypothetical 5-day, 40-hour week, the quorum calls that we have been engaged in 1985 have used over 8 full weeks this year; in fact, almost 41 days.

Using the same assumption, if you add in the amount of time spent on rollcalls in excess of 15 minutes, this equals about 9½ weeks, or 47 typical 8-hour days. Roughly one-quarter of the time, Mr. President, we spend on rollcall votes is in excess of the 15-minute regular order.

Put another way, the Senate's lost time is one full workweek, using a 40-hour week assumption for the lost time on rollcall votes.

Finally, Mr. President, when you couple the lost time—that is, the quorum calls and the time spent voting in excess of 15 minutes—with the regular time spent on votes in 1985, the U.S. Senate consumed 60 full days. That is the equivalent of 12 weeks, or 3 months, out of 1985.

I do have a table, Mr. President. I present it for my colleagues at this time. I ask unanimous consent to have this table printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

USAGE OF TIME IN THE SENATE THROUGH DECEMBER 17, 1985

Quorum calls: 327 hours 15 minutes.

Time spent voting on roll call votes: 140 hours 12 minutes.

Time lost on roll call votes (amount in excess of 15 minutes): 46 hours 52 minutes.

Total roll call votes: 377.

Average length of each vote: 22.6 minutes.

If you assume a hypothetical 5-day, 40-hour week, the quorum calls have used over eight weeks this year (almost 41 days).

Using the same assumption, if you add in the amount of time spent on roll calls in excess of 15 minutes, this equals about 9 and ½ weeks (about 47 typical 8-hour days).

Roughly one-quarter of the time spent on roll call votes is in excess of the 15 minute regular order. Put another way, the Senate's lost one full work week (using a 40-hour week) on the lost time on roll call votes.

Finally, when you couple the "lost" time (quorum calls and time spent voting in excess of 15 minutes) with the regular time spent on votes in 1985, the Senate's used 60 days. That's the equivalent of 12 weeks, or 3 months out of 1985.

Mr. PRYOR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HECHT). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. NUNN. Mr. President, I ask unanimous consent that the order of the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PENTAGON FRUITCAKE SPECIFICATIONS

Mr. NUNN. Mr. President, as we all know, Christmas is a time for sharing recipes, and I have one here from the Department of Defense I should like to share with my colleagues in the Senate. Normally, I would say get your pens and pencils ready, but since the recipe is 14 pages long, with an additional 4 pages of amendments, I will touch the highlights, and perhaps you can jot down some of the Pentagon's thoughts on fruitcake specifications as handy hints for your spouses.

I would call this a "Perfect Specification, Cost-Is-No-Object Fruitcake."

Let me flip through the first six pages or so, because I am sure all your kitchens surpass the MIL-STD-668 and MIL-STD-1105 sanitary standards, and that whoever does the cooking at your house meets the Workmanship Standards under item 3.7 in the recipe.

So, moving directly to the ingredients, I will pick one. Here is item 3.2.7: "Flavoring—Vanilla flavoring shall be pure or artificial vanilla in such quantities that its presence shall be organoleptically detected, but not to a pronounced degree." Or, as Julia Child has said, "Get to know your food." Here is a preparation hint, under item 3.3.1.2.1:

Blending and Depositing . . . The fruitcake batter shall consist of equal parts by weight of cake batter specified in table I, and fruit and nut blend specified in table II blended in such a manner as to meet the requirements of 3.5. A predetermined weight of the blended fruitcake batter, sufficient to yield the specified weight, shall then be deposited into cans with liners and discs and the lids of the cans shall be clinched on loosely to allow for the escape of mositure and gasses evolved during processing. Alternatively, in lieu of paper disc and liner, the can shall have an *enamel interior possessing adequate product release characteristics* so that not more than 5.0 percent by weight of the product adheres to the interior of the can.

It goes on to say that heat retention when baking should create a vacuum in accordance with PPP-C-26.

And, to make sure the cake is good, you will want to inspect it. Here, the perfect specification, Cost-Is-No-Object Fruitcake recipe has tables galore pointing out common pitfalls in fruitcake manufacture. But this pithy paragraph cuts to the heart of the matter:

3.5.1 The finished product shall conform to the inside contour of the can or can liner. There shall be no point on the top lid greater than ¾ inch (19 mm) from the side of the can where the cake did not touch the lid during baking. Sealing and baking shall be so accomplished as to maintain continuity of the compound seal. The processing time shall be adjusted so that the batter portion is heated uniformly throughout to produce a finished product having no raw, stringy, or ungelatinized portions. When the cooled product is bisected vertically and horizontally with a sharp knife, it shall not crumble nor show any compression streaks, gummy centers, soggy areas, be excessively dry or over-processed, and shall display an even grain structure throughout. The fruit and nut pieces when required shall be evenly distributed throughout the sliced surface. The flavor of the finished product shall be typical of the type indicated. There shall be no off-flavors or off-odors.

Under section 4.5.1.1.2, we are told to "examine each ingredient organoleptically." I assume this means we are to lick the beaters and bowl.

Finally, as an indication that the Pentagon is ever striving to tighten

their standards, I notice that amendment MIL-F-1499F increases military tolerances of candied cherries from 12.8mm to 12.7mm. Always onward and upward.

Mr. President, I am pleased to be able to share this old family recipe—and in case anyone is wondering, this really is Military Specification MIL-F-1499F, amended 1980.

In keeping with the spirit of military specifications, if your spouse prepares this recipe, the Pentagon will furnish 15 full-time inspection specialists, and they will work for 1 week to determine whether the fruitcake is in compliance. I will put the full specification in the RECORD.

Mr. President, on a serious note, I am afraid that this is typical of military specifications. It is not an exception. It goes on and on for 14 pages, plus a 4-page amendment—a total of 18 pages for making fruitcake. This is very small type, with all sorts of cross-references to other publications, so that one reading this would have to go to numerous other volumes to be able to determine the full scope of what is required. Can you imagine the specifications on an airplane or a complex weapons system?

Mr. President, Senator GOLDWATER and I have recently made a series of speeches on the floor about organizational bureaucracy and layers of command in the Department of Defense. We described how these layers have hindered our ability to conduct effective military operations. These fruitcake specifications are a wonderful example of the detailed work that the Department is capable of producing. If they go to such lengths for fruitcakes, you can just imagine what the standards and specifications would be for even the most basic weapons system.

Mr. President, I can understand the need for standards and specifications for all kinds of items. In some cases, these standards are needed for safety of performance, or to ensure compatibility with other systems. These standards are also valuable to ensure full and open competition on critical components to be incorporated into weapons systems.

So I am not suggesting here in a completely frivolous manner that there is no appropriate use for standards, but there must be some common sense applied somewhere down the line.

I am very concerned about the complexity of the Department of Defense acquisition process. I have tried and continued to seek ways to simplify this acquisition process.

I think our committee is going to have to focus on that.

I am very hopeful that the Packard Commission is focusing on it, because there is no way that you can buy items cheaply when the people who are bidding must go through this kind of maze to determine what it is they are required to do.

Recently, Deputy Secretary Taft announced a revitalization of the Department's initiative to streamline the standards and specifications being imposed on contractors.

I compliment Secretary Taft for that initiative. But until we address the need for specifications and the detailed requirements of specifications we will not have seriously begun to reform the acquisition system.

Mr. President, I ask unanimous consent to have printed in the RECORD the fruitcake recipe to which I have referred.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MILITARY SPECIFICATION: FRUITCAKE, CANNED

[Beneficial comments (recommendations, additions, deletions) and any pertinent data which may be of use in improving this document should be addressed to: US Army Natick Research and Development Command, Natick, MA 01760 by using the self-addressed Standardization Document Improvement Proposal (DD Form 1426) appearing at the end of this document or by letter.]

This specification is approved for use by all Departments and Agencies of the Department of Defense.

1. Scope:

1.1 Scope. This specification covers fruitcake (see 6.4) for use by the Armed Forces as a component of operational rations. The product may be processed by baking or steaming.

2. Applicable Documents:

2.1 Issues of documents. The following documents of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

Specifications:

Federal:

PPP-C-26—Canned Baked, and Canned Steamed and Retorted Subsistence Items, Packaging and Packing Of.

Military:

MIL-L-1497—Labeling of Metal Cans for Subsistence Items.

Standards:

Military:

MIL-STD-105—Sampling Procedures and Tables for Inspection by Attributes.

MIL-STD-129—Marking for Shipment and Storage.

MIL-STD-668—Sanitary Standards for Food Plants.

MIL-STD-1105—Sanitary Standards for Bakeries.

(Copies of specifications, standards and publications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

Laws and regulations:

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Federal Food, Drug, and Cosmetic Act and Regulations Promulgated Thereunder.

Title 21, Code of Federal Regulations (CFR) 1977 Edition. Note: Orders for the publication should cite CFR 100-197.

(Application for copies should be addressed to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.)

U.S. DEPARTMENT OF AGRICULTURE

Regulations Governing the Grading and Inspection of Egg Products.

U.S. Standards for grades of: Shelled Almonds, Shelled Pecans, Shelled Walnuts, Processed Raisins.

(Application for copies should be addressed to the Information Division, Agricultural Marketing Service, US Department of Agriculture, Washington, DC 20250.)

Code of Federal Regulations, Title 21, Section 113.60. Orders for the above publication should cite CFR 100-199.

(Application for copies should be addressed to the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposal shall apply:

ASSOCIATION OF OFFICIAL ANALYTICAL CHEMISTS

Official Methods of Analysis of the Association of Official Analytical Chemists.

(Application for copies should be addressed to the Association of Official Analytical Chemists, P.O. Box 540, Benjamin Franklin Station, Washington, DC 20044.)

AMERICAN OIL CHEMISTS SOCIETY

Official and Tentative Methods

(Application for copies should be addressed to the American Oil Chemists Society, 508 South Sixth Street, Chicago, IL 61820.)

3. Requirements:

3.1 First article. When specified (see 6.1), a sample of the finished product shall be submitted to the contracting officer for approval before production is commenced.

3.2 Material. All materials shall be clean, sound, wholesome, and free from insect infestation or other objectionable foreign matter and off-flavors and off-odors.

3.2.1. Chemical leavening agents. Chemical leavening shall be of a commercial grade normally used in the production of baked goods and of a type which will produce the required end product.

3.2.2 Enriched flour. Enriched flour shall be wheat flour of a type which will result in the required end product. Enrichment shall be in accordance with the requirements of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder and may be accomplished as a part of the milling process or adding equivalent enrichment to each batch. The flour may be bleached as necessary to provide the required product.

3.2.3 Sugar. Sugar shall be white, refined, cane or beet sugar, or a combination thereof.

3.2.4 Eggs, whole, fresh, frozen or dried. The egg products shall be whole, fresh, frozen or dried or a combination thereof. Egg products shall have been produced and handled in compliance with requirements set forth in the USDA publication entitled "Regulations Governing the Grading and Inspection of Eggs and Egg Products." They shall be prepared under continuous inspection of the USDA and shall bear the inspection shield mark. If fresh eggs are used, temperatures shall be maintained at or below 40°F (4.4°C) prior to use; when thawed frozen eggs are used the temperature and time requirements of the above

regulations shall be met. When dried eggs are used in formulation, and equivalency ratio of 1-part by weight of dried eggs to 3-parts by weight of water shall be maintained.

3.2.5 Shortening. The shortening shall be refined hydrogenated peanut oil or refined hydrogenated cottonseed oil or a combination of both, and shall have a stability of not less than 100 hours, as determined by the active oxygen method (AOM) (see 4.6.1). The shortening shall contain an antioxidant with an active ingredient of TBHQ at the maximum allowable level.

3.2.6 Salt. Salt shall be white, refined sodium chloride with or without anticaking agent. Iodized salt shall not be used.

3.2.7 Flavoring. Vanilla flavoring shall be pure or artificial vanilla in such quantities that its presence shall be organoleptically detected, but not to a pronounced degree.

3.2.8 Nuts. The nuts shall be US No. 1 grade of either pecan, almond or walnut pieces. The pieces shall be from ⅛ to ⅜ inches (3.2 to 9.5 mm) nominal. The walnut pieces shall be treated with a 1:1 mixture of BHA and BHT dissolved in vegetable oil, the level of BHA and BHT shall not exceed 0.02 percent, based on the amount of oil contained in the walnut pieces (approximate analysis 64 percent). The nuts shall be of the latest crop.

3.2.9 Candied cherries. Candied cherries shall be made from pitted cherries. They shall be thoroughly processed with sugars to a soluble solids content of not less than 72 percent and artificially colored with a red dye. They shall be cut to yield ¼-inch to ½-inch (6.4 to 12.8 mm) cherry pieces on the average.

3.2.10 Candied pineapple. Pineapple shall be thoroughly processed with sugars to not less than 72 percent soluble solids. The pineapple pieces shall be cut into approximately ¼-inch (6.4 mm) dice. Pineapple which has been diced through a machine equipped with blades set to yield ¼-inch (6.4 mm) cubes shall be acceptable.

3.2.11 Raisins. Raisins shall be soda dipped or bleached Thompson seedless, select size, grade B or better, as defined in the U.S. Standards for Grades of Processed Raisins. Raisins may be soaked as necessary to prevent clumping. Soak water shall be a part of the required water in the batter formulation and shall be added to the batter at an appropriate time.

3.2.12 Candied orange or lemon peel. Candied peel, as specified, shall be thoroughly deragged and processed with sugar and corn sirup to not less than 72 percent soluble solids. It shall be chopped in a dicer set for ¼-inch or ⅜-inch (6.4 mm or 9.5 mm) cut.

3.2.13 Candied citron. Citron shall have been completely fermented by commercially accepted methods and controls to remove any evidence of bitterness and treated with sugar and corn sirup to a soluble solids content of not less than 72 percent. The citron shall have a translucent appearance. It shall be diced through a dicer set for a ¼-inch (6.4 mm) cut.

3.3 Formulation.

3.3.1 Cake batter. Cake batter shall be prepared from the ingredients in the proportions shown in table I.

TABLE I.—*Cake batter*

Ingredients	*Parts by weight*
Sugar	24
Flour	26
Whole eggs [1]	24
Shortening	16
Salt	1
Water (100° to 140 °F) (38° to 60 °C) (approximately) (variable)	9
Vanilla flavoring (pure or artificial)	(2)
Chemical leavening agents	(2)

[1] For reconstitution ratio (see 3.2.4).
[2] As required.

3.3.1.1 Batter blending. All dry ingredients (flour, sugar and salt) shall be sifted prior to incorporating into the batter. The batter shall be creamed and mixed to yield a smooth homogeneous mixture.

3.3.1.2 Fruit and nut blend. Fruit and nut blend shall be prepared from the ingredients in the proportions shown in table II.

TABLE II.—*Fruit and nut blend*

Ingredients	*Parts by weight*
Raisins	30
Cherries, candied	12.5
Pineapple, candied	20
Citron, candied	10
Lemon peel, candied	8
Orange peel, candied	80
Nuts	20

3.3.1.2.1 Blending and depositing. The fruitcake batter shall consist of equal parts by weight of cake batter specified in table I, and fruit and nut blend specified in table II blended in such a manner as to meet the requirements of 3.5. A predetermined weight of the blended fruitcake batter, sufficient to yield the specified weight, shall then be deposited into cans with liners and discs and the lids of the cans shall be clinched on loosely to allow for the escape of moisture and gases evolved during processing. Alternatively, in lieu of paper disc and liner, the can shall have an enamel interior possessing adequate product release characteristics so that not more than 5.0 percent by weight of the product adheres to the interior of the can.

3.4 Processing. The filled loosely clinched cans shall be baked or steamed as necessary to meet the requirements of 3.5. Heat retention in the cans at the time of sealing shall be such that the vacuum shall be in accordance with PPP-C-26 for the baked or steamed product as applicable. Within one hour after the completion of the heating process, the product shall be cooled to an internal temperature of 100°F (38°C) or less in the center of the product or 10 degrees above ambient, whichever is greater.

3.5 Finished product.

3.5.1 The finished product shall conform to the inside contour of the can or can liner. There shall be no point on the top lid greater than ¾ inch (19 mm) from the side of the can where the cake did not touch the lid during baking. Sealing and baking shall be so accomplished as to maintain continuity of the compound seal. The processing time shall be adjusted so that the batter portion is heated uniformly throughout to produce a finished product having no raw, stringy, or ungelatinized portions. When the cooled product is bisected vertically and horizontally with a sharp knife, it shall not crumble nor show any compression streaks, gummy centers, soggy areas, be excessively dry or over processed, and shall display an even grain structure throughout. The fruit and nut pieces when required shall be evenly distributed throughout the sliced surface. The flavor of the finished product shall be typical of the type indicated. There shall be no off-flavors or off-odors. The moisture content of the end item shall be controlled within the limits of good manufacturing practice.

3.6 All deliveries shall conform in every respect to the provisions of the Federal Food, Drug, and Cosmetic Act and regulations promulgated thereunder.

3.7 Workmanship. The product shall be prepared, processed, and packaged under modern sanitary conditions and in accordance with good commercial practice. The product shall be processed in establishments meeting the requirements of MIL-STD-1105, or if produced in food establishments other than bakeries shall meet requirements of MIL-STD-668.

4. Quality Assurance Provisions:

4.1 Responsibility for inspection. Unless otherwise specified in the contract, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract, the contractor may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Classification of inspections. The inspection requirements specified herein are classified as follows:

a. Plant qualification (see 4.3).

b. First article inspection (see 4.4).

c. Quality conformance inspection (see 4.5).

4.3 Plant qualification. Product shall be rejected if produced in bakery establishments not meeting the requirements of MIL-STD-1105 or if produced in food establishments other than bakeries, not meeting the requirements of MIL-STD-668.

4.4 First article inspection. When preproduction samples of the product which the contractor intends to supply shall be inspected to assure compliance with 3.6.

4.5 Ouality compliance inspection. Sampling for inspection shall be performed in accordance with MIL-STD-105, except where otherwise indicated hereinafter.

4.4.1 Component and material inspection. In accordance with 4.1, components and materials shall be inspected in accordance with all the requirements of referenced specifications, drawings, and standards unless otherwise excluded, amended, modified or qualified in this specification or applicable purchase document.

4.5.1.1 Examination of ingredients. Examinations shall be in accordance with 4.5.1.1.1 and 4.5.1.1.2. Nonconformance with identity requirements of one or more sample units not conforming to condition or quality requirements shall indicate an unacceptable ingredient and use of such shall be cause for rejection of the involved finished product.

4.5.1.1.1 Identity. Examination shall be made of labels, invoices or other valid documents to determine conformance to identity requirements (kinds, grade, age, size, source of inspection, etc. as pertinent to the ingredient).

4.5.1.1.2 Condition. In addition, each ingredient shall be examined organoleptically, as necessary; to determine conformance to condition requirements of 3.2 and quality requirements (other than identity or analytical) that may be contained in the ingredient requirement paragraph. The sample unit for examination shall be approximately ½ pound (0.23 kg) of each ingredient from a primary container. The sample size shall be five. In the event a lot consists of less than five containers, a sample unit shall be extracted from each container in the lot.

4.5.1.1.3 Testing of components. Testing of components shall be as shown in table III. A test result not in conformance to the requirement shall indicate unacceptable component and use of such shall be cause for rejection of the involved finished product.

TABLE III.—TESTING OF COMPONENTS [1]

Component	Sample unit	Lot size expressed in	Inspection level	Characteristics	Results reported	Test reference and requirement paragraph
Shortening	One pound (0.45 kilogram) composite [3]	Pounds	S–2	Fat stability (AOM)	Pass or fail [3]	3.2.5; 4.5
Candied fruits (each kind)	½ pound (0.23 kilogram) composite of each fruit [2].	...do	S–2	Soluble solids	Nearest percent	3.2.9; 3.2.10; 3.2.12; 3.2.13; 4.5

[1] Each component or component characteristic, as applicable, which is not listed in this table, unless otherwise excepted, shall be tested in accordance with the applicable procedures contained in pertinent subsidiary specification.
[2] The composite shall be derived from the number of primary containers as indicated by the inspection level.
[3] If failure, report results to nearest hour.

4.5.2 In-process inspection. Examination shall be performed during the manufacture of the product to determine compliance with 3.3 and 3.4 as concerns formulation, procedures and processing controls, including those for dicing requirements of pineapple, orange or lemon peel, and citron. Records of formulation and moisture testing shall be maintained and made available for examination. Nonconformance to one or more requirement(s) as determined by examination of records or by actual visual examination during processing, shall be cause for rejection of the involved product.

4.5.3 End item inspection. Classification of defects found during examination shall be in accordance with tables V thru VII. The sampling plans for the above tables shall be as shown in table IV. AQLs shall be expressed as percent defective for table V, and in terms of defects per hundred units for table VI and VII.

TABLE IV.—END ITEM SAMPLING PLAN

Table	Inspection level	Sample unit	Lot size expressed in	AQL's		
				Major	Minor	Totals
V	S–3	1 filled and sealed can.	Cans		2.5	
VI	S–2	...do	...do		4.0	
VII	S–2	...do	...do	2.5		4.0

TABLE V.—*Examination for net weight* [1]

Defect	*Category (Minor)*
Net weight more than 5 percent under specified weight (container required to have a net weight of 1 pound (0.45 kg) or less). (Report to nearest ⅛ ounce (nearest gram))	201
Net weight more than 2 percent under specified weight (container required to have a net weight more than 1 pound (0.45 kg). (Report to nearest ¼ ounce (nearest gram))	202

[1] Lot shall be rejected if sample data indicate lot average net weight is less than specified net weight.

TABLE VI.—*Examination for fill of container*

Defect	*Category (Minor)*
The distance between the side of the can and the edge of where the cake touched the top lid in baking is greater than ¾ inch (19 mm) at any point	201
Lack of continuity in compound seal [1]	202

[1] Examine only cans in which the product completely fills the can, touching the top lid at a point closer than ¼ inch from the edge. Examination of can seam and tear down procedure shall be made in accordance with the Code of Federal Regulations, Title 21, Parts 100–199, April 1977, subpart D, part 113.60.

TABLE VII.—EXAMINATION OF PRODUCT [1]

Defenct	Category	
	Major	Minor
Raw, stringy or ungelatinized portion present	101	
Product does not have an even grain structure throughout when cooled and bisected vertically and horizontally with a sharp knife	102	
When bisected as above, product crumbles, shows compression streaks, gummy centers, or soggy areas, or is excessively dry or overprocessed	103	
Nut pieces and fruit pieces not evenly distributed throughout the sliced surface		201
Flavor not characteristic of fruitcake, or not palatable (i.e., burnt, raw, flat, acid, stale, or other off-odor or off-flavor present)	104	

[1] Presence of foreign material such as dirt, paint, wood, metal, insect, or insect part or other foreign material, shall be cause for rejection of the lot.

4.5.3.1 Examination of preservation, vacuum, packing and marking. Examinations shall be made in accordance with the applicable quality assurance provisions of PPP-C-26.

4.5.3.2 Examination of can labeling. Examination of can labeling shall be made in accordance with the quality assurance provisions of MIL-L-1497.

4.6 Test methods.

4.6.1 Chemical analyses. Chemical analyses shall be made in accordance with the following methods from Official Methods of Analysis of the Association of Official Analytical Chemists except for fat stability. (See footnote 1).

Test	Source	Method
Candied fruits: Soluble solids.	Chapter: Fruits and fruit products.	Soluble solids (by refractometer).
Shortening: Fat stability	([1])	Fat stability Cd 12–57.
Moisture	Chapter: Sugar and sugar products. Section: Sugars, syrups and molasses.	Moisture (vacuum drying).

[1] Official and Tentative Methods of the American Oil Chemists Society, Section C, Commercial Fats and Oils.

5. Packaging:

5.1 Preservation-packaging and packing. The product shall be unit packed in accordance with level A requirements and packed in accordance with level C requirements of PPP-C-26.

5.2 Labeling and marking.

5.2.1 Cans. Cans shall be labeled in accordance with MIL-L-1497.

5.2.2 Shipping containers. Shipping containers shall be marked in accordance with MIL-STD-129.

6. Notes:

6.1 Ordering data. Procurement documents should specify the following:

(a) Title, number and date of this specification.

(b) When a first article is required (see 3.1, 4.4, 6.2).

6.2 First article. When a first article is required, it shall be inspected and approved under the appropriate provisions of ASPR 7-104.55. The first article shall be a preproduction sample and shall consist of ten 4- or 5-ounce (113 to 142 g) cans of the product. The contracting officer should include specific inspections in all procurement instruments regarding arrangements for inspection and approval of the first article.

6.3 Metric equivalents. Metric equivalents, indicated in parentheses throughout this document, are based on practices, conversion factors, and symbols specified in AST, E 380 Standard for Metric Practice, and are for information only. In each instance, the value stated in US customary units shall be controlling.

6.4 Supersession data. The correlation between the types of product in the superseded MIL-P-1499E and the product specified herein is as follows:

MIL-P-1499E	MIL-F-1499F
Type I	Deleted.
Type II	Deleted.
Type III	Retained without type designation.

6.5 Changes from previous issue. The margins of this specification are marked with an asterisk to indicate where changes (additions, modification, corrections, deletion) from the previous issue where made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.

MILITARY SPECIFICATION—FRUITCAKE, CANNED

This amendment forms a part of Military Specification MIL-F-1499F, dated 20 August 1979, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGES 1 AND 2

2.1, under "Specifications". Delete "Federal" and "PPP-C-26" and its title.

Under "Specifications, Military". Delete "MIL-L-1497" and its title and insert "MIL-C-43991—Canned Baked, Canned Steamed, Subsistence Items, Packaging of".

"Water activity.	Chapter: Vegetable Products, Processed. Section: Canned Products".	Water activity.

HABEAS CORPUS REFORM

Mr. NUNN. Mr. President, we have had a very grim reminder of a terrible tragedy in the State of Georgia that happened about the time I came to the Senate, the so-called Alday murders. These murders occurred in the early 1970's. We recently had a decision of the Fifth Circuit Court of Appeals and that decision was reversed and remanded for a new trial of the people who were convicted of those murders 12 years ago.

I have been to the small graveyard near Donalsonville, GA, where six members of one family lie side by side in their graves. They were each brutally executed over a long period of hours, one by one, in a systematic and a sadistic manner.

There is no doubt about the guilt of the people involved. I do not think the court has even considered that that was in error. They were convicted. There were confessions in some of the cases. But there was a reversal because of so-called pretrial publicity.

The tragedy, to me, is not the merits of the case or the reasoning but the time element involved. I can think of no way to explain to the American people, the people of Georgia, and particularly to those remaining members of the Alday family and their friends how it can take a system like the American system of justice 12 years to be able to come to a definite conclusion, and the tragedy of it all is now they have to go back through the same thing again.

We have to find a way to streamline our system of justice. We have a two-tier system of appeals. First of all, the appeals go through the State system, and once that happens, they come back and go the habeas corpus route through the State system. They go all the way to the Supreme Court and then they come back another time and go through the Federal habeas corpus proceedings.

This is an intolerable burden on society. It is an intolerable burden on victims and families. It is an intolerable burden on the taxpayers of our country. We have to find a better way.

I have a statement here that goes into great detail about the habeas corpus reform proposal that several of us, including the chairman of the Judiciary Committee, Senator THURMOND, Senator CHILES, and others have been pushing for a long time. We have not been able to get it passed.

There are people who object to this proposal, but I would hope that the people who have studied this will take into account the larger question of justice, and that is whether the American people perceive that we really do have a criminal justice system that works and that deters and that protects society.

I particularly have a great deal of sympathy for the Alday family, the people who have gone through this terrible ordeal once and will now be forced to go through it again in a new trial.

Each court that reviews this matter can have its own explanation but the combined court system and judicial system simply has no adequate explanation for this kind of time delay in carrying out justice.

Mr. President, I have spoken in this Chamber on many, many occasions to urge congressional action on perhaps the most critical problem facing the American criminal justice system: the need for reform of our Federal habeas corpus laws. During the course of the 97th, 98th, and 99th Congresses, I have joined with Senator THURMOND and Senator CHILES, among others, in offering numerous proposals designed to reduce the proliferation of needless, repetitive, and often frivolous habeas corpus petitions which have overburdened our courts and seriously undercut the integrity of our judicial system.

I understand that the most recent of those proposals, S. 238, is now scheduled for markup by the Senate Judiciary Committee, bringing it that much closer to eventual consideration by the full Senate. Introduced on January 21, 1985, and substantially similar to legislation which Senator CHILES and I introduced in both 1982 and 1983, S. 238 would limit the ability of career criminals to continually defer their just punishment by litigating and relitigating sound judgments of the trial courts many, many years after conviction. That legislation would serve as a major step toward restoring some semblance of finality and credibility to the American system of justice.

Unfortunately, while we still await congressional action on that legislation, the glaring misuse and abuse of our habeas corpus laws continues to wreak havoc on the American concept of justice. I feel compelled to again bring to my colleagues' attention the sad fact that the American public is rapidly losing faith in the ability of our system to mete out justice to those responsible for criminal acts. This week I have seen public shock and outrage spread throughout the State of Georgia in response to a decision by the 11th Circuit Court of Appeals. On Monday, December 9, the court reversed the convictions of Wayne Coleman, George Dungee, and Carl Isaacs for the brutal and senseless murder of six members of an honest, hardworking, farm family, the Aldays, in the town of Donalsonville, GA, in 1973. In doing so, the Federal appeals court overturned three separate jury verdicts of guilty for what has been termed the "worst crime in Georgia history." Moreover, the court did so despite acknowledging that "overwhelming evidence of the petitioner's guilt that had been adduced at trial."

One need only recall the facts of the Alday murders to understand the justifiable public anger which the 11th circuit decision has generated. During the afternoon of May 14, 1973, four individuals, three of whom had recently escaped from a Maryland prison, bur-

glarized the Donalsonville home of Jerry Alday. While the burglary was in process, Jerry Alday and his father, Ned Alday, unsuspectedly arrived at Jerry's residence. Upon their arrival, Jerry and his father were taken into the house at gunpoint. They were then shot in the head at close range: Ned Alday was shot seven times while Jerry Alday was shot four times.

Shortly, thereafter, Jerry Alday's brother, Jimmy, also arrived at the Alday residence and was killed by a handgun fired at close range. Jerry Alday's wife, Mary, was the next family member to arrive at the residence. After being robbed of $1, she was locked in the bathroom of the house due to the arrival of yet two more members of the Alday family, Jerry's uncle Aubrey and brother, Chester, Aubrey and Chester were then taken into the Alday home and slain in similar fashion.

Mary Alday was then led from the bathroom into another portion of the house and raped while her husband, father-in-law, and other members of the Alday family lay dead. She was then taken to a wooded area where she was again raped by two of the individuals and physically tortured. She was then killed with two shots from a handgun.

Several days later, Carl Isaacs, Bill Isaacs, George Dungee, and Wayne Carl Coleman were apprehended and arrested for the slayings. Bill Isaacs confessed his role in the slayings and pled guilty while the remaining defendants pled not guilty. In January 1974, the three were found guilty of the Alday slayings in three separate jury trials. Additionally, the juries found the existence of statutory aggravating circumstances and fixed punishment in each case at death. The defendants immediately appealed their convictions and death sentences on a number of grounds, including an allegation that prejudicial pretrial publicity denied them of their right to a fair trial. In the summer of 1976, the Georgia Supreme Court affirmed the conviction and sentence of the defendants and in November 1976, the U.S. Supreme Court denied the defendants' application for a writ of certiorari. The defendants then filed an application for a State writ of habeas corpus and received an evidentiary hearing. In August 1977, the Superior Court of Georgia denied the defendants' petition for a writ and in April 1978 the Georgia Supreme Court affirmed the judgment of the superior court. In October 1978, the U.S. Supreme Court declined to review the State's denial of the defendants' application for a writ of State habeas corpus.

In 1979 and 1980, the defendants filed an application for a writ of Federal habeas corpus in Federal District Court for the Southern District of Georgia. In October 1981 the district court denied the requested relief. In December 1981, the defendants appealed this decision to the U.S. Court of Appeals in Atlanta, GA. In 1983 the court of appeals remanded the case back to the district court to receive further evidence on the issue of pretrial publicity, despite the fact that this was essentially the same issue which was raised, litigated, and decided prior to the 1974 trials. After an evidentiary hearing, the district court again reaffirmed its earlier denial of relief.

Reviewing the second district court decision, the 11th Circuit Court of Appeals has now reversed the convictions of all three defendants. Wayne Coleman, Carl Isaacs, and George Dungee, claiming that they were denied a fair trial, given extensive pretrial publicity in Seminole County, GA. The decision finds "presumed prejudice" despite noting the overwhelming evidence of the guilt of all three defendants. In so holding, the court differs from at least eight separate judicial rulings on this same issue in this case during the last 13 years: the Georgia trial court (1974); the Georgia Supreme Court—on direct appeal, 1976; the U.S. Supreme Court—cert. denied, 1976; the Georgia Superior Court—State habeas corpus petition, 1977; the Georgia Supreme Court—appeal of State habeas corpus, 1978; the U.S. Supreme Court—cert. denied on State habeas corpus, 1978; U.S. district court—Federal habeas corpus petition, 1981, and the U.S. district court again—on remand from the 11th circuit and after receipt of additional evidence, 1985. In each of those instances, the courts refused petitioners' claims for relief based on pretrial publicity.

Cases such as the Alday decision trouble me not only for the great personal tragedy and sorrow which they bring to victims and their families but also for the irreparable damage which they do to the public's faith in the criminal justice system. What does the American public see in these types of cases? They see a judicial system riddled with inconsistencies, overburdened with needless litigation, in which a crafty criminal often succeeds far more often than the honest, victimized citizen. They see a system which speaks of justice, but fails to deliver it. They see a system which denigrates the importance of a jury verdict by countless tiers of judicial review that seems to ignore, as in this case, "overwhelming" evidence of guilt.

I urge Congress to speak to this problem by considering the habeas corpus reform set forth in S. 238. Among other things, that bill imposes a 1-year statute of limitations on Federal habeas corpus proceedings brought by State prisoners. Under current law, there is no statute of limitations governing Federal habeas corpus proceedings. The bill also provides that a Federal court will not reopen issues if, in fact, the defendant had received a full and fair review of that issue in State court. Finally, the bill places rigid restrictions on the ability of a defendant to raise an issue in a Federal habeas corpus proceeding which was not previously raised in State court.

This type of legislation is one way to help insure that justice will, at least in future cases, be meted out fairly, effectively, and without years of unnecessary and costly delay. Beyond reform of the habeas corpus laws, it may well be time to seriously consider retructuring and hopefully streamlining the many avenues of criminal appeal which now exist in our legal system. Certainly the task will be a difficult one, but, in the wake of cases like the Alday murders, it is obviously an increasingly urgent and deserving one.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMAINING MATTERS

Mr. DOLE. Mr. President, I assume some of our colleagues may wonder how near we are to sine die adjournment.

Let me indicate that we are now trying to get a 30-minute time agreement on reconciliation. That will require a rollcall vote. We are trying to approve the nomination of Terrence Scanlon. I understand that will require a rollcall vote.

Once we finish the rollcalls, there will be other items that we will bring up in the evening. But with a little cooperation here, we could turn most Senators loose within the next hour and a half.

So, I hope we could have an agreement on reconciliation. I am sorry that there has been one Senator requesting a rollcall, but in any event, if we get a 30-minute time agreement, we could dispose of that very quickly.

Maybe while we are waiting to do that we could bring up the Scanlon nomination so we will not waste time.

Then we would be able to announce no more rollcall votes this year, and I assume most Members would take off. There would be a few of us stuck here for a while.

SECTION 506 OF THE CONFERENCE REPORT ON H.R. 2959

Mr. HARKIN. Mr. President, on October 17, the Senate approved the conference report on H.R. 2959, the energy and water development appropriations bill.

It has come to my attention that section 506 of that conference report contains a somewhat complicated provision that restricts the procurement by the Federal Power Marketing Administration and the Board of Directors of the Tennessee Valley Authority of certain types of extra-high-voltage power equipment manufactured abroad.

This provision is complex and because it is complex it should not be merely slipped in to the appropriation bill. This is the kind of issue on which there should be hearings and in which the authorizing committee or committees, be it Finance Committee, Government Operations, or Energy and Natural Resources, should have first jurisdiction and decide whether such a provision is applicable to this appropriations bill. As a member of the Appropriations Committee, I know of our ability to handle complex appropriations measures, but I still feel that the right and the jurisdiction of the authorizing committee should be protected as often as possible.

Another concern I have about the inclusion of this provision is that it is an example of what can happen when trade legislation is enacted on a piecemeal basis directed at one specific industry or one specific company or one specific area of the country. Trade legislation must be comprehensive, broad-based, in our national interest, and not destructive of our alliances with countries that are our strong friends and allies. In this instance, one of the countries that could be harmed is Sweden, a country that I understand has a balanced trade with respect to electrical equipment that favors the United States. Sweden, a small country, has recently permitted a United States company to successfully bid on one of its power projects. If Sweden were to enact a reciprocal provision, such as section 506 of the appropriations bill, then our trade deficit would be increased and not decreased by the appropriations conference report. This is the type of problem that is created when trade legislation is enacted on a piecemeal basis, in haste, and where adequate hearings are not held on the subject.

If there is a trade problem with respect to extra-high-voltage electrical equipment, and quite frankly I do not know if there is or not, then it is for the appropriate authorizing committee, and not the Appropriations Committee, to devise a legislative solution that will be in our country's best interest and reduce our trade deficit, and not as this provision may well do which is to increase our trade deficit.

THE UNITED STATES SHOULD STOP SENDING MIXED SIGNALS TO CHILE

Mr. HARKIN. Mr. President, many articles have been written over the last 12 years reviewing United States involvement in the overthrow of Salvador Allende and analyzing current United States policy toward Chile. However, I have recently read what I believe is one of the most thorough and valuable pieces written to date on the subject.

Peter D. Bell, now senior associate at the Carnegie Endowment for International Peace, was the Ford Foundation's representative in Chile from 1970 to 1974. In his writing and testimony before congressional committees, he has contributed enormously to a better understanding of the policy alternatives we face in Chile.

For a better understanding of how we can best promote a peaceful transition to democracy in Chile, I suggest that my colleagues read an article Peter Bell recently wrote for the fall 1985 edition of the World Policy Journal, "Democracy and Double Standards: The View from Chile."

Mr. President, I ask unanimous consent that this article be printed in the RECORD:

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the World Policy Journal, Fall 1985]

DEMOCRACY AND DOUBLE STANDARDS: THE VIEW FROM CHILE

(By Peter D. Bell)

Twelve years after the bloody coup that resulted in the overthrow of the Popular Unity government and the death of Salvador Allende Gossens, Chilean President Augusto Pinochet Ugarte still clings to power. Despite growing opposition, he shows no willingness to permit a democratic opening. His intransigence is the central fact of political life in Chile. Both the Chilean people and U.S. policy toward Chile must confront this reality. The longer the United States supports Pinochet, the longer before his regime falls, and the most dangerous the aftermath will be—both for Chile and for U.S. interests in South America.

Although military regimes have been falling like dominoes throughout South America in recent years, Chile—with perhaps the proudest democratic tradition in the region—has been a tragic exception to this general trend. Pinochet's recalcitrant position is bolstered by the unity of the Chilean Army and the divisions within the political opposition, but it has also been reinforced by the Reagan administration's approach to anticommunist dictatorships in the Third World. The administration has stuck to a policy of "quiet diplomacy"; it avoids weakening anticommunist dictators with public criticism and instead tries using friendly persuasion to get them to mend their repressive ways. He has been able to treat U.S. policy as a show of political support, while turning a deaf ear to any private U.S. criticism of his regime.

The Reagan administration's recent touting of the "return to democracy" in Latin America is a belated effort to identify the United States with the South American trend toward political liberalization—a trend that began before Ronald Reagan's 1980 election and prospered in spite of his administration's "quiet diplomacy." This celebration of the "return to democracy" is also a way to gain greater support, particularly in Congress, for U.S. policy in Central America, which had been widely criticized for its insensitivity to abuses of human rights and civil liberties. By declaring the promotion of democracy to be a central U.S. foreign policy goal, the administration is trying to give moral purpose to the U.S. role on the isthmus and to justify its support for the overthrow of Nicaragua's Sandinista government.

Thus the administration now insists that—as Secretary of State George Shultz put it—"democracy is precisely what is at stake in Central America." In fact, however, the driving force behind current U.S. policy toward both Central and South America is not democracy but anticommunism. Democracy is promoted only when it is judged more effective than support for a particular dictatorship in fighting communism. By encouraging the primitive anticommunism of the Pinochet regime, the administration has actually set back the cause of democracy in Chile. Because he has polarized the country between the extremes of the right and the left, Pinochet has reduced the possibility of a transition to a more open and moderate government and has consequently increased the likelihood of a totalitarian solution.

U.S. INTEREST IN CHILE

Although remote from vital U.S. interests, Chile has occupied a disproportionately large place in U.S. relations with Latin America. What sets Chile apart from its neighbors is its politics. Among Latin American countries, Chile is notable for the length and continuity of its democratic tradition. From 1830 until the military coup of September 1973, Chile suffered only three momentary interruptions in that tradition—first in 1891, and then in 1924 and 1931. Cross-cultural studies of political development in the 1960s ranked Chile among the most advanced democracies in the world, comparable to the Scandinavian countries, England, and the United States. In the decades prior to the coup, Chile's vigorous democracy, with its multiple political parties, strong trade unions, regular elections, free press, open debate, and respect for the rule of law, was a source of national pride and international admiration.

The Chilean political system is further distinguished by the strength of its leftist parties, especially the Socialists and Communists, who probably still command the loyalty of one-quarter to one-third of the population. The fortunes of the Socialists have ebbed and flowed since the founding of the party in the 1930s, and the party has always contained multiple ideological currents in uneasy confluence. The Chilean Communist party, which has often been in bitter rivalry with the Socialists, is the oldest, strongest, and most disciplined communist party in South America. On international issues, it has hewed closely to Moscow's line. At the same time over most of the 50 years prior to the current military dictatorship, the party—despite its Marxist-Leninist rhetoric—abided by the rules of Chile's democracy and participated actively and openly in the political life of the country.

While the political left, with its base in the industrial belts, shantytowns, and mining areas of the country, has been un-

sually strong by Latin American standards, it has never dominated Chilean politics. During most of the period following World War II, Chileans have divided more or less evenly among the political left, right, and center, coming together in unstable coalitions to elect governments. Over the past 25 years, the centrist Christian Democrats, with a heavily middle-class constituency, have been by far the largest, most broadly based political party, their own orientation—either to the left or the right of center—has been a matter of internal competition and has played a crucial role in shaping Chilean politics as a whole. Prior to the 1973 coup, the conservatives, whose strength had rested in the traditional agrarian and financial sectors, had been losing ground to parties of the center and left; but with the coup, conservative economic interests again became dominant.

The very openness of Chilean democracy, when combined with this delicate balance among its political forces, has made Chile an ideological battleground for both domestic and foreign interests. Nowhere else in Latin America has the election of a Marxist government been a repeated possibility in the postwar period. But the United States, as a world power intent on maintaining a friendly environment in its own hemisphere, has persistently sought to prevent that possibility from becoming a reality.

If there has been any constant in U.S. relations with Chile since World War II, it is this implacable U.S. opposition to the Chilean left. Anticommunism was responsible for U.S. intervention in the political life of the country long before Ronald Reagan's inauguration. In 1964, for example, the Johnson administration sank $4 million into the presidential election of Christan Democrat Eduardo Frei and then committed $600 million in aid to make Frei's "Revolution in Liberty" a showcase for the Alliance for Progress.

In 1970, when President Richard Nixon and Secretary of State Henry Kissinger awoke to Salvador Allende's electoral plurality, they tried frantically to find a way to undo it—"to save the Chileans from their own irresponsibility" as Kissinger stated at the time. Disappointed by the outcome of the democratic process, they sought to subvert it. They first plotted to bribe Chilean congressmen into voting against Allende in a runoff election in Congress and then to goad the Chilean armed forces into a coup by kidnaping Commander of the Army René Schneider. When Allende was inaugurated despite U.S. efforts, Nixon vowed "to make the economy scream." The United States subsequently cut off almost all bilateral aid and blocked most multilateral assistance, thereby sending a message to commercial lenders as well. Finally, the Nixon administration secretly paid out $7 million—worth many times that amount on the Chilean black market—to fortify opposition groups and to subvert the Popular Unity government.

The military coup occurred with a virulence and a vengeance for which the Chileans were prepared. The bombing of the presidential palace and the killing of hundreds, and perhaps thousands, of suspected leftists marked a definitive break with the civil tradition of Chilean politics. Many Chileans who had opposed the Allende regime naively hoped that the military government would be a temporary tidying-up operations, but Pinochet and his military colleagues were committed to a thorough going cleansing of Chile's social and political institutions. They were ready for a war without quarter not only against political parties of the left, but also against an entire political system that, in their view, had permitted the intrusion of alien ideologies that had brought the country to the edge of chaos and civil war.

The military junta, with Pinochet at the head as commander of the army, moved swiftly to dismantle the old political order. Civil liberties were sharply curtailed. Tens of thousands of Chileans were detained without charges; many of them, tortured. Thousands more were dismissed from their jobs in public and private institutions and forced into exile. Congress was closed; leftist political parties were banned; other parties were declared "in recess"; all union activity was suspended; universities were given over to military officers; and the press and other media were heavily censored. In addition, Pinochet established a secret police agency, the dreaded DINA, capable of making political suspects "disappear" in Chile and of assassinating rivals abroad.

Throughout the 1970s, Chileans—traumatized by the economic and political chaos of the last months of the Allende government and, neutralized by Pinochet's show of force against all opponents—manifested little open resistance to the dictatorship. The Catholic Church was the only major institution with the conscience, the independence, and the strength to openly offer assistance to the oppressed. Many Chileans, especially from the middle class, longed only for a return to "normalcy." Thanks to the rapid economic growth of the late 1970s, the military enjoyed a measure of popular support through 1980. The vote of confidence for Pinochet in the plebiscite of January 1978 was undoubtedly "manipulated," as retired air force general and former junta member Gustavo Leigh has recently charged, but it was not a total fabrication.

The Nixon and Ford administrations were satisfied that the fate of the Popular Unity government had ended the Marxist threat to Chile. Their enthusiasm about the coup inured them to the massive human rights violations that were occurring under Pinochet. When U.S. Ambassador David Popper complained to the regime about its abuses, Kissinger recommended that Popper "cut out the political science lectures." At the same time, U.S. bilateral aid increased sixfold in 1974 and tripled again in 1975, and the United States rescheduled official loans of $201 million due in 1974 and $96 million due in 1975. The World Bank, which had closed its window to Chile during the Allende years, extended new loans in 1974 and 1975, as did the Inter-American Development Bank. U.S. commercial banks took their cues accordingly.

Thus U.S. policy in the years immediately before and after the coup linked the United States with the destruction of Chilean democracy. Whether or not the Central Intelligence Agency (CIA) actually participated in plotting the coup, U.S. policy had helped to destabilize the Allende government. The coup was provoked primarily by domestic events, but the United States abetted the deterioration of the Chilean economy and the polarization of Chilean society. After the coup, U.S. generosity toward the military regime suggested gratitude and approval—an impression made so deeply on most Chileans that it could not easily be erased, even if the United States so desired.

Members of the U.S. Congress did express concern about human rights violations in Chile—concern that turned into outrage over DINA's brutal murder of Orlando Letelier, a former Chilean ambassador to the United States and minister of defense under Allende, and Ronni Moffitt, an American friend, on the streets of Washington in 1976. By the beginning of the Carter administration, Congress had passed legislation terminating all military assistance to Chile and instructing U.S. directors to vote against loans to Chile in the multilateral financial institutions. But the impact within Chile of this shift in U.S. policy was dulled by the censorship of the Chilean news media and by the enormous influx of U.S. commercial lending that more than compensated for the decline in bilateral and multilateral aid.

CHILE SINCE 1980

Today, Pinochet's main claim to legitimacy is his contention that 67 percent of Chilean voters approved a new constitution in 1980, even though the plebiscite hardly met the standards of a fair election. The constitution was designed to perpetuate Pinochet's rule as president at least until 1989, to convert the other members of the junta into a "legislative" body, and to lay the groundwork for implementing Pinochet's concept of a "protected democracy"—a "democracy" in which, among other things, the left is excluded. A key provision, aimed at eliminating leftist parties and movements, "outlaws the propagation of doctrines that attack the family, advocate violence, or put forward a concept of society . . . based on the class struggle."

Under the terms of the constitution, which is impossible to amend without the agreement of the military, the first opportunity for a change in national leadership would not occur until 1989, when the junta is to name the sole candidate—quite likely Pinochet himself—for an eight-year term. Congressional elections would occur in 1990. In the interim, it is up to Pinochet and the junta to work out the specific steps toward the "transition," including, for example, the preparation of an electoral register and the formulation of a law governing political parties. The constitution contains provisions that, if observed, would protect many civil liberties and human rights; but it also contains several "'states of exception" and "transitory" powers that have become the norm under Pinochet, legalizing a panoply of repressive measures.

Although much of the current opposition in Chile is directed against Pinochet's repression, it was the deterioration of the economy that prompted the first wave of public demonstrations against the regime in mid-1983. The radical free-market economic policies of the junta's "Chicago boys" made Chile especially vulnerable to the world recession of 1981 and 1982 and to the debt crisis that engulfed all of Latin America. In Chile, as in neighboring countries, bankruptcies proliferated, unemployment soared, and public confidence in the government's capacity to manage the crisis waned. National income, which had been growing at 7 percent annually during the economic boom of the late 1970s, plummeted 14 percent in 1982. Disaffection with the regime was exacerbated by the renewal of widespread human rights abuses, including increased numbers of detentions and instances of torture. It was also bolstered by the popular pressures for the return to democracy that were manifested in Argentina, Uruguay, and Brazil.

A series of national days of protest between May 1983 and October 1984 demon-

51-059 O-87-31 (Pt. 27)

strated the extent of opposition to the military regime. The movement, which was started by the copper-workers' union to protest the government's economic policies, quickly broadened into a campaign to defend workers' and human rights and to demand the return to democracy. It enlisted the support of other labor unions, political parties, organizations of slum dwellers, student and professional associations, and human rights groups. What seemed most ominous for Pinochet, however, was not the tens of thousands of union members and Communist, Socialist, and Christian Democratic party militants in the streets, but the presence of groups previously supportive of the regime, including shopkeepers' and farmers' associations, the truckers' union, and several conservative political parties.

The protest movements of 1983 and 1984 also showed the depth of the divisions within the opposition and the intransigence of Pinochet. In retrospect, it is difficult to assess whether, if managed differently, the movement might have succeeded in bringing down Pinochet, or at least in forcing a significant political opening. What is clear, however, is that the political parties underestimated Pinochet's tenacity and overestimated their own strength. Their failure to conduct themselves more adroitly set back the momentum for political change. In the first, heady months of protest, leaders of the political parties acted as though Pinochet's resignation was a foregone conclusion and they turned to jockeying for advantage among themselves in anticipation of a provisional government. When the regime did not fall, the Communist and other parties of the left pressed for stepped-up confrontation in the streets; the conservatives pushed for negotiation with the regime toward a gradual transition; and the Christian Democrats, now at the center of a new Democratic Alliance, equivocated, eschewing leftist violence but advocating decisive change. Despite agreement on the urgency of returning to democracy, the leaders of the major parties were divided over how to get there.

Underlying the tactical differences within the opposition—on whether to seek confrontation or to avoid violence, to negotiate with the government or to demand its resignation—were concerns about substantive issues of vital importance. The left, which had borne the brunt of military repression and free-market economic policies, sought to make the state once again serve the workers. The conservatives, many of whom had been pushed to near ruin by the agrarian and economic policies of the 1960s and early 1970s, demanded assurances of private property and social stability. The Christian Democrats and their allies wanted a mixed economy based on a new social compact. Each of the major political groups distrusted the others, remembering how they had insisted on governing alone once in power in the past. It was difficult for them to adjust to a new reality, in which reconciliation and collaboration needed to precede competition.

Pinochet responded to the pressures for change in the manner that is by now characteristic—giving the minimum ground necessary and then taking back every inch possible as soon as he could regain the advantage. For example, he appointed Sergio Onofre Jarpa, a former president of the conservative National Party, as minister of the interior, and announced that he might advance the date for congressional elections, which had been scheduled for 1990. It was widely believed that Jarpa had been charged by Pinochet to initiate a dialogue with the leaders of the moderate opposition. But the "dialogue" proved short-lived. Pinochet pulled the rug out from under Jarpa by publicly stating that he had never authorized political negotiations and that he had changed his mind about congressional elections. For their part, the political parties—which Pinochet frequently denigrates as factions useful only to ambitious, self-serving politicians—had played into his hands by appearing more interested in doctrinal and tactical disputes than in pushing him from power.

While the opposition failed to close ranks, Pinochet maintained strict command over his real base of power, the armed forces. He relied on their loyalty to censor the media, to arrest opposition leaders, and to repress demonstrations—all in an attempt to keep the semblance of order. Air force officers, including General Leigh, who had been dismissed from the junta in 1978, and General Fernando Matthei, who succeeded him, had occasionally registered dissonant notes by suggesting the need for a political opening. But the army—by far the most powerful of the armed forces—appears to have maintained unity in support of Pinochet's hard line. Schooled in the Prussian tradition, the Chilean Army is accustomed to showing complete obedience to its commanders. Besides, all of the senior officers had been promoted to their posts by Pinochet. Their loyalty could only have been stiffened by neighboring Argentina's return to democracy in 1983, and the subsequent imprisonment and trials there of high-ranking officers for human rights abuses. Short of any direct threat to the integrity and survival of the army itself, the officer corps were very unlikely to abandon Pinochet.

Once Pinochet had regained the upper hand against the opposition, he quickly reasserted his dictatorial control in the name of "restoring order." In November 1984, Pinochet abandoned any remaining pretense of flexibility, and declared a 90-day state of siege. Citing increased terrorist attacks by leftist groups, some of which were actually staged by the armed forces, he began a harsher, more systematic crackdown against his opponents. Characteristically, he struck first at the Communists and their working-class strongholds, but he also targeted Christian Democrats and other moderates whom he views as stalking horses for the left.

During the ensuing seven months, Pinochet twice extended the state of siege and used his repressive authority to impose a strict curfew, close six opposition magazines, censor reporting on political or terrorist activities, and prohibit political meetings and demonstrations. The armed forces conducted predawn security sweeps through low-income settlements, detained some 40,000 young men suspected of "antisocial" behavior, and banished 600 political organizers to remote parts of the country. Besides such "lawful" repression, the state of siege signaled the resurgence of rightwing terrorist activity, linked to the armed forces, on a scale unequaled since the years immediately following the coup. By such repressive measures, Pinochet managed to derail the opposition's plans for a national strike and to intimidate and demoralize the democratic parties. He also further polarized Chilean society and gave credence to the extreme left's insistence that only violence could remove him from power.

"EVENHANDED" POLICY

The declaration of the state of siege catapulted Chile into problem status for the Reagan administration and provoked an interagency policy reassessment. For some members of the administration, Pinochet's repressive measures had begun to conjure up images of the Somoza regime in the late 1970s. They feared the possibility of "another Nicaragua"—an escalating struggle between leftist revolutionaries and a pro-U.S. but isolated dictator, with each side reinforcing the other's intransigence. Other participants in the administration's reassessment confirmed their support for Pinochet's obdurate anticommunism. They stressed the divisions within the opposition, the unity of the army, Pinochet's ability to maintain order, and the general uncertainty about who might succeed him. Three courses seemed open: to stand by Pinochet through thick and thin, to break openly with him in favor of the democratic opposition, or to edge toward a more "evenhanded" policy between him and the opposition.

Any searching reassessment would have had to conclude that the United States had received precious little in return for its friendship toward Pinochet. At the beginning of Reagan's first term, the White House had appointed James Theberge, an early public supporter of the coup, as U.S. ambassador, and dispatched several special envoys, including Vernon Walters and Jeane Kirkpatrick, to call on Pinochet. It also announced the renewal of Chilean participation in the UNITAS joint naval exercises and the resumption of U.S. support for loans to Chile from the multilateral banks.

What did these gestures achieve? Within 48 hours of Kirkpatrick's visit, the president of the respected Chilean Human Rights Commission, with whom Kirkpatrick had refused to meet, was forced into exile. Publicly, the administration responded with silence. When protests spread during 1983 and 1984, Theberge backed Jarpa and the move toward a democratic transition that Jarpa was supposed to represent—only to discover, belatedly, that Pinochet had no intention of relinquishing any power. Instead of the political opening that Washington had meekly encouraged, Pinochet declared the state of siege—on the very day that U.S. citizens were voting in the presidential election. If in 1983 and 1984 the administration had taken a more forthright stance, publicly backing the goals of the protest movement and pushing Pinochet to reduce his repression, it might have furthered the cause of political liberalization, or at a minimum deterred Pinochet from calling the state of siege. Instead, by befriending him, trying to nudge him toward an opening but taking care not to offend him, the administration sent mixed signals, which Pinochet used to his own advantage.

Despite the ineffectiveness of its previous approach, the administration's review of relations with Chile produced little real change in U.S. policy. That policy contained four principal elements: to advocate acceptance of the 1980 constitution, including its stipulation that Pinochet remain in power through 1989, as the framework for a "transition to democracy"; to encourage dialogue between the government and the conservative-to-centrist political parties, within that framework; to cut off the left from the democratic opposition, discrediting the Communists in particular as confirmed terrorists; and to press for reforms—termination of the state of siege, preparation of an

electoral register, and legalization of non-Marxist political parties—that would ready Chile for a gradual and peaceful political opening.

What did emerge from the administration's reassessment was a subtle shift from easy friendship with Pinochet to uneasy friendship. Although unwilling to risk an open break with him, the administration was no longer comfortable with being viewed as giving him unqualified support. It now knew that the credibility of its calls for democracy depended on putting more distance between itself and Pinochet. Yet—especially in view of Pinochet's worsening repression—major aspects of U.S. policy continued to reinforce the legitimacy of Pinochet's rule, to divide the opposition, and to justify both the violence of and the repression against the left.

This ambivalence has resulted in ineffective policy. U.S. actions have usually been too little, too late, and Pinochet has successfully maneuvered around them, as illustrated by his handling of the state of siege. After Pinochet's initial imposition of the state of siege, the administration issued a series of bland public statements, regretting the escalation of violence and the abridgement of human rights and calling for dialogue between the government and the democratic opposition. The White House also canceled a visit to Chile by General John A. Wickham, Jr., the U.S. army chief of staff, and disclosed Reagan's intention to replace Ambassador Theberge with Harry G. Barnes, Jr., a career diplomat then serving as ambassador to India. The impact of this last move—potentially the most important—was dissipated, at first by the efforts of conservatives to sidetrack the nomination and then by their success in delaying it. This past February, unimpressed by the U.S. pressures, Pinochet not ony extended the state of siege for a second 90-day period but also fired Jarpa as minister of the interior, thus completely closing the door on dialogue with the opposition.

The administration responded by instructing its directors as the multilateral banks to abstain from votes on loans to Chile. In none of these cases, however, did the United States actively lobby against the Chilean requests, which were approved without difficulty. The administration also sent Assistant Secretary of State A. Langhorne Motley and Deputy Assistant Secretary of Defense Nestor Sanchez on missions to Chile, but the effectiveness of their visits was questionable. What these two officials told Pinochet is still not a matter of record, but Motley's public statements seemed designed to assuage Pinochet and his most conservative U.S. supporters. Motley declared that Western democracies owed a "debt of gratitude" to Chile for carrying out the 1973 coup, downplayed the first of the U.S. abstentions on Chilean loans as a sop to congressional critics of administration policy, and assured the world that Chile's destiny was "in good hands."

In May, Pinochet extended the state of siege for yet a third 90-day period. In the words of one State Department official, this provoked the administration "to lower the boom" on the dictator. At that time, Chile had nearly completed critical negotiations with the United States, the multilateral lending institutions, and the commercial banks for a $1.4-billion package of loans to keep the Chilean economy afloat. Approval depended heavily on active U.S. support for three controversial requests to the World Bank—a $50-million loan for an energy development project, a $145-million loan for a highway construction program, and $150-million guarantee of commercial bank loans. By threatening to withhold its backing, the administration finally persuaded Pinochet to lift the state of siege in mid-June. A few days later, however, without taking time to ascertain whether the end of the state of siege meant a real reduction in repression, the administration backed World Bank approval of the Chilean requests—once again displaying the ambivalence that underlies its policy.

Although most opposition leaders in Chile welcomed the lifting of the state of siege, they were not long in realizing that, except for the return of the six previously proscribed magazines and the relaxation of the curfew, it did not mean much in practice. By declaring the continuation of a state of emergency and issuing several supplementary decrees, Pinochet effectively retained most of his repressive powers. Many Chileans wondered aloud not at the success of U.S. pressures but at how little they had actually achieved. The question was whether Pinochet had outmaneuvered the administration, whether the administration had mainly been trying to impress Congress, or whether the administration had indulged in wishful thinking. Each of those interpretations undoubtedly bears some truth.

The lifting of the state of siege—almost as much as its imposition—showed that the Reagan administration's much-vaunted "quiet diplomacy" was only half working in Chile. It had succeeded in reassuring Pinochet about the U.S. need for his friendship, but had not resulted in any significant improvement in human rights or in any movement toward a political opening. From the Chilean perspective, the shift in U.S. policy during the state of siege was scarcely noticeable. Pinochet is not a subtle man. He remained confidential that when push came to shove the Reagan administration would back his militant anticommunism. And although leaders of the democratic opposition might have detected the change from active support of Pinochet to a more ambiguous position, they were disappointed by Washington's indecisiveness. Shortly after the lifting of the state of siege, officials of the centrist parties were still asking when—and whether—the United States would come around to supporting democracy in Chile. In light of Pinochet's near monopoly over the use of force and his determination to remain in power, U.S. "evenhandedness" between the regime and the democratic opposition still looks like backing for Pinochet.

The inconsistencies in U.S. statements and actions concerning democracy in Latin America are not lost on Chileans. Many of them compare Washington's policies toward Chile today with its policies toward Chile during the Allende period and toward Nicaragua under the Sandinistas. Nixon set out to make the economy under Allende "scream" and Reagan wants to make the Sandinistas cry "uncle"—yet at the same time his administration has stressed its determination not to "muscle" into the internal affairs of Pinochet's Chile. The White House has declared unswerving support for the "restoration of democracy" in Nicaragua, a country without democratic tradition—and has made references to the "pendulum swings" between democracy and dictatorship in Chile, which governed itself democratically for more than four decades prior to 1973. Kissinger insisted on rescuing Chileans from their "own irresponsibility" (the choice they freely expressed at the polls in 1970)—while the current administration insists that Chile is in good hands today. Except on the left, Chileans have not reacted to these glaring examples of U.S. double standards with rabid anti-Americanism. But moderate Chileans do convey a deepening cynicism about the United States and about the moral basis of its claim to leadership of the "free world."

HARD LESSONS

The leaders of the democratic opposition have learned some hard lessons in the school of Pinochet's repression—lessons that make them question not just the effectiveness but also the sincerity of U.S. policy toward Chile.

First, the twelve years of Pinochets' dictatorship have made it clear that Pinochet will not negotiate a transition to democracy of his own accord. Under the pretext of fighting lefist terrorism and "protecting" democracy, he has persistently sought to dismantle and silence the entire opposition. He is implacably opposed both to the left and to democracy as such. He did not push through the 1980 constitution to pave the way for a return to democracy; rather, he was trying to legitimize the continuation of his repressive rule. When confronted with the 1983 protest movement, Pinochet designated Jarpa to negotiate a political opening with the opposition. Once he regained the upper hand, Pinochet turned his back on Jarpa, renounced dialogue, and slapped the state of siege on the country. Under U.S. pressure he finally lifted the state of siege, but then took advantage of Washington's indecisiveness by reimposing the state of emergency. The major obstacle to a democratic transition is not the constitution of 1980, deficient though it may be. The major obstacle is Pinochet himself.

Second, in order to overcome this obstacle, the opposition—now the overwhelming majority of Chileans—must forge a unified front. Throughout much of 1983 and 1984, the opposition seemed to be gathering strength. But rivalries and doctrinal disputes between political party chieftains slowed this momentum, and today opposition groups are still divided on important issues. For example, the parties of the left and center vehemently reject the 1980 constitution as a framework for a political transition. In contrast, the conservatives, though they question the constitution's legitimacy, accept it as a starting point for negotiation. The left, having suffered the most from Pinochet's repression, believes that political change will have to be forced by confrontation, whereas the conservative and centrist parties advocate peaceful resistance, refusing to ally themselves with groups committed to violence. Underlying these issues, of course, are basic conflicts of attitude toward the Pinochet legacy and the Communist party. To overcome these differences, the opposition must painstakingly construct a broad civic front, composed not only of political parties but also of the Catholic Church and organizations of workers, women, students, professionals, merchants, and farmers. In late August, with the blessing of Archbishop Juan Francisco Fresno Larrain, leaders from 11 conservative to left-of-center parties advance toward that goal in signing a "National Accord for the Transition to Full Democracy." Partisan dissension must be set aside if Chilean democracy is to be restored.

Third, in order to form the broadest possible democratic movement, the opposition must resolve the question of the Communist

party's current and future role—a question that is complicated by the party's present endorsement of "all means," including violence, to combat the dictatorship. In a letter to the central committee of the Communist party last April, Christian Democratic President Gabriel Valdes made it clear that his party would not ally itself with the Communists as long as they continue to espouse violent tactics. The Communists' response justified the use of arms primarily as a way for workers to defend themselves against the regime, but it also acknowedged that reaching an "accord among all democratic forces is fundamental." Despite Pinochet's commitment "to extirpating the Marxist cancer" from Chile, the Communist Party still has deep roots in the country and probably continues to command the loyalty of about 15 percent of the population. In light of the Communists' long adherence to the rules of Chilean politics before the 1973 coup, it is widely assumed—even by conservatives—that they will eventually participate in a restored democracy. But if they want to close ranks with the rest of the opposition, they must forswear violence. In exchange, the centrists and conservatives should recognized that Pinochet must be confronted by mass mobilization.

Fourth, the cause around which Chileans are most likely to mobilize is the holding of fair and open elections, as propounded in the National Accord of last August. Despite persistent ideological differences, Chileans across the political spectrum are now disposed toward compromise and pragmatism on questions of how to organize the economy. The left recognizes the importance of spurring private investment and guaranteeing private property, and the right understands the need to regulate personal wealth and to offer all Chileans a decent livelihood. And unlike Nicaragua or El Salvador, Chile has a long history of deciding its most important questions by democratic elections. Even with the state of siege, the principal labor, student, and professional organizations all held internal elections over the past year, and in almost every case opposition groups joined forces to elect their candidates, usually moderate Christian Democrats. Without question, in a genuine plebiscite on whether to continue the dictatorship or restore democracy, Pinochet would lose. So he rejects free elections in order to ensure his political survival. The more blatantly he is forced to circumvent elections, the weaker will be the perceived legitimacy of his rule.

Finally, once the military sees that the regime is isolated and that the Chilean people seek reconciliation, not retribution, the officer crops may begin to question their loyalty to Pinochet. The National Accord makes clear that the demands for justice during a democractic transition must be in keeping with "the spirit of national reconciliation." Within that spirit, it eschews special tribunals for human rights violations, relying instead on the existing court system. If the question of vengeance is put to rest, then the opposition may be able to convince the military—by unity, by mass mobilization, and by nonviolent resistance—that a political opening is preferable to endless repression. A year ago, just before Pinochet declared the state of siege, Air Force Commander Matthei warned that if a transition to democracy did not begin soon, "we will end up destroying the armed forces more efficiently than any Marxist infiltration can." There have been suggestions of breaches in the traditional unity of the armed forces. In August, General Cesar Mendoza, long regarded as a close ally of Pinochet, was forced to resign as chief of the National Police and member of the junta after policemen were implicated in death squad activities. It was widely speculated that this purge of Mendoza and other police officers resulted from rivalry between intelligence agencies. Matthei's warning may yet prove to have been prescient.

A NEW U.S. POLICY

These lessons, which Chile's opposition has had no choice but to learn, should also be studied by Washington. For they suggest that if the United States is serious about promoting democracy in Chile, it has to change its approach. To begin with, U.S. policymakers must recognize both Pinochet's intransigence and the interest of the United States in distancing itself from him. The administration should not be overly impressed by Pinochet's ability to impose order by force, but should steadfastly commit itself to democracy as the best guarantor of political stability in Chile.

Because the fashioning of a democratic transition is first and foremost a Chilean responsibility, the U.S. role should remain limited. Nevertheless, what the United States does and says matters in Chile—as throughout Latin America. The administration can demonstrate its commitment in a variety of ways; speaking out in favor of democracy, denouncing human rights violations, backtracking on its support for the 1980 constitution, and advocating free and fair elections at an early date. In doing so, the White House would send clear signals to both Pinochet and the opposition—that it was no longer willing to appear complicit in Pinochet's repression and that it was confident in the capacity of Chileans to decide their future for themselves. The United States does not have the power to persuade Pinochet to withdraw from the presidency, but it could pressure him to reduce his repression, which would create opportunity for Chileans to express their opposition and organize themselves for a democratic transition.

Although disappointing in important respects, the U.S. role in the lifting of the state of seige gives a hint of what Washington could do with the requisite commitment. Contrary to the administration's disclaimers, the United States has not lacked leverage in Chile; it has lacked the determination to use it. To exercise this influence, Washington need not threaten special economic sanctions. It must simply implement current U.S. law that requires U.S. opposition to multilateral loans for countries that grossly violate human rights, and it must refuse to go the extra measure on Chile's behalf, as it did in June when it mobilized for Chile in the World Bank.

With the highest foreign debt per capita in South America and with its export earnings down as a result of depressed world prices for copper, Chile is in deep economic trouble that will last into the 1990s. Despite the continued orderliness of its accounts, Chile should, by most objective standards, be considered uncreditworthy. As long as it obtains active U.S. backing, it will probably keep its commercial creditors in tow. But its entire package of international credit—multilateral and commercial—could quickly unravel if Washington became uncooperative. Pinochet has made improvement in the economy a high priority for consolidating his rule. He knows that even his most conservative support might crumble if his repression became a net liability to the economy.

In addition to economic pressures, the United States should use its relations with the Chilean military, the last bastion of Pinochet's power, to convey its advocacy for the return to democracy. For example, it should suspend Chilean participation in the annual UNITAS joint maneuvers—a collaborative activity that Pinochet regards as a symbol of U.S. political support. The administration should also stop making soundings in Congress about renewing military assistance to Chile. The rationale that this would furnish the United States with leverage over Pinochet seems disingenuous. If the real goal is to increase leverage over Pinochet, the U.S.-Chilean economic relationship should be used.

In moving away from Pinochet, Washington should become more accessible to the democratic opposition. The administration has indeed made some progress since its first months in office, when Ambassador Theberge invited only the most conservative, pro-Pinochet political figures to his residence. This past July, the assistant secretary of state for inter-American affairs, Motley, was replaced by Elliot Abrams. In his previous post as head of the Human Rights Bureau, Abrams had been more accessible to the Chilean opposition than any other senior official in the State Department. Neither Secretary Shultz nor National Securities Advisor Robert McFarlane, however, has met with opposition leaders. In May, Reagan denounced Chile as one of four dictatorships—along with Paraguay, Cuba, and Nicaragua—in Latin America. If he takes that position, then to be consistent he should invite the leaders of the 11 opposition parties who signed the National Accords to meet with him at the White House, just as he invited the leaders of the Unified Nicarguan Opposition last April.

Although the United States should forthrightly support the return to democracy and demonstrate its confidence in the democratic opposition, it must not try to engineer the terms of the transition. Specifically, the administration should not interfere in the democratic opposition's relations with the Communists and other leftist elements, as Motley did when he told the Chilean press: "A front or an alliance that includes Communists or Marxists, by definition, is prodemocratic." Including the Communist party within Chilean political system poses some risks, but most Chileans believe that the risks of excluding it are greater. Washington should respect the democratic opposition's efforts to persuade the Communists to renounce their support for armed struggle and to adopt a non-violent stance. By its current policy of adamantly opposing a role for the Communists in any political transition in Chile, the Reagan administration increases the rigidity of both Pinochet and the Communist party. It also impedes the unity among opposition groups that is cruicial to restoring democracy.

The Reagan administration may not be ready to put its full weight behind the return to democracy in Chile. In this case, Congress must make a bipartisan effort to strengthen the administration's resolve and to convey U.S. support for the democratic opposition. Last spring, a resolution of such support was narrowly defeated in the House of Representatives—and the deciding factors was not so much disagreement over Chile as Republican disgruntlement over the seating of an Indian Democrat whose election was in dispute. Since then, the

Western Hemisphere Subcommitee of the House Foreign Affairs Committee has held hearings on Chile at which even Congressman Henry Hyde, an outspoken conservative, declared that Pinochet had outlived his usefulness: "He has held power much too long, and the country is ready, has been ready for a long time for a democratic election." The subcommittee, though bitterly divided on Central American issues, is near a consensus on Chile. This should be crystallized in a congressional resolution calling for early elections and, in the interim, the suspension of joint naval exercises and of U.S. economic backing for Chile.

In addition, the United States should work in concert with its democratic friends in South America and its allies in Western Europe to curb human rights abuses and advance a political opening in Chile. Unlike most of its NATO allies, the United States has opposed the naming of a special human rights reporter on Chile at the United Nations, and it has voted against U.N. condemnation of Chilean abuses. The United States should back the efforts of both the United Nations and the Organization of American States to improve human rights in Chile. Washington should also coordinate its embassy in Santiago with those of its friends and allies, so that there is joint participation in such symbolic activities as the celebration of the tenth anniversary of the Catholic Church's human rights office—an event from which the U.S. Ambassador was noticeably absent last year.

Quasi-governmental and government-funded private organizations can help as well. For example, the Inter-American Foundation, an independent government agency, has a strong record of promoting democratic values and grass-roots organizations in Chile. Last year, instead of criticizing the foundation for not supporting groups close to the regime. Ambassador Theberge should have treated its program as an expression of the commitment to pluralism and democracy shared by the United States and the Chilean people. The private but government-funded National Endowment for Democracy recently made a boldly symbolic grant to La Prensa in Nicaragua, but in Chile its activity has been timid; it has bypassed opportunities to back human rights groups and democratic political organizations. Similarly, the government-funded AIFLD, the regional institute of the AFL-CIO, should stop dividing the labor movement, as it has been doing, and should try to strengthen the capacity of all workers to secure their rights.

In short, the United States should stop sending mixed signals to Chile. The Reagan administration must make it unmistakably clear to Pinochet and to all Chileans that peaceful political activities—across the political spectrum—should be legalized, that an early date for democratic elections should be fixed, and that the civil liberties essential to democratic participation should be respected. For now, Chileans have expressed their opposition to military rule with remarkable moderation and restraint. But the longer Pinochet remains in power, the greater will be the suffering of the Chilean people. Pinochet's intransigence only wears down the reasonableness of the moderate opposition and strengthens the appeal of the militant left, increasing the likelihood of political polarization and massive civil strife.

Earlier this year, in congressional testimony on Central America, Secretary of State Shultz admonished, "If we abandon those seeking democracy, the extremists will gain and the forces of moderation and decency will be victims." His warning would more aptly apply to Chile, with its large internal opposition committed to restoring civil, democratic government. The moderate opposition there does not ask that the United States organize a rebel force on the slopes of the Andes, mine the harbors of Valparaiso, or engage in military maneuvers in neighboring Argentina. They do not want, or expect, the United States to overthrow Pinochet. What they seek is strong, consistent, and public U.S. support for ending repression and reviving political freedom.

If there is to be a democratic transition, Chileans themselves will make it. They may need years to succeed. But our being soft on Pinochet now is both morally indefensible and politically short-sighted. It alienates the great majority of Chileans from the United States and pits us against Chile's future democratic leaders. It also puts us on the side of a regime that will ultimately be viewed as an aberrant chapter in Chile's history. Finally, it cheapens U.S. support for democracy in Central America. Support for democracy, like opposition to dictatorship, is vitiated by double standards.

Mr. HARKIN. Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. DOLE. I am just sort of killing time here. We do not seem to be getting anywhere.

COMMENDING MICHAEL STERN

Mr. LONG. Mr. President, this is the last day of the Senate session on which Michael Stern will be an employee of the Senate. Mike Stern has served as a member of the Senate Finance Committee staff for a period of 17 years. He came with us in 1968 and has served continuously since that time.

In 1973, when the late Tom Vail passed away, it was my privilege to promote Mike Stern to be the staff director, at a time when I was the chairman of the Senate Finance Committee. As fortunes changed and the Republican minority became a majority, he became the minority staff director.

During much of the time while he was the staff director, we did not have a minority and majority staff. I would, as chairman, for example, consult with the ranking Republican and the senior Republicans generally, and we would employ our staff to work for the Democrats and Republicans as well, trying to provide both sides with the best information that was available. That is no longer the practice.

But Mike Stern is a veteran of that old system on the Senate Finance Committee where the staff, and particularly the chief of staff, had an equal responsibility to be helpful to both Republicans and Democrats. Mike Stern was admired and respected and beloved by those on both sides of the aisle in that capacity.

He will be leaving us to move into the lush fields of free enterprise at the end of this session. He will find it, from a financial point of view, far more rewarding than it is as a staff member of the U.S. Senate. But I know he will miss us, as we will miss him, because I for one, and I am sure many other Senators, have relied upon Mike and have complete confidence in him.

I have never known Mike Stern to have misrepresented the facts. Every time you asked for any information, you could depend upon an honest, sincere presentation of the information as he knew it. He carried in his head a tremendous wealth of information, particularly in the area of Social Security, unemployment insurance, and social welfare, that would come under the jurisdiction of the Finance Committee. You could ask Mike about almost anything along that line and he could tell you immediately off the top of his head what the answer was.

If he did not have it in his head, somewhat like a human computer, he would have a little chart in his pocket that would have the information. He could tell you how much money was raised and spent for each program in the social welfare area during the last 10 or 20 years, and how much we both raised and spent for all these different things.

Oftentimes, he would carry with him a briefcase. And if we were managing a bill that had to do with something not in his line of complete expertise, where one would need to be a tax lawyer, for example, he had pretty well mastered all of that as well. So we would ask him about something that was not involved at all or relevant to the bill pending before us but, because it may happen to occur to us that we would like to have that information, he would reach down in his briefcase and come up with almost any information one might desire. He seemed to keep all that information at his fingertips or in his briefcase, if not in his head or pocket, available to all Senators.

Mike Stern has one of the best organized minds of any person that I have ever been privileged to know. We will very definitely miss him in the U.S. Senate. At the same time, it is good to know that he will still be in Washington and he will still be available to us from time to time if we wish to call him and have his thoughtful suggestions as to answers to some of our problems.

Mr. President, I send to the desk a resolution which commends Mike Stern for his faithful service to the U.S. Senate and to the Nation and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A resolution (S. Res. 285) commending Michael Stern for his faithful and outstanding

service to the United States Senate and the Nation.

Mr. LONG. Mr. President, I ask unanimous consent that that resolution remain at the desk and that any Senator who wishes to do so may add his name to it.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the distinguished chairman of the Finance Committee, Senator PACKWOOD, be added as a cosponsor, along with the majority leader, if that is satisfactory.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, having worked with Mike Stern for a number of years on the Finance Committee, I certainly share the views expressed by the distinguished Senator from Louisiana. Mike is a friend. He is a man of total integrity. He has been very helpful to all of us on the Finance Committee over the years. Regardless of party, the information was always the same—straight. And we appreciate it. The Finance Committee has a reputation for working well in a bipartisan fashion. Much of the credit for this must go to professional staff members like Mike Stern who always seem to be able to gather the information and present the options necessary for us to make judgments on the merits. Mike is a modest man. I cannot recall seeing him quoted much in the papers and magazines. But no one should underestimate how much he added to the efficient operation of the Finance Committee. He has been a great help and he will be missed.

I wish him well as he goes into the private sector. I have kidded him. I said, "I hope you make enough money that you can contribute to my campaign."

But the joking does not mean I have not valued his counsel. He is an outstanding public servant. I know he will do equally as well in the private sector.

Mr. DANFORTH. Mr. President, I ask unanimous consent that I be added as a cosponsor of this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, I want to join in the comments of Senator LONG and Senator DOLE with respect to Mike Stern. By Mike Stern's standards and certainly by the standards of the Senator from Louisiana, I am a new kid on the block of the Finance Committee. I have only been on the committee a mere 9 years. But during that 9 years, I have found Mike Stern to be one of the most capable and decent public servants I have known.

During the time I have been on the committee, he was the chief counsel first of the committee staff and then he was the chief Democratic counsel, which he is today. So his role was not really bipartisan since I have been on the committee. He was really representing Senator LONG and the Democrats. However, he was always most helpful and most cooperative with all members of the Finance Committee, particularly in my younger years when I was doing crazy things like trying to tax State royalties, things I should have known better, until I was taught a lesson by the Senator from Louisiana.

Mike Stern was always very decent and very fair in all of my dealings with him and with the committee. So I am pleased to join in this resolution and wish Mike well in his future years.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 285) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 285

Whereas Michael Stern has faithfully served the Senate of the United States as Staff Director and as Minority Staff Director of the Committee on Finance, and the Senate wishes to express its appreciation for his seventeen years of dedicated service to the Senate and to the Nation;

Whereas Michael Stern has discharged the important duties and responsibilities of his position with great distinction;

Whereas Michael Stern has helped guide the Committee on Finance through an extraordinarily active and challenging period of its history;

Whereas the loyalty, judgment, exceptional service, and continuing dedication of Michael Stern have earned for him respect, gratitude, and affection: Now, therefore, be it

Resolved, That the Senate of the United States commends Michael Stern for his faithful and outstanding service to the Senate and the Nation.

SEC. 2. The Secretary of the Senate shall transmit a copy of the resolution to Michael Stern.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MICHAEL STERN

Mr. PACKWOOD. Mr. President, the Senate is soon to lose one of its most valuable employees, Mike Stern, who is to leave the Finance Committee to go off into private enterprise.

I have known Mike since I went on the Finance Committee in January of 1973. As the most junior Republican member on the minority side, Mike would go out of his way to take time to come to my office to teach me about the goings on of the committee, to inform me about taxation, and to teach me about Medicare.

When he was then serving as the principal aid to the chairman, RUSSELL LONG, he could still find time to talk to the most junior Republican, and give him hours and hours of time. I have not met in my career a half a dozen, if that, people of his equal who worked for the Senate. I have not met any that are his superior.

I do not grieve his leaving because I understand why he is going, and after 17 years he is entitled to a respite that gives him a few opportunities to know at 9 o'clock in the morning what time he is going home at night, and a chance to share weekends with family that can be planned a week or two ahead of time.

I shall continue to count him as a close friend, and trusted adviser. I hope he will allow me without any limitation to continue to call upon him, and seek his counsel. There is no better in this town.

Mr. ARMSTRONG. Mr. President, I just want to rise to endorse what has been said by the chairman of the Finance Committee, Mr. PACKWOOD, and by the distinguished Democratic leader of the Finance Committee, Mr. LONG, about our friend and associate, Mike Stern.

I had exactly the same experience as Mr. PACKWOOD described coming on the committee as a junior Member during the time the Democrats were in the majority, and Mr. LONG was the chairman. And the way in which Mike Stern helped me as I know he has other generations of new Members on both sides of the aisle is really an example of the highest traditions of public service.

We serve on that committee as Republicans and Democrats, but I have observed over and over again under both Democratic and Republican leadership that when the chips are down the fundamental qualities of integrity and dedication to good policy, even though we may not always agree what that constitutes, run deep and strong. And one of the people who has kept those ideas alive for a long, long time in the staff and among the members of that committee is Mike Stern.

So I want to join in complimenting and congratulating Mike, and needless to say, wishing him much success as he enters the private sector.

FAREWELL TO MIKE STERN

Mr. BRADLEY. Mr. President, Mike Stern's departure is a genuine loss to the Senate and to the Finance Committee. Mike has served the committee for 17 years. He has been our institutional memory, our conscience, and our counsel all these years and we will truly miss him. His capacity for hard work, his unstinting devotion to the committee, his calm confidence under enormous pressure, and his loyalty

have made a lasting impression on all of us.

I am particularly appreciative for Mike's thoughtfulness to me and to my staff when I first arrived in the Senate and to this day. He has always been available to answer questions, explain procedure, give background information, and help me to better serve my constituents. In these respects, Mike is an excellent reflection of the standards of the former chairman and ranking minority member of the Finance Committee, Senator LONG.

I am sure that those same qualities will serve him well in his new profession and I join my colleagues in wishing him every success.

Mr. CRANSTON. Mr. President, I want to take this opportunity to pay special tribute to a member of the Senate staff who is leaving after over 17 years of service in this body. Michael Stern has worked for the Senate since 1968. He has served as a longtime assistant to Senator LONG; in that capacity he has served as the staff director of the Senate Finance Committee from 1973 through 1980, and since 1981 as its minority staff director.

Michael has been an invaluable resource to Members on both sides of the aisle on the Finance Committee and in the Senate at large. His breadth of knowledge, his wise counsel, and his patience in helping carry out the will of the Senate are well-known to many, if not all, Senators.

Michael has on many, many occasions assisted me and my staff in working out complicated problems within the jurisdiction of the Finance Committee. He has always been a true professional in every sense of the word, always willing to help in an objective and thorough way and lend his considerable expertise to the tasks that needed to be performed.

Michael has left his mark upon countless measures acted on by this body, but I recall perhaps most vividly his dedication and commitment to helping gain passage of the 1980 Adoption Assistance and Child Welfare Act—legislation designed to improve the lot of America's forgotten foster children. This legislation was of special interest to me and I recall that—in sharp contrast to the interest displayed as to many other issues before the Finance Committee—there were only a handful of outside groups lobbying for its passage. Nevertheless, Michael put in countless hours and boundless energy helping make sure that his landmark legislation became law.

Michael Stern has served the Senate and the Nation extraordinarily well. My staff and I will miss him deeply. I know that his exceptional legislative and analytical skills, his vast experience and knowledge in the extremely diverse subjects under the Finance Committee's jurisdiction, his keen and insightful mind, and his deep sense of public commitment and public trust will be missed by all who have worked with him.

We wish him all possible success in his new endeavors and have no doubt he will achieve the same success in the private sector that he has achieved in his long career in public service.

Mr. MOYNIHAN. Mr. President, Michael Stern is leaving the U.S. Senate today. May I say—without exaggeration, without hyperbole, as simple description—that it is hard to imagine the Senate Finance Committee, and in consequence the U.S. Senate, going on without him.

Or at least, not as well as it has for the past 17 years—which is to say, for 8 years before this Senator joined this body—while Mike has been here.

According to the fortunes of our great political parties, Mike has served as the committee's majority staff director, and as the minority staff director. Whatever the fortunes of our parties, it was our good fortune to have Mike near our side. He is the chief aide and help to RUSSELL LONG, a giant as well in this body; but he has been much the same to me and I daresay to every member of the Finance Committee.

He brought order; he brought calm; he brought the civility of his own personal integrity to a committee of 20 and a Congress of 100 beset oftimes by crass and grasping pressures on every side in the deliberation of the tax law. To paraphrase another, he was among those blessed and those able to confer blessings.

I will miss him, and so will many others.

HONORING MICHAEL STERN ON HIS LEAVING THE SENATE FINANCE COMMITTEE, U.S. SENATE

Mr. MATSUNAGA. Mr. President, it has been said by wiser men than I, that an ideal Government worker is one who never forgets that he is a public servant, hired to serve the public. Mike Stern has measured up to that standard in all the 9 years that I have served on the Finance Committee and during which time I have known him as staff director and in recent years as chief minority counsel. His proficiency in the performance of his duties and carrying out the responsibilities of his positions have been of the highest order.

Mike will be leaving Government service for more lucrative ventures in the private sector, as announced by the senior Senator from Louisiana [Mr. LONG]. Members of the Finance Committee, and I especially, will miss Mike, for he has been not only a valuable advisor and teacher to me in matters of taxes and finances, but also a dear friend.

I join my colleagues in wishing Mike the best that he deserves in his private ventures, in the hope that our friendship will continue unchanged.

UNANIMOUS CONSENT AGREEMENT—CONFERENCE REPORT ON BUDGET RECONCILIATION

Mr. DOLE. Mr. President, I believe I am now prepared to make a unanimous consent request on the conference report on the budget reconciliation. It has been cleared with the distinguished minority leader, with one good suggestion.

Provided the Senate acts first, I ask unanimous consent that the conference report to accompany H.R. 3128, the budget reconciliation, be considered under the following time agreement: 30 minutes on the conference report, to be equally divided between the Senator from Colorado, Mr. ARMSTRONG, and the Senator from Louisiana, Mr. JOHNSTON, or their designees.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. Mr. President, that has been cleared on this side of the aisle. I also indicated earlier that I had a request from a Senator for a rollcall vote on this matter so that Senators might want to stick around.

Mr. DOLE. I have indicated there would be that vote and maybe a vote on a nomination.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go into executive session in order to consider the nomination of Terrence M. Scanlon, to be Chairman of the Consumer Product Safety Commission.

The PRESIDING OFFICER. Without objection, it is so ordered.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nomination will be stated.

CONSUMER PRODUCT SAFETY COMMISSION

The bill clerk read the nomination of Terrence M. Scanlon, of the District of Columbia, to be Chairman of the Consumer Product Safety Commission.

Mr. SIMON. Mr. President, I rise in opposition to this nomination.

I regret taking the time of the Senate at this point in the session. But frankly, this is a nomination that does not bring credit to the administration, nor to the country. I have never met Mr. Scanlon. All I know is he is the wrong person for this kind of a job. It may very well be if he were up for some other spot, I would be standing here supporting him. I have no personal knowledge that questions his integrity. What I do know is that frankly he is to be Chairman of the Con-

sumer Product Safety Commission, and has evidenced an interest in protecting the consumers of this country.

It would be a little bit like—I see my good friend from Colorado here, Senator ARMSTRONG—naming Senator ARMSTRONG as chairman of the Democratic National Committee. He is a fine man. But he should not be chairman of the Democratic National Committee.

Mr. Scanlon has made amply clear he has absolutely no business being Chairman of the Consumer Product Safety Commission.

I note that he was approved by the committee barely. Two members of that side of the aisle voted against approving him in the committee.

My own experience is with the permanent amusement rides where we had some debate on this floor.

I see the chairman of the committee, with whom I debated that point, the Senator from Missouri, Senator DANFORTH, for whom I have great respect. But what happened in 1981 in that huge reconciliation bill was a little line put in there stating that the Federal Government would no longer inspect permanent amusement rides. Since that time fatalities and injuries in permanent amusement rides have gone up.

That I do not blame on Mr. Scanlon. But what did happen after that piece of legislation passed was the Chairman of the Consumer Product Safety Commission, Nancy Steorts, a Reagan appointee, said we ought to be having inspections, we ought to be providing safe rides, and a member of the Commission, Mr. Scanlon, said no. That is not the business of the Federal Government. That is not the business of the Consumer Product Safety Commission.

My friends, what is the business of the Consumer Product Safety Commission? The former Chairman of that Commission, Nancy Steorts, was right. The purpose of that Commission is to protect the consumers, not the manufacturers, not the people who provide the amusement rides, and the people in all the other functions. I think fundamentally we have to ask do we want to Consumer Product Safety Commission? Do we want to protect the public? Do we want to protect the public? If the answer is in the affirmative, then we ought to get someone who is interested in protecting the public, and this gentleman clearly is not. And it is not simply the amusement ride industry where he has been on the wrong side. The Washington Post had a story November 27, 1985, just a few days ago, saying that the Consumer Product Safety Commission does not want to do the job that it ought to be doing for toys.

I ask unanimous consent to insert this article in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 27, 1985]

NEW TOYS RELATIVELY SAFE, AGAIN

(By Leah Y. Latimer)

The chairman of the Consumer Product Safety Commission had no sooner said yesterday that this year's batch of Christmas toys poses no major new safety risks than one of the commission's members blasted the agency for not looking hard enough into the area of toy safety.

Commissioner Stuart Statler said the CPSC doesn't know about new risks because it has not been vigorously monitoring the toy industry and noted the number of toy-related accidents in 1984 is up over the previous year.

Stressing previous warnings that balloons, toy chests and certain crib toys continue to pose a serious hazard to children, Chairman Terrence Scanlon said, 'There is no number one major threat this year. I am not aware on any compelling problems at this time."

Scanlon credited the scarcity of problems to the recall of 78 hazardous children's products during fiscal year 1985, 10 more than the previous year.

But Statler said budget cutbacks have meant that the commission is not up to date on information about hazardous toys.

Scanlon, a Democrat, is "speaking the truth in terms of what he's not aware of," said Statler, a Republican whose term on the commission ends in 1986. "He would be more aware if we had more resources and more monitoring."

Meanwhile, Ann Brown, head of the consumer affairs committee of Americans for Democratic Action, said her committee had identified a number of hazardous toys and products that have gone unchecked and will name them next week.

Brown said the group will seek CPSC action on the items, currently in stores, that the group's toy experts found were dangerous during a year-long study it conducts annually.

At the kickoff of its annual toy safety campaign in the atrium of the Department of Agriculture, commission and toy industry officials said vigorous enforcement and voluntary standards helped reduce the number of toy-related injuries to 126,000 last year, down from 147,000 in 1977.

In 1983, however, there were 118,000 incidents, according to Statler. "It troubles me that somebody is trying to minimize what appears to be an increase."

The CPSC yesterday stressed the importance of selecting toys suitable for the child's age, supervising children playing with toys, storing toys out of the reach of children for whom they are not intended and keeping toys in good repair.

But its emphasis on parental awareness sparked criticism from some who said the group is leaving too much of the responsibility with parents and is not moving aggressively enough to remove unsafe toys from the market.

Brown called for more mandatory standards and criticized the CPSC for relying on recalls to assure safety. "It's mostly based on when there's a death," Brown said of the recalls, calling for "more anticipation" of problems.

Brown also challenged the voluntary warning labels in place of mandatory redesign of some products, such as balloons, that account for the most toy-related deaths among young children who choke on uninflated ones or pieces of broken balloons. "All they do is keep warning parents. Did you ever try to warn a group of kids at a birthday party?"

Amendments to the Consumer Product Safety Act four years ago limited the adoption of mandatory safety standards until voluntary standards have been tried.

CPSC's Scanlon called more mandatory standards "a foolish thing" because voluntary ones can be adopted much more quickly, assuring safety precautions sooner.

Mr. SIMON. The reality is—incidentally, the person who led the fight here, and I am quoting from the Washington Post, "Chairman Terrence Scanlon said, 'There is no number one major threat this year. I am not aware of any compelling problems at this time.' " That is the general record of the nominee.

I became interested in this question and in the nominee specifically when I was contacted by some people associated with the Commission who said, "If you are going to have a commission and if there is any purpose in having a commission, you ought to have someone who wants to protect the consuming public." Clearly this nominee is not interested in protecting the consuming public. He has demonstrated that over and over and over again. So I urge my colleagues to take a good close look.

I am aware of the phone calls that are being made to the Members of this body in behalf of this nominee. Frankly, the very fact that these phone calls are being made ought to raise some questions in the minds of some people as to why everyone is so interested in having this gentleman as the Chairman of the Consumer Product Safety Commission.

Well, I think I have an idea, and it is not because he is out there fighting for the consumers. I had a phone call on another matter just a couple of days ago from Ralph Nader, and while I was on the phone I asked him what did he think about this particular nominee. What he had to say was a long way from laudatory of this nominee. He suggested that nominee has no business being Chairman of the Consumer Product Safety Commission.

The fundamental question is, Mr. President and my colleagues, Do we want the Consumer Product Safety Commission just to be some icing out there so we look like we are doing something or do we want a Consumer Product Safety Commission that really protects the public? My vote—incidentally, I am going to ask for a rollcall, Mr. President. I ask for the yeas and nays on this nomination.

The PRESIDING OFFICER (Mr. GORTON). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SIMON. The question for this body is, Do we want a vigorous Consumer Product Safety Commission?

My answer is yes. I am going to express that answer by voting "no" on the nomination of Mr. Scanlon, as did a substantial minority in the committee that approved him, including two on the other side who voted against him. If he were up for Ambassador to Luxemburg or something else, I might very well be for him. But in this kind of a position, the public ought to be protected. The public is not being protected by this nominee, who consistently is on the wrong side of things. I urge my colleagues to vote against this nomination.

Mr. PROXMIRE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent to lay aside temporarily the nomination of Mr. Scanlon.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENT OF ENERGY

Mr. DOLE. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be discharged from the further consideration of the nomination of Mary Walker. I ask unanimous consent for its immediate consideration.

Mr. BYRD. Mr. President, there is not only no objection to this request; I support it.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the nomination.

The assistant legislative clerk read the nomination of Mary L. Walker, of Maryland, to be Assistant Secretary of Energy (Environment, Safety and Health).

Mr. MATTINGLY. Mr. President, reserving the right to object, I would like to ask a question.

I have no objection to this nomination, but I wonder if there will be any further consideration given to the nomination for the GPO. I wonder if that has had any clearance yet at this time.

Mr. DOLE. I am not sure, Mr. President. I understand the Senator from Georgia has discussed it with the Senator from Ohio. Does he feel there might be some light at the end of the tunnel?

Mr. MATTINGLY. I hope so. I wonder if the Democratic leader may have any further information yet.

Mr. BYRD. Mr. President, what is the request?

Mr. MATTINGLY. Mr. President, I ask the Democratic leader if he has heard any more with reference to the GPO nominee, if there is any further objection to bringing his nomination up tonight?

Mr. BYRD. Mr. President, I shall have to say that that has not been cleared, so far as I know, on this side.

Mr. DOLE. There is still hope. We have not gone out yet.

Mr. MATTINGLY. Does the leader feel he might be able to make some contact toward that light at the end of the tunnel the majority leader was talking about with regard to Senator METZENBAUM'S agreement to consider this nomination?

Mr. BYRD. We will go through the normal processes and I shall be in a better position to discuss this with the Senator at that point.

Mr. MATTINGLY. I thank the Senator.

NOMINATION OF MARY L. WALKER

Mr. McCLURE. Mr. President, on December 12, 1985, the Committee on Energy and Natural Resources held a hearing to consider the nomination of Mary L. Walker to be Assistant Secretary for Environment, Safety and Health at the Department of Energy. She has fully complied with the committee's rules requiring submittal of a financial disclosure report and a detailed information statement. I am prepared to recommend Ms. Walker's confirmation.

On September 18, 1985, Secretary Herrington announced a series of initiatives designed to strengthen the environmental protection, safety and health programs of the Department of Energy. One of his actions was to create this new position at the Department. The Assistant Secretary's overall responsibility will be the management of the Department's environmental and safety programs. This will involve compliance reviews with respect to existing standards and requirements, an appraisal of all DOE nuclear facilities to identify health and safety risks, a baseline survey of all DOE facilities to identify environmental problems, and the development of new departmental policies and standards. The Assistant Secretary will also provide technical assistance to the Department's field operations in such areas as new project review and liaison with states and Federal agencies.

Ms. Walker has served as a consultant in the area of environmental and safety matters to Secretary Herrington since June 1985. Prior to that, she was the Deputy Solicitor for the Department of the Interior. In 1982, she joined the Reagan Administration as Deputy Assistant Attorney General in the Land and Natural Resources Division of the Justice Department.

During her confirmation hearing, Ms. Walker stated her view of her role in this newly created position:

While ensuring that the Department's operations are safe and environmentally sound is the responsibility of every employee, the advice, technical assistance and oversight functions that the Assistant Secretary for Environment, Safety and Health will have are critical to ensuring a uniform Department-wide approach to environmental and safety requirements and a consistency in compliance.

She also expressed her philosophy about the use of our natural resources and the protection of the environment:

I believe in the wise use of our resources. We should strive to achieve economic development of our energy resources, while at the same time, being careful to minimize any impact on our natural environment. Development of our resources and protection of our environment are not, in my view, inconsistent. In order to be good managers, using the resources we have most effectively, we must know the scope of our existing and potential environmental and safety problems and the priorities among them. We can then be in a position to correct what is wrong in the proper order, giving our first attention to the most critical problems. Through careful and consistent audits and appraisals, we can also take steps to reduce any potential risks.

Mr. President, on behalf of the Committee on Energy and Natural Resources, I recommend Senate approval of the Presidential nomination of Mary L. Walker for the position of Assistant Secretary for Environment, Safety and Health.

The PRESIDING OFFICER. Is there further debate on the nomination of Mary Walker to be an Assistant Secretary of Energy?

Without objection, the nomination is considered and confirmed.

Mr. DOLE. I move to reconsider the vote.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

MISCELLANEOUS CHANGES IN LAWS AFFECTING THE COAST GUARD

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 276, H.R. 2466, the Coast Guard bill.

The PRESIDING OFFICER. The bill will be stated.

The assistant legislative clerk read as follows:

A bill (H.R. 2466) to make miscellaneous changes in laws affecting the United States Coast Guard, and for other purposes.

The PRESIDING OFFICER. Is there objection to considering the bill? Without objection, it is so ordered.

The Senate proceeded to consider the bill.

AMENDMENT NO. 1431

(Purpose: To make an amendment in the nature of a substitute)

Mr. DOLE. Mr. President, I send an amendment to the desk in behalf of Senator DANFORTH in the nature of a substitute.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas [Mr. DOLE] for Mr. DANFORTH, proposes an amendment numbered 1431.

Strike all after the enacting clause and insert in lieu thereof the following:

That subtitle II of title 46, United States Code, is amended as follows:

(1) In section 2101(14)(C), strike "Material" and substitute "Materials".

(2) Section 2101(21) is amended as follows:

(A) In subclause (A)(ii), strike "crewmember." and substitute "crewmember or other individual engaged in the business of the vessel who has not contributed consideration for carriage on board the vessel.".

(B) Strike subclause (B)(v)-(vii) and substitute the following:

"(v) a guest on board a vessel being operated only for pleasure who has not contributed consideration for carriage on board; or

"(vi) an individual on board a towing vessel of a least 50 gross tons who has not contributed consideration for carriage on board.".

(C) At the end, add the following new subclause:

"(F) on a sailing school vessel, means an individual carried on the vessel except—

"(i) the owner or representatives of the owner;

"(ii) the master or a crewmember engaged in the business of the vessel who has not contributed consideration for carriage and who is paid for services;

"(iii) an employee of the owner of the vessel engaged in the business of the owner, except when the vessel is operating under a demise charter;

"(iv) an employee of the demise charterer of the vessel engaged in the business of the demise charterer;

"(v) a guest on board the vessel who has not contributed consideration for carriage on board; or

"(vi) a sailing school instructor or sailing school student.".

(D) Strike "or a sailing school vessel," in clause (B).

(3) In section 3302(i)(5), strike "charter" and substitute "charterer".

(4) At the end of section 3302, add the following new subsection:

"(k) Only the boiler, engine, and other operating machinery of a steam vessel that is a recreational vessel of not more than 65 feet overall in length are subject to inspection under section 3301(9) of this title.".

(5)(A) Section 3304 is amended as follows:

(i) In the section catchline, strike "Carrying" and substitute "Transporting".

(ii) In subsection (a), strike "carrying cargo that carries" and "vessel." and substitute "transporting cargo that transports" and "vessel if the vessel is otherwise subject to inspection under this chapter.", respectively.

(iii) In subsection (b), strike "Before an individual in addition to the crew is carried" and substitute "Except when subsection (e) of this section applies, before an individual in addition to the crew is transported".

(iv) In subsection (c), strike "The privilege" and substitute "A privilege".

(v) Add at the end the following new subsection:

"(e) The Secretary may by regulation allow individuals in addition to the crew to be transported in an emergency or under section 2304 of this title.".

(B) In item 3304 in the analysis of chapter 33, strike "Carrying" and substitute "Transporting".

(6) In section 3318(f), before clause (1), strike "then" wherever it appears and substitute "than".

(7)(A) Section 3503 is amended as follows:

(i) Insert "(a)" at the beginning of the section.

(ii) Strike the last sentence and substitute "Before November 1, 1993, this section does not apply to a vessel in operation before January 1, 1968, and operating only on the inland rivers.".

(iii) Add at the end the following:

"(b)(1) When a vessel is exempted from the fire-retardant standards of this section—

"(A) the owner or managing operator of the vessel shall notify prospective passengers that the vessel does not comply with applicable fire safety standards due primarily to the wooden construction of passenger berthing areas;

"(B) the owner or managing operator of the vessel may not disclaim liability to a passenger for death, injury, or any other loss caused by fire due to the negligence of the owner or managing operator; and

"(C) the penalties provided in section 3504(c) of this title apply to a violation of this subsection.

"(2) The Secretary shall prescribe regulations under this subsection on the manner in which prospective passengers are to be notified.".

(B) Until the regulations required by clause (7) of this section become effective, the owner or managing operator shall notify prospective passengers in all promotional literature and on each ticket that the vessel does not comply with those standards due primarily to the wooden construction of passenger berthing areas.

(8) In section 3714(a)(4), strike "charter" and substitute "charterer".

(9) Section 4308 is amended by striking "operator" wherever it appears and substituting "individual in charge".

(10) In section 7111, strike "Part" and substitute "part".

(11) In section 7312(e), strike "able seaman-limited" and substitute "able seamen-limited".

(12) Section 8104(k) is amended by striking "watchers" and substituting "watches".

(13) In section 8502(a)(4)(A), strike "Part" and substitute "part".

(14) Chapter 89 is amended as follows:

(A) In item 8903 in the chapter analysis, strike "Uninspected" and substitute "Self-propelled, uninspected".

(B) In the catchline of section 8903, strike "Uninspected" and substitute "Self-propelled, uninspected".

(C) In the text of section 8903, strike "An" and substitute "A self-propelled,".

(15) In section 10709(a)(1), before clause (A)—

(A) strike "then $1,500 in value, and" and substitute "than $1,500 in value, the court,"; and

(B) strike "wages, the court" and substitute "wages,".

(16) Section 12122(a) is amended by adding at the end the following sentence: "Each day of a continuing violation is a separate violation.".

(17) In section 13102(a)(4), strike "coordinate carrying the State" and substitute "coordinate carrying out the State".

(18) Section 13104(b) is amended by inserting after "Secretary" the words "for State recreational boating safety programs".

(19) Chapter 111 is amended as follows:

(A) At the end of the chapter analysis, add the following new item:

"11112. Master's lien for wages.".

(B) At the end of the chapter, add the following new section;

"S11112. Master's lien for wages

"The master of a documented vessel has the same lien against the vessel for the master's wages and the same priority as any other seaman serving on the vessel.".

SEC. 2. (a) The Coast Guard may enter into a lease in excess of one fiscal year to acquire a site on the State pier in New Bedford, Massachusetts, for construction of maintenance assistance team and vessel support facilities on that pier.

(b) Any lease under this section is effective only to the extent that amounts are provided for in appropriations laws.

(c) Notwithstanding section 322 of the Act of June 30, 1932 (40 U.S.C. 278a), and beginning in fiscal year 1986, the Coast Guard may spend appropriated amounts for the construction of fixed facilities and improvements on that portion of the State pier leased from Massachusetts for the use of a maintenance assistance team and Coast Guard vessels.

SEC. 3. Notwithstanding any other law, the Coast Guard Yard, Curtis Bay, Maryland, and the Coast Guard Aircraft Repair and Supply Center, Elizabeth City, North Carolina, are exempt from statutory and administrative personnel ceilings through September 30, 1988.

SEC. 3. The body of water know as Lawyer's Ditch located at block 5000 in the city of Newark, County of Essex, New Jersey, is declared to be a nonnavigable waterway of the United States within the meaning of the General Bridge Act of 1946 (33 U.S.C. 525 et seq.).

SEC. 5. Notwithstanding the last sentence of section 81 of title 14 of the United States Code, the Coast Guard may not, except for the installation of fixed aids to navigation, carry out by contract the determination of the location, or the placement, of aids to maritime navigation in the Intracoastal Waterway in New Jersey.

SEC. 6. The Coast Guard may enter into any agreement or letter of intent with a municipal utility within the Seventeenth Coast Guard District to provide electricity to a Coast Guard facility without complying with the provisions of section 14 of Public Law 98-557.

SEC. 7. (a) There is established a National Offshore Vessel Operators Safety Advisory Committee (hereinafter in this section referred to as the "Committee"). The Committee shall advise, consult with, and make

recommendations to the Secretary of the department in which the Coast Guard is operating (hearinafter in this section referred to as the "Secretary") on matters relating to the safety aspects of offshore oil, gas, and other mineral operations subject to regulation by the Secretary. The Secretary shall, whenever practicable, consult the Committee concerning proposed or desirable actions affecting the safety of such offshore operations. Any advice or recommendation made by the Committee to the Secretary shall reflect the independent judgment of the Committee on the matter concerned. The Committee is authorized to make available to Congress any information, advice, and recommendations which the Committee is authorized to give to the Secretary. The Committee shall meet at the call of the Secretary, but in any event not less than once during each calendar year. All proceedings of the Committee shall comply with the Federal Advisory Committee Act (5 U.S.C. App. 1 et seq.).

(b)(1) The Committee shall consist of fifteen members, who have particular expertise, knowledge, and experience regarding the transportation and other technology, equipment, and techniques that are used, or are being developed for use, in the exploration for, or the recovery of, offshore oil, gas, or other mineral resources, as follows:

(A) Two members representing enterprises engaged in the production of oil, gas, or other mineral resources, except that not more than one member may represent companies included on the list of restricted joint bidders prepared by the Department of the Interior;

(B) Two members representing enterprises specializing in offshore drilling;

(C) Two members representing enterprises specializing in the supply of offshore oil, gas, or other mineral exploration or recovery operations by water;

(D) Three members representing general support services for offshore oil and gas activities, including construction, diving, geophysical, and helicopter services;

(E) Two members representing individuals employed in offshore operations;

(F) Two members representing environmental interests; and

(G) Two members representing the general public.

(2) The Secretary shall appoint the members of the Committee after first soliciting nominations by notice published in the Federal Register. The Secretary may request the head of any other Federal agency or department to designate a representative to advise the Committee on matters within the jurisdiction of that agency or department.

(3) The Committee shall elect, by majority vote at its first meeting, one of the members of the Committee as the Chairman and one of the members as the Vice Chairman. The Vice Chairman shall act as Chairman in the absence or incapacity of, or in the event of a vacancy in, the Office of the Chairman.

(4) Terms of members appointed to the Committee shall be for three years, except that the terms of those members first appointed under subsection (c)(1) (A), (B), and (C) shall be for two years. The Secretary shall, not less often than once a year, publish notice in the Federal Register for solicitation of nominations for membership on the Committee.

(c)(1) Members of the Committee who are not officers or employees of the United States shall serve without pay and members of the Committee who are officers or employees of the United States shall receive no additional pay on account of their service on the Committee. While away from their homes or regular places of business, members of the Committee may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code. The Secretary shall furnish to the Committee an executive secretary and such secretarial, clerical, and other services as are considered necessary for the conduct of its business. There are authorized to be appropriated such sums as may be necessary to implement the provisions of this section.

(2) Unless extended by subsequent Act of Congress, the Committee shall terminate five years from the date of enactment of this section.

SEC. 8. Bayou Lafourche, in the State of Louisiana, between Canal Boulevard, city of Thibodaux, Parish of Lafourche and the Southern Pacific Railroad bridge crossing the bayou, city of Thibodaux, Parish of Lafourche, is hereby declared to be a nonnavigable waterway of the United States within the meaning of the General Bridge Act of 1946 (33 U.S.C. 525 et seq.)

SEC. 9. Notwithstanding sections 12105, 12106, 12107 and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 U.S.C. App. 883), as applicable on the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for the following vessels: MARILYN, Maryland registration number MD 3533 AA; ROYAL STAR, Michigan registration number MC 9707 J; ALASKAN SHORES, United States official number 603879; SHEARWATER, United States official number 260827; GYPSY ROSE, California registration number CF 4291 HF; ELIMINATOR, United States official number 507572; PUKA KAI, United States official number 677462; LOBSTER HOUSE, Panama registration number 494-PEXT; JANE E, Bahamian official number 315924; and DIANE M., Bahamian official number 315925, except that such vessels JANE E and DIANE M. may be operated under such documentation only in the waters of the Atlantic Ocean and the Gulf of Mexico.

SEC. 10. Any use or expenditure of funds by the Coast Guard related to the alternation of the Burlington-Nothern Railroad Bridge at mile 6.9 on the Willamette River in Portland, Oregon shall be subject to the first six sections of the Act March 3, 1931 (40 U.S.C. 276a through 276a-5).

SEC. 11. Section 2(a) of the Act entitled "An Act to facilitate increased enforcement by the Coast Guard of laws relating to the importation of controlled substances, and for other purposes," approved September 15, 1980 (21 U.S.C. 955b(a)), is amended by inserting immediately before the period the following: ", except that an event otherwise qualifying as an arrangement under such section does not lose that qualification by the fact that consent to, or the terms of, such arrangement are communicated by radio, telephone, or other similar means, or by how specific such arrangement is as to the vessel to which such arrangement applies".

SEC. 12. The Coast Guard may enter into a cost-sharing arrangement with the City of Cape May, New Jersey under which the City of Cape May will provide necessary roadway improvement on and along Pennsylvania Avenue between Pittsburg and Buffalo Avenues, as abutted by housing owned by the Coast Guard. For purposes of entering into such an arrangement, the Coast Guard may expend from previously-appropriated funds an amount not to exceed $200,000 on a nonrecurring basis.

SEC. 13. Section 2103 of title 46, United States Code, is amended by striking all after "subtitle" the third time it appears and substituting". The Secretary may prescribe regulations to carry out the provisions of this subtitle.".

SEC. 14. Section 4370(a) of the Revised Statutes of the United States (46 U.S.C. App. 316(a)) is amended—

(1) by striking all from "a certificate of registry," through "the Act of June 7, 1918, as amended (U.S.C. 1934 edition, Supp. IV, title 46, sec. 288)," and substituting "a certificate of documentation issued under sections 12106 or 12107 of title 46, United States Code,"; and

(2) by striking "a vessel of foreign registry, or a vessel in distress," and substituting "a vessel in distress".

SEC. 15. Section 3 of the Shipping Act of 1984 (46 U.S.C. App. 1702) is amended—

(1) in paragraph 6, (A) by striking the period at the end of subparagraph (B) and substituting a comma, and (B) by adding at the end thereof the following: "except that the term does not include a common carrier engaged in ocean transportation by ferry boat, ocean tramp, or chemical parcel-tanker. As used in this paragraph, 'chemical parcel-tanker' means a vessel whose cargo-carrying capability consists of individual cargo tanks for bulk chemicals that are a permanent part of the vessel, that have segregation capability with piping systems to permit simultaneous carriage of several bulk chemical cargoes with minimum risk of cross-contamination, and that has a valid certificate of fitness under the International Maritime Organization Code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk."; and

(2) in paragraph (18), by striking all from the semi-colon and substituting a period.

SEC. 16. (a) As used in this section, the term—

(1) "commercial fishing industry vessel" means a fishing vessel, fish processing vessel, or fish tender vessel, as those terms are defined in section 2101 of title 46, United States Code;

(2) "Committee" means the Commercial Fishing Industry Vessel Safety Advisory Committee established in subsection (b) of this section; and

(3) "Secretary" means the Secretary of the department in which the Coast Guard is operating.

(b) There is established a Commercial Fishing Industry Vessel Safety Advisory Committee as an advisory committee of the United States Government reporting to the Secretary.

(c)(1) The Committee shall advise, consult with, and make recommendations to the Secretary on matters relating to commercial fishing industry vessels, including—

(A) navigation safety;

(B) safety equipment and procedures;

(C) marine insurance;

(D) vessel design, construction, maintenance, and operation; and

(E) personnel qualifications and training.

(2) The Secretary, and the Secretary of Commerce, shall use the information, advice, and recommendations of the Committee in consulting with other agencies and the public or in formulating policy regarding commercial fishing industry vessels.

(3) The Committee shall meet at the call of the Secretary, but not less often than once during each calendar year.

(4) Any advice or recommendation made by the Committee shall reflect the independent judgment of the Committee on the matter concerned.

(5) The Committee may make available to Congress any information, advice, and recommendations which the Committee is authorized to give to the Secretary.

(d)(1) The Committee shall consist of seventeen members with particular expertise, knowledge, and experience regarding the commercial fishing industry, as follows:

(A) ten members from the commercial fishing industry who reflect a regional and representational balance, and have experience in the operation of commercial fishing industry vessels, or have experience as a crew member or processing line worker on a commercial fishing industry vessel;

(B) two members from each of the following:

(i) underwriters engaged in insuring commercial fishing industry vessels; and

(ii) the general public, including whenever possible, a member of a national organization composed of commercial fishing industry vessel and marine insurance interests; and

(C) one member from each of the following—

(i) naval architects or marine surveyors;

(ii) manufacturers of fishing industry vessel equipment; and

(iii) education or training professionals related to commercial fishing industry vessel safety or personnel qualifications.

(2) At least once each year, the Secretary shall publish a notice in the Federal Register and in newspapers of general circulation in coastal areas soliciting nominations for membership on the Committee. After timely notice is published, the Secretary shall appoint the members of the Committee. A member may be reappointed to any number of terms.

(3) The term of a member is three years, except that—

(A) initially, one-third of the members shall serve a term of one year and one-third of the members shall serve a term of two years, to be determined by lot at the first meeting of the Committee;

(B) initially, terms may be adjusted to coincide with the Government's fiscal year; and

(C) if a vacancy occurs, the Secretary shall appoint a member to fill the remainder of the vacated term.

(4) The Committee shall elect one of its members as the Chairman and one of its members as the Vice Chairman. The Vice Chairman shall act as Chairman in the absence or incapacity of, or in the event of a vacancy in the office of, the Chairman.

(5) The Secretary and the Secretary of Commerce shall, and any other interested agency may, designate a representative to participate as an observer with the Committee. These representatives shall, as appropriate, report to and advise the Committee on matters relating to commercial fishing industry vessels under the jurisdiction of their respective departments. The Secretary's designated representative shall act as executive secretary for the Committee and perform the duties specified in section 10(c) of the Federal Advisory Committee Act (5 U.S.C. App. 10(c)).

(e)(1) The Secretary shall, whenever practicable, except regarding issues which could compromise national security, consult with the Committee concerning the following actions affecting commercial fishing industry vessels—

(A) proposing legislation;

(B) proposing or publishing a regulation;

(C) authorizing or conducting research or a study; or

(D) taking any other major action of the United States Government relating to the Committee's purpose and duties as set forth in subsection (c)(1) of this section.

(2) Consultation with the Committee shall be deemed to satisfy all requirements of title 46, United States Code, for consulting with representatives of the private sector having experience in the operation of commercial fishing industry vessels.

(f)(1) Except as otherwise provided in paragraph (3) of this subsection, a member of the Committee, when attending meetings of the Committee or when otherwise engaged in the business of the Committee, shall serve without pay. While away from their homes or regular places of business, members of the Committee may be allowed travel or transportation expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code.

(2) Any payment made under this subsection shall not render a member of the Committee, a member of the uniformed services (as defined in section 101(3) of title 37, United States Code), or an officer or employee of the United States for any purpose.
